All decisions in our society ideally would be democratically made by those persons affected by their outcome, with due consideration to environmental, social and economic questions, and with an emphasis on decentralization. Our society thus would be providing its citizens with control over their own lives. We would be a free and equal people, and the goal of our Government would be the common good. Unfortunately, our system has evolved so that the outcome of most important decisions, made in both the public and private sector, benefit a relatively few persons. Their goal is not the common good but rather private gain (money, perks, prestige, and power over other people's lives). Government intervention was historically limited to protecting personal convictions and private property rights. Economic, social, and political decisionmaking has been slowly transferred from local governments and the private sector to the Federal Government as crises, most notably the Great Depression, and various wars have occurred. Those persons benefiting from the decisions are not mush different, though, as the decisionmakers have changed. Advertising, campaign financing, lobbying, and the general structure in which questions are asked limit most Government actions. The crises continue to occur, because we in Government do not usually attempt to solve the fundamental flaws of our systems, but merely devise further programs to keep our society hobbling along to the next crisis. These programs benefit a wealthy few, but are paid out of general tax funds. Proposition 13 shows that the people are not satisfied with what they receive from their Government. I believe, though, that the people are just as dissatisfied with the private sector. The message of Proposition 13 is that we should stop reforms that merely increase the power and size of Government and business. Our Government should end programs that provide for the private gain of a wealthy few and adopt the goals of the common good I first described.

Unfortunately, Propostion 13 is being used by many as an excuse for indiscriminate cuts in Government spending and attacks on social welfare programs. This could lead to the return of cowboy capitalism and social Darwinism, where the goals and welfare of the poor and middle classes are sacrificed almost completely for the private gain of a wealthy few without consideration of social and environmental consequences. Therefore, we should try to understand the fallacies of the arguments that lead to this end before we attempt to use Proposition 13 as a catalyst for social change. An article from the August 18 edition of the Los Angeles Times, by Blase Bonpane of Cal State Northridge, I think best explains these fallacies. I thus would like to insert here this article, entitled "It's Time to Chop Up Those Myths About the Distribution of Wealth":

PROPOSITION 13

The ideas of every age, according to Karl Marx, were the ideas that belonged to the ruling class. On that axiom he would base his explanation of why middle and lower-class people generally mimic the ideas of society's wealthiest members.

Even today the wealthy have the means and the media to define reality for the rest of us. They do it by perpetuating myths in the thinking patterns of both the ruling and the ruled—myths that, in the wake of the Jarvis-Gann "tax revolt," it is important to examine.

The possibility of establishing a real economic democracy—a truly equitable distribution of goods and services—depends on our ability to expose these myths for the fallacies that they are. Of the seven myths that I am listing here, five are already firmly established in the public mind. The last two have recently been promoted by some of our more frightened and opportunistic politicians.

Myth No. 1: We are middle-class.

So many people claim to be middle-class that it is hard to find anyone who admits to being anything else. However, if the father and mother of a family of four must both work, and if even with their combined salaries they sink deeper in debt each month, they are not middle-class—they are poor. The majority of Americans neglect regular medical and dental care; if this happens, as in many cases, in spite of rigorous budgeting, we are describing poverty. The vast ma-

jority of Americans still have not flown in an airplane or stayed in a hotel.

The people who owe more than they own are rarely suffering from bad management of their family finances. The money that is rationed out after taxes to hard-working Americans is simply not enough to justify referring to most of them as middle-class.

Myth No. 2: Those who have it earned it.

We do not actually live in a meritocracy. Most individuals in the highest ranks of wealth and position entered them at birth, usually on the strength of their parents' or grandparents' labor.

By contrast, no one puts in more demanding physical labor than do farm workers—and no one gets paid less. Even white-collar crime pays better. Offenses against society like tax evasion, embezzlement, price-fixing and consumer fraud are each far, far more lucrative than ordinary street crime. To cite just one example, Ramsey Clark notes in his book, "Crime in America," that "reported bank embezzlements cost 10 times more than bank robberies each year."

The same principle applies to education. The majority of students in college this year are there through parental support. Privilege is stacked on privilege: Once they have a college education, these students will be in a position to earn more than those without one. Farm workers may labor more hours, with equal dedication to their tasks, but their reward will never be as great.

Myth No. 3: "They" don't want to work.

Substandard jobs are filled with blacks and other minorities usually lumped together as "they." Such positions are not unionized (fewer than 25 percent of U.S. workers belong to a union), and they offer no health or pension benefits, and very little income. "They" also stand in line by the hundreds for any decent job opening—one that pays more than the minimum wage plus benefits.

The head of a family cannot realistically afford to accept a job that pays only the minimum wage; in doing so, he would draw approximately the same income as he does on welfare, while surrendering the secondary assistance of food stamps and the option of Medi-Cal in time of crisis.

Myth No. 4: All "they" want is welfare.

Over 90 percent of the people on welfare simply cannot work. They are children, aged, sick or mothers with dependent children whose day-care costs would eat up any income in excess of the amount supplied by welfare.

It is essential to remember that the poor did not design the welfare system. Liberals, including a number of rich ones, established it as a poverty-maintenance program. Welfare is not supposed to lead the poor out of poverty. Fundamentally, it is a domestic pacification program, not a means toward rehabilitation.

Myth No. 5: The middle class supports the poor.

The poor are not supported by anyone; that is why they are poor. In fact, both the poor and the middle class support the rich, by condoning a system that is impossibly weighted in favor of the rich. A person possessed of $100,000 who invests it conservatively can reap an average of $8,000 or better per year for doing nothing at all, while a hard-working husband and wife who rent their home and are struggling to pay bills can find themselves charged 25 percent or more to borrow $1,000 for that same year. And the larger the loan, the lower the interest rate.

For most people, the American Dream will remain just that. It is the exception, not the rule, for the poor and middle classes to move up. Generally they just move over, or down.

Indeed, through all the political and economic fluctuations of the 20th century, the distribution of wealth in this country has shown no fundamental change—this according to Douglas Dowd in his 1974 essay, "The Twisted Dream." Dowd notes that, back in 1910, the top fifth of the population on the economic scale received 46 percent of the national income, while the bottom fifth wound up with slightly more than 8 percent. Only five years ago the top fifth was still getting more than 40 percent, while the bottom fifth was scraping along with a little more than 5 percent.

Myth No. 6: We are going to cut the fat.

Payments to senior citizens do not constitute fat in anyone's budget. Reducing or eliminating those expenditures is a curtailment of essential services. So is the termination of summer school.

Budgetary fat does include inflated salaries and excessive privileges enjoyed by many elected officials. Do such luxuries as limousines, chauffeurs and tax allowances not available to the rest of us add measurably to the efficient performance of an officeholder? I think not. And my heart stops bleeding when I see salaries begin to rise much above $30,000 a year.

In condoning such inequities, Gov. Brown and the Legislature are making whipping-boys of precisely the members of society who are least able to defend themselves. Instead, in my view, California officials should stand up to the economic powers-that-be by instituting an impartial progressive state income tax that would be hardest on those who could most easily afford it.

The surplus already accumulated from state taxes could have been spent on services for the people of California who paid those taxes in the first place. Why is it now being trundled out as the reason that Proposition 13 cuts will not hurt so much?

Unfortunately, the reduction in statewide property-tax revenues will hand back about $2 billion in extra income taxes to the federal government, and an additional amount that may well run into billions to national and international corporations for their use outside California. Can this state so easily afford to lose that much money as "fat"?

Myth No. 7: The people have spoken.

The only statement that the people made in their vote for Proposition 13 was that they did not want their property taxed in the way it was being taxed. They did not, however, insist on forestalling a progressive state income-tax program; they did not even ask for a constitutional amendment to limit state spending (although they may have an opportunity to vote on such an amendment this November). The people did not ask to have schools closed for the summer, library hours cut or fees imposed for garbage collection. On the contrary, they believed that it was possible to have better education and better services available to all with lower property taxes on private homes.

It is time for the governor of California to ask himself whether he wants to maintain these myths or to serve the common good. Come on, Jerry—*noblesse oblige*.●

## KEEPING AN EYE ON AIRBUS, CONTINUED

### HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. HANNAFORD. Mr. Speaker, it has come to my attention that it is not only the House of Representatives and the Department of the Treasury that are particularly interested in French Government activities on behalf of Airbus Industrie in its sales efforts in the Republic of China. Our colleagues in the Senate are also watching. I insert a copy of a letter from four of our distinguished Senators to Secretary of the Treasury Blumenthal on this matter:

AUGUST 11, 1978.

Hon. W. MICHAEL BLUMENTHAL,
*Secretary of the Treasury, Department of the Treasury, Washington, D.C.*

DEAR MR. SECRETARY: We have received reports that the French have offered China Airlines landing rights in Paris in exchange for the purchase of the Airbus A-300. Landing rights tied to an aircraft sale would violate the OECD understanding with respect to the sale of aircraft.

We urge you to investigate the allegation and take appropriate action. Aircraft sales should be based on fair competition in conformity with the international rules previously agreed upon by the principal exporting countries.

We look forward to receiving the results of your investigation.

With best wishes,

Sincerely,

WILLIAM PROXMIRE,
*Chairman, Committee on Banking, Housing and Urban Affairs.*
EDWARD W. BROOKE,
*Ranking Minority Member.*
ADLAI E. STEVENSON,
*Chairman, Subcommittee on International Finance of the Committee on Banking, Housing, and Urban Affairs.*
H. JOHN HEINZ,
*Ranking Minority Member.*●

## NATURAL GAS COMPROMISE SEMINAR SEPTEMBER 12

### HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. DINGELL. Mr. Speaker, if the Senate approves the conference report on the natural gas portion of the energy bill, the House will be casting the final, deciding vote on this critical question. The Congressional Research Service has just announced that it will be holding an informational debate seminar on the pros and cons of the natural gas compromise next Tuesday, September 12, for all interested Members and professional staff. Because this program is being planned on short notice, notification of it may not reach all congressional offices in time. I believe that the planned program may be of significant value to those who are considering the merits of the natural gas conference report. I therefore ask that the announcement of the seminar be printed in the RECORD and encourage all interested Members and staff to attend.

THE NATURAL GAS COMPROMISE—PROS AND CONS

In response to the anticipated debate, the Congressional Research Service invites Members and staff professionals to a seminar on the Natural Gas Compromise.

Date: Tuesday, September 12, 1978

Time: 9:00 a.m. to 11:00 a.m.

Place: Coolidge Auditorium, Library of Congress

Panels will offer five-minute arguments on each of the following issues:

1. Is the natural gas compromise an enforceable piece of legislation?

2. What are the impacts of the compromise on consumers, both residential and industrial, compared to the status quo?

3. How will natural gas producers fare un-

der the compromise, compared to the status quo?

4. How will gas supply respond under the compromise as compared to the status quo?

5. What is the impact of the compromise on the dollar, the balance of payments, and the U.S. image abroad?

6. Are there any practical current alternatives to the compromise and will Congress face the issue again if the compromise fails?

Written and oral questions from the audience will be entertained after the debate.

PANELISTS

Pro

Leslie J. Goldman, Prin. Dpty. Ass't Sec'y, DOE.

George H. Lawrence, Pres., American Gas Assoc.

William Demarest, Counsel, Energy and Power Subc.

J. N. Warren, Natural Gas Producer.

Con

Jack M. Allen, Pres., Indep. Petroleum Assoc.

Danny Boogs, Senate Energy Committee.

James Flug, Exec. Dir., Energy Action Committee.

A Noted Economist.

Questions about the seminar may be directed to John Jimison, 426-5880.●

## DEFENDING THE DOLLAR: THE CRISIS OF CONFUSION

## HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. KEMP. Mr. Speaker, that the U.S. dollar is in trouble can come as no surprise. We read daily of its decline in the world's money markets—a decline against currencies in Western Europe, against the Japanese yen.

International monetary policy can be an incredibly complex subject area. But what is wrong with the U.S. dollar and what ought to be done about it is not incredibly complex. It is something which can be dealt with in only a few movements, if there is national U.S. leadership committed to it, committed both to understanding the issue and to doing something about it.

The roots of the dollar's problems go back for several administrations, but the precipitous decline has occurred in the current administration. The year 1977 marked the beginning of the dollar's sharp decline, declining in that 1 year about 20 percent against the German mark and about 30 percent against the yen. In just 90 days, the dollar lost one-fifth of its value against the Swiss franc.

This issue must be understood and a course of action charted. A major contribution to those twin objectives has been made in the Washington Review of Strategic and International Studies by Richard J. Whalen. Mr. Whalen is a political and economic writer, consultant, and president of the Worldwide Resources, Inc., of Washington. Many will remember him as the author of such best sellers as "Catch the Falling Flag," and "Taking Sides."

Mr. Whalen has detailed what has happened to the dollar during the current administration and he has offered some thoughtful solutions for correcting the situation.

This important piece follows:

DEFENDING THE DOLLAR—THE CRISIS OF CONFUSION

(By Richard J. Whalen)

I

Early last spring, on his final day on the job, ousted Federal Reserve Board Chairman Arthur F. Burns held a rare, on-the-record, direct-quotation news conference and fired a few parting salvos at the misguided policies of the Carter administration, especially its failure actively to defend the international value of the dollar. In his best Old Testament manner, the white-haired, 73-year-old conservative economist solemnly warned: "I fear that if the dollar continues to depreciate, it may bring on, before very long, serious international economic and political trouble."

Privately, Burns was known to believe that this "trouble" had already overtaken the inept administration. The floating dollar was sinking beneath unprecedented trade and current account deficits, swollen by an accelerating domestic inflation. Nevertheless, Burns cast his public counsel in a somewhat more hopeful vein because, as he told a questioner, "the thinking of the government is evolving," and he evidently hoped it might yet be moved toward his position.

Repeating advice unheeded earlier in administration councils, Burns urged mobilization of the nation's official financial resources, including the expressed willingness to sell the entire $50 billion gold hoard if necessary to bolster confidence in the dollar. ("What the hell are reserves for?" he thundered.) He also proposed large-scale Treasury borrowing abroad through the issuance of new bonds to be denominated in foreign currencies, a scheme flatly rejected by Treasury Secretary W. Michael Blumenthal. These fairly dramatic short-term measures would buy time to pursue "fundamental correction" of the dollar's major problems, said Burns. Permanent solutions would be found along several "routes," he declared, pointing to such remedies as a "significant" energy-conservation policy, a "credible" antiinflation policy, a tax policy encouraging capital formation and business investment, and more rapid economic growth among leading U.S. trading partners.

The farewell news conference of the retiring Federal Reserve Board chairman, though skillful as ever, caused scarcely a day's ripple in the Washington media pond. So Arthur Burns was sounding off again on the dollar—and what else was new? Yet it was noteworthy nonetheless that Burns had chosen these international concerns for his closing lines. If one listened closely, one could detect in his words a disturbing echo of similar urgent warnings sounded in the spheres of international politics, strategy, and military affairs—warnings against the tendency of post-Vietnam America indiscriminately to slough off foreign burdens, obligations, and commitments. Our political leaders were seeking to redefine the nation's position in the world according to popular desires rather than as hard necessities dictated. In publicly admonishing the administration, Burns was trying to awaken proper concern for the dubious message sent overseas by the dollar's plunge amid official indifference.

Burns's departure removed from power one of the last representatives of the post-World War II leadership generation in the United States. He had first entered government service as a part-time adviser to the Treasury in the late 1930s, and like many other distinguished academics and men of business and finance, he had shuttled between New York and Washington during the decades after the Second World War to help steer the country on the course of international cooperation appropriate to its unique influence in world affairs. Burns and his contemporaries acted on assumptions that looked beyond crisis, and these anchoring beliefs gave long-term continuity to U.S. policy. They naturally inclined to the view that America's leadership combined moral and practical imperatives, and that the marketplace advantages of economic primacy were balanced by acceptance of responsibilities to others even at the cost of pain and sacrifice. One of these was the duty to uphold the dollar's integrity.

Like so much else that belonged to the post-World War II perspective and policy consensus, this view of America's role was a casualty of the strange war in Vietnam, which President Lyndon Johnson "escalated by stealth"—Eliot Janeway's telling phrase—and financed through inflation. This fiscal deception in the mid-1960s laid the groundwork for the economic upheavals of the early 1970s. At the same time, Johnson's Great Society social welfare programs, with their fantastic built-in spending increases, tilted the fiscal balance decisively from foreign to domestic priority and, by determining the shape of future budgets, confirmed the nation's inclination to become self-absorbed.

II

The international monetary system created at Bretton Woods in 1944 rested on the dollar and depended crucially on a reasonable degree of intelligence, foresight, and self-discipline in Washington's economic policy making. (It also depended, among other things, on the willingness of Americans and foreigners to live with a relatively overvalued dollar, but that is another and more technical matter.) Because U.S. domestic monetary policy determined monetary conditions for the rest of the world, stability at the center was essential. In return for the great financial and trading advantages of possessing at the world's key currency, the United States was expected to restrain those domestic political forces pressing for inflationary expansion measures. This proved to be too much to ask of politicians. The crucial attributes of American policy assumed to be the foundation of the dollar's position began to erode in the late 1960s and then disappeared in a rush in the early 1970s as inflation soared.

The dollar devaluations that President Nixon attempted to depict as triumphs of American statecraft were in fact the financial analogue to the military retreats of an overcommitted United States. And Nixon's ill-conceived New Economic Policy, with its import surcharge and peacetime wage and price controls, reflected the inwardness of post-Vietnam America. Thus, even before the spectacularly successful price-gouging of the Organization of Petroleum Exporting Countries and the onset of the Great Recession of 1974–75, the dollar-centered international economic system was in danger of being shaken apart by the fundamental inflationary disequilibrium developing within the United States.

Here we may briefly note the ambivalence that foreigners typically display toward the United States, the ubiquitous dollar, and official U.S. economic managers. They are dependent on the special status of the dollar, yet they resent it. Because the United States is the world's most important export market (it absorbs some 15 percent of total exports), foreigners have a clear self-interest in a prosperous and expanding American economy. Yet they also insist that such expansion should be as noninflationary as possible. Because they hold so many dollars (roughly 80 percent of official foreign currency reserves overseas are held in dollars; the private Eurodollar pool consists of an estimated $400 billion), they wish to preserve these assets

against the ravages of inflation and exchange-rate deterioration—hence their ceaseless clamor for a "strong" dollar. Yet they also fear the impact on them and their markets of the kind of trade and balance of payments surpluses that a fully competitive United States might generate in pursuit of unquestioned "confidence" in the dollar.

The self-perception of foreigners, especially in Europe and Japan, is profoundly affected by their seemingly helpless dependence on the dollar. As Claude Monnier, editor-in-chief of the prestigious *Journal de Geneve*, told an American interviewer last March: "We are very, very nervous about the fall of the dollar, not because it means we will be selling fewer Mercedes automobiles in the United States, but because it is proof that we are weak. We are weak because there is nothing we can do to stop the fall. We feel completely powerless."

In practical as well as psychological terms, there is no alternative to the dollar. More than 40 percent of the world's trade is denominated in dollars. The petroleum-exporting and consuming nations need ready access to scores of billions of dollars annually to finance the international oil trade. Only the dollar offers a currency supply large enough to meet the world's enormous trading and financing demands. Yet the fanciful notion of doing global business with "baskets" of several currencies, mixed together like so many apples, persists and invariably revives when the dollar weakens.

During the Burns era, foreign central bankers usually could resolve their recurring doubts about the dollar through their personal trust in the intelligence and integrity of their American counterpart. His professorial manner, even his old-fashioned rimless spectacles and his hair parted down the middle, seemed cause for reassurance. His European heritage helped. For his part, Burns recognized that the ultimate guarantee of the dollar's value was the performance of the U.S. economy. Washington's fiscal and monetary policies would satisfy dollar-holders abroad if they appeared to be working at home; but they were visibly failing, no official words, gestures, or "intervention" gimmicks could boost American credibility and foreign confidence. Of course, in his own antiinflation rhetoric, which sometimes bore only faint resemblance to actual Fed policy, Burns made a personal exception.

III

President Carter and his administration see the world economy, America's place in it, and the role of the dollar in an entirely different way. To the extent that high administration officials have truly settled on international economic policy, these are based, not on deep-rooted convictions and assumptions such as the post-World War II generation shared, but on freshly minted abstract theories about the way the real world ought to work. The arrival of such men as Richard Cooper of Yale at the State Department and of Fred Bergsten of Brookings at the Treasury, along with their supporting casts, signalled a coming to power by the academics under Carter that was far more consequential than the celebrated (but largely illusory) reign of the intellectuals in the Kennedy years.

In an interview early in 1977, a senior Treasury official under the sway of fashionable academic theories expressed to me his delight at "the strength and stability" of the dollar under the floating-exchange rate system, and his complete confidence in the systems' ability to continue to absorb a rising U.S. current account deficit, which he then underestimated at barely one-third its eventual mammoth size for the year. This head-on clash between theory and reality, between arrogant policy and unexpected results, explains much of the new administration's difficulty overseas in its first year. The near-collapse of the dollar destroyed Carter's credibility before he could begin building it. And the "tragedy," as Burns remarked, was that the dollar's fall was unnecessary.

Treasury Secretary Blumenthal, the former chairman of the Bendix Corporation (but no insider in the corporate business establishment) was himself an international economist as well as a Kennedy-era trade negotiator. Although he prided himself on being a pragmatic operator, he fell in easily with the theorizing of Undersecretary Anthony Solomon and Assistant Secretary Bergsten. Early in his tenure, Blumenthal began expounding the theme that the mounting U.S. payments deficit was not an embarassment but an exemplary American contribution to international financial stability and the collective adjustment to OPEC's steep levy on oil consumers. The United States thus was enabling other nations to earn or borrow the dollars to pay their oil import bills.

If he had stopped about there in his public remarks, Blumenthal would have been more right than wrong. In the unprecedented financial circumstances created by OPEC, a substantial U.S. payments deficit was appropriate and indefinitely sustainable, at least as long as the cartel ran a collective surplus with the rest of the world. After all, the OPEC nations with payments surpluses recycled their dollars through the American private banking system and bought many billions of dollars annually of Treasury bonds, thus painlessly financing a large fraction of the chronic U.S. budget deficit. (In 1977, as Blumenthal seemed to overlook, fully one-third of the Treasury's cash needs were borrowed overseas.)

With a cynical shrug, foreigners could have swallowed Blumenthal's claims of altruism when in fact the special status of the dollar made it easy for the U.S. to pay its oil bills. As a former senior Treasury official had once observed to me: "The U.S. can print dollars as fast as OPEC can pump oil." Foreigners might even have suppressed their suspicion that the U.S. was deliberately allowing its payments deficit to soar (an attitude soon dubbed "malign neglect") and thereby tacitly devaluing the dollar once again in order to gain a competitive edge for U.S. exports. As foreigners saw it, that official expediency postponed the evil day of reckoning when Americans would be forced to cease paying artificially low, government subsidized prices for imported energy.

But Blumenthal did not stop at any of these points. Noting the sharp swing in the U.S. payments position from an $11 billion surplus in 1975 to a larger and still growing deficit in 1977, the secretary presumed to advise our allies on how to run their economies. He insisted that the other major trading nations, especially Japan and West Germany, should quickly reduce their surpluses, stimulate their sluggish domestic economies to absorb more imports, and allow the value of their currencies to rise against the dollar. Even at this point, after semipublic hectoring of Bonn and Tokyo, Blumenthal could have halted without too much damage to his own or the dollar's credibility. Instead, presenting a spectacle that shocked and dismayed foreigners, he rushed headlong to throw his weight against the dollar in foreign-exchange markets.

In late June 1977, at a Paris meeting of Western finance ministers, Blumenthal bluntly declared: "We need significant shifts—into deficit—in the [balance of payments] positions of such surplus countries as Japan, Germany, Switzerland, and the Netherlands." He insisted on language in the conference communique indicating the deutschemark and the yen should be allowed to float upward. Until the American secretary of the treasury launched his "open mouth" devaluation effort, the dollar had been strong despite the mounting U.S. payments deficit. Capital inflows had made up for trade imbalance, insulating exchange and financial markets from the effects of the deficit. Swiftly, however, foreigners now heeded Blumenthal's advice that the dollar was overvalued and switched into "stronger" (undervalued) currencies such as the yen, the mark, and the Swiss franc.

By needlessly increasing the exchange risk to dollar holders, Blumenthal had triggered a panicky, self-reinforcing flight from the U.S. currency and dollar-denominated assets. After Blumenthal's mid-June speech, the dollar plummeted, and it kept on falling for the rest of the year. By the end of 1977, it had declined about 20 percent against the German mark and roughly 30 percent against the yen. Within a span of only 90 days, the dollar lost one-fifth of its value against the Swiss franc. The reversal of capital flows was stunning. In the first half of 1977, items reflecting private capital movements into the United States showed a net surplus of $2.9 billion; in the second half, this became a $6.6 billion outflow.

Like the sorcerer's apprentice, Blumenthal found the violent market fluctuations were too much of a presumed blessing, but neither he nor his colleagues had any idea how to turn off the devaluation process. Meanwhile, the wildly gyrating value of the world's trading money disrupted markets, caused record-level bankruptcies in Japan, pushed up unemployment in stagnant West Germany, and generally depressed international economic activity. Confidence in U.S. leadership fell even further than the dollar. West Germany's thoroughly alarmed Central Bank President Otmar Emminger declared: "The decline of the dollar has gone far beyond what could be justified by the facts."

Treasury officials emphatically agreed, complaining that the exchange markets were "irrational." If floating exchange rates had been working according to theory, adjusting currency values to differing rates of domestic inflation, experts calculated that the dollar might have lost perhaps 3 to 4 percent of its value against the German mark. Obviously, the markets were applying a much larger discount than the theorists anticipated for uncertainty arising from American unpredictability and demonstrated incompetence in managing both the dollar and the domestic economy. As the *Wall Street Journal* declared: "This flight from the dollar is a massive vote of no-confidence in the policies of the administration and the Federal Reserve." Ironically, long before producing any promised trade advantages, the cheaper dollar boosted the cost of imports and encouraged domestic producers to hike their prices, too, thus worsening the overall inflationary threat to American consumers and, more than incidentally, to the Carter presidency.

IV

Late in 1977, the administration heard a succession of entreaties from foreign leaders to "do something" about the free-falling dollar, climaxed by the plea of Saudi Arabia's King Khalid, whose kingdom possesses more than $55 billion in paper assets subjected to inflationary erosion. In a face-to-face meeting with President Carter, he made an impressive appeal backed by a credible "or else" threat pinned to higher oil prices. Carter at once gave the commitment demanded, turning it over to Blumenthal and his colleagues to redeem. Rather naively, they assumed that

they could talk and manipulate the dollar upward as surely as they had driven it down earlier. Their magic formula: "intervention."

By this time, the secret, behind-the-scenes campaign to gain the reappointment of Federal Reserve Board Chairman Burns had more or less conclusively failed. With his term due to expire at the end of January, the chairman, who had stood aloof from the efforts on his behalf, was as completely his own man as he had ever been. When informed by Carter and Blumenthal that official indifference to the dollar was now to be succeeded by "intervention," even on what the secretary called a "massive" scale, he approved the new approach. But he went on to tell them that "intervention in itself is not a policy."

On January 4, 1978 in an extraordinary joint statement, the Treasury and the Federal Reserve Board announced that they would begin to intervene "actively" in chaotic foreign exchange markets, using borrowed West German marks and other "strong" currencies to buy up dollars. To some anxious and credulous dollar-holders overseas, that statement may have had the same thrilling sound as the bugle call of the cavalry riding hard to the rescue in the final reel of the classic Western movie. But the speculators were unimpressed, and after a short-lived rally, the dollar resumed its decline. Although the battered currency was overdue for a strong technical rebound, the markets concluded that "intervention" left adverse fundamental factors unchanged.

As Burns had forewarned, official U.S. and foreign resources available for supporting the dollar—on which Blumenthal appeared unbriefed—were piddling alongside the hundreds of billions of dollars in private and potentially speculative hands. In 1977, foreign central banks had spent an estimated $40 billion to prop up the dollar, much of it by the skilled market-riggers of the Bank of Japan, but all to no avail. In terms of influencing flows of liquidity, "intervention" was like dipping a teaspoon into Niagara Falls.

Burns did more than deliver a private White House lecture. Acting on his own initiative, he resolved to give the Carter-Blumenthal exercise in symbolism at least a measure of substance. At a meeting of the Fed's board of governors on January 6, he proposed, and a divided board adopted by a close four to two vote, an increase in the discount rate from 6 to 6.5 percent. This was the first increase in the discount rate for balance of payments reasons in a decade, a fact that conveyed its own symbolic message abroad.

The Treasury was *not* informed in advance of the action. According to an aide, Blumenthal was "furious" at the news. He was angry chiefly because the Fed's decision to increase a key interest rate and restrain the domestic economy had been for *international* reasons, which he bitterly characterized as an "unforgivable" distortion of priorities. Burns stood his ground. He refused to allow the administration to waffle and attempt to embrace a fundamental contradiction. Either it would defend the integrity of the dollar through such classical (and credible) measures as raising rates and restraining the growth of the money supply, or it could persist in a kind of "America-first" economics based on continued inflationary expansion, regardless of the damage to the international value of the dollar. But it could not have it both ways.

Subsequently, in March, when the Treasury came up with an unconvincing defend-the-dollar plan, Burns personally intervened with West Germany's central bankers on Blumenthal's behalf. In transatlantic telephone calls, he persuaded his friends and former colleagues to agree to an additional $2 billion in "swap" arrangements to bolster the dollar. It remains to be seen whether these all-important lines of personal communications, based on trust, can be kept open in the future.

v

To defend the dollar, the source of its peril must be clearly identified. It is simply this: we are creating too many dollars. An inflationary monetary policy, reflected in more rapid recent price increases in the U.S. than in any other major industrial country, lies at the heart of the dollar's weakness. This dangerously accommodative stance is forced on the Federal Reserve by loose U.S. fiscal policy, which has produced 16 budget deficits in the past 17 years.

The dollar crisis grows out of the intellectual bankruptcy of orthodox, neo-Keynesian economic theory, which rationalizes mounting deficits as the sure-fire stimulus to achieve "full employment." Instead, the deficits now yield higher levels of inflation, a rapidly expanding federal borrowing requirement, and disappointingly slow growth. Nevertheless, despite the perverse effects, the prescription remains unchanged: *inflate.*

But astute foreigners are not so trusting as they once were, and they test avowals of good intentions by performance. Each Thursday afternoon, when the Federal Reserve issues the weekly money-supply figures, dollar-holders abroad are attentive and many adjust their investment strategies according to the changing inflation outlook. For more than a year, the biggest dollar-holders, the Saudis, have been sending not-so-subtle messages to Washington through the money markets—by buying British pounds and by shifting their short-term investment funds from dollars into marks and Swiss francs. If they have not already done so, they are in a position to send a message that cannot be ignored simply by restricting their purchases of U.S. Treasury debt issues. Such a "buyer's strike" could force the Treasury into borrowing in foreign currencies, a procedure that would compel Washington to bear exchange risk involved in committing itself to future repayment of marks or yen. "We always do the right thing after exhausting the other possibilities," notes a governor of the Federal Reserve who has urged such borrowing.

In a speech in mid-April, Henry Kaufman, one of the most respected economists in Wall Street, said: "I have come to the sobering conclusion that the dollar's role in international finance is overextended. In a global inflationary environment the key reserve currency is subjected to increasing volatility and pressure * * *. In addition, the compromise with inflation domestically arouses doubts among foreign dollar creditors about the will of the government of the key reserve currency to defend its currency and maintain its world banking role."

Kaufman, like many others, speculated on the possibility that eventually a new international monetary system might be devised, one that reduced the dollar's role and perhaps shifted the burdens to multiple reserve currencies. But the major trading nations, especially Japan and West Germany, are not willing to see their currencies become "internationalized" and thereby escape the control of domestic monetary authorities. It is precisely the absence of meaningful international cooperation that subverts the present system and makes a new and basically different one so difficult to imagine.

So the world is stuck with the dollar, at least in the near future, and has no real choice but to continue transacting its business and holding its reserve assets in U.S. paper. This should not be the excuse, however, for a short-sighted and complacent U.S. attitude that ignores the international consequences of domestic inflation. At a minimum, the U.S. needs to restrain its oil imports by one means or another, expand its agricultural and high-value technology exports as systematically as our Japanese competitors, and adopt tax measures and investment incentives to restore the productivity and competitiveness of American industry. Ideally, these measures would be taken within the framework as a new analysis and strategy for the U.S. economy, which outgrew Keynesianism a generation ago.

Unfortunately, a fairly broad consensus, including much of the business and financial community, favors inherently inflationary fiscal and monetary policies. The reason is as plain as the statistical evidence: we are a nation of debtors (private, corporate, and pub'ic) and we greatly prefer cheap money and ample credit to keep the leverage game going as long as possible. This "structural" bias is often overlooked. The vested organizational interests favoring "moderate" inflation are also vastly more powerful than those opposing it because the former are protected by various forms of "indexing."

All in all, the domestic priority in economic policy and politics is becoming very nearly absolute. Americans are unaware of any need to adjust their domestic appetites to their international financial condition, and their elected leaders, in this generation, are not telling them otherwise. Americans reject the discipline that balance of payments deficits impose on other nations more dependent on trade. From Congress to Main Street, they mentally inhabit a securely America-centered, dollar-oriented world—and so, apparently, does the provincial Jimmy Carter. Professor Ralph B. Levering, in his newly published book, The Public and American Foreign Policy, 1918–1978, predicts that "if the next series of international crises center on economic issues, the American people may be almost as ill-prepared to deal with these crises intelligently as they were to judge the merits of escalating the Vietnam War in 1965."

In April of this year, confidence at home and overseas rallied, sending the New York Stock Exchange into orbit. Newly appointed Federal Reserve Board Chairman G. William Miller, former chief executive of Textron Corporation, impressed businessmen (and surprised the White House) by echoing Burns's antiinflation opinions. What's more, the Fed gave weight to Miller's words by pushing up short-term interest rates.

Meanwhile, the president finally unveiled his own, largely voluntary program to deal with inflation, and it, too, boosted confidence because he put his most accomplished political aide, Special Trade Representative Robert Strauss, in charge. Finally, the Treasury announced plans to sell modest amounts of gold from its reserves over a period of several months. The West German press praised the move and especially the new attitude of Secretary Blumenthal. "He has undergone an inner change so exemplary as to be found only in Biblical history," a Frankfurt newspaper rejoiced.

The surge of optimism abroad was as excessive as the earlier deep slide into pessimism. It did not matter whether Blumenthal had seen the light or even whether Carter had seen the rapidly growing threat to his tensure beyond 1980. What did matter was Washington's belated acceptance of the seriousness of the inflationary danger, which at last put the administration in step with the allies.

Economics will not determine the future of the dollar or the international payments system based on it. Ultimately, this system rests on certain assumptions about the character and behavior of the political leadership of the United States. For semantic convenience, these assumptions are commonly bundled together in a single word—"confidence."

The steep decline of the dollar reveals in-

creasing doubts abroad not only about the immediate value of our currency and the near-term prospects for the U.S. economy but also about the long-term validity of the underlying political assumptions. To foreigners, the most important assumption is that, at the level of national policy, the United States can be depended on to act from a rational and intelligible estimate of self-interest. In calculating their risks and making decisions that must be translated into buying and selling dollars, foreigners may disagree with Washington's views, but they must be able to understand them, see how they reflect American calculations, and how they serve American objectives. In too many instances during the first year and a half of Carter's presidency, this has simply been impossible.

If we Americans seem to know where we are going and why, foreigners are better able to decide, for their own reasons, what course to pursue. It is an aimless, politically irrational, and morally self-indulgent America that alarms them and causes them to take flight from the dollar and our larger common causes.●

## NOTHING FUNNY ABOUT POLISH JOKES

### HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. ZABLOCKI. Mr. Speaker, recently my esteemed colleague and friend, Representative JOHN G. FARY, condemned in remarks before the House a current motion picture production defaming persons of Polish descent in the crudest possible manner.

I personally deplore such disparagement of Polish Americans or any ethnic group, and join in the denouncement of irresponsible filmmaking, which profits from such abuses of constitutionally protected freedom of expression.

In that vein, I would like to share the following commentary which appeared recently in the Milwaukee Journal, which succinctly expresses the righteous anger of Polish Americans everywhere whose contributions to the greatness of our Nation seem to be rewarded with ill-conceived, malicious humor:

NOTHING FUNNY ABOUT POLISH JOKES

(By Matt Babinski)

In the movie "The End," Dom DeLuise portrays a Polish schizophrenic. His performance is highlighted by a lengthy series of Polish jokes. Raw Polish jokes. Crude Polish jokes.

I am a first generation Polish American. A Pol-Am.

Polish jokes are protected in this instance by the First Amendment. As an individual, I have no practical recourse in a court of law for any defamation to me. What has been my injury? Impossible to measure. Theirs is a multimillion dollar enterprise. My resources are meager. As a distinct legal class, we don't exist. Second and third generation Polish Americans legally are simply Americans. Sub rosa, however, the Polish American is classified. He is a second class American.

I compared a few of the movie's reviews. Elliott of the Chicago Sun-Times ". . . and a full star to DeLuise, who shakes us awake as an asylum inmate traumatized by a childhood of Polish jokes. . . ." Siskel of the Chicago Tribune, ". . . DeLuise's is a rich performance that takes over the second half of the movie. . . ." Vincent Canby of the New York Times, ". . . the film's sustained comedy, supplied by the incomparable DeLuise, amounts to a solo nightclub act. . . ."

Not one of them mentioned that DeLuise's characterization might, just might, be highly offensive to many of the 12 million Americans of Polish descent. What in the world were these reviewers thinking of with this praise? Are they that blind to bigotry? That insensitive? Canby of the Times, Dodds of the New Orleans Times-Picayune, and Rich of Time Magazine made no reference whatsoever of the Polish characterization or the Polish jokes. How could they have failed to mention this blatant group defamation?

Has the evil of these Polish jokes now become so deep rooted that it is accepted as a norm by perceptive reviewers? This defamation, under the guise of movie irreverence, has become so commonplace that everyone is expected to participate. Next, a TV audience of 30 million will be invited to indulge, children included.

Recently, a friend attended a performance of Voltaire's "Candide" at Stratford in Canada. When a simple mention of a Polish something or other occurred in this 18th century play, the audience burst into laughter, totally unrelated to the play. Is this the future "Krystalnacht" for my people, where any reference to them within a dramatic piece will produce a similar wave of spontaneous laughter?

It's partially our own fault. We have permitted this to happen through the meekness of our politicians, the timidity of our clergy, our ignorance, our reluctance to get involved, shyness in speaking out, fear of jeopardizing opportunities to get ahead if too outspoken on Polishness. Maybe we're like the Jews were in Germany in the thirties.

No longer can I be silent. Come what may. Our awesome Bill of Rights protects the right of actors and writers to express themselves freely. For me, Polish jokes foul precious memories of my mother, widowed with seven children in the 1930s, knowing very little English, insecure, yet somehow guiding us through it all. The "rich performance" upstages the care, love, affection and traditions imparted to me by my small community of relatives and Polish neighbors. The DeLuise nightclub act ridicules my name, Babinski, about the only thing my TB victim father could pass on to us seven.

I must learn to hate. I must hate with a vengeance those who are trying to destroy by ridicule and irreverence all those things that are dear to me and to my people, my Polacks.●

## A VERY SPECIAL 40TH WEDDING ANNIVERSARY

### HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Ms. OAKAR. Mr. Speaker, a very special occasion was celebrated in my district recently—the 40th wedding anniversary of Ann and Emmet Holleran. I want to take this occasion to comment on the fact that in this day and age when marriage is looked upon by some as "old-fashioned" and bringing children into the world is not considered as important as it once was, the Hollerans are a joyful and wonderful family.

I want to extend my congratulations to them and their children on the occasion of their 40th wedding anniversary and to use this occasion to say that there are many families like the Hollerans in this country who adhere to the traditional family life, and who believe in the old-fashioned virtues we are so fond of extolling from our pulpits and our platforms. May they have many more years of happiness together.●

## "HELPERS FOR CHRIST" SET EXAMPLE

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. FINDLEY. Mr. Speaker, we all remember the fairy tale of the elves who did the shoemaker's work for him when he was too sick to do it for himself. Well, it happens in real life—only the "elves" are more like angels.

Each summer a group of 15 or more teenagers from Sherman and Athens, communities near Springfield, Ill., spend 12 days living away from home donating their labor to repair the homes of those who cannot do the work themselves or afford to have it done. During the year the teenagers earn money for building materials through pizza sales and by manning coat check booths at dances.

They are called "the Helpers for Christ" and are supervised by Father Peter Mascari, the pastor of Catholic churches in Athens and Sherman, formerly pastor at Pittsfield. It is an example that other groups, religious and secular, could well follow.

The nature and value of their work is reviewed in two articles that I would like to place in the CONGRESSIONAL RECORD. One article is by Bob Hastings, editor of the Illinois Baptist. The other is from the Cairo Evening Citizen.

It is hard to think of a better way for young people to spend some time. They help others, and no doubt learn a lesson in charity and goodwill that stays with them the rest of their lives.

Text of articles follow:

"THE NEEDIEST"

(By R. J. Hastings)

"The Helpers of Christ" is a group of Catholic teenagers from the Illinois communities of Athens and Sherman who *look* for people to help. Throughout the year, they raise their own funds in various projects. Then in June, they spend 12 days helping a needy family somewhere in the Midwest.

"We go to the public aid office," Father Peter Mascari told me, "and ask for the names of some of their neediest families. Maybe it's a family that needs a new roof on their house. Or the house needs painting, or some minor electrical or plumbing work. We go in with our own material and tools, and do the job for them. There's no cost, no obligation. We do it in the name of Christ, to make life a little easier for someone who really has it tough."

When pastor Mascari told me this story, I thought of Job 15–16, "I was eyes to the blind, and feet was I to the lame. I was a father to the needy; and the cause which I knew not, I searched out."

There's no end to appeals. Solicitors stop us on the street. Door-to-door canvassers

come with pledge cards and contribution envelopes. Almost daily, the mail brings another appeal for money. Each new fund-raising drive persuades us why we should give.

But the Bible verse from the book of Job, quoted above, talks about *looking* for places to give, not waiting to be solicited. "And the cause which I knew not, I searched not."

Some of the neediest people have no one to champion them, no one to plead their cause. They will be found only when we look for them. In fact, they may be too proud to signal their need. And remember, not all needs are material.

That's why I admire "The Helpers of Christ." They're looking—not waiting!

"HELPERS FOR CHRIST" GROUP ASSISTS NEEDY HOMEOWNERS

Several families in Alexander and Union counties will be getting some help in repairing their homes during the next week.

Members of the "Helpers of Christ" group headed by Father Peter Mascari, are in the area until June 30, painting repairing roofs, paneling, and constructing porches.

The group of 15 high school students and nine adults are from two communities outside Springfield, Ill.: Sherman and Athens.

The volunteers, all members of either the Holy Family Catholic Church or St. John Vainney Catholic Church, provide the materials and labor to repair homes year round in their own communities. They also spend 12 days a year working on homes in some area within 250 miles of Springfield.

"The group repairs the homes of persons too old or incapacitated to do the work, or those who don't have the finances.

"The only criteria" says Father Mascari, "is that they own their own homes. We don't want to repair some landlord's property free of charge."

The group works from referrals given to them by local Public Aid offices. The families referred don't have to be receiving any assistance to qualify, they merely have to fit the requirements above.

Each family referred is visited by a representative of the organization during the year in order to evaluate their needs and see if "helpers" are in a position to assist. A form is filled out at this time listing the work to be done.

The "Helpers" earn all money for their supplies and other costs themselves through pizza sales and proceeds from a coat check booth at parish dances. The group also receives private donations from persons who have heard of their work and want to support their efforts.

They earn between $3,500 and $4,000 a year. Father Mascari says they try not to take any contributions for their labor because this takes away from the real purpose which is to "live the Christian charity we hope we are learning in our religious instruction program."

This is the first time the group has been in Alexander and Union counties, although they have been in Southeastern Illinois and Southeastern Missouri in the past, and also in Ohio and Kentucky.

The group is working with the Cairo and Anna Public Welfare offices. The students are staying at St. Vincent's College in Cape Girardeau and rooms for the adults have been provided free of charge at the Ramada Inn through the generosity of a sponsor in St. Louis.

Members of the group are: Brother Michael, Father Mascari, Mark Barnett, Paul and Eileen Cerar, Karen Christen, Chris Cownan, Ann Dees, Mike Egizil, Angie Fontana, Les Freer, Lori Freer, Andy Johnson, Rick Johnson, Tammy Jones, Denise Markey, Rhonda McDaniel, Maureen Rork, Vicki Schmidt, Joe and Elizabeth Thompson, Clarence and Millie White, Jeff Young, Kim Young and Kelly Young.●

## ARCADIA'S DIAMOND JUBILEE

### HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. ROUSSELOT. Mr. Speaker, this is indeed a season of jubilant celebration in the city of Arcadia, located in the beautiful San Gabriel Valley in the golden State of California. Residents of this city are observing the 75th anniversary of Arcadia's incorporation. It gives me great pride, as the elected Representative of California's 26th Congressional District including the city of Arcadia, to offer this well-deserved tribute.

Arcadia has a background rich in the tradition of early Californian history. Situated in southern California, the city of Arcadia was once part of an enormous land grant given by the King of Spain to the San Gabriel Mission in 1771. Later, Spanish rule submitted to Mexican rule in 1822, and following the Mexican War and the treaty of Guadalupe Hidalgo, California was transferred to the United States and became a State of the Union in 1850.

Incorporated on August 17, 1903, Arcadia has grown from a small city of 696 residents to a "city of beautiful homes" with over 47,000 residents and encompasses an area of approximately 11 square miles.

With the awesome backdrop of the imposing, yet impressive, Sierre Madre Range and with easy access to mountain resorts, desert and ocean playgrounds and metropolitan cultural centers, Arcadia attracts both the business executive and professional as the ideal spot in which to settle and raise a family.

Arcadia offers exceptional recreational and educational facilities and opportunities. It is the home of the beautiful State and county aboretum, as well as thoroughbred horseracing at Santa Anita Race Track. In addition, the city has 12 attractive community parks, including the Wilderness Park and Nature Center.

Many people choose Arcadia as their residential community because of an outstanding public education system. The school district, staff members and students alike, continue to receive each year numerous scholastic, artistic, musical, and athletic honors and awards. Members of Arcadia's school district have been the recipients of 19 Freedom Foundation Awards.

Arcadia's library is a busy place, indeed, with appriximately 2,000 people per day utilizing the facility. Readers borrow over 400,000 items annually, making Arcadia truly a "reading community." As well as housing an outstanding collection of books, the library serves as a public service center offering a variety of remarkable programs to the citizens of Arcadia.

Assuring health care facilities for Arcadians, the Methodist Hospital of Southern California, with a bed capacity of 345, is a nonprofit charitable community hospital serving persons of all races, faiths and creeds. Every specialty of medicine is represented by the 300 distinguished members of the medical staff. Located on a 22-acre site leased from the city of Arcadia the Methodist Hospital continues to provide excellent care and service to those in need of treatment.

Helping people has not been limited to the hospital. Arcadia's churches open their doors to all who come to worship. Everyone is welcomed by these churches and in these challenging times they provide stability, faith, understanding, and guidance for all. Every denomination—Christian Reformed, Christian Science, Church of Christ, Church of God, Congregational, Episcopal, Evangelical Free, Friends, Lutheran, Methodist, Non-Denominational, Pentecostal, Presbyterian, Roman Catholic, Latter-Day Saints, Serbian Orthodox, and Jewish Synogogues—offer experiences in worship, education, fellowship and counseling for personal and family development.

In 1951, the electorate of Arcadia voted to become a charter city and establish the council-manager form of municipal government. The five-member city council, elected from the city of large, each year, selects one of its outstanding members to serve as mayor. This has proven a truly representative body, serving Arcadians wisely during the years. Boasting one of the lowest city property tax rates in Los Angeles County, Arcadia council members have actually reduced property taxes over the years. Presently, the rate is the lowest in the last 83 years and 20 percent below the rate of 10 years ago.

The Arcadia Chamber of Commerce represents over 900 member firms and provides a broad range of services for the community, including an official city hostess program which provides useful community information to all new residents.

The Arcadia Chamber of Commerce has been designated as the official agency charged with the responsibility to organize, coordinate and present the 75th birthday celebration on September 29 and 30. The Honorable James R. Helms, Jr., former mayor and councilman, now serving as president of the chamber of commerce has been named as general chairman of the Diamond Jubilee. Although Mr. Helms and the various committee chairmen will provide leadership for the festival, it is the 47,000 residents of Arcadia who will be the "stars" of the occasion. This promises to be a truly proud occasion for all Arcadians. Among the scheduled events are the: Jubilee Parade, Jubilee Dance, Alumni Homecoming, Jubilee Tournaments and Sports, Jubilee Judging and Awards and Jubilee Fiesta.

Tribute should be given to the individuals who have contributed their time and efforts to the festival: Kel Mason, chairman, Jubilee Parade; Marguerite Towsley, chairman, Jubilee Dance; the Honorable Charles Gilb, chairman, Jubilee Grand Marshall's and VIP Committee; Steve Lloyd and Caye Wells, cochairmen, Alumni Homecoming; Carol Papay, chairman, and Marilyn Daleo, vice chairman, Jubilee Publicity; Richard Miller, chairman, and F. Harold Roach, vice chairman, Jubilee

Historical Committee; Neal Johnson, chairman, Jubilee Judging Prizes and Awards Committee; Floretta Lauber, chairman, Community Coordinating; Rick Bundy, chairman, Jubilee Merchants Committee; Jerry Collins, chairman, Jubilee Tournaments and Sports Committee; and Ruth Gilb, chairman, Jubilee Fiesta Committee.

Before closing, Mr. Speaker, I would like to spotlight five dedicated individuals who have given guidance to the city of Arcadia. Mayor David E. Parry is serving his third year on the council. He is an attorney for the Santa Fe Railway Co. and has been a resident of Arcadia for the past 12 years. Mayor pro tem Robert G. Margett is currently serving his third year on the council. He is an engineering contractor and has been a resident for the past 18 years. Councilman Charles E. Gilb is a former Mayor and is serving in his 5th year on the council. He is the owner of a wholesale produce firm and has been a resident for 19 years. Councilman Don Pellegrino, elected to the council just this year, has been a fine resident for the past 17 years. Finally, Councilman Jack Saelid, who served as mayor last year, is currently in his fifth year on the city council. He is manager of Electrical Mechanical Engineering for the Xerox Corp. in Pasadena and has also been an Arcadian resident for 17 years.

Mr. Speaker, I ask that you and my colleagues in the House of Representatives join with me to offer our heartiest congratulations to the residents of the City of Arcadia as they celebrate their Diamond Jubilee.●

## W. A. MOORE TO BE 99 ON OCTOBER 1

### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. KILDEE. Mr. Speaker. one of my constituents, Mr. W. A. "Wiley" Moore of Mount Morris, Mich., will be 99 years old on Sunday, October 1. His active and productive life, which covers nearly half the entire history of the United States as a nation, is a tribute to his fine spirit and to his determination to live a good life and raise a fine family.

Mr. Moore was born in Sanilac County, in the Thumb of Michigan.

Mr. Moore's education was limited to the grade school facilities of those times and location. However, he clerked in a legal office for a few years. Mr. Moore met his future wife, Martha Mable Whitely, while she was teaching at the local one-room school and boarding at Mr. Moore's parents' home. Mr. and Mrs. Moore went deer hunting every fall until he was 88 years old. Mrs. Moore passed away in 1972 at the age of 90.

Mr. and Mrs. Moore first ran a farm, and after World War I operated a local road building firm in the early State program to promote road building. Mr. Moore tells that in building his first new home, he considered the question of whether to install an acetylene gas plant for lighting the home, or an electrical generator. The gas was selected as being more safe and reliable.

Following the financial panic after World War I, Mr. Moore found himself nearly out of business upon the failure of the local country bank. At this time, he moved to the Flint area near Mount Morris to engage with others in home construction and manufacturing. After the depression of the early thirties, he continued the cement block business and remained in that business until his retirement at the age of 88. He says the biggest mistake he ever made was when he quit working, but he's delighted to say that he has never worked for anyone in his life time.

To talk to Mr. Moore is to turn back a whole book of history, not only in chronological terms, but in terms of attitude, language and philosophy of living. As an example—his children had difficulty in getting him to sign up for social security.

He was raised in a time that a trip to the county seat was of significance. Medical care was rarely available. For example, his teeth were completely extracted at an early age by an itinerant dentist, and all without the benefit of our modern pain killers.

As a youngster, there were limited churches nearby. As a result, his father held services of his own, and complemented this by a Bible reading before each evening meal.

Mr. and Mrs. Moore both saw that their children procured the best education available. As young parents, their two oldest sons traveled a distance of 7 miles by horse and buggy to attend high school.

Upon coming to Mt. Morris, their four children further attended college, some starting at what was then Flint Junior College. There were three sons and one daughter. The eldest, Stuart, was a civil engineer, graduate of Michigan State, and became assistant head of the Divisional Office of the U.S. Engineer Office. He died in a United Airlines crash in Chicago in 1940. Samuel graduated from our local General Motors Institute, married Jane Hyatt of Flushing, and worked mostly for Ismont Corp. as manager of its plastics division. He is now retired in New Jersey. W. James graduated in civil engineering from the University of Michigan, and following naval civil engineering, married Phyllis Kennedy of Detroit. He now operates a manufacturing business in Detroit. The daughter, Virginia, interrupted her stay at the University of Michigan to marry a Navy pilot at the beginning of World War II. Her husband, George Castle, continued as an airline pilot, and they now live in Seattle, Wash.

It is interesting that people of modest means not only sacrificed to send all four of their children on to college, but they instilled in them the desire to do so, something most of us do not appreciate in our more affluent times. Also, here is a man, who as a youth saw mostly only a local county and used horse and buggy, and now he jets from coast to coast to visit his children.

Mr. Moore has 13 granchildren and five great grandchildren.

Mr. Moore enjoys excellent health, retains a remarkable sense of humor and an avid interest in current events and political life. His slogan has been and continues to be, "Don't sell America short."●

## IRRESPONSIBLE CONDUCT BY THE WASHINGTON POST

### HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. FOUNTAIN. Mr. Speaker, on August 5, the Washington Post ran an editorial, "Urban Aid in Distress" on the administration's supplementary fiscal assistance proposal which contained two completely untrue allegations.

The Post alleged first, that the subcommittee which I chair has never been hospitable to urban aid plans, and second, that I personally did not entertain any amendments before the subcommittee voted on that bill.

In addition to making these two allegations—which are demonstrably not true—the Post editorial displayed a lack of understanding about the relationship between unemployment rates and the fiscal condition of local governments.

I sent a hand-delivered letter to the Post's editor 2 days later—August 7—requesting that my response be printed while the untrue allegations were still fresh in the readers' minds.

I believe any person who is singled out for criticism in an editorial is entitled to an opportunity to defend himself and to have his response printed on a timely basis.

The Washington Post, I am sorry to report, has denied me an opportunity to reply to the untrue statements in its editorial. Moreover, it has done so in an inconsiderate and arrogant manner.

When my letter to the editor did not appear by August 11, I asked my staff to phone the Post to inquire when it would appear. Only then was I informed, through my staff, that the letter was considered too lengthy for the available space. My staff was advised that it would be printed more quickly if compressed into 850 words and rewritten as an Op-Ed piece.

Acting on that understanding, I took the time from a very busy schedule that same afternoon to rewrite the letter in accordance with the Post's specifications, and it was picked up by a Post messenger late in the day. What did I get for that effort? Dead silence from the Post. The Op-Ed piece did not appear, and I have never received even the courtesy of a call or letter of acknowledgment.

After repeated, unproductive phone calls to the Post's editorial office, my staff learned yesterday afternoon from Mr. Philip L. Geyelin, the paper's editorial page editor, that the Post has no intention of printing my response. So much for fair play.

I firmly believe that a free press is an essential component of a democratic

society. But it is equally important that the rights and privileges accorded to the press be exercised with a sense of responsibility and a high regard for the rights of individuals.

Mr. Speaker, the Post editorial conveyed the erroneous impression that the subcommittee I chair acted hastily in voting to postpone further consideration of the supplementary fiscal assistance bill, and that I refused to consider amendments. That false impression has also been conveyed repeatedly by a subcommittee member who was on the losing side. What that Member fails to disclose is the fact that he did not offer any amendment or alternative either in our Democratic caucus or in the subcommittee meeting, nor did he inform the chairman before the meeting of his intention to offer an amendment.

The truth is that the bill was fully and carefully examined in 3 days of public hearings, an executive session, a caucus, by in-depth staff analysis, and in numerous discussions among the Members. It was evident before the subcommittee meeting on August 2 that a majority of the Members could not support the bill, and no amount of discussion would have changed the outcome. Indeed, the President personally sought to persuade at least one Member to change his position, and failed.

As for the false charge that the Chair did not permit amendments to be offered, the official stenographic record of the meeting clearly shows that I actually invited amendments on three separate occasions. This is shown on pages 7, 8, and 10 of the record. I would be delighted to furnish that transcript to interested Members, or anyone else who cares.

Mr. Speaker, I request that my August 7, 1978, letter to the editor of the Washington Post be included at this point for the information of my colleagues and other readers of the CONGRESSIONAL RECORD.

The letter follows:

INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES SUBCOMMITTEE OF THE COMMITTEE ON GOVERNMENT OPERATIONS,
*Washington, D.C., August 7, 1978.*

LETTER TO EDITOR, WASHINGTON POST

Your editorial, "Urban Aid in Distress", (Washington Post for August 5), makes the unwarranted assertion that the Subcommittee I chair "has never been too hospitable to urban-aid plans." I know of no factual basis for that statement. On the contrary, the Intergovernmental Relations and Human Resources Subcommittee was deeply concerned with urban problems and Federal-State-local relations long before these subjects became fashionable in Washington.

It would be correct to say that the Fountain Subcommittee has never been hospitable to unsubstantiated claims, the misuse of statistical data, and political slogans when it comes to spending the public's money.

The Subcommittee opposed the Antirecession Fiscal Assistance (countercyclical) program last year because it was poorly constructed and could not possibly serve the objectives stated for it. It was claimed the program was needed to help compensate State and local governments for their recession-related revenue losses, even though the recession had ended two years earlier. It was argued that the State and local governments would spend their allocations promptly, thereby stimulating the national economy. This argument ignored the legal reality that governments are required to follow budget procedures which preclude the rapid spending of temporary assistance. Further, a government qualified for aid if its unemployment rate exceeded 4.5 percent, a lower figure than the rate considered "full employment" by the Presidents' Council of Economic Advisers.

The use of local unemployment rates as the mechanism for targeting money to needy governments was the fatal flaw of the countercyclical program. Those rates are so unreliable that the Commissioner of Labor Statistics has described their fluctuations as no better than "random numbers" for communities under 50,000 population. Worse still, actual rates have been developed for fewer than 5,000 governments, with the vast majority of units receiving allocations on the basis of assigned "balance of the county" rates which bear little or no resemblance to the local situation.

As a result, many of the wealthiest communities in the United States, located in counties like Nassau, Suffolk and Westchester in New York State, have been receiving assistance. And they would continue to receive money under the proposed new program.

Even if unemployment rates could be made reliable, they would still not be a useful measure of local need because these rates are wholly unrelated to a government's service responsibilities and fiscal condition. By an interesting coincidence, the lead story in the August 5 Washington Post dealt with black teen-age unemployment. I agree that minority youth unemployment is a serious problem, and one which we have not yet addressed satisfactorily. It is important to note in this regard that approximately half of the national unemployment rate is attributable to youth unemployment. Youth unemployment, therefore, accounts for an even larger percentage of the high unemployment rates found in a great many central cities.

It is essential to ask in this connection what fiscal responsibility a particular local government has for this group or for the unemployed in general. The answer for most cities is "very little". There are, of course, exceptions. The cities mentioned in your editorial illustrate this point. Cleveland, New Orleans and Buffalo have no responsibility for financing any part of the costly public assistance and medicaid programs. These costs are borne by an overlying county for Buffalo and Cleveland and by the State in the case of New Orleans. Moreover, the public schools are the fiscal responsibility of independent school boards in both Cleveland and New Orleans.

In sharp contrast, a small number of cities, including New York and San Francisco, are required by their States to pay part of the non-Federal share of public assistance and medicaid costs, and they also support public education out of the municipal budget.

The fact is that local governments have widely differing responsibilities revenue sources, and fiscal arrangements with their State governments. As a result, it is highly misleading to compare cities, especially across State lines, or to measure local need and tax effort without taking the total State fiscal system into account. And it is just plain silly to conclude a city is in fiscal need or distress on the basis of an unemployment rate or any other available socio-economic indicator. Our Subcommittee has studied this problem, with the counsel of the Nation's leading experts, for the past several years. Like many social problems, this one is not susceptible to easy solutions.

The Washington Post has helped create the false impression that the Subcommittee acted hastily in voting to postpone consideration of the Administration's bill. The bill was carefully and fully examined in hearings, executive session, caucus, staff analyses, and in numerous discussions among the Members before last week's meeting. I am convinced that every Subcommittee member had made up his mind before the meeting, and no amount of discussion would have changed the outcome. It should be noted that not a single amendment was offered when the Chair made amendments in order on three separate occasions.

The defects of the proposed Supplementary Fiscal Assistance program are so fundamental that the bill is beyond salvage. Far from being a program to aid distressed communities, it would allocate money to fully 70 percent of the Nation's local governments. The quirks in the allocation formula result in its favoring wealthy communities over poorer ones.

How the program would operate in the Washington metropolitan area is instructive. The District government is treated as the third most distressed city among the country's one hundred largest municipalities, and would receive a per capita payment of $14.29. Among the one hundred largest cities, only Newark and New York would receive larger per capita amounts. On the other hand, no other large city or any county in the Washington area would receive a penny. However, payments would be made to such wealthy places as Chevy Chase Village, Chevy Chase Town, and Somerset. It would be difficult to devise a more irrational formula.

This legislation would surely encourage local governments to become permanently dependent on the Federal budget for such basic local services as police and fire protection and trash collection.

The local perception of need is a very flexible one when the Federal Government stands ready to hand out money. Last week, for example, I received a mailgram from the mayor of Jacksonville, Florida, which read: "Needless to say, these funds are most urgently needed and important to Jacksonville." This is the same city for which large advertisements were recently placed in the Wall Street Journal announcing its "property taxes are among the lowest in the nation and they've been going down . . . There is no State or local income tax. And independent research shows the cost of living for an executive is $10,000 a year lower here than in New York."

There is no justification for another general revenue sharing program when we already have one providing almost $7 billion a year in assistance. This is especially true at this time when the Federal Government has an astronomical national debt, a huge budget deficit, and when inflation is the most critical domestic problem facing all of us. Moreover, it is not widely known that the existing general revenue sharing program targets money more effectively to the large central cities than the Administration's proposal.

I believe there is need for a carefully designed program to help those local governments that are genuinely distressed as the result of long-term economic decline, and I plan to give this matter priority attention early next year. However, it would be a disservice to the American people to create the impression that a "quick fix" is possible now through political negotiation in the Congress.

Sincerely,

L. H. FOUNTAIN,
*Chairman.*●

## SPEAK, MR. SPEAKER

## HON. W. R. POAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. POAGE. Mr. Speaker, H. G. Dulaney and Edward H. Phillips have just prepared a most remarkable and unique

book entitled, "Speak, Mr. Speaker." It is a big book, containing nearly 500 pages. It traces the life and actions of Hon. Sam Rayburn from his childhood to his death—and it lets Mr. Rayburn do the speaking, in the form of quotations.

The book is for sale by the Sam Rayburn Library at Bonham, Texas 75418. Of course, the proceeds all go to the support and maintenance of the library which is probably the finest legislative library in existence. I am sure that many of the senior Members, and I hope of the junior Members, of the House will want a copy of this book. It can be procured by sending a check for $12.50 to the Sam Rayburn Library, which pays for the postage as well as the book.●

## MR. ANDREW J. SUSCE OF NEWTON FALLS, OHIO, CONTINUES HIS 35-YEAR FIGHT WITH THE IRS

### HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. CARNEY. Mr. Speaker, one of my constituents, Mr. Andrew J. Susce, of Newton Falls, Ohio, is continuing his 35-year battle with the Internal Revenue Service for justice and restitution. Mr. Susce was fired from his job with the IRS in 1943, allegedly because he "blew the whistle" on wrong-doing by his superiors.

The story of Mr. Susce's long struggle will be told in a book entitled "Lonely Fight: One Man's Battle with the Government," which will be published later this year. In addition, attorneys for Mr. Susce are preparing a civil suit against the Secretary of the Treasury, seeking full redress of Mr. Susce's grievances.

Recent developments in Andrew Susce's efforts to vindicate himself have been chronicled in the Youngstown Vindicator and other area newspapers, and I am inserting one of these articles in the RECORD at this time. The article follows:

[From the Youngstown Vindicator, Aug. 20, 1978]

FIRED FROM IRS IN '43, SUSCE WANTS JOB BACK

(By Emily Webster)

NEWTON FALLS.—Andrew J. Susce, frustrated in his attempts to regain a government job from which he was fired more than 30 years ago, is hoping that an imminent, double-barrelled attack will result in the righting of what he believes is an old wrong.

The story of Susce's fight for reinstatement to his Internal Revenue Service job—a job he lost after he conducted, on superiors' orders, an investigation that implicated some of those same bosses—has become the subject of a book slated for fall publication.

At the same time, a civil suit is being prepared in his name to force the government to recognize his claim and reinstate him with full back pay and benefits.

Susce's battle began in 1943, after he had been fired from the IRS's Pittsburgh office on a charge that he had "reflected on the integrity of a superior officer."

In fact, Susce's report on the tax evasion practices of Pittsburgh's top mobsters did more than "reflect"—it relayed direct accusations of bribery and corruption. And more than one of his superiors in the IRS, as well as Pittsburgh area city officials and policemen, were named.

DILIGENCE SURPRISED BOSSES

The report, ostensibly a study of possible tax evasion on the part of mob kingpin John S. LaRocca, had been wrongly assigned to him in the first place, Susce felt—it belonged in the IRS's intelligence division. But, ordered to pursue it, he did that with a diligence that, he thinks now, surprised his immediate superiors.

LaRocca, Susce learned, instituted the help of city leaders, law enforcement officials and government workers, including highly placed IRS men, in a successful attempt to amass more than $180 million annually in undeclared—therefore tax-free—income.

His information had come—surprisingly freely—from inside the very mob he was investigating. Susce says. Surprised and angered that some of the top men in the IRS were named as having been corrupted by the mob, he nevertheless dutifully recorded what he was told.

The implication of what he had learned was not lost on Andy Susce. He made a copy of his report before he turned it in—a move he was later to congratulate himself for, because he was immediately fired from his job.

He began the appeal process immediately, but the trail of justice always ended at the same place—the door of the Treasury Department, where a "Case Closed" sign was hung.

Just "Case Closed." No explanation, no investigation, no hearing were ever offered.

Congress heard of the Susce report, and for a while it looked as though his plight might be alleviated by the power of the people as represented in Washington. That excitement soon died down though it gave birth to the convening of a grand jury in Pittsburgh to investigate the circumstances of the report.

NO INDICTING JURY

The grand jury was impressed though as an investigative jury it had no indicating powers. An indicting jury was never called.

Subsequent indictments and convictions concerning tax evasion, and the unearthing of scandals within the IRS in the past several decades, have convinced Susce that his report is indeed being put to use. But he's never gotten credit for it.

Thirty-five years of repeated attempts through congressmen, senators, and government officials as high as the President resulted in the same response: Sorry. Wish we could do something for you. Too bad . . .

Now, he's found two people who can do something, and who are willing to try.

One of them's a journalism instructor at Temple University in Philadelphia, John Hayes. Hayes wrote a story on Susce's long fight for "Pittsburgh" magazine more than a year ago and then expanded that work into book length.

The manuscript was accepted by the Lyle Stuart Publishing Co. of Secaucus, N.J. "Lonely Fighter: One Man's Battle With the Government" will be published in November.

By that time, Susce's attorney, Ted Johnson, expects to have filed a civil action against the Secretary of the Treasury, seeking reinstatement of job status, retroactive pay and benefits, as well as reimbursement for the covert blacklisting that prevented his client from getting another government job.

"We've come to the end of the road," Johnson says of Susce's long struggle. "Something's got to be done for this guy."

HAS PROOF OF APPEAL

Johnson acknowledges that the statute of limitations may create some problems in prosecuting a case against the government but notes that an appeal was filed immediately after Susce was fired.

"He never had an appeal hearing—they just rubber-stamped the firing notice—but it establishes that he hasn't let this many years go by without trying to rectify the condition," Johnson explains.

An earlier appeal which Johnson filed with the U.S. Civil Service Commission resulted in "a long time without an answer, then a letter saying no appeal had ever been filed," Johnson says.

"But we have papers proving that the appeal was filed," he adds.

Susce, still nursing the shock and disappointment he first felt when the mighty power of the United States Government was turned against him, clings to the hope that, finally, his lifelong faith in ultimate justice will be justified.

Besides the matter of his own treatment, he insists, is the lingering question of that tax evasion. At $180 million a year in undeclared income, he says, "there's enough taxable money in this country to wipe out the national debt."

Someone, he says, should go out and collect it.●

## SENATOR STEVENSON GIVES SENSIBLE WARNING

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. SIMON. Mr. Speaker, one of the most distinguished Members of the Senate is the junior Senator from Illinois, ADLAI STEVENSON.

He is not one of the noisier Members of that body, but certainly one of the most reflective.

In remarks for the Senate, which were in the RECORD of August 18 (while the House was in recess) Senator STEVENSON pointed out that we are "shooting ourselves in the foot" in our policies on exports.

I am taking the liberty of inserting his remarks into the RECORD at this point, because many Members of the House probably did not see them.

What he has to say to those of us in the House and the Senate and what he has to say to business, labor, and the Nation makes a great deal of sense:

THE SLIPPING DOLLAR

U.S. exports are becoming less competitive in world markets. This conclusion is reinforced in the extensive hearings which the Subcommittee on International Finance has recently held on U.S. export policy.

The reasons for this decline in competitiveness are largely self-inflicted. Business too often ignores export markets, or fails to compete aggressively for them. It has seen increasing numbers of foreign competitors, including the LDC's, beat it with superior technology and marketing. Labor concentrates on protecting jobs from import competition, instead of creating jobs through more exports. Thus, it warmly endorses import restrictions, which threaten the fabric of international trade, and reacts grudgingly to export incentives. And we in Congress, with the best of motives, encumber trade laws with a maze of restrictions, limitations, and conditions designed to promote everything from emigration to environmental protection, but not exports.

This article contains a rude awakening—we are no longer the indispensable supplier of the world's commodities, goods, and serv-

ices. For every sale we forgo—for lack of effort, for other objectives—there is someone else ready to make the sale, to create jobs in their own country. I hope my colleagues will keep this in mind when we begin debate on the Eximbank bill. Any more unnecessary restrictions on exports, no matter how well intentioned, will be but another case of shooting ourselves in the foot. Soon, we may have no feet to stand on in international markets.

We are at a watershed in our international economic history. Either we compete, to sell more abroad to reduce the trade deficit or face the prospect of becoming a second-rate economic power. That may sound a harsh statement, but it is a harsh reality.

Included in the Senator's remarks was an article on exports which appeared in the National Journal of August 5, written by Robert J. Samuelson. For those interested in the subject, I would recommend either reading the Journal article or getting the CONGRESSIONAL RECORD of August 18.

Among other things Mr. Samuelson points out is the slippage in exports; that, for example, between 1974 and 1977, there was actually a drop in U.S. exports.

The Samuelson article also quotes Henry G. Walliich, a member of the Federal Reserve Board, as saying:

Treating our exports as a stick with which to beat people (is) completely ineffective. Every time we deny a country access (to sales) there's another country to take our place . . . we get a reputation as an unreliable supplier.

Among the OECD nations, the U.S. share of exports to Japan declined from 52.4 percent in 1974 to 48.2 percent in 1977; to the European community, our exports declined from 11 percent in 1974 to 9.8 percent in 1977; in the developing countries, the decline was 27.2 to 24.6 percent and to the Communist countries it was 12.4 to 8.4 percent.

Our colleague in the Senate and the author of the article in the National Journal are sending us a message that is not making any headlines but is extremely important for the economy of this Nation, and I hope we heed their sensible warning.●

## INFLATIONITIS REMEDIES

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. HAMILTON. Mr. Speaker, the September 4 issue of the Chicago Sun-Times carried an excellent article on inflation by my good friend, the Honorable JOHN BRADEMAS of Indiana. I insert the article into the CONGRESSIONAL RECORD and commend it to my colleagues with the suggestion that its prescriptions be carefully considered.

The article follows:

[From the Chicago Sun-Times, Sept. 4, 1978]

12 REMEDIES TO HELP US GET OVER INFLATIONITIS

(By John Brademas)

With another Labor Day upon us, Americans have reason to rejoice that the past 20 months have brought a record number of new jobs and substantially lower unemployment. But because these advances have been accompanied by a rising cost of living, the American economy is not as healthy as it should be.

Just as government led the effort to put more people to work, government now must take the lead in the drive to hold down inflation.

Congress is acting. On Aug. 16 the House adopted its annual budget resolution for fiscal 1979 with a deficit of $39.7 billion, the lowest in five years and a one-third slash from the $60.5-billion deficit President Carter proposed last January. This proposal allows for the $16.3-billion tax cut that the House approved early last month and continues the programs and policies that set the economy on the road to recovery.

Since January, 1977, nearly 6 million new jobs have been created, most of them in the private sector; the unemployment rate has dropped from 7.8 per cent to 6.2 per cent. But, although personal income has shot up 11 per cent this year, escalating costs strike at nearly every family.

So what's to be done about inflation?

First, we must understand its causes, which includes hikes in oil prices by the oil-producing countries, drought in the wheat belt, soaring interest rates and poor productivity. All these factors, in addition to unjustified government spending, contribute to inflation.

Also, we must realize that no quick, overnight fix is likely to solve the problem. If we are really serious, we must attack inflation on several fronts—in both the private and public sectors, and with a variety of approaches.

Here, with a comment or two, are a dozen prescriptions I think should be considered;

1. Keep lowering the federal deficit. This means gradually reducing the proportion of the gross national product represented by federal spending from the present 22 per cent to 20 percent by 1982.

2. Scrutinize the impact of the costs of government regulations. Estimates are that they add about three-quarters of a per cent annually to the rate of inflation.

3. Keep reducing unemployment. Stimulating recession is no way to fight inflation. It would take an additional 1 million unemployed to lower the inflation rate one percentage point—a bad tradeoff.

4. Press for a national energy policy that sharply reduces our reliance on imported oil, steps up energy conservation and develops alternative sources. We cannot expect to win the war against inflation as long as we pay billions of dollars a year for oil imports.

5. Encourage private investment and higher productivity by tax cuts for both individuals and business. The bill the House passed in August would mean $12.2 billion in tax reductions for individual's, including $1.8 billion in capital-gains relief and $4.1 billion for business.

6. Intensify the drive to sell Americans goods abroad, especially farm products, to improve our trade balance and strengthen the dollar.

7. Urge restraint on business and labor in price and wage policies. A careful look should be taken at tax-incentive plans—tax credits to workers for holding down wage demands and to companies for holding down price increases, plus penalties for stiff increases in either one.

8. Consider the use of vountary guidelines for wages and prices, geared to productivity, for companies and unions of significant size. Fact-finding, mediation and presidential jawboning would be the instruments of compliance.

9. Reduce interest rates as inflation subsidies. The rising cost of money is part of the rising cost of living.

10. Encourage competition in the private sector. Airline deregulation is a dramatic example of how a little free enterprise goes a long way in helping both consumers and business.

11. Zero in on sectors of the economy that have special inflation problems, such as health care, food and housing.

12. Provide job training and employment opportunities to chronic welfare recipients who are able to work, thereby reducing unwarranted public expenditures.

No single one of these remedies will eliminate the curse of inflation. All will mean sacrifice by some sector of our society. But, taken together, they could improve the well-being of all Americans.●

## MILITARY INTERVENTION IN BEHALF OF TAIWAN

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. FINDLEY. Mr. Speaker, if Taiwan were ever attacked by the Peking government, most of the people in my congressional district feel the United States should help in some way—but not with U.S. military forces.

This is the conclusion drawn from the nearly 18,000 answers to my annual survey of district opinion. One question asked:

The United States currently has a defense treaty with Taiwan (Republic of China). If Taiwan is attacked militarily by communists from the mainland (People's Republic of China), what should the United States do? (Check one or more.)

Only 21 percent checked doing nothing. Other checks went to sending some form of U.S. aid to Taiwan: Economic supplies, 28 percent; military supplies, 31 percent; U.S. air and sea forces, 16 percent; U.S. ground forces, 4 percent.

Interestingly only a total of 20 percent of the check marks fell in the last two alternatives which involve committing American military forces. Certainly most Americans are anxious to avoid getting bogged down again as happened in Vietnam. Also many see some advantage to better relations with mainland China.

The People's Republic of China has the world's largest population and offers a huge potential market for U.S. commodities and products. Earlier this spring I went to China, and recently I invited the Chinese representative stationed in Washington to Illinois in an effort to spur mutual understanding as the basis for peace and trade.

One of the challenges to American foreign policy in the future will be finding a satisfactory relationship with Taiwan which at the same time will allow improved relations with the Chinese mainland.

To that end I recommended earlier this year several steps toward modernizing our relations with Taiwan. They are:

First. The enactment of legislation which will assure continuity of our friendly relations with Taiwan.

Second. The termination at a date certain after 1 year's notice as provided in the treaty, of our mutual defense treaty with the Republic of China, a document

that was signed and ratified in a bygone era and which is now so out of date that it no longer serves as a proper instrument of U.S. national interest.

Third. The establishment of a diplomatic mission at Taipei at the consular level, the same that we have with the other island province of China, Hong Kong.

Fourth. The removal from Taiwan of the few U.S. military personnel who remain there, consisting of about 1,000 persons. Almost all of them serve in communications work assignments, which could be handled by civilians.

These changes would bring our relations with Taiwan up to date with today's security needs in the Far East as well as with American public opinion.●

## NEED FOR HIGHWAY BEAUTIFICATION ACT

### HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. KOSTMAYER. Mr. Speaker, I share today with my colleagues a letter from Secretary of Transportation Brock Adams citing his Department's objections to proposed amendments to the Highway Beautification Act contained in H.R. 11733, the Surface Transportation Assistance Act of 1978.

SECRETARY OF TRANSPORTATION
*Washington, D.C., August 17, 1978.*

Hon. PETER KOSTMAYER,
*U.S. House of Representatives,*
*Washington, D.C.*

DEAR M. KOSTMAYER: You have asked for our comments regarding sections 116 and 117 of H.R. 11733 (July 12, 1978 Committee Print), the Surface Transportation Assistance Act of 1978, which would amend the outdoor advertising control provisions of the Highway Beautification Act (23 U.S.C. 131).

These sections would change the existing Highway Beautification Act in several important ways. First, the amendment to 23 U.S.C. 131(g) contained in section 116 would require that just compensation be paid upon removal of a legally erected sign that is located adjacent to a federal-aid primary or Interstate highway, even though the removal may be for a purpose not related to the state or federal highway beautification laws. It is even possible that the amendments to 23 U.S.C. 131(k) would extend the compensation requirements of 23 U.S.C. 131(g) to highway systems not otherwise controlled by the Highway Beautification Act. In addition, section 116 amends 23 U.S.C. 131(o), which presently permits exemptions from removal requirements for tourist information signs located in areas that would suffer economic hardships if such signs were removed. The amended language would require the Secretary to approve any state application for exemptions and would strike the existing requirement that exempted signs be located in the area which suffers the hardship. Finally, section 117 of the bill would require the Department to permit many types of electronic signs.

We are very concerned that these amendments would seriously undermine the integrity of the outdoor advertising control program and would inject the federal government into areas which have long been the responsibility of state and local governments. The Highway Beautification Act has consistently been interpreted to require compensation only in those cases where signs are removed in furtherance of the Act. Typically, localities also regulate activities such as outdoor advertising pursuant to zoning ordinances that terminate nonconforming uses after a period of time by amortization. Section 116 of the bill would prohibit removal without compensation even under such local zoning ordinances. Federal protection would thus be provided for outdoor advertisers against legitimate local regulation that is not related to the specific purposes of the Highway Beautification Act. This would represent an unprecedented intrusion by the federal government into the prerogatives of localities to control land uses within their jurisdiction. Moreover, by requiring zoning authorities to give sign owners special treatment, it would raise constitutional problems of discriminatory treatment. Since most of these signs are not reached by the federal Act, they would in effect be guaranteed the right to stay up or receive compensation for removal, a protection not granted any other commercial interests. Local authorities would be inclined to leave signs up rather than pay compensation and therefore undermine their own zoning laws.

A number of recent decisions by state courts across the nation have considered local authority in this area. For example, the Maryland Court of Appeals recently upheld a Baltimore ordinance creating an historic district. Activities inconsistent with the purposes of the district were eliminated over a period of years by amortization. These activities included outdoor advertising. A company owning signs adjacent to Interstate and primary highways sued, claiming that state and federal highway beautification laws required compensation. The court ruled that the purpose of the Baltimore ordinance was not related to the purposes of the state and federal beautification laws and therefore signs removed because of it were not subject to the federal compensation requirements. *Donnelly Advertising Corp.* v. *City of Baltimore*, 370 A. 2d 1127 (Md. 1977).

A New York law providing for the removal of signs by amortization in the Catskill Park was upheld by the New York Court of Appeals, since the statute pursuant to which the signs were removed was a general land use law establishing the Catskill Park. Again the advertising company alleged a right to compensation under the state and federal highway beautification laws, but the court held that those laws were not related to the state park law, since the intent of the two statutes was different. *Modjeska Sign Studio, Inc.* v. *Berle*, 43 N.Y. 2d, 468, 402 N.Y.S. 2d 359 NE. 2d, 255 (1977).

The proposed amendments to section 131 would require us to penalize the states involved in these cases if compensation were not paid for the signs. Similar decisions have been rendered in recent months in Maine, Oregon, and Massachusetts. This is in addition to numerous other court decisions of less recent vintage. In fact, a brief review of the state statutes relating to outdoor advertising control indicates that should section 116 of H.R. 11733 be enacted, only five states could comply under their present laws. This would mean that, with respect to 45 states, immediate amendments to state law would be needed or we would have to take a penalty action. In some cases, the state government does not have constitutional authority to bind local officials, and a single city could cause the loss of ten percent of federal-aid highway funds to the state by refusing to pay for removed signs.

The Department recognizes that a small potential for abuse exists under present law. The outdoor advertising industry has argued that state and local governments may avoid their responsibilities under the Highway Beautification Act by the expedient of providing for removal of all signs pursuant to zoning ordinances without payment of the compensation that would otherwise be required under the Act. In order to deal with this problem, the Federal Highway Administration (FHWA) issued instructions to its field units regarding the review of advertising signs. A copy is enclosed.

These instructions set forth standards under which federal officials are to review local actions. The tests for this review are based on a decision of the United States Supreme Court dealing with the question of whether or not a local zoning ordinance had a racially discriminatory intent. *Village of Arlington Heights* v. *Metropolitan Housing Development Corp.*, 97 S. Ct. 555 (1977). Only one matter has been brought to our attention in the eighteen months since these instructions were issued, and it was successfully resolved after federal review.

The Department recognizes its responsibilities under the Highway Beautification Act, including the responsibility to ensure that outdoor advertisers whose signs are removed because of the Act receive just compensation. However, section 116 of H.R. 11733 would enmesh the Federal Government in local matters to a degree unprecedented in the land use area. We do not believe that past experience indicates a need to make such fundamental changes to the Highway Beautification Act.

Section 116 of H.R. 11733 would also amend 23 U.S.C. 131(o). This provision, added to the Act in 1976, allows the Secretary to approve requests of a state to exempt from removal nonconforming signs which carry "directional information about goods and services in the interest of the traveling public" and which are located in a defined area that would suffer substantial economic hardship in the event such signs were removed. The proposed amendment appears to eliminate the Secretary's discretion to deny requests not made in conformance with section 131(o). Since we will in fact grant properly supported requests, there is no reason to eliminate the Secretary's discretion to deny requests which are fundamentally inconsistent with the Act.

The amendment would also exempt from removal all signs advertising a tourist oriented concern located within an economic hardship area, no matter where the signs are located. Exempted signs could be located hundreds of miles from the hardship area or the activity advertised.

In the almost two years since the adoption of section 131(o), not one request for exemption has been made by a state in accordance with the Act's provisions. The proposed amendment does not change the economic factors which would qualify an area for exemption; it simply increases the number of signs eligible for exemption. The result could be a proliferation of signs along our nation's highways, which would be seriously at odds with the basic intent of the Highway Beautification Act.

Finally, section 117 of H.R. 11733, dealing with electronic signs, would mandate the allowance of many types of signs with flashing, moving or intermittant lights. These signs are presently controlled under state/federal agreements and would necessitate legislative or regulatory changes in virtually every state. There are no indications that the states want to make such a change. Further, we are concerned that the safety and esthetic impacts of allowing signs of this type have not been adequately considered and believe that until these impacts have been thoroughly evaluated, a legislative mandate to allow such signs without limitation is premature.

The provisions of the 1978 bill would produce a profound change in the direction of the Highway Beautification Program and

would undermine efforts to control scenic blight along our highways. We do not believe such a change is warranted or desirable.

Your interest in this matter is greatly appreciated. If we can provide you with any further information, please do not hesitate to contact us.

Sincerely,

BROCK ADAMS.

Mr. Speaker, I am concerned that the Public Works Committee has approved the amendments to the highway beautification program without hearings and with little or no discussion during mark-up. As Secretary Adams states, the bill if adopted would "seriously undermine the integrity of the outdoor advertising control program." If we are to take such a drastic step, I believe we should do so only after a thoughtful reevaluation of the whole nationwide highway beautification program . I do not believe we have met this obligation, and I hope the Congress would not act too hastily in the rush to adjourn.

I will, therefore, offer amendments when H.R. 11733 comes to the floor next week to delete those sections of the bill which do damage the the highway beautification program, a program initiated in 1965. I ask my colleagues for their support in this effort to save the Highway Beautification Act from irreparable damage.

## A PLAN FOR ENERGY CONSERVATION

### HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. PATTISON of New York. Mr. Speaker, a great deal is said these days about the need to conserve energy. But not much is said about specific, practical ways to do this, beyond setting our heaters lower and our air-conditioners higher.

That is why I was so impressed with a plan for energy conservation developed by the city of Davis, Calif. The Davis plan is outstanding for two reasons: First, the ways that have been developed to save energy are practical, relatively cheap, simple, and clearcut, yet they may be able to cut energy consumption in that city by up to 50 percent; and second, these measures have been developed by a community on its own initiative.

I learned of the Davis plan early this year through an article in the New York Times by James Ridgeway, the editor of the Elements, a monthly journal on resources. Subsequently, I was able to obtain from the Elements copies of a booklet entitled "The Davis Experiment," which describes the plan in detail.

I think that "The Davis Experiment" is worth serious study. While some of the programs developed in Davis are not suited to other parts of the country, the Davis approach can be creatively adapted to the particular needs of any area.

Having a national energy plan is vital, and I hope that Congress will approve one before this session ends. But such a plan, however good, will not solve our energy problems. They will only be solved when communities across the country, like Davis, decide to get serious about conserving energy, and work together to find ways to do that.

At this point, I would like to insert the Times article in the RECORD. Copies of the booklet, "The Davis Experiment," can be obtained by writing to the Elements, 1747 Connecticut Avenue NW., Washington, D.C. 20009. The cost is $2 per copy.

The article follows:

A CITY'S ENERGY-SAVING

(By James Ridgeway)

WASHINGTON.—The small city of Davis, Cal., offers a good example of what a community can do on its own to save energy. With a population of about 33,000 Davis is set amidst the lush farmlands of the northern central valley. It is both the home of a major campus of the state university system and a residency for office workers in nearby Sacramento, the state capital.

When Davis was threatened by suburban sprawl and swarming traffic, the city council 10 years ago moved to limit growth. In 1973, before the Arab oil boycott, residents were troubled by rapidly rising costs of electricity and natural gas; a group of architects, professors and students persuaded the university and city council to support a study of how energy could be properly conserved in Davis buildings, many of which are apartment complexes.

The energy study showed that apartments that faced either East or West were especially hot during the summer and required large amounts of electricity to run air conditioners. In the winter, apartments with South windows needed much less energy for heating than apartments facing in other directions. The survey concluded that natural heating and cooling is obtained with well-ventilated buildings oriented on a North-South axis with maximum glass exposure on the South.

The city council thereupon drew up and approved an ordinance embodying a set of performance standards for building construction aimed at achieving conservation. The code regulates the amount of window area in relation to the floor area. If more glass is desired, then architects must arrange it on the South-facing portions of the building, or employ thermal glass. The amount of unshaded glass is severely limited. The code stipulates that light colors (to better withstand the sun) must be used on the roof, and it included upgraded requirements for insulation.

Plans for new buildings are carefully checked by city officials who put scale models of proposed buildings under a solar simulator. The simulator is a gadget with light bulbs canted at different angles to represent the rays of the sun on different days of the year. In this way you can get a quick idea of whether a proposed building is properly positioned on a lot, whether there is too much glass, whether the glass is properly shaded, and so on.

Since the code took effect last year, Davis has widened its efforts to conserve energy. There are 25,000 bicycles in town, and Davis has built a complex of special paths and set aside lanes on public roads to encourage their use. City Hall maintains its own bike fleet for the use of employees who need to shuttle about on their jobs. Bikes must be registered and youngsters learn how to use them in special courses presented at school by the police department.

To further cut down on use of cars, Davis has a fleet of old London double-decked buses that are run about the city by a student group as a sort of jitney service. Finally, the city itself is getting rid of its big cars and trucks, replacing them with compacts and sub-compacts.

Davis wants to narrow—not widen—its streets and take pains to be sure they are well-shaded. Research has shown that neighborhoods with narrow, shaded streets are 10 degrees cooler in summer than neighborhoods with wide unshaded streets. A citizens committee has made a careful survey of all the trees in the city, and takes care to see that new trees are planted in accordance with a general plan.

Until recently, Davis made heavy use of pesticides for controlling insects on trees and shrubs. Now the city sprays the trees with water, and has introduced biological control for bugs.

The city council has designed different kinds of solar houses as models to encourage builders to formally adopt such houses in major complexes; the model houses will be used as dwellings for migrant farm workers. There are more than 700 swimming pools in Davis, and the city council wants to cut down on energy by forbidding the use of gas or electricity for heating them. Finally, a solemn ordinance endorses the use of "solar dryers" or clotheslines.

By adopting these fairly simple, clear-cut measures, Davis hopes to cut energy consumption by up to 50 percent.

While the details of the Davis experiments in energy conservation are, of course, designed to meet the city's unique needs, the ideas and plans can be helpful elsewhere around the nation. For what the Davis experiments really show is that citizens working through local government actually can have a substantial impact on a major international issue.●

## TRADE AND WEAPONS SALES

### HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. SIKES. Mr. Speaker, my research shows that many nations, particularly among the Arabs, now supplied with Russian weapons, first sought to buy from the United States. They prefer U.S. aircraft and weapons for performance and durability.

In some instances sales were refused to help maintain peace. In others we said they should spend more on internal improvement. The prospective buyers simply went elsewhere. The Russians are knocking on doors worldwide to sell weapons on favorable terms. Our allies in the western world are equally anxious to sell. However, weapons sales offer one of the few opportunities open to the United States to improve our very serious trade deficit. We are falling behind year after year. Weapons sales are accompanied by assignment of technicians and advisors who in themselves can help to improve relations and to encourage dialog between the United States and other nations.

There are obvious benefits to U.S. industry and U.S. workers from increased sales of weapons abroad.

No amount of moralizing can change the fact that Russian and other Communist weapons are immediately available to almost anyone who will accept them. A certain amount of influence accompanies each sale. Weapons sold by

the Russians are more likely to be used against us and our friends than are American weapons.

Better the United States sell them than the Russians. Better that people look to us than the Russians. The number who do is dwindling year by year. ●

## PANAMANIAN POLITICAL CRISIS

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. DORNAN. Mr. Speaker, on August 9, 1978, the official Communist Party newspaper, "Pravda," praised the Republic of Panama for its new policy of "warmer relations" with the U.S.S.R. and the Soviet bloc. The Soviet journal also praised the Torrijos regime for supporting "national liberation" movements in the Third World and the Panamanian advocacy of U.S. abandonment of its naval base at Guantanamo, Cuba.

How well I remember those of us warning that the transfer of the Panama Canal would only be a prelude to Latin Communist agitation for the U.S. surrender of its Cuban naval base. Naturally, those of us who opposed the treaties were dismissed in liberal circles as alramists and jingoists. We were condescendingly reminded that we were no longer living in the age of Teddy Roosevelt and America's Great White Fleet. Our fears, we were told, were borne of our inability to grasp the broader view of modern geopolitics and the higher destiny of the American Republic. We could afford to be generous with a little dictator like Torrijos, we were told. Such a display of generosity was the proper testimony to our new greatness in a greatly changed world.

I am not here, of course, to repeat the litanies that could—easily and cruelly—burn the ears of pro-Canal Treaty Congressmen in this House. I am not, in other words, going to indulge in an orgy of "I told you so" recriminations. But I do think it is worthwhile to sketch, in outline, the character of the current Isthmian political crisis.

The geopolitical reality is this: The anti-American, anti-Western forces, openly backed by Havana (no Communist conspiracy here), are seizing every opportunity to establish bases of political and diplomatic support in the western Caribbean region. In Nicaragua, the Cuban-supported Sandanistas are trying to overthrow the Somoza regime. Whatever its drawbacks, and they are many, it is not clear that the rebels are going to establish a social order that is more open, free, or democratic than that of Somoza's. The one saving grace of rightwing regimes is that they do not aline themselves with an aggressive and expansionist ideological power. A Somoza is not a Castro; and the Nicaraguan troops are not fighting black nationalists in Africa. The outcome, as of today, is not entirely clear. But the regime has thus far had the support of the military.

In Panama, the situation is reversed. The Torrijos regime is supported by the military, or at least a large portion of it, the Cubans, and probably terrorists exiled from embattled Nicaragua. From what I have gathered, the Panamanian political condition is potentially explosive. All the political parties, rallying around the former, democratically elected President Arnulfo Arias, are opposing the Torrijos dictatorship. On August 28, there was a massive demonstration in Panama City by women, carrying pots and pans. The economic situation in this poorly managed political system is still chaotic. As far as I know, this great demonstration received little or no coverage in the U.S. press.

There is another development that is extremely significant. Former President Arias is being protected by segments of the Panamanian Guardia Nacional. This very fact suggests that there may be potentially explosive divisions of loyalty within the National Guard itself. I have no doubt that there are many officers and men in the Panamanian armed forces who, fearing for the future of their country, would favor a change in the government. They realize that the radical leftward position of the Panamanian regime is being consolidated. This fact is confirmed by recent announcements that Torrijos' Minister of Education Aristides Royo, will, in all likelihood, assume the full executive powers of the Republic of Panama in October. Royo is a protege of Escobar Bethancourt, whose sympathies for the Communist enterprise are a matter of historical record.

So the internal national crises will determine the political character of the region. The success or failure of President Somoza in Nicaragua will undoubtedly have a strong impact on the internal politics of Panama. If Somoza holds out against the radical left, there is every possibility that anti-Marxist Panamanian forces will be encouraged to take action against the Torrijos dictatorship. If Cuban-backed Communist forces are successful in Nicaragua, we will see an even hotter pace in Panama's move toward warmer relations with "national liberation" movements. Red terrorists, based in Nicaragua, could join forces with a hostile Panamanian regime in a classic "pincer movement" against Costa Rica. But the ultimate prize, of course, is not Costa Rica. The big stake is the undisputed control over the two, historic canal route sites: Panama and Nicaragua. This control will assure a stronger Cuban hand in the Gulf basin and the Carribbean region in general.

There are internal pressures in Panama which will no doubt be decisive in the shaping of that nation's relations with the United States and the world. Internally, there is a movement to control the education and outlook of Panamanian youth, to consolidate political control over the content of the educational curriculum. Externally there is a clear, unabashed desire on the part of the Torrijos regime to forge new, positive relations with Soviet Russia, now in possession of a powerful, modernized—blue water navy. It is no wonder that the Soviet leadership, sending such a high level functionary as politbureau candidate Vasiliy Zuznietsov, is deeply interested in the future of the Panama Canal.

Mr. Speaker, I am enclosing two relevant documents on the current situation. The first is a letter by a former professor of the University of Panama, Roberto Reyna, on the transformation of Panamanian education. The other is a report from "Matutino", an independent Panamanian newspaper on the recent high level meetings in Bogota, Colombia between Torrijos and Soviet leader Vasili Zuznietsov on the bright future of Soviet-Panamanian relations. I ask my colleagues to give these literary pieces their close attention.

The Documents follow:

Translation (Spanish)

Alert, Head of families
Alert, Consciencious educators
Alert, Attention, free men of Panama

PANAMA, *July 17, 1978.*

Mr. JULIO ORTEGA,
*Radio Mia,*
*Panama City*

DEAR MR. ORTEGA: I would like to discuss in this letter the intervention of a group of officials responsible for guidance, printing and publications of the new text books under the auspices of the Ministry of Education, during today's morning news bulletin of Radio Mia. Here are my remarks:

1. Love through hate. Despite the fact that I am unfamiliar with the books in question, in the "Republica Dominical" of yesterday I read the column "The world needs love," taken from the book "Spanish, the language of my country," and like you, I found it in very bad taste, that to guide a child towards love, they had recurred to hate, with aggravating circumstances which seek to indicate that egoism is rooted in a given social group so that you must feel "compassion, pity or disgust" and not in just any social class.

The eminent Panamanian educator, Professor José Daniel Crespo, told us in one of his psychology classes to a group of future teachers: "Never try to convey a positive message to a child's mind by negative means. Instead of saying to your pupils, 'Don't throw stones at birds,' invite them to place food in small bird houses made by them and put on the branches of trees. A child who does this will never throw stones at a bird and will never allow others to do so."

Unfortunately, from what I hear today, it is a question of breaking with the past, and what I deduce is that the teachings of the famous teachers of the National Institute, the Normal School and the Professional School will become outmoded in the new textbooks.

Who can judge: One of the visitors to Radio Mia today said unequivocally that her group was ready to listen to criticism made of her work by her students, but that they were not inclined to accept opinions about the books given by the parents. This mental attitude requires the following considerations:

a. It is really unbelievable for somebody called "educator," to have such a poor notion of the citizens of this country, and to try to make us believe that immature pupils of what they call the elementary level, without knowledge and experience, have more academic and spiritual acumen about what should be taught to them than their parents, among whom there are professionals, educators, craftsmen, farmers and individuals of all activities. Simply, the children are much easier to deceive.

b. the justification that they advanced for such an absurdity is that since their academic formation is of the old school, with which they are trying to break their children are better qualified than them to decide whether their text books are good or not. This is truly incredible.

I am not trying to say that the school in which so many generations of Panamanians have been educated was perfect. What I can state is that the majority of the teachers were ladies and gentleman incapable of spreading hate, people with minds open to new educational currents of humanity, citizens who taught their students the democratic principles of respect for the opinion of others and who did not fear open discussion of ideas, educators whose pupils left primary school without bitterness and with an academic formation which at least saved them from grammatical errors which we hear on the radio program today.

c. To deny parents, with whose taxes the salaries of those in charge of the texts and of all the educators are paid, the right to have an opinion on the books which are intended to be used for the academic and spiritual formation of their children is an unacceptable and dogmatic kind of authoritarianism which we Panamanians are not used to, and is also a violent attack against the legal provisions of paternal power, as they intend to pass over the parents, undermine their authority and cause conflict between parents and their children, characteristic of totalitarian political systems, and which lead to turning the children into political spies against their own parents. Will Panamanian parents allow this divisive activity?

3. Evasive reply: The reply which was given to you by one of the ladies from the Ministry of Education drew attention negatively when she observed the fact that in one of the texts there appeared a photograph of the commander of the National Guard in thought. The lady in question replied that as they only intended to show that the text books had no Marxist orientation, there was no reason to refer to this fact.

I, who share with you astonishment at the presence of the photograph in question because I do not agree with personal politics interfering in the education of children, I deplore the impolite reply, which I interpret as the result of her incapacity to give a reasonable explanation for that unusual fact without precedents in Panamanian educational history, because it is contrary to elemental norms in any serious and democratic educational system.

I believe, nevertheless, that this fact has a closer relation with the orders of the educational authorities who are making compulsory attendance of primary school pupils to political concentrations which under the name given to it by the military of "domestic patrolling" is currently being carried out by the Commander of the National Guard over all the country.

I congratulate you for your performance today and with my best greetings I remain

Sincerely yours

ROBERTO REYNA R.,

Translation (Spanish)

Source: MATUTINO, (Independent Newspaper), Panama, Wednesday, August 9, 1978

The caption reads: The second of the high dignataries with whom the head of the Panamanian government, Omar Torrijos Herrera, had talks during his visit to Bogotá, Colombia, on the occasion of the transfer of power to the new Colombian President Dr. Julio César Turbay Ayala, was with the first Vice President of the Supreme Soviet of the Soviet Union, Vasily Kusnietsov, behind closed doors. Rogelio Achurra photographed this historical event.

THE MEETING BETWEEN TORRIJOS AND KUZNIETSOV INDICATES THE CHANGES THAT OPERATE IN LATIN AMERICA, SAYS PRAVDA

Bogotá, August 8 (TASS). The head of the Soviet delegation to the inauguration ceremonies of President Julio César Turbay, Vasili V. Kuznietsov, candidate for Political Bureau of the Communist Party of the Soviet Union and Vice President of the Supreme Soviet of the USSR met today with General Omar Torrijos, head of the government of the Republic of Panama. During the meeting, which took place in an atmosphere of friendship, there was an exchange of views concerning the relations between both countries as well as on other problems of interest to both nations.

Moscow, August 8 (TASS). The cooperation between the USSR and other states of the Socialist camp with the emerging countries of Latin America is fully in line with the interest in peace and progress, notes Juli Rusanov in Pravda, commenting on the intention of the Panamanian government to strengthen friendly relations and cooperation with the Socialist states and develop economic ties with them on a mutually beneficial basis.

The initiative of Panama, the commentary emphasizes, is an additional sign of the changes operating in Latin America, whose peoples do not want the U.S. to keep on considering them its fief. The editorialist notes that the desire to establish and strengthen economic, technical, scientific and cultural cooperation with the Socialist world is on the increase in various states of the region.

In the editorial it is said that the states of the Socialist camp base their relations with the emerging countries on a profoundly democratic basis, guided strictly by the principles of compete equality and mutual benefit. "By rigorously complying with these principles well-deserved confidence is gained as reliable partners."

The economic cooperation of the emerging states of Latin America with the countries of the Socialist Camp, the editorialist notes, has been enriched with considerable useful experience and led to positive and concrete results.

Prepared by Phillip Harman, Chairman, Committee for a Free Panama, 2401 H Street, N.W., Washington, D.C. 20037.●

## ARBITRATION VS. BARGAINING

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Friday, September 8, 1978*

● Mr. SIMON. Mr. Speaker, the St. Louis Post-Dispatch recently carried an article by Gerald M. Boyd which pointed out the movement toward more and more compulsory arbitration in settling labor disputes.

I am inserting into the RECORD the article from the Post-Dispatch as well as a column I wrote in May of 1976.

The Post-Dispatch article suggests that some changes are taking place that have not received a great deal of attention. I concur with the reporter's conclusion that these changes are significant.

I hope my colleagues and members of congressional staffs will read the article.

ARBITRATION VS. BARGAINING

(By Gerald M. Boyd)

WASHINGTON.—With trepidation like that of somebody about to leave for a blind date, major unions are rethinking their long-standing opposition to compulsory arbitration to prevent prolonged and devastating strikes.

Thus far, the rethinking among most unions has been little more than an academic exercise, representatives of several major labor organizations have told the Post-Dispatch in interviews. But what organized labor once viewed as a straitjacket around its ability to bargain collectively, is no longer universally scorned.

In fact, some of the stiffest opposition to the use of binding arbitration is coming not from the ranks of the labor movement, but from governmental and management organizations, which argue that it gives labor an unfair edge.

"There is a movement toward compulsory arbitration in those areas where strikes are extremely destructive to the public welfare," said Robert Coulson, president of the American Arbitration Association. "When there is a strike by police or firemen, for example, there is the danger of a serious social breakdown in the community."

Both organized labor and management groups are watching with more than a casual eye the outcome of an eleventh-hour decision here last week that averted a national postal strike. Although the agreement, between Postal Service and union leaders is not being called such, it represents the potential use of binding arbitration to resolve a strike that could have crippled mail delivery nationwide.

Compulsory arbitration was proposed by federal mediators after the membership of two major postal unions rejected a contract that had been negotiated by postal and union officials. It is the first time in recent years that the concept has been offered and agreed to as a last-minute option to an unsuccessful collective bargaining process in a strike with national implications.

Under the compromise procedure, what represents binding arbitration would be used if the two sides failed to reach a settlement within 15 days, during which talks are to be held before a specially appointed mediator. The mediator, James J. Healy, a professor of industrial relations at Harvard University, would then become the arbitrator if a negotiated settlement is not reached.

Under a 1970 congressional law creating the Postal Service, arbitration can be required if labor and management fail to reach an agreement; thus a legal mandate exists for it to be used. But several other examples, in addition to the postal dispute, reflect a growing acceptance of the tactic.

Seven states presently have compulsory arbitration for some state nad local government employees. Six other states have such laws applicable only to fire fighters and policemen. In addition, several cities nationally have also adopted compulsory arbitration for municipal employees.

At least one major union, the United Steelworkers of America, has a contract with major steel companies that calls for the use of compulsory arbitration if an impasse occurs during contract negotiations. Since the agreement has existed, over the last several years, there have been no strikes in the steel industry.

The leadership of the largest union within the AFL–CIO, the American Federation of State, County and Municipal Employees, has supported the use of arbitration in contract disputes that involve public employees working in emergency-care type situations. It also favors arbitration as an option for public employees working in non-emergency type jobs.

"Things are changing somewhat," says John Leach, a spokesman for the union. "I don't know if it is a trend, because I don't think compulsory arbitration is really understood by the public as an alternative. But it is one of the avenues open, if both sides are not willing to bargain in good faith."

The union's statistics would seem to present an argument for the concept, at least in public sector labor disputes. The number of strikes in the public sector declined from a high of about 412 in 1970 to 384 in 1974 as increasingly more states passed laws calling for the use of compulsory arbitration.

Many union leaders and labor experts, however, are quick to note a key distinction. Where it is often viewed favorably among

public sector unions, it is opposed, often strongly, by unions in the private sector.

In 1975, for example, arbitration prompted a major dispute and bruising floor fight at the AFL–CIO convention in San Francisco. The American Federation of State, County and Municipal Employees led efforts to have the AFL–CIO adopt a resolution supporting compulsory arbitration for police and firemen unions, but sharp opposition erupted from representatives of private sector labor groups. The resolution was defeated.

Officially, the AFL–CIO is absolutely opposed to compulsory arbitration, spokesman said. But he pointed out that a distinction is at least being made by the leadership in its use in private sector strikes as compared to labor disputes in the public sector.

George Meany, the head of AFL–CIO, for example, called the agreement that ended the postal impasse "a responsible and sensible decision" and "a common-sense solution to a difficult problem." By agreeing to compulsory arbitration, he said, union leaders had done a solid job of representing their members.

The United Auto Workers union has a similar position, a spokesman said.

"The UAW has always taken a position against compulsory arbitration in private sector bargaining, but I believe it has an open mind in public sector disputes," the spokesman said. "If it can be used to achieve equality for public employees with private sector employees, it can be a healthy thing."

Only one major private sector union, the United Steelworkers, now has an agreement that calls for compulsory arbitration if a negotiated settlement cannot be reached. Two contracts that have been decided since it went into effect were arrived at by negotiation, so arbitration was not necessary.

"Because of good faith bargaining, it has not been necessary to test it," said Robert Moffet, a union spokesman in Pittsburgh. "Our position is that we are not wedded to the arrangement; the first time it doesn't satisfy our people we will probably dispose of it."

But Moffet said the fact that arbitration was available if a negotiation faltered, has been one reason behind the successful bargaining. And he said that under the arrangement union members have been the recipients of good contracts.

Recent statistics by the Labor Department, for example, show that four types of employees represented by the United Steelworkers have obtained recent wage increases substantially above the inflation rate. And the wage increase for steelworkers represented the highest salary gain in the 12-month period that ended on March 31.

Labor officials say that the compulsory arbitration agreement, as an aid to bargaining, has benefited both the steelworkers, by resulting in favorable contracts, and the steel industry, by alleviating strikes. But because no dispute has ever gone to arbitration, they add, no track record exists to gauge the agreement's effectiveness.

"In private sector employment, where the employer normally has an overwhelmingly strong economic advantage, he usually is not willing to have an impartial arbitrator dictating wages, hours and working conditions," said Howard Coughlin, board chairman of the American Arbitration Association. "The same is true when the union is very strong, and it will normally refuse, too, to agree to arbitration."

But perhaps the strongest, or at least the most vocal, opponents of binding arbitration are not unions, but local elected officials. Public sector groups adamantly opposed include the National League of Cities, the United States Conference of Mayors, the National Governor's Conference and the National Association of Counties.

"What we are finding is that cities now have a great concern about compulsory arbitration," said Allan Beals, the executive director of the National League of Cities. "There is a willingness developing to waive a position opposing strikes by public employees to give local officials the right to bargain. That trend is significant."

Last week, Beal and several organization officials met with a selected group of reporters in an effort to publicize their objectives to arbitration. At the same time, he said, the group is gearing its drive to several other levels, such as intervening in court challenges to state and local laws legalizing arbitration, he said.

In one instance, for example, it intervened in a Connecticut case now before the state Supreme Court in which a lower court held that binding arbitration was illegal because it denied decisionmaking by elected officials. That ruling, Beal said, supported the group's argument that arbitration destroys collective bargaining, not enhances it.

"A lot of people believe in collective bargaining, but binding arbitration is eating at the very foundation of collective bargaining and is forcing people to abandon it for a gamble on a strike," he said. "What happens is that both sides submit extremes to an arbitrator and he normally rules somewhere in the middle. That destroys collective bargaining."

One case Beal cites is in the city of Livonia, Mich., where an arbitrator decided in favor of the firemen's union in a dispute that lasted about 18 months. The ruling, said the city's mayor, meant the city had to ask voters to approve a $1.3 million tax increase to pay increased salary and fringe benefits firemen received, a precarious position for local officials in light of resistence nationally to tax increases.

Edward H. McNamara, the city's mayor, says compulsory arbitration dilutes local officials' control of tax rates and muddies their accountability and responsibility to the public.

McNamara heads the League of Cities labor relations committee, which has been attempting to help cities handle better compulsory arbitration. He said that about 60 percent of the cases nationally involving contract disputes that have gone to arbitration have been decided in favor of the labor organizations and not local officials.

McNamara said that had voters not approved the tax increase in August, he has no idea how the arbitrator-mandated settlement would have been met.

But Leach, of the American Federation of State, County and Municipal Employees, said that victories for unions reflect the fact that the public employees unions probably have a more responsible position than the local officials.

Leach cited a recent study of binding arbitration financed by the Department of Labor that concluded that arbitration is emerging as a politically acceptable means of resolving impasses. The study said that it had not had an adverse effect thus far on the collective bargaining process.

"It's very popular now to beat up on public employees," he said. "Officials are willing to take a strike and blame public employees so they can say that they are being responsible with the city's money; they never address the issue of whether a need exists."

Officially the Carter Administration does not have a public position on binding arbitration, a Labor Department spokesman said. Large management type organizations, however, generally are opposed to it, several labor experts said.

"Our policy and practice are strongly opposed to it, primarily because it involves having an outsider not familiar with working conditions settling disputes," said Randolph Hale, who works for the National Association of Manufacturers.

Another criticism expressed by several officials is that the public generally opposes arbitration and shows that position when given an opportunity. Several cited voters' rejection of a proposal which would have mandated compulsory bargaining in Dayton, Ohio.

Last June Dayton voters defeated a charter amendment for the proposal, 21,103 to 12,009. City officials, with several community and business organizations, had waged a strong campaign against adoption, arguing that it would interfere with the ability of local officials to bargain effectively. Although the defeat meant that the 390-member fire union still maintained the ability to bargain collectively, it could not place a contract impasse before an arbitrator.

---

### Alternatives to National Strikes

(By Congressman Paul Simon)

The brief Teamsters strike a few weeks ago brings into focus a problem that the laws of the United States don't adequately face, and probably will not face for some time. But if we wait until a crisis situation develops we may make some bad judgments.

The United States economy is so interdependent, so intertwined, that a lengthy nation-wide strike of the Teamsters or the Auto Workers or the Steelworkers or a number of other unions would bring the national economy to a halt.

Then, in an emotional atmosphere, we might pass some radical legislation rather than sensible legislation.

The President now has the power to postpone a strike, through the Taft-Hartley Act provisions, but after a period a strike may continue.

One alternative some have suggested is to have special labor-management courts, with power to make some determinations both as to corporate profits and labor wages in any extreme situations which might be referred to the special courts by the President.

Proponents of this idea hope that both labor and management would increasingly find these labor-management courts fair, and would refer their disputes to such courts, without the necessity of presidential action.

Germany has another interesting alternative.

By law, Germany requires labor leaders to sit on the boards of directors of the large corporations; and since the labor representatives are involved in the decision-making, strikes as we know them are rare.

Volkswagen is a good example.

Seven of the 21 votes on the VW board are labor votes. Labor representatives are involved in all of the major decisions of the company. The union there is the Metal Workers Union, the largest in West Germany.

There has not been a nation-wide strike in the 30-year history of this union.

Recently, when there had to be a substantial layoff of workers because of the recession and decreasing car sales, union representatives on the board helped to make the decisions as to how many layoffs and how they would take place.

There are both management and union people in the United States who don't like the German idea.

I do.

It makes both union leaders and management personnel more realistic and more understanding of the problems the other side faces.

Germans call it "co-determination."

The United States has had remarkably little strike difficulty during the past few years, and one of the finest long-range pacts has been signed for the steel industry.

But whenever a strike occurs, it means loss of wages, loss of profits and loss of productivity.

I believe we should take a good, serious look at the German idea of co-determination.●

# SENATE—*Monday, September 11, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the Vice President.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty and ever-living God, who has made of one blood all peoples to dwell upon this Earth, Thou hast made us for Thyself, and our hearts are restless until they rest in Thee. As Thou hast taught us to pray without ceasing, so unite us heart to heart, mind to mind, soul to soul with all who are in quest for justice and righteousness, especially those who have ascended to the summit of high peaceful purpose. Grant wisdom and courage to those in whom so many have placed their trust and their hope.

Show us once more that man is the highest order of creation and that people are of greater value than land or heritage. Give us grace and wisdom to know and to do Thy will in this place that we may have a part in moving forward Thy coming kingdom.

We pray in His name who rules above all men and all nations. Amen.

## RECOGNITION OF LEADERSHIP

The VICE PRESIDENT. The Senator from West Virginia is recognized.

## THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The VICE PRESIDENT. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 o'clock tomorrow morning.

The VICE PRESIDENT. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield 5 minutes of my allotted time under the standing order to the Senator from Texas (Mr. BENTSEN).

Mr. BENTSEN. I thank the distinguished majority leader.

## SALT II

Mr. BENTSEN. Mr. President, on June 28, I addressed the Senate on some of my concerns regarding the SALT II negotiations. I suggested at the time that, like it or not, diplomatic "linkage" would be a major factor in Senate consideration of SALT II for the simple reason that there can be no such thing as a sound agreement with an aggressive partner seeking to exploit every advantage and widen every loophole.

The record of past Soviet performance on SALT I and current Soviet adventurism make it apparent that adequate verification procedures are absolutely essential to any acceptable SALT II treaty. If we cannot trust the Soviets, clearly we must be able to tell when they are cheating, particularly on an issue as important as strategic arms limitations.

Furthermore, we cannot permit a SALT II agreement, no matter how sound or verifiable, to serve as a maginot line in our strategic posture. The Soviets clearly have the will, and may well have the capacity, to outflank any such agreement by aggressively exploiting opportunities for confrontation throughout the world, using conventional means.

Obviously Mr. President, no Member of this body is in a position to pass final judgment on a SALT II agreement that does not yet exist. I believe, however, that there is some merit in raising and discussing fundamental issues pertaining to SALT; issues that will inevitably bear on the question of Senate ratification regardless of the final form the treaty may take.

There are two aspects of SALT that currently cause me some disquiet. The first is the necessity of preserving MAPS in the forthcoming SALT II treaty—MAPS is the concept that we can confound a Soviet first strike against our Minuteman sites by digging more silos than we have missiles. The second issue is our general perception of arms limitations agreements over the years and the aura of inevitability that has developed around SALT II.

The faddishness and jargon of the arms control dialog would be amusing if the topic were not so important. Clearly, the latest vogue in the ongoing debate about SALT II is the multiple aim point system, or MAPS. The same concept is also referred to with the acronym of ALPS—alternate launch point system. MAPS or ALPS, the notion is identical and disarmingly simple. It is almost as if a talented layman were introduced into the arms control debate.

I am neither qualified nor inclined to deliver a long address on the pros and cons of MAPS. Certain elements of the problem and the proposed remedy are, however, beyond dispute.

We currently have a substantial number of ICBM's, mostly Minuteman III, targeted at the Soviet Union in hardened positions. This land-based missile force constitutes one element of our triad. There is substantial agreement within the brotherhood of strategic analysts that the Soviet Union will, by the early to mid-1980's, have the capability of destroying the majority of our Minuteman force without substantially depleting their own missile inventory. This situation will exist whether or not the SALT II treaty is signed in its current form, and it is not a comforting thought.

With these factors in mind, two questions immediately occur. What options are available to us, within and beyond the constraints of SALT II, to protect our land-based missile system? What purpose is this system intended to serve?

In regard to the first question, we could program, fund, and build a mobile missile system, the much-heralded, hotly debated and highly expensive MX. That is one option, and SALT II would not be an impediment. It has been deliberately delayed by the administration, and is scheduled to be operational in 1986, after the treaty expires.

The MAPS/ALPS multiple silo approach provides a second, theoretically less costly option for enhanced survivability, because it utilizes the existing Minuteman III. Our missiles are vulnerable because they exist in finite numbers; the Soviets know where they are; they can land a warhead close enough to take them out; and they will have sufficient warheads to do the job.

Let me just add parenthetically that I have always been a little puzzled by the notion that our ICBMs could be eliminated in their silos because I had always assumed that, even in the case of a Soviet first strike, we would have sufficient warning time to get our missiles up and off. But let us assume for the sake of argument that this launch-on-warning option is rejected.

Under the MAPS/ALPS approach, we simply diffuse about 250 of our missiles over a much greater number of holes, or launch points. They become safer because the Soviets do not know at any given instant which of up to 5,000 new holes has the missile and because they lack the means to attack all the launch points. Multiple silos should theoretically curb the Soviet appetite for a first strike and virtually assure the survival of at least a significant part of our minuteman force in any contingency.

At the very least, Mr. President, this is a clever idea. I would be hard-pressed to demonstrate why it would not work.

True, the multiple silo concept raises some very significant and difficult questions. It complicates verifiability, which is a critical aspect of SALT II. We would, in effect, set out to make it impossible for the Soviet Union to determine where our missiles are. We would make each silo look as if it contained a missle, a conscious effort at deception. We would make it more difficult for the Soviets to determine if we were cheating on the upper limit of missiles, assuming that

they lack the capacity to detect new missile production in this country.

Resort to the multiple silo approach would also invite the Soviets to follow suit, creating new verification problems for us and raising similar concerns about total numbers of missiles.

Considerations of this nature are important. They deserve to be addressed. But the option is also important. It deserves to be preserved. We gave up the B–1 bomber and got nothing in return. We are treading water on the neutron bomb, again with no reciprocal concession in sight. We have terminated minuteman III production and delayed MX and have production delays with Trident. I do not think we can gratuitously afford to scrap the multiple silo concept, and I am pleased to see Secretary Brown and ACDA Director Warnke agree with this position. They are insisting that the option to deploy a MAPS be preserved in a SALT II treaty.

One of the most intriguing aspects of the MAPS debate is the fact that it drives the Soviets up the wall. Pravda is indignant. They do not like it one bit.

Perhaps we should pause for a moment and attempt to determine why the Soviet Union is so clearly and strongly opposed to multiple silos, particularly when we do not deny their right to deploy the same system.

It takes no great strategic genius to divine the reasons for this protest. The reason is simple. The Soviets are acknowledging that they do not want to sacrifice their perceived ability to destroy our land-based missiles in a first strike.

I do not want the Soviet Union, even in a worse case hypothesis, to have that capability. I do not think we should permit it to exist. One way to circumvent it is to deploy a MAPS.

There may be some other, more arcane, or more legitimate reason for strong Soviet objections to multiple silos. If it exists, I would like to know what it is. In the absence of any such information, I must assume that the Soviets object for the reason stated.

I alluded earlier to a second question on MAPS/ALPS: What is the purpose of our land-based missile system? It should by now be apparent to even a neophyte in the field of arms limitations that we lack the capacity to take out the Soviet land-based missile force in a first strike with our Minuteman force. That is not the goal nor the purpose of Minuteman. Our land-based missiles serve only to deter a Soviet first strike; they are an element of our potential response to any such initiative. They do not, however, represent a significant first strike threat to the Soviet ICBM's.

Where, I ask, is the symmetry in an agreement that acknowledges the Soviet potential to wipe out our land-based missiles while denying us a reciprocal ability to provide for our own ICBM survivability? Clearly, this Nation must demand the creative latitude to take passive measures to protect this essential element of the triad.

If the Soviets want to dig more silos, more power to them. They are welcome to do so. We have no illusions about our ability to target and destroy their missile force now or in the future. If they want to double their invulnerability, that is their option. We simply seek to preserve ours in the face of a very real and legitimate threat.

I am not prepared at this stage to stand before the Senate and argue that an ability to deploy a multiple silo system is essential to our national security. I do not suggest that MAPS/ALPS is the only, or necessarily the best way to safeguard our land-based missile system.

I do, however, submit that our Minuteman force must be protected and must remain invincible to a Soviet first strike. If it can be demonstrated that the MAPS approach is the most efficient, least expensive means to make that system survivable, then I for one would be extremely skeptical of any SALT II agreement that impinged on our right to exercise this option.

What I am saying, Mr. President, is let us not discard this option until we determine whether it can serve our national interests. Let us not give it away for nothing. Let us weigh the multiple silos proposal on its merits, independent of SALT, independent of Soviet objections. Multiple silos are not a menace to the Soviet Union; they merely deny the Soviets the ability to destroy our land-based missile force in a first strike.

I am somewhat reluctant to make the point, but we must understand that there comes a point at which no SALT II agreement is preferable to an ambiguous, weak, or dangerous agreement. There is a limit to the concessions we can make on the altar of strategic arms limitation, and we are fast approaching that limit.

We have been engaged in the business of trying to brake our arms race with the Soviets for the past 15 years. During this time there have been a number of "successes." Agreements that have imparted momentum to the process and gradually created a sense of euphoria in the American public.

Now any reasonable person, Mr. President, would support the notion of arms limitation and reduction provided it does not pose a threat to our national security.

What concerns me, however, is that the American public has come to accept the notion that we are winding down our Union. Disarmament, it seems, is just around the corner.

We believe this for two reasons: Because we want to believe it, and because our fondest hopes have been reinforced by a series of pacts successfully marketed as significant steps on the road to an end of the arms race and—eventually—to a relaxation of the balance of terror that rules the world.

During the past 15 years we have become so committed to the concept of arms control limitation that I shudder to think how we might react if the process does not continue. What happens if we cannot negotiate a successful SALT II agreement with the Soviet Union? Are we prepared to accept an unsafe, inadequate agreement on the basis that it is better than no agreement at all; the best that the situation will permit? Are we prepared, as a nation, to accept the consequences of failure to agree with our traditional adversary on the issue of arms control? Do we, really and honestly, have any option but to conclude a SALT II agreement with the Soviet Union?

Fifteen years ago we set out on the path of arms limitation with the Soviet Union with conclusion of the limited test ban treaty, the first, tentative step back from the cold war policy of confrontation. At that time, so soon after the Cuban missile crisis, we were clearly and unequivocally superior to the Soviet Union in nuclear weaponry; we held a clear strategic advantage.

Today that is obviously no longer the case. We seek to preserve a position of "parity" and avoid a situation of outright inferiority.

I do not suggest that our slide from superiority to precarious parity is entirely a function of the era of arms control. Obviously, it is not. The United States has exercised unilateral restraint in deploying new ICBM and SLBM launchers since 1967, and our strategic budget has declined since 1963.

But I suggest that, having accepted and embraced the notion of arms control/limitation, we were better able to look with equanimity on the notion of parity. A security posture "second to none" became good enough. We accepted the inevitability of a Soviet Union as powerful and as advanced as the United States.

What bothers me, Mr. President, is the lingering suspicion that the Soviet Union might just see things a little differently. One does not have to be an expert in trend lines and force analysis to conclude that, during the past 15 years. the Soviets have been winning the race for strategic superiority. They have the momentum going their way.

The whole purpose of SALT II, of course, is to stabilize this process at rough equilibrium. To establish limits that insure essential parity. But the spirit of SALT II is as important as the letter of agreement. It is important to understand that there is no fat, no margin for error or miscalculation, in a U.S. position of parity.

The United States has available a number of options that could restore to this Nation a position of strategic superiority. They include the cruise missile, the B–1 bomber, and the multiple silo approach or MX missile. Most are expensive options, both in terms of cost and in terms of what they would do to the cherished notion of arms control/limitation. I think it is safe to assume that we can no longer have arms control and a position of strategic superiority. The Soviets will not permit it, and their attitude is probably understandable.

If we forsake superiority and opt for parity together with a welcome element of control, I must be convinced that our partners in the negotiations are not lead-

ing us down the garden path. Otherwise we might be deceived into accepting inferiority.

With every arms limitation agreement—the LTBT, the SALT I ABM Treaty, SALT I interim agreement, the Vladivostok aide memoire—the Soviets have continued to gain on us. What assurance do we have that SALT II will put an end to this historical progression and stabilize the balance of forces? What sign, what indication, do we have from the Soviets that they will be satisfied with parity? How do we know that they are not using arms limitations talks as a smokescreen to mask a drive toward superiority?

The answer, Mr. President, is that we have no such assurance. We just do not know. We are asked instead to credit the Soviets with honorable intentions, and that is no mean task on an issue this important. Their record of questionable compliance with the SALT I agreements alone should warn us that they may have more sinister intentions.

Perhaps the time has come to disabuse ourselves of the notion that a SALT II agreement is inevitable and inherently desirable. In a recent SALT paper circulated by the State Department the point is made that—

> The choice the United States now faces is between a good agreement protecting and enhancing our national security, and no agreement at all. It is against this standard that what has been achieved at SALT should be measured—not against some ideal agreement that as a practical matter, given the relationship between the two countries, cannot be concluded at this time.

I am bothered by this distinction between a good and an ideal agreement. It would seem to me that an agreement that truly protects and enhances our national security would be ideal. If it pretty much protects our national security, if it protects as well as it is possible to protect in the context of SALT, if there are gaps in this protection, then the agreement is not good at all. We should not accept negotiated risks to our national survival as inevitable. If it is simply the best we can do, then I am not prepared to accept that standard when it comes to national security; I do not think the Senate is prepared to accept it, and I do not think the American people will accept it.

The United States of America has clearly demonstrated its abiding commitment to arms control by unilaterally allowing itself to move from a position of superiority to a position of parity. The Soviets have yet to demonstrate a reciprocal commitment. It is now the turn of the Soviets to display good faith, to cease exploiting every loophole in existing arms control agreements, to cut back on their awesome increase in strategic capability, to accept the notion that we have the right to insure the survival or our land-based missiles—in short, Mr. President, to demonstrate that they are prepared to stop at parity and reach a truly equitable SALT II treaty.

In the absence of positive indications of good will from the Soviet Union, in the absence of positive indications of a commitment to parity and mutual deterrence, it is going to be difficult indeed for the U.S. Senate to approve any SALT II agreement.

(Mr. LEAHY assumed the chair.)

Mr. ROBERT C. BYRD. Mr. President, I understand Mr. SPARKMAN has a conference report he wishes to call up, and it will only take 3 or 4 minutes.

I yield to him time on my time under the order for that purpose.

Is that all right with the acting Republican leader?

Mr. STEVENS. Mr. President, it is all right with me.

## INTERNATIONAL SECURITY ASSISTANCE ACT OF 1978—CONFERENCE REPORT

Mr. SPARKMAN. Mr. President, I submit a report of the committee of conference on S. 3075 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. METZENBAUM). The report will be stated.

The assistant legislative clerk read as follows:

> The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3075) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of September 7, 1978.)

Mr. SPARKMAN. Mr. President, Senate and House conferees met on August 10, 14, and 15 to consider the International Security Assistance Act of 1978. The committee of conference recommends a fiscal year 1979 authorization of $2,817,500,000 for seven security assistance programs.

Mr. President, I ask unanimous consent that a table reflecting the executive request, the Senate recommendation, the House recommendation, and the conference agreement for funding of seven security assistance programs be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[In millions of dollars]

| | Executive request | Senate recommendation | House recommendation | Conference agreement |
|---|---|---|---|---|
| Grant military assistance | 133.5 | 133.5 | 163.5 | 133.5 |
| Grant international military education and training | 32.1 | 31.8 | 32.1 | 31.8 |
| Foriegn military sales (FMS) credits | 674.3 | 677.8 | 674.3 | 674.3 |
| FMS aggregate ceiling [1] | [1] (2,085.5) | [1] (2,120.2) | [1] (2,085.5) | [1] (2,085.5) |
| Subtotal, military assistance and sales program | 839.9 | 843.1 | 869.9 | 839.6 |
| Peacekeeping operations | | | 29.4 | 30.9 |
| Middle East Special Requirements Fund | [2] (5.0) | 5.0 | [3] (2.0) | [4] (3.5) |
| Sinai Support Mission | [2] (11.7) | 11.7 | [3] (11.7) | [3] (11.7) |
| U.N. Forces in Cyprus | [2] (8.7) | 8.7 | [3] (8.7) | [3] (8.7) |
| Spain | [2] (7.0) | 7.0 | [3] (7.0) | [3] (7.0) |
| Subtotal, peackeeping operations | [2] 32.4 | 32.4 | 29.4 | 30.9 |
| Economic Support Fund | [2] 1,872.0 | 1,932.0 | [5] 50.0 | 1,902.0 |
| Contingency Fund | 5.0 | 2.5 | 10.0 | 5.0 |
| International Narcotics Control | 40.0 | 40.0 | 40.0 | 40.0 |
| Total | 2,789.3 | 2,850.0 | 999.3 [6] (2,854.3) | 2,817.5 |

[1] The FMS aggregate ceiling represents the total program which could be funded under FMS credit authorization. The aggregate ceiling is not an authorization of funds for appropriation.
[2] Requested under the Security Supporting Assistance account.
[3] Included in the general peacekeeping operations assistance authorization, but no line item authorization made.
[4] Earmarked under the Peacekeeping Operations account.
[5] Only $50,000,000 (for Turkey) of the Economic Support Fund was authorized in the House amendment. An additional $1,855,000,000 was authorized in the International Development and Food Assistance Act of 1978 (H.R. 12222).
[6] Total including $1,855,000,000 authorized for an Economic Support Fund in H.R. 12222.

Mr. SPARKMAN. Mr. President, the authorization of appropriations agreed upon in conference is $32.5 million less than the authorization contained in the Senate bill and $28.2 million more than the authorization requested by the President. The conference bill provides $1,785,000,000 in economic aid and military credits for Israel and $750,000,000 in economic aid for Egypt, as requested by the President.

In addition to these authorizations, the committee of conference reached agreement on all policy issues, including repeal of the arms embargo on Turkey, economic sanctions on Rhodesia, troop withdrawal from Korea, conventional arms exports, and the economic support fund.

First. Repeal of the arms embargo on Turkey. The Senate bill repealed the arms embargo on Turkey, made policy statements regarding Cyprus, and required special Presidential certifications to accompany future economic and military aid requests for Greece, Cyprus, and Turkey. The House bill contained similar policy language and provided

that the arms embargo would have no further force and effect if the President made certain determinations. The conferees adopted the House version with an amendment containing some of the Senate's policy language. The action clearly constitutes a de facto repeal of the arms embargo and has the support of the President. The conferees also agreed to provide Greece with $35 million in grant military aid and $140 million in military credits. Turkey will receive $175 million in military credits and $50 million in economic aid.

Second. Sanctions against Rhodesia. The Senate bill required the President to lift sanctions against Rhodesia until fiscal year 1980 if determinations were made concerning Rhodesia's participation in an all-parties conference and installation of a freely elected government. The House bill permanently lifted sanctions after calendar year 1978 unless the President determined that a freely elected government had not been installed in Rhodesia. The conferees adopted a compromise version which retains the basic intent of the Senate bill. Sanctions would be lifted permanently only if the President makes certain determinations about Rhodesia's willingness to negotiate at an all-parties conference and to install a freely elected government. The conference report contains the details of the determinations.

Third. Compensation for troop withdrawal from Korea. The conferees adopted a compromise provision authorizing the President to transfer defense articles and services to South Korea in conjunction with U.S. ground troop withdrawal. The conferees also accepted the sense of the Congress statement that further withdrawal of U.S. ground forces may seriously risk upsetting the military balance in the region and requires full advance consultation with the Congress. Detailed reports are required 120 days prior to each phase of troop withdrawal.

Fourth. Arms transfer policy. The conferees accepted a number of modified Senate provisions on arms transfer policy including requirements for an annual arms sale proposal, reports on defense requirements surveys, and a policy statement on multilateral arms export restraint. The conferees also accepted provisions clairfying existing human rights language.

Fifth. Economic support fund. The conferees accepted Senate provisions creating an economic support fund as a successor to the security supporting assistance program. The fund would emphasize economic development. Peacekeeping programs would be authorized under a separate title.

Mr. President, I believe that this conference report represents a fine effort to bring together the best of both the Senate and the House bills. The administration generally supports the conference report. I urge its passage. I move the adoption of the conference report on the International Security Assistance Act of 1978 (S. 3075).

● Mr. CASE. Mr. President, the conference report on the security supporting assistance bill pretty much speaks for itself. I wish, however, to call attention to a section which is not in the conference report, because it was dropped by the conference committee.

Recent events make it worth pointing the section out to Members in the hope and expectation that work will continue on the matter.

I refer to the problem of giving adequate and thorough consideration to the export of equipment and technology which could have a political and military implication. The recent dispute over the sale of sophisticated drill bits to the Soviet Union illustrates that some of the problems still exist.

I recall to my colleagues that the original version of S. 3075, which passed the Senate on July 26, contained section 29, a modification by Senator STEVENSON of my amendment intended to assure an adequate review by the Secretary of State of commercial sales which might have a political and economic significance.

My amendment to S. 3075 sought to clarify the intent of Congress with respect to exports which could be damaging to U.S. foreign policy and national security interests.

While the provision was not too different from current authority, it did provide for a State Department review during a 30-day period. It also permitted the appropriate Federal agency to review the transaction.

Mr. President, I ask unanimous consent that a copy of my amendment be inserted at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

SEC. 29. Section 4 of the Export Administration Act of 1969, as amended, is amended by adding at the end thereof the following new subsection:

"(m)(1) With respect to any country engaged in activities which are detrimental to important political/military interests of the United States, any item which could have direct military application and could significantly assist such activities shall be approved for export by the Secretary of Commerce only pursuant to a validated export license.

"(2) The Secretary of Commerce shall determine, in consultation with the Secretary of State, the types of transactions which shall be reviewed by the Secretary of State to carry out the purposes of this subsection. The Secretary of State shall have thirty calendar days to conduct the reviews referred to in this subsection and at the end of such period of time shall state his recommendation or his reasons for not making a recommendation.

"(3) The provisions of this subsection shall not apply with respect to countries which are members of the North Atlantic Treaty Organization, or to Japan, Australia or New Zealand.

"(4) The provisions of this subsection shall not apply with respect to any agricultural commodity, including fats and oils or animal hides or skins.".

Mr. CASE. The amendment met with the immediate opposition of industry and the State Department. A spokesman for the Department said that while the amendment would limit the flexibility of the executive branch, it would enforce greater discipline upon the Department in expediting export approvals.

While the legislation was under consideration on the floor of the Senate, Senator STEVENSON wrote a letter to Senator PERCY, a member of the Senate Foreign Relations Committee, seeking the withdrawal of the amendment. At the same time, Senator STEVENSON promised that his Banking Subcommittee on International Finance would begin hearings on export controls this fall as part of the extension of the Export Administration Act of 1969.

Mr. President, I ask unanimous consent that a copy of Senator STEVENSON's letter to Senator PERCY be inserted at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
*August 10, 1978.*

Hon. CHARLES H. PERCY,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR PERCY: I understand that when the conference committee meets on S. 3075, the International Security Assistance Act of 1978, the Senate conferees may move to recede to the House with respect to section 29 of the bill as passed by the Senate. Section 29 would amend the Export Administration Act to clarify the intent of Congress that exports which could be damaging to U.S. foreign policy and security interests be screened by the appropriate departments of the Federal Government before the transaction is completed. The House version contains no similar provision.

As I stated when I offered the language of section 29 as a floor amendment, export controls for political and national security as well as economic reasons will receive thorough study next year by the Committee on Banking, Housing and Urban Affairs which has jurisdiction over the Export Administration Act and the subject of exports controls generally.

As you know, that Act must be reviewed and extended next year because it would otherwise expire September 30, 1979. The Subcommittee on International Finance, which I chair, will begin hearings on export controls this fall. Accordingly, should the conferees decide to delete section 29 from S. 3075, I will not oppose such action.

With best wishes,
Sincerely,

ADLAI E. STEVENSON.

Mr. CASE. I understand that hearings have since been scheduled for the full Banking, Housing, and Urban Affairs Committee, chaired by Senator PROXMIRE. This committee, which has jurisdiction over export controls, is to begin those hearings September 21.

Mr. President, I cite my amendment and the subsequent turn of events in view of the Carter administration's approval of the sale of a drill bit factory to the Soviet Union.

As you may recall, Dresser Industries of Dallas, Tex., had sought approval from the Commerce Department to supply the Soviet Union with technology

and equipment to build its own plant to manufacture oil field drilling bits.

Part of the overall deal is a $1 million electron-beam welding machine which purportedly has direct military application in the production of armor piercing shells.

Most of the licenses for this $144 million deal—a transaction which is regarded as one of the largest United States-Soviet deals in recent years—had been approved May 30.

Then in the wake of human rights violations in the Soviet Union, including the imposition of prison sentences against dissidents, President Carter in mid-July ordered a review of all oil technology exports to the Soviet Union.

By August, however, no one reportedly had told the President's national security affairs adviser, Zbigniew Brzezinski, and Energy Secretary James Schlesinger that a Presidential go-ahead had been given to the Commerce Department to approve the rest of the project, which included the electron-beam welding machine. They purportedly learned of the resumption of the deal through the press.

After Schlesinger and Brzezinski raised strenuous protest over the sale, the Defense Department reconsiderd its position and opposed the sale.

Schlesinger and Brzezinski reportedly pressed for an independent review of the disputed licenses and the Defense Department's Defense Science Board undertook the study.

These events raise questions surrounding review procedures on the sale of equipment which may have national security application.

But it has happened before.

Earlier this year, American Motors Corp. announced the construction of a factory outside Cairo to manufacture so-called utility vehicles. That really meant jeeps.

The sale was approved by the Commerce and State Departments. What was not known to the Congress at the time was a classified document from State to the Commerce Department which, I am informed, indicated that the location of the factory would be next to a factory to build British Swingfire antitank missiles. It now is our information that these missiles are to be mounted on the jeeps, making them a highly versatile long-range weapon.

What seemingly appears to be an innocuous sale, Mr. President, turns out to be a new weapons system which increases the arms race while bypassing the congressional review procedure.

A similar development arose earlier this year when the Commerce Department approved the sale to Libya of 400 heavy duty trucks—suitable for tank transports.

The company, in Oshkosh, Wis., had been warned that there would be problems with that sale, but they went ahead with the contract signing anyway. The sale was ultimately turned down.

Mr. President, I cite these incidents not to rake over not-so-ancient history but to point out that there is a need to improve the review procedures for exports of items and equipment which have a direct or indirect military use. It may be that there are reasons for letting most of the proposed sales go through. But there are times when our national interests are best served by stopping or delaying such sales.

These decisions are not always clear-cut and seldom are easy. But it is important that the decisionmaking process be thorough and that all the various sections of the Government which should be involved in the process are fully consulted.

In the most recent case, that of the sophisticated drill bits, I and many of my colleagues believe that this is not the time to go ahead with the sale. The decision to go ahead was disturbing. But equally disturbing was the way it was handled.

I am glad, therefore, that the matter of review procedures will be taken up by the Senate Banking Committee.

It is important, too, that the Committees on Foreign Relations and Banking continue efforts to improve those procedures.●

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. SPARKMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## PRIVILEGE OF THE FLOOR

Mr. STEVENS. Mr. President, I ask unanimous consent that Patricia Bennett, of my staff, be accorded the privilege of the floor during consideration of the conference report on the natural gas bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Erich Evered, of my staff, and Fred Craft and Danny Boggs, of the minority staff, be accorded the privilege of the floor during the vote and consideration of the conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. CANNON. Mr. President, I ask unanimous consent that Frankie Sue Del Papa and Bruce Eggers, of my staff, be accorded the privilege of the floor during consideration of the natural gas conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECOGNITION OF LEADERSHIP

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, there is no request for the minority leader's time. Therefore, I yield back the remainder of the minority leader's time.

## SPECIAL ORDER

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes.

## UNCLE SAM'S TWO FATTEST WELFARE APPLICANTS—GENERAL DYNAMICS AND LITTON

Mr. PROXMIRE. Mr. President, last Friday I submitted resolutions of disapproval for the two proposals to bail out the giant Navy shipbuilders, General Dynamics and Litton. Under the terms of Public Law 85–804, either House of Congress has 60 days to disapprove use of Public Law 85–804 or else the proposed action will go into effect. That 60 days expires in about 1 week.

Without passage of this resolution or disapproval, General Dynamics and Litton will become the two fattest welfare recipients in this country.

As the author of the 60-day provision, along with the Senator from Virginia (Mr. HARRY F. BYRD, JR.) I can assert in unqualified terms that its purpose was to grant authority to Congress to act in extraordinary circumstances. The conditions are simple—there must be a large amount of money—public funds—at stake. While the legislation calls for congressional participation anytime the amount is over $25 million, the present case involves $931 million for two claims of which $541 million is in excess of what was substantiated by the Navy's own claims review process.

When I introduced this legislation, it had incorporated within its provision certain requirements which would make it certain that any controversial matter would come to a vote. There was an antifilibuster provision, for example. However, due to the request from the majority leader, this language was stricken. Senator Symington, then acting chairman of the Armed Services Committee, indicated that he thought these controversial subjects should be brought to the Senate for a vote. He wrote me a letter stating that he had instructed the staff of the committee to inform the authors of the amendment when the use of Public Law 85–804 was contemplated. He also said that he would work with me to insure votes on such matters. Given that assurance, I struck the antifilibuster and automatic vote provisions from the legislation and it was passed.

Perhaps I was too trusting for today we have a circumstance where it is possible that these resolutions of disapproval will be bottled up in the Armed Services Committee and not allowed to come to the floor for a vote.

I withheld offering these resolutions so that the committee could hold hearings and gather the facts. It seemed that this was the proper thing to do—to allow

the committee process to work. But now it appears that the committee process will not work and that the committee deliberately will take no action on the resolutions or will block consideration of these resolutions on the floor.

I hope that this will not be the case—that the committee will agree that the expenditure of nearly 1 billion of tax funds is worthy of a vote by the Senate. Even if the committee should be in oppositon to the resolutions, certainly there should be a vote on the substance of the issue.

Those who do not favor bailing out the giant shipbuilders at the expense of the taxpayers, those who disagree with the presumption that large corporations who mismanage Federal programs and find themselves in financial difficulty should become corporate welfare clients, those of us who argue that the Federal Government is taking the risk out of business and transferring it to the taxpayers—we believe that the Senate should take a stand on this issue.

If by one stratagem or another, a resolution of disapproval is blocked in the Senate, I serve notice that the Senate will not completely escape this responsibility. The payment of claims above that now set aside must be authorized in a new military procurement authorization bill or appropriated within a following defense appropriations bill. Language can be attached to the authorizing measure specifically disallowing the payment of any claims above that determined by the Navy's claim review process—no matter whether or not the 60-day period has expired and Public Law 85-804 is in effect.

I wish to make it clear that I will not agree to any unanimous-consent agreements regarding time or procedure on the new military procurement bill or the upcoming defense appropriations bill. Furthermore I now indicate that there should be a thorough if not exhaustive debate on this matter at that time. It would be far better to have a vote on the resolution of disapproval itself, but if individual Senators move to block this, I will take whatever action is necessary to safeguard the taxpayers against this arbitrary payout of $541 million in unaudited claims.

Mr. President, in view of the fact that there are no stipulations as to how these resolutions of disapproval will be handled, will the Chair please inform me if a resolution of disapproval can be attached as a rider to some appropriate bill that happens to be pending on the floor—that is regardless of any action taken by the Armed Services Committee, is that in order to place a resolution of disapproval on another measure?

The PRESIDING OFFICER (Mr. HART). The Chair wishes to inform the Senator that the procedure which he suggests would be appropriate under circumstances where the legislation to be amended does not have a germaneness condition attached to it for amendments.

The Chair further wishes to inform the Senator from Wisconsin that under rule XVI appropriation bills do have a germaneness requirement on amendments.

Mr. PROXMIRE. May I further inquire whether or not I could attach this to a bill that would not be an appropriation bill, say, an authorization bill? Would that be in order?

The PRESIDING OFFICER. If cloture has not been invoked, and there were no agreement otherwise providing for germaneness of amendments.

Mr. PROXMIRE. In other words, if I object to a unanimous-consent agreement until this is settled, I would be free to offer this on an authorization bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. Mr. President, I thank the Chair.

Let me just continue very briefly on this matter. Let me put the substance of this argument in the clearest terms. The civilian hierarchy of the Navy, the Secretary and Assistant Secretary, over the objections of the uniformed Navy, has arbitrarily decided to split the difference with General Dynamics and Litton on the size of their shipbuilding claims. Instead of auditing the claims, some of which may have been fraudulent, they simply divide the amount in half. Now this amount—$541 million—is in excess of the total determined by the Navy's own specialists and claims award process.

Therefore, we can now see the formula for success for defense firms. It goes like this. When in trouble, file millions of dollars in inflated claims, disregard any investigations or audits, do not cooperate with the auditors, threaten to stop production, and sit back and wait. Very shortly, the Defense Department will be pleading to provide at least one-half of what you want. And if you have inflated the claims originally by at least 100 percent, you will gain back every penny in your original plan.

The welfare handout doors are open. The treasury is large. The inclination on the part of the civilian leadership of the Pentagon is "come and get it."

## THE STATE OF PUBLIC EDUCATION AND THE ROLE OF THE FEDERAL GOVERNMENT

Mr. PROXMIRE. Mr. President, what an irony. The same week that the Senate passed the colossal $50 billion bill to extend the Elementary and Secondary Education Act, two major reports appeared which revealed both the failures of the present public school system and the fruitlessness of the present Federal school aid approach.

The first report was a CBS News three-part documentary entitled, "Is Anyone Out There Learning?" which showed why many parents, taxpayers, and even students and teachers have lost faith in our Nation's public schools.

The best test of any program is the results. Public education is not only doing badly it is getting worse. Why do I say this?

### INCREASING COSTS AND LOWER TEST SCORES

During the past 15 years our Nation has increased its spending on public schools, not by twofold, not by threefold, but by fourfold, and the results? Students are scoring lower on any number of standardized tests.

Since 1963 the educational achievement as measured by the scholastic aptitude test of collegebound students has fallen year after year in both verbal and math skills.

As the CBS documentary points out, the level of functional illiteracy among all 17-year-olds is at least 13 percent and is three times higher for 17-year-old blacks.

Studies supported by the Office of Education show a general decline in test scores over the last decade for grades 5 and above. Again, what is particularly striking is the fact that the decline becomes more pronounced at the higher grades.

These disappointing statistics reinforce the belief of many that there has been a serious deterioration in the ability of our young people to perform satisfactorily as informed citizens and skilled workers. Mr. President, why is our economic productivity declining? Here is one clear and shocking answer.

The tragically high unemployment rate among teenagers, especially black teenagers, can, in part, be traced to this group's deficiencies in basic English and math skills.

On the CBS broadcast the personnel manager of Mountain Bell says that 40 to 50 percent of the people applying for a job failed to even get past the company's entrance exams because of these deficiencies in math or English skills.

The CBS documentary also reports on the ugly atmosphere of insubordination, drugs, hostility, and fear which pervades some of our Nation's public schools. It is obvious that very little learning can go in in schools exhibiting that kind of unwholesome environment.

Finally, as CBS news reports, there have been runaway costs associated with educating children in our Nation's public schools. Higher salaries for teachers, more expensive textbooks, and larger amounts and more costly types of "teaching aids" such as audio visual equipment and computers have pushed the cost of educating children clear through the roof and into the sky. No wonder the hard-pressed taxpayer is looking for relief from school-related taxation.

Mr. President, this should be far more alarming to any American concerned with the strength of this country than any military deterioration. Why? Because the strength of this country—as in any country—is in the strength of its people. The skill, the understanding, the training of our citizens is what makes a nation strong. This is more important than our factories, our farms, our natural resources. The quality of our people is what will make this country succeed or fail. And the dismal record now shows we are failing.

The CBS news report never focuses on the role of the Federal Government in public elementary and secondary education. However, at the same time the CBS education documentary ran, the Rand Corporation was releasing a study funded by the Office of Education which re-

ported the results of a 4-year examination of a large number of federally supported educational innovations in public schools. And what were the results of this massive review of Federal aid to elementary and secondary education? The Rand researchers found that in general no existing educational approaches consistently improve student performances; that Federal aid had not fulfilled expectations and that questions continue to be raised about what might be the most appropriate and effective Federal role for improving the Nation's public schools.

The Rand study states what I believe to be true—that more Federal intervention and money cannot and must not be a replacement for local commitment and innovation. As the report says:

All the Federal programs had funded some successfully implemented projects as well as dismal failures and many projects in between. The difference between success and failure depended primarily on how school districts implemented their projects, not on the type of Federal sponsorship. The Federal spending was simply overwhelmed by local concerns and characteristics.

Did the huge increase in Federal money help? No! It did not "buy" more committed teachers, more effective project directors, more concerned principals, and so on. In other words, project outcomes reflected not the amount of funds available, but the quality and behavior of the local staff.

THE NEED FOR A REEXAMINATION

The Senate has recently passed a $50 billion education bill. That I voted against for that very reason. My first speech in the Senate more than 20 years ago addressed the need for a strong Federal commitment to education, and yet I was one of the few who voted against this year's education bill. Why did I vote as I did?

Because too much of our Federal education money is just going into the education slag heap. We must not continue to blindly, thoughtlessly, pour money into programs and approaches that simply are not working. What we need to do is to end Federal support of educational programs which have been shown to be failures. We need to reform those programs which can be salvaged. And most important of all, we need to control overall Federal spending and taxation so that additional funds can be retained through State and local taxation to be spent on locally created and controlled educational programs.

While there are legitimate and important Federal educational priorities, Federal aid to public education must always be a limited supplement, for limited purposes, to help support local and State educational programs and initiatives.

Mr. President, I ask unanimous consent that excerpts from the CBS News broadcast "Is Anyone Out There Learning?" and the summary of the Rand report entitled "Federal Programs Supporting Educational Change, Volume VIII, Implementing and Sustaining Innovations" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IS ANYONE OUT THERE LEARNING?

CHARLES COLLINGWOOD. Here comes the class of 1978, part of an army of three million young Americans who went through similar high school graduation ceremonies this year. This particular battalion comes from the John F. Kennedy High School in Denver, Colorado.

How good an education did they get? Many people think it was not good enough. There are widespread complaints that young Americans like these have not acquired in school the basic skills with which to lead full lives in today's society. There is a national demand that high school graduates must demonstrate academic competence to get their diplomas. There are taxpayers' revolts against the high cost of education. The rallying cry of the critics is: "Back to the basics!"

Ironically, among those members of the Denver school board conferring the diplomas was Mrs. Naomi Bradford, herself a critic of the present educational system.

NAOMI BRADFORD (member, Denver public school board). We are not giving the students the basics that we ought to be giving. The parents are telling me they want more of the basics. They want their children as well educated in the basics as they are. Let the alternatives go by the wayside if they need be, but give them the basics.

WALTER CRONKITE. Good evening. The appeal we heard a minute ago—they want their children as well-educated as they are—happened to come from Denver. It could have come from anywhere in this country. Parents, teachers, students, taxpayers—all are increasingly critical, increasingly emotional, about public schools they say are not educating young people as they could, as well as they should.

Well, what has happened? What we know is that tests show today's students scoring lower in basic subjects than they did 15 years ago. During those same 15 years, the cost of public education has almost quadrupled. So the question: "Is anyone out there learning?"

Starting tonight and for two nights to come, we will suggest some answers to that elemental question. First, some elements of the problem.

CRONKITE. The rate of functional illiteracy—the inability to read and write simple sentences—is now running at 13% or higher among 17-year-olds.

STIRLING COOPER [teacher]. The tests we're giving don't show literacy. They show bits and pieces of learning. If we really gave literacy tests, I would wager half or more of our students are illiterate in the old-fashioned sense.

CRONKITE. Students are passed on to higher grades, whether or not they can do grade-level work.

WILLIAM KOERBER [teacher]. We pass kids because they physically get big, not because they mentally or emotionally or any other ways get big. And that's been the pattern of—as long as I've been in the schools. We socially—we call it a social promotion.

CRONKITE. Most standardized test scores, including the SAT, the Scholastic Aptitude Test taken by those seeking to go to college, have been declining for the past 14 years.

WILLARD WIRTZ [Director, National Manpower Institute]. Starting in the early sixties, middle sixties, almost all of the academic scores started going down gradually. They all went down gradually until about 1970, and then they plummeted.

CRONKITE. There's a rapidly growing grassroots demand for minimal competency testing to determine whether a student actually has enough knowledge to qualify him or her for a diploma, or whether he or she is not qualified and should be denied a diploma.

CHRISTIAN C. PIPHO [Education Commission of the States]. I would say it's one of the few times in the history of American education that we've had a—a movement for reform come into education from outside of education—from legislators, from state board members, from citizens—something like this.

CRONKITE. It is said that the quality of teaching has declined.

LLOYD BAKER [parent]. Some of the teachers, truthfully, in my opinion, have been retired, as far as educating children are concerned, for many years; but sit there, because of tenure, and collect their—their pay. That's all they care about.

CRONKITE. Because of all this, widespread demands have emerged for "back to basics" in the school curriculum.

Mrs. BRADFORD. Anyone with their ear to the ground and really listening to the public right now will hear that the public demand is back to the basics. "Hey, my kid can't do the multiplication facts like I can." "Hey, my kid can't punctuate, can't sound out words, like I can." "That's what I want first for my children." I think that's what the public is saying.

CRONKITE. Across the nation, an HEW study shows that 42% of black 17-year-olds enrolled in school are functionally illiterate, three times the national average. And the absentee rate among black youngsters—it used to be called truancy or playing hooky—is also higher than the national average. An absentee rate of about 5% for reasons of health is considered about normal, but in inner-city schools, 30% is not uncommon.

CLARK BALLINGER (Denver teachers union head). You have a great number of youngsters, as you do in any urban city, that really haven't found themselves, and they just don't care. And so they have great problems in the absentee business. They don't—they don't want to come to school. The question is how do you force them to do that? What do you do? Do you—take a youngster that says, you know, "I'll come when I want to, and if I don't want to I won't." You can flunk them. You could kick them out if you wanted to, and say you can't—you can't come to school. There's any number of answers, none of which meet the needs of the youngster. The goal is to keep these kids in school, and to try to help them. And the Denver public schools—and I really want to give them credit here—work hard at that, And they do a—really a good job of—of putting together progams. They don't do a very good job of making those programs successful. They just frankly are not working. The absentee rate sometimes in a—in a high school can be as much as four and five and six hundred a day. That's horrendous. And they're trying to work on it. All I can say is we can only do so much as educators. Basically, if the parents cannot force and make their youngsters go to school, the teachers can't.

COLLINGWOOD. There is no father figure in the Craft family, and Mrs. Craft has enough to do with making ends meet and coping with her own problems that she is not a stern disciplinarian. Still, she feels keenly that two of her children seem to be missing out on the educational opportunities she herself tried to take advantage of in a less privileged time.

What kind of facilities did you have when you went to school?

Mrs. CRAFT. Nothing. [Laughs.] Not anything. Scratched up desks, a raggedy book and a few crayons, and a few scratched up blackboards.

COLLINGWOOD. But you still think you got more out of it than some of your children have?

Mrs. CRAFT. I think so. With—with all the latest equipment that they have, and different types of things they have to work with, I think my education's better than theirs.

CRONKITE. Mrs. Craft is not alone in believing that throwing money at the problem has not solved it. The public doesn't think so either. Our CBS News poll shows that 41% of

those who responded say that their children are not getting as good an education as they got. Only 35% think today's education is better; 16% feel it's about the same. And those are not very good marks.

One of the greatest public concerns is about violence and vandalism in the schools, and we'll look at that next.

CRONKITE. When we talk about violence in our schools these days, we're not talking about youthful high jinks. We're talking about a pattern of widespread mindless destruction. We're speaking of attacks on persons of incalculable cost, of attacks on property that cost enough each year to pay the salaries of 50,000 teachers. As Charles Collingwood tells us, Denver's been paying the price, too.

COLLINGWOOD. In Denver, Miss Barbara Piascik, who teaches social sciences at Smiley Junior High, finds that year by year her job becomes more difficult because of the growing lack of discipline tolerated in the schools.

MS. BARABARA PIASCIK. I—I think that when a kid comes to school, I mean, he should come there to learn something. And you know, we can—we can only do so much. But when—when a child—when—when a teacher reprimands a kid, and the kid comes back with—with four-letter words and all this kind of thing, that's a discipline problem. When I open the door and see kids in the hall, they're running around, kids with pieces of glass, and—and then other students telling me of—of kids of with guns, I get very depressed about it, because I don't see anything being done about it.

JOHN RYOR [President, National Education Association]. Our statistics suggest that about 70,000 teachers a year in the United States are victims of physical abuse, and it is a serious problem. It's—it's a problem that's been growing over the years. It's a problem again that needs resolution. It's difficult in a classroom of 40 people, of 35 people, for a teacher to accomplish his or her goals as they relate to the school's curriculum when you spend thirty, forty or—percent of your time perhaps with three or four students who just are either unwilling to—to fit the—the classroom situation, unwilling to behave according to standards that make it possible for all the children to learn, or—or simply are disruptive for whatever reason.

ROBERT HOLLEY. Yeah, some classes get pretty bad. It's—some of the classes that have the good kids in them, supposedly, are pretty bad discipline-wise. I'm in—in my ex-English class, there's absolutely no order. The—the teacher tries to do something about it, but he can't—he doesn't have the authority to whip the kids back into their place. All's he can do is slap their hand or send them down to the student advisor. And it doesn't do any good.

COLLINGWOOD. Part of the problem of discipline in the schools is the widespread use of drugs. Hank Holley was very frank about that.

Are there a good deal of drugs in high school in Denver?

HANK HOLLEY [laughs]. Yes.

COLLINGWOOD. Hard or soft?

HANK HOLLEY. Both. I can—yeah, there's—there's a lot. I've seem more than my fair share, let's put it that way. I've seen quite—quite a few that I wish I wouldn't have.

COLLINGWOOD. You ever into that much yourself?

HANK HOLLEY. I have been. And like my sophomore year I don't think I spent a day straight. Always high, always smoking dope. Going out before class and after class. That—that was—that was my status.

BALLINGER. The youngsters that come to school that are in high school, by the time they're in high school at least 80% smoke marijuana regularly or—or have at least tried some kind of hard drug. This is a lot different from the education in the fifties, in the sixties. The seventies is different, and it's very difficult to work with these youngsters.

DR. BEZEINSKI. Discipline is the number one concern of Denver parents, as well as the rest of the country. It's a problem that we're trying to do something about. We've appointed a very high-level discipline committee composed of administrators, teachers, parents and students. We're examining the discipline policies and practices. Prior to my taking this position, no one had been expelled from the Denver public schools for two years.

CRONKITE. What is the public perception of discipline in the schools. Well, it's overwhelming critical. A CBS News poll finds that 84% of those who responded say that discipline is not strict enough. Only 4% say it is too strict.

Elementary and high schools are a steppingstone, a training ground, for the young peole of the United States. They determine what happens to the student when he or she goes on to a job or to college. How do the universities and the employers feel about today's high school graduates? Charles Collingwood has some answers.

COLLINGWOOD. Of all the test American students take, perhaps the ultimate one is that administered by the marketplace, which decides what kind of a job the skills he has learned qualify him for. In Denver, the Mountain Bell Telephone System is the largest private employer. Mrs. Connie Bragg, Mountain Bell's personnel manager, is not happy about the qualifications of the young people who apply for jobs there.

CONNIE BRAGG. Forty and fifty percent of the people who come in to take our entrance exams are unable to qualify.

COLLINGWOOD. What are the reasons for that? What—what—what are their deficiencies?

Mrs. BRAGG. Basically, I guess the prime deficiency is in the area of math. But in some cases it's just an inability to understand or comprehend language.

COLLINGWOOD. Do you attribute this to the schools that they've gone through, or to the society in general, or to their homes, or what?

Mrs. BRAGG. Well, I guess inasmuch as—as we charge the school system with—with training our—our young people, you have to put some of the blame there. But it's—it's difficult for me to say how much of that really is—is the education system's fault and now much is—is a—a home environment.

COLLINGWOOD. What kind of qualifications would you ideally like to see in those coming in to Mountain Bell?

Mrs. BRAGG. If I can use some old-fashioned terms, I would certainly like to—I'd want to say reading, writing and arithmetic. Those are very basic skills that you need to operate in—in the business world.

COLLINGWOOD. Business is not the only end user of the products of American high schools; so are colleges and universities. At the University of Colorado at Boulder, which enrolls many Denver high school graduates, the head of the English Department, Dr. Paul Levitt, and his colleague, Professor Elissa Guralnick, have been waging a campaign against the illiteracy of the students they get.

Professor ELISSA GURALNICK. Most of our students are not prepared to write college papers when they come to the university, college-level papers. They tell us that they haven't written papers in high school. They'll tell us that they've written one or two papers in high school, usually in tenth grade for some reason. They'll tell us that they can't remember writing in junior high school.

Dr. PAUL LEVITT: I'm persuaded that the writing has—has—has grown terrible in the last few years. And the only—the only evidence I have is that on occasion I go back to my files and I look at papers that were written for me in 1964, '5, '6, and they are, in fact, better written papers than the ones I am receiving now.

COLLINGWOOD. Dr. Levitt, you wrote once that many students in this university are only marginally literate. Now, what do you mean by "literacy", and how many are only marginally literate?

Dr. LEVITT. In order for a student to be literate at a university level, he has—he has to bring with him, or she has to bring with her, a body of knowledge. There has to be an assumed ex— experience for that student. For example, we assume that the—that the student can, at a very fundamental level, can read and write. We assume that the student can recognize names like William Shakespeare and Winston Churchill. We assume that if we are talking to student—students about a grammatical error in a sentence and we say that the subject and the verb do not agree, the student won't look at us and say, "What's a verb?" We have students who are coming to us who, when you say to them, "What is the subject of this sentence?" they say, "What's a subject?" And so we can't talk to them about literature. That is to say we can't make any assumptions. We can't mention the word plot, because they don't know what a plot is. We can't mention the word character because they don't know what a character is. We can't say the subject of the sentence because they don't know what the subject is. So finally I say they're marginally literate, and I'm being polite when I say that.

WALTER CRONKITE. Public education is bigger than ever in America. Almost 44-million youngsters go to public elementary and high schools. Many more now graduate than ever before. We spend almost $81-billion each year on their schooling, a record. More than one person in every four is involved in some way in education. There are more school books—more expensive, more glossy, more pictures; more kinds of instructional kits and gadgets to supplement the books; more than two million teachers getting more pay, some quite a lot more. And there's more criticism, more concern, more questioning whether our public schools are doing the job. Why? Some say it's the teachers.

Mr. RONALD SEVIER: I don't think the teacher today is nearly as dedicated as the teacher was twenty years ago.

Mr. ROBERT HOLLEY. Just kind—lose interest after a little while, and they're just there for—to be there from day to day.

Dr. DIANE RAVITCH [educational historian]. Studies have shown that an awful lot of time spent in school is not spent in classroom, and a lot of time spent in classrooms is not spent teaching or learning. It's spent moving around, shuffling papers, gabbing, rapping, whatever. This is not teaching and learning.

CRONKITE. It's not just the teachers and teaching that are criticized. It's the books and other teaching equipment. Instructional materials are big business, too.

JERROLD ZACHARIAS [Professor Emeritus, MIT]. The control of education is in the hands of the publishers now; a handful.

CRONKITE. And there's television. It has transformed the lives of most of us. Certainly it's impact on the lives and minds of the young has been revolutionary. How and why?

ERNEST L. BOYER [U.S. Education Commissioner]. Children are now watching television four to five thousand hours every—before they go to school.

DUKE SEVIER. I enjoy television. That's probably the funest thing besides sports that I do. Actually, I watch more TV than I do anything else in life.

BARBARA PIASCIK [teacher]. Television! I mean, kids are glued to the television set all day. They don't have to read a book the way I did when I was growing up, or the way you did when you were growing up.

CRONKITE. Teachers, textbooks, television. These are some of the reasons critics say are behind the decline in American public education. There are other reasons, ranging from a permissive society to a change in family structure and basic social values. They help to explain why today's public school pupils are not learning as well as they could, as well as they should. And the reasons why are the subject of our broadcast tonight.

CRONKITE. Good evening. For most of America's history our pride and our boast have been that our system of public education is second to none. But today, to many Americans the boast seems hollow and the pride is gone. Last night we presented a situation report on the state of the country's public elementary and high schools, with the focus on the school system of Denver, Colorado. What we found was an alarming number of high school graduates who could not read well enough to function in society, lack of discipline in the schools, absenteeism, and widespread complaints by employers and colleges that the young people who come to them are sadly unqualified. Tonight in this second of three broadcasts, we'll look at the reasons why.

In the teaching process, nobody's more important than the teacher, and most people are not very happy with today's teachers. In a CBS News poll, we found that only 26% of those who answered said that today's teachers were better than those of a generation ago; 35% said teachers were worse; and 39% said they were about the same, or they voiced no opinion.

My colleague Charles Collingwood has been looking into the reasons for what is at least a perceived decline in the quality of teaching and school administration.

CHARLES COLLINGWOOD. There are more than two million public school teachers in our elementary and high schools. How are they doing?

STUDENT. They don't push you to read and they don't push you or, if it's not part of the class, you're not going to read.

MOTHER. My son brought home a paper that had something like seventy mistakes on it that I caught. His teacher didn't bother.

ROBERT HOLLEY. No teacher has ever really told me that I have to do some homework or I'm going to fail the class.

STUDENT. If you have an assignment due—a writing assignment due on Friday, you turn in some words written on a paper, she grades it—marks it up. Who cares? You get an A.

COLLINGWOOD. "She's not teaching." "They don't push you to read." His teacher "didn't bother." It all seems to suggest that teachers are part of the problem. A study prepared for the College Entrance Examination Board suggests that, too. Secondary school principals reported that their teachers today are less dedicated, have less desire to enforce high academic standards, are more permissive, spend less time outside the class with the students, and place less emphasis on classroom discipline than did their counterparts in 1965. They also hold more degrees. There are 61 percent more M.A. degrees or the equivalent than back in the early sixties, when test scores were at their peak.

Their defenders say teachers are better than ever.

JOSEPH A. CALIFANO, JR. [HEW Secretary]. I think that its—it's very easy for any of us at any point in time to say, "Well, my child is not learning because the teacher isn't good." I think schools by and large do a better job than they're given credit for, and I think teachers by and large do a better job than they're given credit for.

CULHANE. Do children watch too much television? Is that why they seem to be learning less? Many teachers and psychologists think that television is having a negative impact on the education of children. Indeed, some authorities say television is one of the main culprits. They are not talking only about too much violence and sex, too many candy commercials, and the reinforcement of racial and male-female stereotypes on TV. What they are saying is this: first, that children watch so much television that it becomes a thief of time, time that would be better spent reading or writing; and second, that there may be something inherent in the act of watching television that is detrimental to the educational process.

And the critics are talking about all television—good television, bad television, commercials, cartoons, educational TV—whatever children watch, and they watch everything. By the time children get to the first grade, they will have watched, on the average, more than 4,000 hours of TV. And by the time they graduate from high school, they will have expended more time watching television than they spent in the classroom, or indeed on any activity except sleeping.

ERNEST L. BOYER. There's an up side to television. It has traveled around—caused children to travel around the world through some of our marvelous specials. They've gone to the bottom of the ocean, to the top of our greatest mountains. They understand chemistry, and we've seen the moon. And we've looked at Earth from outer space. I just think it has had a marvelous expansion of our understanding of the nature of the world we live in and our relationships to it. So I think its force has been exciting, in my view, as well as—as somewhat destructive to formal education.

CRONKITE. In case you hadn't noticed, there's been a lot of finger-pointing in this hour, and I think we've shown there's plenty of blame to go around. The teachers: they're the key, but they place the blame on society, not themselves. And they're not altogether wrong, nor are they all that right. They're better paid than ever, better protected by unions than ever, hold more degrees than ever, but they do not do a better job than ever. If children are tuned out, so are many of their teachers.

Teaching materials are, we have heard, glossier and jazzier than ever, but are they better than ever? They talk down to students who cannot read and write as well as they used to, but that just perpetuates the vicious cycle we were told of.

Poor discipline—society's fault. That means everybody's fault, and nobody's. But our conclusion is that permissive parents and timid school administrations have to shoulder a lot of the balme.

Television. Well there seems no question that too many children look at television too much. And when they put on their statesmen's hats, many leaders of our industry agree, even if they dispute the criticisms that TV viewing shortens a child's attention span or makes him a passive participant in the world around him. Whose fault is too much TV? The parents? Sure. But what if the parents are busy or indifferent or incapable. What if they're not there?

Tomorrow night we'll search for some answers to the questions we have raised. If our schools do not teach our children as well as they should, what can we do? As we say in our trade, stay tuned.

WALTER CRONKITE. Good evening. On the first two broadcasts of this series, we talk about some of the problems facing American education, and some of the reasons those problems came into being. Tonight, we'll look at some proposals for improving our schools—experiments that are now under way in many parts of the country. Some appear to be working well; some are having difficulties. But there are lessons to be learned from all of them.

One proposed solution is called "minimum competency testing". It's been described as the hottest growth stock form of competency testing. In half of those, the test must be passed before a high school diploma can be issued. Our CBS News poll indicates how popular that idea has become: 82% of those polled favor requiring high school students to pass a standard test before graduation. But does that system produce results? Charles Collingwood reports on one example.

CHARLES COLLINGWOOD. The program here in Denver is the oldest in the country. It's been in operation 18 years now. Denver calls the tests P & R tests—proficiency and review—and they're given in four subjects: arithmetic, spelling, grammar and reading. A student must pass all four to qualify for a high school diploma. Otherwise he can graduate, but he gets only a certificate of attendance. And does this guarantee a good education? Some here say it does not. They argue that high school seniors are being tested at about a sixth grade level.

STIRLING COOPER [teacher]. I smile to myself when I hear this praise nationally about Denver's courage in giving a test. Sure, we've got courage; but, boy, do we have problems. We now have the courage to get kids up to the sixth grade level and give them a diploma for 12 years.

DR. JOSEPH BRZEINSKI [Superintendent, Denver Public Schools]. All the test does—and we've never tried to say that it does any more than this—is to ensure minimal competencies in reading, language, spelling and mathematics. It was certainly never intended to be the hallmark of an educated man or woman.

COLLINGWOOD. The fact of the matter is that almost all of Denver's high school seniors pass the test. But they don't necessarily pass it the first time. It's first given in the ninth grade, and students who fail can keep trying in later years. They can even come back after graduation and try again.

TEACHER. Do you have any questions?

STUDENT. No, I'm—been through it a couple of times, so I know what's happening.

TEACHER. Okay.

COLLINGWOOD. Some 40% of the students fail the test the first time, but all but two to four percent have passed it by graduation time. Should the tests be made more demanding?

Dr. BRZEINSKI. Now it's possible to change that standard. And there has been some criticism as to the level of competency demanded by that test. It's very possible to change that standard. It depends whether you expect the schools to become a sorting institution for society. We could put those requirements through changing the score that is required, so that only 50% of our students could get a high school diploma. I'm not sure society is ready to pay that price or to deal with that social dynamite that would exist.

COLLINGWOOD. There are other questions about the minimum competency tests. Can multiple choice exams graded by computer measure the true abilities of a student? Who decides what competencies to test? What do you do with those who fail? And when should the test be given?

ERNEST L. BOYER [U.S. Education Commissioner]. Testing should be done to keep children in school, not to force them out. So I would like to see testing start earlier, especially on the skills that we've mentioned, so that the progress can be measured. And if a young person is not moving forward, you can make changes before it's too late.

COLLINGWOOD. As a matter of fact, Denver began a pilot program this year to develop competency testing as early as the third grade. The results would be used by teachers in the next grade to give special help where needed. Across the country there seems to be a trend toward early testing. Those who favor minimum competency testing say it will force the schools to do a better job. Skeptics reply that's not necessarily true; it

depends on how the tests are designed, and how the results are used.

CRONKITE. So far tonight, we've been talking about what our schools can do for us. Perhaps it is time to talk about what we can do for them.

ERNEST BOYER. Very often the school reflects what the community is facing. And I think the—the lack of influence on the home has been a serious problem. If the parents are not deeply engaged in the school—helping the children read, encouraging homework, turning off TV occasionally—the school cannot do it all alone.

CRONKITE. Many Americans do read to their children. Educators believe that's important, not only because the child is learning to read; he's also learning that education is taken seriously in his family. That will be reinforced later on if his parents show they care about his homework assignments and study hours, and if they keep in touch with his teachers and counselors. One school believes there is much more parents can do. Barry Serafin reports.

BARRY SERAFIN. Just over one thousand children attend Hunt Valley Elementary School in Springfield, Virginia. What makes this school unusual—and, according to everyone involved, what makes it particularly successful—is the fact that hundreds of parents don't just drop their children off here each morning; they join them in the classroom.

STUDENT. . . . thirteen, fourteen, fifteen.

PARENT. Okay. Fifteen times three. Help her out.

SERAFIN. This woman is not a teacher. She's a parent. Several years ago the Hunt Valley school and the local PTA began a program under which parents help out teachers in the classroom. This year 467 parents volunteered nearly 4,000 hours of their time. For example, they help in the reading lab, of which the school is particularly proud. The lab is not just for slow learners, but for every student from the third grade on. Tests indicate that students make two-month gains for every month spent in the program, and more than 90 percent perform at or above their expected reading levels. Reading instructor Mike Matta says such results would be impossible without the parent's help.

CRONKITE. Charles, in the first two hours of this series we looked at the problems of our schools. And in this hour we've shown a whole array of solutions. We'd like now, before we sign off, to review both problems and solutions.

The biggest problem, at least as the public perceives it, is that the schools have strayed too far from the basics of learning; that we don't adequately teach reading, writing, mathematics.

COLLINGWOOD. And the solutions to that seem clear, at least in outline: a thorough review of curricula and courses; perhaps some reduction in the number of elective subjects, and certainly elimination of the softest electives; re-emphasis above all in courses that require writing; homework assignments that require both reading and writing.

CRONKITE. The second problem that bothers people most is the lack of discipline in our schools. You can't learn if you or those around you don't behave. And the problem's compounded by the fact that the schools are part of a more permissive society. You can't expect them to be enclaves of discipline in an increasingly undisciplined world.

COLLINGWOOD. One solution to discipline problems is simply better schools. We've seen that when a learning environment that stimulates students exists, discipline tends to take care of itself. In addition, teachers and administrators need greater community support to enforce discipline. And in that I would include fewer legal constraints upon them.

CRONKITE. Another problem that really bothers people is promotion from grade to grade whether or not the student deserves it. And a sort of corollary, what is called grade inflation. We've seen that youngsters get into honor societies even if they can't read or write adequately.

COLLINGWOOD. Again, Walter, we have seen solutions: tougher tests, tougher grading. Don't just pass student if they don't pass the tests. But that has to be accompanied by other things: starting testing and remediation in the earliest grades; remedial programs quickly, when it's seen that a student isn't up to standard. Don't wait until the higher grades until it's too late. And second, alternative education programs for those youngsters who, with the best teaching in the world, cannot or will not do well with a conventional curriculum.

CRONKITE. Another problem we've seen is with teachers. Too many of them are simply not as good as they should be.

COLLINGWOOD. Here again we've had solutions pointed out to us: competency tests for teachers before they enter the system; closer review of their records once they're in it; on the job training; and special training for teachers who work in the inner cities.

CRONKITE. And there's the problem and the opportunity called television. We can certainly not ignore the fact that critics say we've not lived up to our responsibilities: that too much of what appears on TV is simply not suitable for young viewers. And that too much television watching of any kind can interfere with education. But at the same time, TV is very much a fact of our lives. It's not going to go away. And it can be used both in and out of the classroom to enhance the learning process.

COLLINGWOOD. Again, there are indicated solutions. First, most obviously, stricter parental control of TV viewing. Second, encouraging teachers, many of whom become set in their ways, to use television and not just fight it. Certainly they should try to make full use of the best programming now available for young people. And third, though it hardly falls within the scope of these broadcasts, better overall television programming for young people.

CRONKITE. What we can say at the end of these three hours is that our children deserve a better education than they are now getting. They deserve better from their teachers, their school administrators and boards of education, their textbooks, the television industry. And most of all, they deserve better from us, their parents, and from the whole society.

For Charles Collingwood and me, good night.

---

## FEDERAL PROGRAMS SUPPORTING EDUCATIONAL CHANGE, VOLUME VIII: IMPLEMENTING AND SUSTAINING INNOVATIONS

### SUMMARY

*Background*

Federal financial aid now makes up an important fraction of many local school district budgets, but its effectiveness in improving local educational practices is uncertain. Federally sponsored evaluations reveal inconsistent and generally disappointing results, and, despite considerable innovative activity on the part of local school districts, the evidence suggests that:

No class of existing educational treatments has been found that consistently leads to improved student outcomes (when variations in the institutional setting and non-school factors are taken into account).

"Successful" projects have difficulty sustaining their success over a number of years.

"Successful" projects are not disseminated automatically or easily, and their "replication" in new sites usually falls short of their performance in the original sites.

Consequently, although federal support for local school services has become well established, the "decade of reform" that began with ESEA has not fulfilled its expectations, and questions continue to be raised about what might be the most appropriate and effective federal role in improving the public schools.

To aid in reexamining federal education policies, the U.S. Office of Education awarded a contract to The Rand Corporation to study a national sample of educational innovations funded by federal programs. The study aimed to help improve federal change agent policies by describing how the process of innovation works in its local setting, and by trying to discern what factors affect the innovative process and its outcomes. This report reviews the findings of Rand's research.

*Study design*

Rand conducted a four-year, two-phase study. The first phase (July 1973 to July 1975) studied local innovations during their last or next to last year of funding by federal change agent programs and the research focused on the initiation and implementation of these local projects. Four federal programs were identified by USOE to be included in Phase I of the study: Elementary and Secondary Education Act Title III (now a part of Title IV-C), Innovative Projects; Elementary and Secondary Education Act Title VII, Bilingual Projects; Vocational Educational Act, 1968 Amendments, Part D, Exemplary Programs; and Right-to-Read. These change agent programs had a common purpose: the stimulation and spread of educational innovations. They also had a common policy instrument: the provision of temporary funds (3 to 5 years) which, although small relative to the budget of a school district (ranging from grants of $10,000 or less to several hundred thousand dollars per year), were intended to fund new educational services, not to support existing practice. A sample of 293 local projects funded by these four federal programs was drawn from 18 states. Field studies were conducted at 29 projects, and 1,735 personal interviews were conducted with staff at all levels in the school districts for all 293 projects.

Phase II of the study (August 1975 to April 1977) examined what happened to innovative projects after the end of the federal funding period (of 3 to 5 years). Accordingly, two years after the initial field research, Rand restudied a sample of approximately 100 of the projects, originally funded under Title III of ESEA. Fieldwork was conducted in 18 school districts, and 1,343 district staff were surveyed in 100 sites. By thus studying local innovations one to two years after the end of federal funding, we were able to explore the longer-run effects of the federal policy of providing "seed money" as a means to promote educational improvement.

This research was exploratory. Consequently, the analysis is subject to methodological reservations, and the conclusions are open to rival interpretations. These caveats notwithstanding, we believe the research sheds light on how innovation works and on the factors affecting educational change.

### Findings About the Effects of Federal Programs

We examined two questions relevant to the effects of the federal programs:

How did the "seed money" policy common to the change agent programs affect local projects?

Were the differences in guidelines and objectives among the federal programs reflected in their projects' implementation and continuation?

We found that federal change agent policies had a major effect in stimulating local education agencies to undertake projects that were generally consistent with federal categorical guidelines. This local response resulted from the availability of federal funds

and, in some programs, from guidelines that encouraged specific educational practices.

But the adoption of projects did not insure successful implementation; moreover, successful implementation did not guarantee long-run continuation. Neither those policies unique to each federal program nor those policies common to them strongly influenced the fate of adopted innovations. The net return to the federal investment was the adoption of many innovations, the successful implementation of few, and the long-run continuation of still fewer (with the exception of the special case of bilingual projects, where federal and state funding continues to be available)

All the federal programs had funded some successfully implemented projects as well as dismal failures and many projects in between. The difference between success and failure depended primarily on how school districts implemented their projects, not on the type of federal sponsorship. The guidelines and management strategies of the federal change agent programs were simply overshadowed by local concerns and characteristics.

Similarly, "more" money supplied by federal funds did not necessarily purchase those things that mattered; it did not "buy," for example, more committed teachers, more effective project directors, more concerned principals, and so on. In other words, project outcomes reflected not the amount of funds available, but the quality and behavior of the local staff.

This is not to say that "federal money doesn't matter." Federal seed money allowed some districts to undertake activities that their staff were anxious to pursue but that could not be supported out of district funds. Moreover, federal funding has bestowed legitimacy on local projects and given them the aura of "special status," which can provide some measure of "protection" for politically controversial or pedagogically untested educational practices.

Yet few districts in our sample planned for the long-term stability of projects. The end of federal funding generally resulted in a reduction of resources, particularly expensive ones. Many districts complained of insufficient resources to carry on project activities, although the financial requirements for project continuation could have been foreseen and planned for from a project's inception. Instead, budget and personnel decisions typically perpetuated the "special project" status of innovations, thereby leaving them particularly vulnerable to the financial and political fortunes of the district.

While the overall effects of federal policy may be disappointing, the positive results should not be overlooked. Some local projects worked well, and from these successes, we can identify factors that determine the fate of innovations.

Factors Affecting Implementation and Continuation

In addition to analyzing the effects of federal policies, we examined how characteristics of projects and school districts affect the outcomes of innovations. We studied the projects' educational method, resource levels, scope, and implementation strategies; the district characteristics we analyzed were school climate and leadership, teacher attributes, and district management capacity and support. We found:

1. *Eaucational methods.* A project's methods determined its implementation, effect, and continuation to only a small and limited extent. This is so because projects with essentially the same educational methods can be, and usually are, implemented very differently and thus with varying effectiveness. In short, what the project *was* mattered less than how it was done.

2. *Project resources.* More expensive projects were generally no more likely than less expensive ones to be effectively implemented, elicit teacher change, improve student performance, or be continued by teachers. Nor did variations in the number of project schools per district or in the funding per student strongly affect project outcomes in most cases.

3. *Scope of project.* Ambitious and demanding innovations promoted teacher change and teacher continuation of project methods without necessarily causing unmanageable implementation problems or diminishing gains is student performance. Teachers must clearly understand their project's goals and percepts; such clarity comes during implementation. We doubt whether projects aiming at significant change can be effectively implemented across a whole school system at once.

4. *Implementation strategies.* Implementation strategies are the local decisions and choices, explicit or implict, on how to put the innovation into practice. We found that these strategies could spell the difference between success or failure, almost independently of the type of innovation or educational methods involved; moreover, they could determine whether teachers would assimilate and continue using project methods or allow them to fall into disuse. The following strategies were frequently *ineffective* because they were not consonant with the conditions of school district life or with the dominant motivations and needs of teachers:

Outside consultants.
Packaged management approaches.
One-shot, preimplementation training.
Pay for training.
Formal evaluation.
Comprehensive projects.

Effective strategies promoted *mutual adaptation,* the process by which the project is adapted to the reality of its institutional setting, while at the same time teachers and school officials adapt their practices in response to the project. Effective strategies provide each teacher with necessary and timely feedback, allow project-level choices to be made to correct errors, and encourage commitment to the project. The following were effective strategies, particularly when applied in concert:

Concrete, teacher-specific, and extended training.
Classroom assistance from project or district staff.
Teacher observation of similar projects in other classrooms, schools, or districts.
Regular project meetings that focused on practical problems.
Teacher participation in project decisions.
Local materials development.
Principal participation in training.

5. *School organizational climate and leadership.* Three elements of a school's organizational climate powerfully affected the project's implementation and continuation—the quality of working relationships among teachers, the active support of principals, and the effectiveness of project directors. The importance of the principal to both short- and long-run effects of innovations can hardly be overstated. The principal's unique contribution to implementation lies not in "how to do it" advice better offered by project directors, but in giving moral support to the staff and in creating an organizational climate that gives the project "legitimacy." The principal's support was also crucial for continuation. Teachers were unlikely to continue a full array of project methods without the sanction of their principal, even if the methods were successful and had been assimilated. Moreover, after the end of federal funding, many districts took a laissez-faire attitude of letting the principals decide the fate of the project within their schools. Unless principals actively promoted the project, particularly in regard to seeking district financial support and replacing staff that moved elsewhere, even "successful" projects could wither away. All told, the principal amply merits the title of "gatekeeper of change."

6. *Characteristics of schools and attributes of teachers.* Change was typically harder to obtain and continue at the secondary level. Three teacher attributes—years of teaching, sense of efficacy, and verbal ability—significantly affected project outcomes. The number of years of teaching had *negative* effects: the longer a teacher had taught the less likely was the project to achieve its goals, and the less likely was the project to improve student performance. Furthermore, teachers with many years on the jobs were less likely to change their own practices and less likely to continue using project methods after the end of federal funding. The teacher's sense of efficacy—a belief that the teacher can help even the most difficult or unmotivated students—showed strong positive effects on all outcomes, where as teachers' verbal ability had a positive correlation only with improved student achievement.

7. *District management capacity and support.* Districts differ sharply in their capacity to manage change agent projects and in their receptivity toward them. Though we could not measure these factors with precision, our observation and interview data leave little doubt as to the importance of constant and active support from LEA officials and specialized staff for the project's short-run outcomes and especially its long-run fate.

*Implications for Federal policy*

Our research suggests that federal policy has often been based on misconceptions about the reality of school districts and the factors that produce change in their organizational and educational practices. Correct assumptions would not, of course, automatically improve policy effectiveness, because any policy may be poorly implemented. But faulty assumptions—indeed even one faulty assumption among otherwise good ones—can lead to ineffective and counterproductive programs. Federal policy to date has largely been based on a research and development point of view—that the federal government should develop new technologies, provide incentives for their adoption, and introduce these technologies into school districts by projects that were targeted, and thus accountable. In a very real sense, school districts were thought of as "black boxes." Federal "inputs" would be supplied to change and control district behavior so that a desirable educational "output" could be achieved. This R&D point of view was embodied in the following assumptions:

1. Improving educational performance requires innovative educational technologies.

2. Improving educational performance requires the provision of missing resources to school districts.

3. Improving educational performance requires a targeted project focus.

We believe that federal officials should set aside the largely ineffective R&D point of view. Instead, they might consider an approach that assumes school districts are ultimately responsible for improving their own performance but require both short- and long-run aid to achieve this end.

School districts need institutional assistance, but an institutional development strategy can work only if federal officials identify those aspects of the local change process and of district organizational characteristics where federal resources and influence can be effective. The following premises might provide building-blocks to formulate this point of view:

1. Educational performance could be improved if more attention were paid to all stages of the local change process.

2. Educational performance could be improved with adaptive implementation assistance.

3. Educational performance could be improved if the capacity of school districts to manage change were enhanced.

These premises, as well as mode specific recommendations suggested in the report, direct attention to areas that federal policy has tended to neglect. For example, they suggest that local adoption of projects should not be the sole federal policy focus; that federal efforts to improve the change process within school districts should take precedence over their past concern with improving educational products; that federal evaluators should expect and encourage the adaptation of programs to suit local needs; that the federal government should promote local institutional development in addition to more targeted project approaches; and that federal legislation should establish ways to provide more differentiated and flexible support to school districts. In short, these premises suggest a shift in the federal role toward the process of educational change, which might well imply a strengthened role for state educational agencies. We believe that policy should reflect the assumption that state education agencies are potentially better suited than federal agencies to influence and provide opportune assistance to school districts.

Mr. PROXMIRE. Mr. President, I point out that that splendid TV program should be included in the RECORD because, of course, it is highly perishable, and if it is not preserved in some way it is hard to refer to.

## LAWYERS, HUMAN RIGHTS, AND THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it should come as no surprise that, in the three decades since the Genocide Convention first came before the Senate, almost no one has objected to the treaty on principle. No, opponents have always rested their case on supposed legal shortcomings of the document.

That is why February 27, 1976, was such an important day in the history of the Genocide Convention. On that day, the secretary of the American Bar Association, Mr. Herbert D. Sledd, wrote a letter to my colleague, Senator SPARKMAN. The letter notified the Senate that the ABA's House of Delegates had voted at their February 1976 meeting to support the Genocide Convention. With opponents placing so much weight on the legal drawbacks of the treaty, the support of this distinguished body, the representative of the legal profession in America, was particularly heartening.

It is really not surprising that the American Bar Association should take such an enlightened, humane position on this crucial human rights treaty. In fact, the ABA has consistently recognized its peculiar responsibility to advocate the cause of human rights across the globe.

Let me mention just one recent example.

In May 1977, shortly before assuming his duties as president of the American Bar Association, Mr. William B. Spann spoke before the 20th conference of the Inter-American Bar Association, on the topic "Lawyers and Human Rights." Mr. Spann stated unequivocally the role lawyers must play in advancing human rights.

"There can be no doubt," he said, "where lawyers' responsibility as professionals lies in regard to human rights. They have a very special obligation to assert themselves in their behalf."

Mr. President, how is it that lawyers have a responsibility to human rights? What about their profession obligates them in this way?

From Plato and Cicero down to Rousseau, the great thinkers of Western civilization have known that for a society to be good, it must first have good laws. But they knew also that good laws are to no avail if not vigorously, scrupulously upheld.

Mr. President, the lawyer's obligation is twofold: To labor for good laws, and to make certain that the law is upheld.

This obligation comes through crystal clear when we consider human rights. These rights are so fundamental that any law abusing them is clearly a bad law, and any action denying them is clearly unlawful. Much of the responsibility for making certain that human rights receive the protection of the law, both in theory and in fact, must logically fall on the legal profession itself.

Mr. President, if we are ever to have peace and justice in the world, we must enact just, humane laws, and we must be vigilant in their defense. We need to make the protection of human rights a reality instead of an empty platitude. The Genocide Convention is an important step in that direction.

The support of the American Bar Association, and of clear-sighted individuals like William B. Spann, makes it all the more likely that we will soon take that step, and many more afterwards, toward safeguarding the human rights of all the world's people. With their help, and the help of all those who revere good laws and labor to make certain the law is good, we can enact just laws and make them stick.

The American Bar Association stands behind the Genocide Convention. What more assurance do we need?

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business of not to exceed 15 minutes, with statements therein limited to 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered. Is there morning business?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CANNON). Without objection, it is so ordered.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## PRIVILEGE OF THE FLOOR

Mr. JACKSON. Mr. President, I ask unanimous consent for the privilege of the floor in connection with the conference report which will be called up shortly on the natural gas pricing bill, H.R. 5289, for Charles Gentry, of the Budget Committee staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask for the privileges of the floor during the consideration of the Natural Gas Pricing Act conference committee report for Barry Direnfeld, Rick Wilson, Roy Meyers, Dan Grady, and Rick Sloan.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. I yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I ask unanimous consent that the following staff members be given floor privileges during the consideration of and voting on H.R. 5289, the natural gas conference report: Fred Craft, Danny Boggs, Dave Swanson, Tom Imeson, Carol Sacchi, Rose Fillingane, Ted Orf, Chuck Trabandt, Nolan McKean, Peggy Kimbrough, and Judy Foley.

The PRESIDING OFFICER. Without objection, it is so ordered.

## NATURAL GAS POLICY ACT OF 1978—CONFERENCE REPORT

Mr. JACKSON. Mr. President, pursuant to the previous unanimous consent agreement, I submit a report of the committee of conference on H.R 5289 and ask for its immediate consideration.

Mr. HANSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. CANNON). The report will be stated.

Mr. HANSEN. As I understood the Senator, he stated——

The PRESIDING OFFICER. First, the clerk will report.

Mr. HANSEN. The Senator said "according to the previous unanimous-consent agreement."

Mr. JACKSON. That I be recognized.

Mr. HANSEN. All right; no objection.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing vote of the two Houses on the amendment of the House to the amendment numbered 8 of the Senate to the bill (H.R. 5289) for the relief of Joe Cortina of Tampa, Florida, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection? Without objection, the Senate will proceed to the consideration of the conference report.

Mr. JACKSON. Mr. President, the Senate today begins to consider the conference report on the Natural Gas Policy Act of 1978.

We do so at a critical time for national economic and energy policy. Rightly or wrongly, events have made congressional action on natural gas policy a serious test of our ability to deal with major

national problems and halt the erosion of confidence in our economic and political institutions.

I have participated in debates over natural gas pricing policy for 25 years in the Senate. For the past 18 months I have devoted the largest part of my time to the prolonged, painstaking and—at times—painful deliberations which produced this compromise.

I do not ask my colleagues to approve this conference report on the vague grounds of national interest or to satisfy the demands of world opinion.

If this bill is not a major step forward toward a sound natural gas pricing policy, we should defeat it. If it is not a vast improvement over the shambles of a regulatory system we have in natural gas today, we should defeat it.

I am convinced that the natural gas conference report is a sound compromise that will be good for the Nation and that we must pass it.

It will increase supplies of our premium fuel for the Nation's consumers while providing price certainty and new markets for the Nation's producers. Even the act's opponents do not dispute the critical fact that substantial additional quantities of natural gas will flow into the interstate market at prices below that of displaced alternate fuels if this bill is enacted.

The fact is that the conferees have agreed on legislation dealing in a definitive way with a central issue of energy policy—natural gas pricing—which has gone unresolved for a quarter of a century.

We are proposing a natural gas pricing policy to replace the increasingly unworkable, antiquated system we have today.

We are proposing a policy which opens the interstate market to producers, allowing gas now backed up in the intrastate market to flow into the interstate market, where it is sorely needed.

We are proposing a policy which concentrates the rewards of higher prices where they are most needed—on the development of new, high-cost gas.

We are proposing a policy which would, through incremental pricing, protect the residential and small commercial consumers who most need protection from excessive price increases.

We are proposing a policy which assures the privately-financed construction of the Alaska gas pipeline to bring 0.8 trillion cubic feet of production to domestic markets in 1985.

We are proposing a policy which, by opening Alaskan production and stimulating greater production in the lower 48 States, could increase interstate gas supplies by 30 percent by 1990.

We are proposing a policy which could, by 1985, reduce our dependence on high-cost foreign oil by 1 million barrels a day, saving more than $5 billion a year in our balance of payments.

Mr. President, over the past few weeks this conference compromise has been subject to attack from all sides. Consumer groups argue that it will set prices too high. Producers contend that prices will be too low. Many critics contend that the bill is unworkable, that it would cost billions more than no bill, that the status quo is far preferable.

As debate on the conference report begins, I will address two issues—whether the bill will work and produce new supplies, and whether it will cost consumers more than no bill at all. I plan to discuss incremental pricing in some detail later during the debate.

(Mrs. HUMPHREY assumed the chair.)

Mr. JACKSON. Madam President, the virtues of the status quo are worth examining in light of two basic criticisms: that the bill is unworkable and cannot be administered and that it will cost billions more than a continuation of present law.

Everyone has heard of the 17 or 18 or 22 categories of natural gas this legislation creates. But counting categories is a simplistic exercise which should be taken with a grain of salt.

According to the Independent Gas Producers Committee:

> The definitions of each category are clear cut, and should not be difficult to apply. New discoveries and new reservoirs qualify for the new gas price. A special incentive development price is available for bona fide reservoir extensions. Stripper wells qualify for a higher ceiling price, and high cost gas is deregulated in one year. Flowing gas prices are not affected until existing contracts expire.

That is it.

Most of the categories of natural gas in the conference report result from the differences between the House and Senate new natural gas definitions. Our objective was to target the revenues a producer can expect to receive from production from a given well. We wanted to elicit the maximum supply response at a minimum cost to consumers. For example, the most expensive kinds of wells to drill, those over 15,000 feet in depth, are deregulated in 1 year. So is natural gas produced from Devonian shale, methane gas from coal seams, and natural gas produced from geopressurized brine. Because production from these categories will be very important in our long-term natural gas supply picture, they deserve the maximum economic incentive. Gas produced from 15,000-foot wells represents 500–600 trillion cubic feet of potential; methane gas from coal seams represents 300–800 tcf; and geopressurized zones represent 3,000–50,000 tcf. The short-term supply response may be minimal, but the long-term potential is great. These were perfect candidates for the maximum price incentive.

As the Independent Gas Producers Committee puts it, "Although this process (of creating different categories) tended to make the bill more complicated, it also allowed the conferees to achieve a bill that will encourage production while protecting consumers from paying unnecessarily high prices for gas that they could expect to receive at lower prices under current policies."

Yes, Madam President, the legislation is complicated. But it works. And, more importantly, it works far better than existing law.

The existing system is, in my opinion, even more complicated than the conference report. Intrastate producers are generally unregulated, and are subject to a fickle market which is increasingly satiated and unable to expand to accommodate new supplies.

The interstate market price system is a patchwork quilt of various Federal Power Commission and Federal Energy Regulatory Commission, opinions, rules, and orders, I submit that if we could project the situation that would exist in 1985 without new legislation, there would be many more categories of natural gas under the Natural Gas Act than there are under this act. The chart of the interstate market in 1985 would be even more complicated than the chart of the conference report. Let me describe it.

First, you would have five pre-1978 "vintages." When the FPC allowed prices to increase for new natural gas, it did not necessarily allow prices to increase for old flowing natural gas. So you already have FPC opinion 749, which establishes a ceiling price for certain vintages of natural gas; then the rollover opinion which establishes another ceiling price for certain vintages of natural gas; then FPC Opinion 699 for recompletions which establishes yet another ceiling price for certain vintages of natural gas; then the 1973–74 vintage, which is yet another ceiling price; then the famous Opinion 770–A ceiling price for the 1975–76 vintage, which is yet another vintage. Second, you would have all of the 1978–85 vintage prices. Any FERC price decision issues between 1978 and 1985 will be open to question and will certainly be subject to challenge, and Commission review, and court review, by consumer groups, or farmer groups, or producer groups, or a combination of all groups.

Then, of course, one must consider emergency sales, and limited-term certificates, and the optional procedure, and the direct sales to a qualified industrial user under order 533, and the special relief procedures. And, of course, there is nothing to preclude the Commission from establishing new forms of cost-based pricing under the just and reasonable standard of the Natural Gas Act. And do not forget the special proceeding that would be necessary to establish the wellhead price for Prudhoe Bay gas. And so on and so forth. Based on past experience, FERC could be expected to establish at least one, and perhaps two or three, additional categories or vintages of gas every 2 years as it attempts to adjust the current system within the constraints of the Natural Gas Act to bring more gas into the interstate market.

It is easy to count the number of categories under the conference report. But it is very misleading to imply there will be fewer categories by 1985 under the Natural Gas Act. It is also easy to complain about the new litigation that will result under the new legislation. But that is misleading, too, unless you also account for the litigation that will be inevitable under the Natural Gas Act during the same period.

Is this the simple status quo that critics of the conference report seek to maintain?

COST OF STATUS QUO VERSUS COMPROMISE

Consider also the costs of continuing

under the status quo, as opposed to the costs of the compromise.

There are two ways of looking at the cost of the proposed legislation. One way examines the revenues that will be paid to producers between now and 1985. The other way examines the consumer cost between now and 1985. Obviously if you produce more natural gas under the compromise than you would under present law, the producer will have greater revenues.

But producer revenues should not be confused with consumer cost. The measure of consumer cost compares what consumers would pay for the energy supplies by natural gas with what consumers would pay for energy supplied from other sources if natural gas is not available.

In order to project either producer revenues or consumer cost for years to come, it is necessary to project what would happen to natural gas wellhead prices under existing law, without the legislation, and what would happen with the legislation. This crystal ball approach is hazy, at best, but it is a useful tool for assessing the consequences of no legislation.

I need to stress the importance of looking at the assumptions that are made about the future of natural gas prices without any legislation and the supply response projected to occur under the legislation before attempting to compare various cost estimates.

If you assume that the FERC will not raise interstate ceiling prices for natural gas, and that intrastate prices will also remain constant, the proposed legislation could cost $9 billion more in producer revenues than the status quo. The consumer cost of the proposal would be only about $1 billion with those assumptions, because consumers would pay nearly $8 billion less to foreign sources for heating oil, liquefied natural gas, and imported natural gas due to increased supplies of domestic gas. These are the assumptions and statistics used by the staff of the House Subcommittee on Energy and Power in analyzing the conference report.

Quite frankly, I do not agree with those assumptions. It is not reasonable to assume that FERC will keep interstate natural gas prices constant; nor is it reasonable to assume that intrastate prices will not increase.

If you assume that FERC will allow interstate prices to increase at a rate equivalent to projected increases in the cost of fuel oil, and that intrastate prices will increase at a similar rate, projected producer revenues would be $5 billion less with the proposed legislation than under the status quo. These are also statistics used by the House Subcommittee on Energy and Power which I believe are more reasonable ones.

Consumer group analysts assert that the proposed legislation will cost $35 to $55 billion more than we would pay—under the very generous House bill which is $21 to $41 billion more than the status quo—if we stick with the current gas price control law and the current law is fully enforced by the brandnew Federal Energy Regulatory Commission. Their analysis assumes there is no real price increase in interstate natural gas prices. They also assume that FERC is able to fully enforce the Natural Gas Act and in doing so control the price of old intrastate natural gas at the same price as old interstate natural gas. Intrastate rollovers would be limited to the same rate that interstate rollovers are allowed by the FERC.

In my view, their assumptions are simply unrealistic. The consumer groups have petitioned FERC to exercise authority under a nondiscrimination provision in the Natural Gas Act which they believe enables the Federal Government to control intrastate natural gas prices at the wellhead. I must say, Madam President, it is a novel legal theory and I give them credit for their idea. But even if FERC did grant their petition, it would no doubt be subject to challenge in the courts and the results would be tied up in litigation for years.

Indications are that even the friendliest circuit court of appeals the consumers could hope for, the District of Columbia Circuit Court of Appeals, would not accept their argument.

In a recent opinion, the court said that the plea "that intrastate sales be regulated, is a plea that must be addressed to the legislature. The courts cannot provide the relief desired." *American Public Gas Association et al.* v. *Federal Energy Regulatory Commission*, No. 75-2105, D.C. Cir., May 10, 1978.

But even if the consumers could convince the court to change its mind, and decide that the Natural Gas Act does provide authority to regulate intrastate prices, I doubt that it would roll back existing intrastate prices to interstate price levels. Under close scrutiny, the consumer groups' price projections simply do not hold up.

In sum, Madam President, this bill does not gouge consumers and cost them untold billions of dollars. Even conservative assumptions show it will cost consumers no more than $1 billion more than existing law between now and 1985. And more realistic assumptions show that it will save—not cost—consumers substantial amounts of money.

President Carter's National Energy Act has been before the Congress for 16 months. Those 16 months have been difficult ones.

Madam President, the time to act is now. The proposed legislation deals head on with the massive distortions of the dual market system for natural gas. It will produce more natural gas, at less to consumers, than no bill. It will provide producers with the certainty they need to make investment. It will decrease our balance of payments problems by reducing the amount of crude oil that we import.

I urge adoption of the conference report on H.R. 5289, the Natural Gas Policy Act of 1978.

(Mr. BAYH assumed the chair.)

Mr. BARTLETT. Will the Senator yield for a question?

Mr. JACKSON. Yes.

Mr. BARTLETT. The distinguished chairman of our committee has been very closely associated with this conference report for some time.

My question is, Would the Senator classify it as a deregulation proposal, or conference report, or as a regulation conference report?

Mr. JACKSON. It is a phased deregulation bill which, in 1985, if it does not work, the Congress and the President retain the opportunity to continue price regulations for 18 months, if necessary.

Mr. BARTLETT. Are there not classifications of gas that will be——

Mr. JACKSON. Deregulated?

Mr. BARTLETT. That will be controlled forever?

Mr. JACKSON. No—well, we are talking about ongoing contracts, and that is old gas.

But I am talking about the categories I mentioned in my remarks that will be deregulated within 1 year. That is the high cost gas.

Mr. BARTLETT. For example, the gas that might have great potential in the Baltimore Canyon that is just, possibly, being discovered now—at least it looks very interesting—I believe is on old leases. Would that not be controlled gas, the price of which will be controlled forever in the future as far as this legislation is concerned?

Mr. JACKSON. I point out to the Senator that the gas from the Outer Continental Shelf, as the Senator knows, has been dedicated by statute over the years to the interstate market.

I would point out to the Senator that even Pearson-Bentsen continued regulation of certain categories of natural gas. I think that is the bill the Senator voted for——.

Mr. BARTLETT. Are there not other categories of gas that will be controlled; stripper gas for one, intrastate gas with the price less than $1 for another; was that not controlled?

Mr. JACKSON. Yes, but let me add one thing. The Senator asked about the Baltimore Canyon. The new reservoirs that come in will be subject to deregulation.

Mr. BARTLETT. I understand that. But is it not true it takes about 10 to 15 years leadtime to develop any amount of production on new offshore leases?

These leases were awarded, I believe, in 1966.

Mr. JACKSON. Well, the OCS Act requires that on the Outer Continental Shelf they must act, that is, get drilling underway, within 5 years. I believe that is the existing law.

Already, they have discovered some gas in the Baltimore Canyon area allegedly—all I know is what I read in the papers.

Mr. BARTLETT. Well, does the Senator have——.

Mr. JACKSON. I want to emphasize to the Senator that the bill that passed the Senate, Pearson-Bentsen, which I voted against, made provisions for the continued regulation of certain categories. The Senator voted for that; I did not.

So when we went to conference, obviously, we had to try to reconcile the differences between a close vote in the Senate to deregulate and a close vote

in the House to regulate. I think we did the most sensible thing that one could do under all the circumstances.

The art of legislating—that is what we are here for—is to try to find a way in which we can reconcile real differences in bills that have been passed by one body versus the action taken by the other.

Mr. BARTLETT. Am I correct in my understanding that new reservoirs on old leases offshore are not deregulated by the conference report?

Mr. JACKSON. The Senator is in error on that. They are deregulated.

Mr. BARTLETT. We will do a little checking on that with the conference report.

I will ask another question.

At the present time we get about 40 percent of our gas production from the intrastate market. Is that not roughly correct?

Mr. JACKSON. My understanding is that last year the demand for natural gas was about 20 trillion cubic feet. Supply was a little more than 19 trillion. The intrastate market was a little more than 8 trillion. So that is better than 40 percent. Would the Senator agree with that? It is about 42 percent or 43 percent of the market.

Mr. BARTLETT. I was trying to be conservative. Yes, 42 or 43 percent.

Mr. HANSEN. Mr. President, will the Senator from Oklahoma yield?

Mr. JACKSON. Will the Senator withhold for a moment? The distinguished Senator from New York has a unanimous-consent request, and I yield for that purpose.

Mr. METZENBAUM. Mr. President, will the Senator yield for a unanimous-consent request?

The PRESIDING OFFICER. Does the Senator from Washington yield?

Mr. JACKSON. I yield.

Mr. METZENBAUM. On behalf of Senator HUMPHREY, I ask unanimous consent that Tom Gator have the privilege of the floor; and on behalf of the Presiding Officer, Senator BAYH, I ask unanimous consent that Eve Lubelan have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I make the same request for Dr. Jerry Cohen, of my staff, and Mr. Sam Ratner and Miss Jocelyn Samuels.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington has the floor.

Mr. BARTLETT. I believe the Senator did say earlier that new reservoirs on old leases offshore are deregulated.

Mr. HANSEN. He said deregulated.

Mr. JACKSON. Yes. The staff advises me that the new reservoirs will get the new price but that they will not be deregulated after 1985.

Mr. BARTLETT. That was the point I was trying to make.

Mr. JACKSON. They are deregulated for nonprice purposes, but for price purposes regulation continues after 1985.

Mr. BARTLETT. The present percentage of deregulated gas, then, according to the Senator from Washington, is approximately 42 percent.

Mr. JACKSON. That is a rough approximation.

Mr. BARTLETT. I agree with that. I will call it 40 percent, if the Senator wishes.

Mr. JACKSON. It does not matter.

Mr. BARTLETT. I think 42 percent is a little more accurate.

What percentage will be deregulated for price in 1985, after we have deregulation?

Mr. JACKSON. I cannot give the Senator a figure on that. That will depend on new discoveries and the amount that will come into the market. That would be pretty much in the field of speculation.

Mr. BARTLETT. I think there is some speculation with it, but I think the Department of Energy has made some general determinations as to what that would be.

Let me put it this way, then: Does the Senator anticipate that the amount deregulated in 1985 would be greater than the amount today?

Mr. JACKSON. Oh, yes; there is no question about that. The staff has indicated that the Department of Energy has supplied estimates, and they talk about 24.6 percent of gas production being "new" gas in 1985 and thus subject to deregulation by that time.

Mr. BARTLETT. 24.6 percent?

Mr. JACKSON. That is the figure they have submitted.

Mr. BARTLETT. We looked at the figures that DOE had in the report. I do not have the name of that report before me, but the amount came out to be less than 40 percent.

I find that many people have been very discouraged with that kind of finding. They felt that there would be true deregulation, meaning to them a deregulation of the present interstate gas, which was deregulated in the Pearson-Bentsen bill, as the Senator knows. It appears that this certainly is not a deregulation bill.

Mr. JACKSON. I said it is a phased deregulation bill.

Mr. BARTLETT. Apparently, it would deregulate in the future, at such time as there were no controls, after 1985, but it does not phase deregulation in the 7 years or so of the existence of control under this conference report.

Mr. JACKSON. I am trying to describe this the best I can. The Senator from Washington philosophically, of course, supports regulation. As the chairman of the committee, I have a responsibility to put together legislation that would give us some kind of policy, despite the opposing views of the two bodies. I believe that regulation is the proper way to approach it. So I had to allow my views to be subordinated to the decision of this body and the views of the House.

I believe that, on balance, we have a bill here that will serve the public interests and the national interests, which the current law will not do.

As a regulator, when I talk to my friends who are for keeping the old law, I have to taunt them and say the old law is inadequate. After all, I have been here through all these battles, supporting regulation. I supported Mr. Truman when he vetoed legislation which would have taken away from the Federal Power Commission the authority to regulate gas.

I have to point out that if we have regulation, how do my friends on the side that are joined together with all you regulators and deregulators explain that the price of new gas in 1970 was 17 cents and that now, under so-called regulation, it is $1.50? I know the Senator will have a lot of fun with that.

Mr. METZENBAUM. If the Senator will yield, Mr. President, I would like to explain.

Mr. JACKSON. I yield.

Mr. METZENBAUM. That was because two previous Presidents had made the wrong appointments to the Federal Power Commission. Now, under the present appointments, I am looking for better protection for the American consumer.

Mr. JACKSON. I say to the Senator from Ohio that the trouble with that argument is that the Federal Energy Regulatory Commission does not have the power they should have, which is to get the gas.

And the reason that the price has gone up under the doctrine of just and reasonable compensation is that the price of oil has gone up, thanks to the OPEC oil cartel. It is fine to make these great statements about being for regulation when the existing law is totally inadequate. I challenge my friend, and I will support him if he really wants a motion to recommit with instructions to vote for tougher regulations, how many votes he will get. Does the Senator know, I say to my friend—and I was here—that under a Democratic Congress, Mr. President, we could not get the votes for tough regulation. I was here. I know. It was only a courageous Mr. Truman who stopped that move way back.

So I am here trying to be realistic because I know that under existing law the Federal Energy Regulatory Commission cannot adequately do the job of regulating.

Mr. METZENBAUM. Mr. President, will the Senator from Washington yield?

Mr. JACKSON. I quoted the dicta from the—may I just finish?

Mr. METZENBAUM. I am sorry.

Mr. JACKSON. I quoted the dicta from that most liberal category of judicial repose, the Circuit Court of Appeals for the District of Columbia, that they will not entertain the idea by legislation that you can regulate intrastate gas. That should be a clear signal to our friends who are laboring under the impression that by judicial action you can do it. But where are the votes, I say to my good friend from Ohio? Where are the votes for tough regulation?

Mr. METZENBAUM. I respond to my very good friend and my leader on the Energy Committee that the votes are not there for tougher regulation and hopefully the votes will not be there for this phased deregulation which really becomes almost total deregulation in some instances by reason of the redefinition of old gas and new gas and the rollover contracts.

I also say to the Senator from Wash-

ington that when he was talking a moment ago about how FERC is going to get the new gas, let us first agree there is a surplusage of natural gas in this country at the moment and there is a glut on the market, but let me also remind the Senator—if my friend from Washington says that I am in error I will publicly admit that—is it not the fact that at one point in these deliberations in the conference committee the Senator said he would never accept a natural gas bill if it did not contain a provision giving the President the authority to have mandatory allocation so that he might go into the intrastate market and bring out natural gas into the interstate market? And the conference committee report on the bill does not have that provision in it? Is that not correct?

Mr. JACKSON. That is correct, and this bill does make it possible to allocate gas for boiler fuel.

Mr. METZENBAUM. But that is just a de minimis item.

Mr. JACKSON. It is not de minimis.

Mr. METZENBAUM. But the fact is that is on emergency situations not in excess of 120 days, but as far as allocating intrastate gas into the interstate market, which the Senator indicated to those of us who serve with him and supported his leadership in the conference committee, he would never accept the bill that did not give the President the authority for mandatory allocation from the intrastate market to the interstate market and not merely for the limited extent that is provided for under the conference committee report.

Mr. JACKSON. We got part of it, and I think that is a helpful part. It is the best we could get. But I do not know how the Senator from Ohio can support a motion to recommit that will send the bill back which he knows will be dead and face the country with the fact that nothing is being proposed as an alternative to this bill. I have great respect for those who will come in and move to recommit the bill with tough regulations. Why is that not being offered?

Mr. METZENBAUM. Because that will not survive. The Senator knows it and I know it.

Mr. JACKSON. We are both going in opposite directions.

Mr. METZENBAUM. There is not any reason under the sun why our motion to recommit with instructions should not be agreed to. It will bring back this very provision that the Senator just talked about, which would make it possible for FERC to allocate gas from the intrastate market to the interstate market where there is surplus gas. That would all be in our motion to recommit with instructions. If the bill sounds a death knell, it will not be because the Members of the Senate were unwilling to have a natural gas bill. It will be because someone preconceived an idea many months ago that we have to hold hostage three bills that were the part of the national energy plan. We hold those bills hostage and what we will do is then get a natural gas bill that will satisfy the oil and gas industry, and then after we get that, we will get the wellhead tax. That was the preconceived plan, but it did not work.

Now we are saying none of this stuff has worked so far. It just did not. Why do we have to say to the American people that you are going to get hit with, I do not care what the number is—$20 billion, $11 billion, $29 billion, $40 billion—whatever the amount is? Why should the American people have to pay a price for a piece of legislation that even its best supporters say is nothing but a C-minus piece of legislation? I think that we are asking too much and we do not need legislation under these circumstances.

Mr. JACKSON. I wonder what the Senator from Ohio is going to do about the gas that should come from Alaska, which is in this bill? Why does he not say something about the gas that we need to bring from Alaska to do something about supply and about the balance of payments?

That is, Mr. President, a very critical part of this legislation and that part of the President's program will die if that motion to recommit carries.

Mr. METZENBAUM. Will the Senator from Washington be willing to go with us on the motion to recommit if we accepted that portion of it?

Mr. JACKSON. Why, of course not. That is only a part of the bill. But the Senator has made an arrangement with the deregulators. That is the unholy part of this alliance. The regulators on one side and deregulators on the other side are sending to conference a proposal which will not give us a program in the field of natural gas but is just dealing with emergency gas. How can one face the country, Mr. President, go home and tell the people of this country we do not have an alternative program to this one? What is your alternative program?

Mr. METZENBAUM. The alternative program is included. The Senator is well aware of the fact that in our motion to recommit we intend to give the President the emergency powers that the Senator just described in the Chamber giving him the authority to allocate gas to priority users. We also provide that the surplus gas, which may be moved from the intrastate market into the interstate market under orders made by FERC, will provide people some protection, and we also provide that you can move gas in the intrastate market along interstate pipelines without thereby becoming subject to the Federal regulations.

Mr. JACKSON. Does the Senator have his motion to recommit? I wish to see a copy of it. I have not seen it.

Mr. METZENBAUM. I will be happy to make a copy available to the Senator.

Mr. JACKSON. I wish to see it.

All I am saying, Mr. President, is how can one go home after this session of Congress, having been here for almost 18 months, and say that we just killed the program, we did not come in with an alternative program? If the alternative program is simply to extend the Emergency Natural Gas Act, that is buying deregulated gas, is it not? That is buying deregulated gas. I do not know how my good friend can be associated with that ideology.

Mr. METZENBAUM. I say to the Senator from Washington I will be very happy to share with him the terms of our motion to recommit which were outlined in the Dear Colleague letter signed by 24 Senators.

Mr. JACKSON. Fine. But is it not a fact that the Senator is proposing in this motion to recommit in an emergency to buy deregulated gas? I thought the Senator favored regulation.

Mr. METZENBAUM. That is the very provision that is in the bill that the Senator is standing on the floor advocating at this moment, and what we are saying is that we will take some portions of the bill that the Senator is advocating and which were needed on an emergency basis, but we do not want the pricing provision.

Mr. JACKSON. But the Senator knows in this bill for the first time—and that is why my colleagues from the producing States in the South are opposing it—for the first time we are providing for a ceiling price on intrastate gas on the same basis as interstate gas.

Mr. METZENBAUM. The ceiling price, I might point out, is much higher than the market price of that same gas, substantially higher.

Mr. JACKSON. In the summertime, and I would point out it is a ceiling and, obviously, they are not going to sell gas up to the ceiling if the market is below it.

Mr. METZENBAUM. It has been higher by about 40 cents per mcf for a good many months now.

Mr. JACKSON. All I want to say is, as one who has supported in this Congress regulation longer than any Member of this body, I had to face a problem, and that was to reconcile the action taken by the Senate, which supported regulation by a narrow margin, and by the House which supported regulation by a narrow margin.

All I want to say, Mr. President, is I think this legislation is, on balance, in the national interest for the consumers. I come from a State that pays the highest price of any State in the Union for natural gas. We get it all the way from Canada because we have not been able to get production, Mr. President. We have to buy it from Canada at $2.16 per 1,000 cubic feet, which is higher, Mr. President, than the unregulated intrastate price of new gas, which currently is about $1.80.

I do not want this country to be dependent on other countries for its gas supply.

I again emphasize, Mr. President, that this bill makes possible the movement of almost 1 trillion cubic feet of gas from Alaska across Canada into the middle of the United States, and that addresses itself to supply and that addresses itself to the balance of payments.

I believe this body, the Senate—yes, and the House—has a responsibility of facing the energy problem head on. If we want to reject this bill, then pass a bill that will get the supply and provide for a sensible price to the consumer. But where is that proposal? It is not being offered.

For the Congress to adjourn and say, "Well, we recommitted it," killed it, I would not want to face my constituents

under those circumstances or face a cold winter with a short supply of gas.

With the dollar, Mr. President, every time you turn on the radio in the morning, the first thing you hear—the radio or TV—is the dollar is down again today in Zurich, the dollar is down again today in London, Bonn, and in Tokyo.

I think we have to fish or cut bait in this operation in which we are involved. It is obvious that we have irreconcilable views in the Senate if we do not work out a compromise, we have irreconcilable views with the House if we do not work out a compromise. That, Mr. President, in my years in Congress is what legislation is all about. You just cannot say, "I am going to either have it my way or I am going to take my marbles and go home."

We have tried to put this all together in what I think is the best bill we can get after 15 months of labor.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that floor privileges be granted for Ed Tanzman and Chris Burke of Senator DURKIN's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. President, I ask unanimous consent that Jim Fleming and Martha Moloney of my staff be granted the privileges of the floor during the debate and vote on this piece of legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I rise today to express in the strongest terms my opposition to the conference report now before us. I have great respect for the chairman of the Energy Committee, but in this issue I must disagree with him because I believe it is bad legislation. It is bad because it will saddle the consumers of gas in this country with up to $41 billion in additional costs between now and the end of 1985, costs which will fall heaviest on residential consumers.

The sad fact is that even the strongest supporters of this legislation do not claim it will call forth much in the way of additional gas production between now and 1985.

The very estimates—and I have just heard the distinguished Senator from Washington use it—is that it would mean a trillion cubic feet in 1985, which would be 5 percent.

The other figures that are being used by the CBO are seven-tenths of a trillion cubic feet, which would be 3½ percent, but it will be——

Mr. FORD. Mr. President, will the Senator yield?

Mr. METZENBAUM. I will not.

Mr. FORD. I just want to get the Senator straight on something.

Mr. METZENBAUM. It will have a severe effect on consumers. By 1985 the average wellhead cost of this legislation will be 353 percent of what it was last year, 618 percent of what it was in 1975, and 1,608 percent of what it was in 1970.

Those specific figures, Mr. President, are 17.1 cents per mcf in 1970; 44.5 cents in 1975; 77.9 cents in 1977; and a projected $2.75 average figure in 1985, although the actual maximum at that point would be about $3.50.

This bill is bad for consumers; it is bad for producers; it is bad even for the regulators, and it is bad for our economy as a whole.

By sharply raising the costs of the 27 percent of our total energy consumption that now derives from natural gas, the bill will contribute substantially to the inflation that is one of the main causes of the decline abroad in the value of the dollar.

The ripple effects of this price rise will touch every sector of the economy, and the direct impact of higher heating bills on residential consumers—and, I might point out, that over half of the homes in this country heat with gas—will lead inevitably to demands for compensating wage and salary increases.

Mr. President, the Natural Gas Pricing Act is a bill that has no constituency, no constituency outside of the White House and the Office of the Secretary of Energy. I stand corrected in one respect on that point, Mr. President, in that I did note the other day that the League of Women Voters has now come out for the bill, as being the only consumer organization in the country that has indicated its support for the legislation.

This bill has only one distinction. It is a bill that has produced the most widespread, broadly based opposition that this Chamber has probably seen in a great many years in opposition to a single piece of legislation. It is a bill that nobody wants. It is a bill that brings together in opposition such unlikely allies as the American Conservative Union and the ADA—that may be a first; the U.S. Chamber of Commerce, the UAW, and the AFL–CIO, the American Farm Bureau Federation, and the Consumer Federation of America.

It unites the Independent Petroleum Association of America with Energy Action, the Energy Policy Task Force, and the Environmental Policy Centers.

It joins together marathon oil, the Farmers' Union, and the National Association of State Regulatory Commissioners.

The Secretary of Energy has publicly dismissed this alliance of conservatives and liberals, of consumers and producers, and of labor and industry as a coming together of extremes. By using that language he has attempted to claim the middle ground for himself and his legislation.

But the bill does not represent a middle ground. It is, as one observer described it, "a feeble patchwork, the product of constant giveaways and give-ins."

It is a bill that has often been described as the end result of the administration's desire to get a bill—any kind of a bill.

While the members of the conference committee were meeting at night, keeping other members of the conference committee out of the meeting, what were they saying? They were saying the administration was willing to agree to anything, anything at all, just to get a bill—a bad bill, a good bill, any kind of a bill. This reflects the administration's willingness to pay any price to get a bill.

It is a bill whose strongest supporters grade it no better than "C—".

And it is a bill whose supporters argue for its enactment on grounds that have little or nothing to do with its legislative merits.

We are told, for example, that to vote against this bill is to undermine the President's ability to lead the Nation.

I do not for one moment accept this argument.

I have been a strong and loyal supporter of the President's legislative program.

An examination of my voting record will show that I rank in the top 5 percent of all Senators in supporting the President's positions.

But I cannot and I will not support the President when I know him to be wrong.

I cannot and I will not support him when he acts, as he has clearly done in this case, on bad advice.

And I fail to see any way in which enactment of this crazy quilt of a bill will enhance the administration's position in this country or abroad.

Nonetheless, we have repeatedly been told that failure to pass this bill will signal the rest of the world that, as Secretary Schlesinger recently put it, this country "lacks the discipline" to face up to our energy problems. That signal, the Secretary has assured us, will have what he described as a "devastating" effect on the value of the dollar overseas. It is interesting to note that the Secretary of Energy is the only one who talks in these terms except other administration spokesmen.

Leading experts in international finance do not agree with this assessment. In a letter dated August 23 to the Business Round Table, for example, the vice president for international economic forecasting of the Chase Manhattan Bank wrote as follows:

> The argument that passage of the compromise gas bill would play an important role in halting the decline in the dollar and strengthening the U.S. balance-of-payments outlook is at best highly exaggerated and at worst just plainly wrong. Adoption of the proposed legislation would probably result in a modest strengthening of the dollar in the very short run, but this improvement would not be permanent. In the longer run, the legislation could actually result in some weakening of the dollar as foreign exchange markets come to perceive that the longrun supply of natural gas in the U.S. is as likely to be reduced as increased under the new regulatory regime.
>
> There are two major weaknesses with the administration's position that international implications provide a strong argument for the bill. First, the major source of weakness in the dollar at this time is not a weak current or prospective trade balance but rather worsening expectations about U.S. inflation. Indeed, the dollar has entered a new phase of weakness in spite of widespread recognition by market analysts that the U.S. trade deficit has peaked and is likely to decline substantially in 1979. The movement of the U.S. trade account into a large deficit position—and concerns that growing energy imports would imply continuing balance-of-payments difficulties—were the major sources

of weakness in the dollar from the summer of 1977 until the spring of 1978. The current weakness of the dollar springs from the accelerated rate of inflation in the U.S. and perception that U.S. monetary policy seem designed to accommodate to increased cost-push inflation. No policy action that is not designed to affect inflationary expectations is likely to have a significant and permanent impact on the value of the dollar under current market conditions.

Second, it is by no means clear that the market will perceive the compromise bill as resulting in an enhanced long-run supply of natural gas in the U.S. and hence an improved long-run balance-of-payments outlook. The legislation is highly complex and difficult to analyze, thus there is likely to be a short period of euphoria in which the dollar temporarily strengthens in response to the assumption of favorable supply effects. Our belief is that once market analysts have time to examine the legislation carefully, they are likely to conclude that the status quo provides at least as much production incentive as the proposed regulatory regime.

This issue we confront today has nothing to do with this Nation's "discipline". Instead, it has everything to do with the Senate's ability to exercise commonsense.

And it makes no sense at all to pass a bad bill in order to somehow appear "tough" or "determined" or "disciplined" in the eyes of foreign observers.

Europeans and Japanese bankers, government officials, and businessmen are no fools. They know this legislation for what it is, and they also know that the problems of the dollar are complex—far more complex than the advocates of this bill would have the Congress and the American people believe.

Mr. President, natural gas pricing has little or nothing to do with the position of the dollar.

West Germany, Switzerland, and Japan are far more dependent than we are on imported energy. Yet their currencies are now the strongest in the world.

Our problem, Mr. President, is that inflation in this country is far worse than it is in the strong foreign economies.

Our problem is that foreigners do not want to hoard our dollar because they believe with good reason that it is a shrinking asset.

And our further problem is that, according to leading Wall Street economists quoted in an article that appeared in the August 18 edition of the Washington Post, foreigners doubt our Government's resolve to do something about it:

"As we read it," said the chief economist for Goldman, Sachs and Co., "there has been in the last couple of weeks a significant loss of credibility in the anti-inflation posture of the government as a whole."

And make no mistake about it, Mr. President, the gas bill is highly inflationary.

As I have already said, it will directly hit every family in this country that heats and cooks with natural gas.

It will have ripple effects on the costs of production of every single item that needs gas in the production process.

And it will inevitably lead to a strengthening of demands for higher wage and salary settlements.

My friend, the distinguished Senator from Maine, has argued in an article published this morning that it is difficult to measure what he calls the "confidence factor" with regard to the expectations of the American people about the economy.

I agree with him that such measurements are difficult for the economists and the statisticians. But I say that if you want to know the confidence factor, if you want to know about the impact of inflation, do not just take a statistician's figure about it being one-half of 1 percent or one-tenth of 1 percent, or whatever the case may be. Walk down the streets of any American community today or tomorrow, and ask the people whether they think inflation is 7 percent, 8 percent, or 10 percent. The American people have lost confidence that we can hold back the whole problem of inflation. I suggest to the Senator from Maine that he ask the people of my State what they think about the prospect of paying $2.75 per mcf by 1985 for gas that cost 17 cents in 1970.

I suggest that the Senator from Maine, or any other Senator, ask the people of my State or any other State in this Union what they think when they pay their soaring utility bills, or when they make a 20-cent telephone call that used to cost a dime. That is not 8-percent inflation or 10-percent inflation. Or go out and buy a hamburger, a 2-by-4, or a lady's dress. Ask them whether or not that is 8- or 10-percent inflation.

Ask them about the statistics and the figures, and you will find that the people of this country are not willing to support any bill that increases their utility bills more than they presently are; and they are complaining about those figures at the present time.

This bill means intolerable pressures on consumer budgets, and no statisticians' figures are going to change the result of the American people. When we went from 17 cents to the place where we are at the moment, about a dollar and a half, and where we go up immediately upon passage of this bill to about $1.93, and then when we go up to $3.00 by 1985, and then when we will go to deregulation after that, the people of American understand what we are talking about.

We are talking about a massive movement of billions of dollars from the consumers of this country to the gas producers of this country.

The gas pricing picture in this country is an unhealthy, dangerous situation. This bill will make it even worse.

We have also heard, Mr. President, that a vote against this costly, cumbersome, and ill-conceived natural gas bill is a vote against the national energy program.

Mr. President, I want to emphasize to the President of the Senate, to every Member of the Senate, and to the American people, that that is just not in accordance with the facts. It is just not true.

The truth is that the Nation could have had an energy program in place almost a year ago. Back in October and November, the conference committee came to agreement on the coal conversion measure, the Utility Rate Reform Act, and the Conservation Act. These three bills will achieve most of the reduction in foreign oil imports envisioned by the National Energy Act. But the administration has deliberately insisted that those measures be held hostage to passage of the gas bill.

I remember when I personally went to representatives of the administration and said, "Will you support us? Will you support the chairman of the Senate Energy Committee in moving those three bills so we can put them into place and we can make them law?" They were unwilling to do so.

Clearly, the strategy of the administration was to give the oil and gas industry enough dollars through the gas bill to enlist their support for passage of the administration's even more costly and inflationary crude oil tax.

This Nation urgently needs an energy program.

Let us go ahead and take up the bills that stand ready for action.

The Nation needs a natural gas bill as part of its energy program. But the Nation does not need a bill passed for the sole purpose of getting something—anything on the books.

Accordingly, I intend to join at the appropriate time with a number of other Senators in introducing a congressional alternative to the faulty legislation that is now before us.

That alternative will take the form of a motion to recommit the bill to conference. with instructions to delete its pricing provisions and to report back alternative legislation. That legislative alternative will restore to the President his expired authority to protect residential consumers from unnecessary supply interruptions in the event of an emergency, and to allow extra gas from the producing States to flow into the consuming States under prescribed conditions.

This alternative proposal will restore to the President the emergency powers that have expired to allocate interstate gas to high priority users like hospitals, schools, and homes. It will also make it possible for FERC to authorize emergency sales from intrastate markets under certain conditions. The alternative will help consumers by sparing them billions of dollars in extra costs and it will help producers and intrastate pipelines by minimizing complex regulations and bureaucratic mumbo jumbo.

And passage of the alternative will permit the Senate to move expeditiously to consideration of the remaining three parts of the national energy plan. It will, in other words, remove the logjam that has kept us until now from putting a national energy program in place.

Let me take a moment to talk about a point that keeps coming up, and that has been emphasized by both the President and the majority leader. It has been mentioned today by the chairman of the energy committee. It is a point that concerns and disturbs a number of Members of this body. Query: Does support and passage of the motion to recommit mean that we are killing the gas legislation? I have said it before and I repeat it now, and was joined by the distinguished Senator from Wyoming the other day:

We are proposing this legislative alternative with the sincere expectation that the conference committee, in these closing days, will promptly return the bill to both Houses for final passage. There will be nothing new in our version of the bill. The language and the issues are not controversial, because they are already in the conference committee bill. Let me emphasize this point:

If the House refuses, with or without the President's support, to accept this stripped-down version of the bill, then it will not be the Senate that has sounded the death knell of the gas bill. The responsibility will lie upon those who for almost a year have played the game of withholding the three parts of the national energy plan on which we have been in agreement. The Senate, if it agrees to our motion to recommit will have spoken in an affirmative manner for a national energy plan.

Mr. President, I have directed the bulk of my remarks so far to generalized issues like Presidential leadership, international currency movements, and the need for a national energy plan. I have done so because those are the themes emphasized so far by supporters of the bill. As such, they are topics that must be addressed.

But I believe that it would be a mistake for the Senate to confine its debate to these broad concerns. In the end, our decision must turn on the specifics of the bill.

There is a report around, and it has been repeated often, that the administration, when they are going out seeking votes for the conference committee bill, does not want to talk about the specifics of the bill. They do not want to talk about how this proposal before the Senate is different from that which the administration originally proposed.

It is no secret that the bill the administration now supports so strongly differs in almost every important respect from the gas bill proposed by the President in April 1977.

The original bill would have continued Federal regulation of the wellhead price of natural gas. The conference report provides for deregulation in 1985.

The original bill sought to abolish the current distinction between the interstate and intrastate gas markets, in spite of administration claims to the contrary. The conference report preserves much of the dual market system, eliminating the price differences only where "new gas" is conceived.

For all the many other categories of gas, price differences will continue to exist. And as I have stated already, the conference report will make it impossible in times of emergency for the Federal Government to allocate gas from low priority users in the producing States to homes, schools, and hospitals in the consuming States. In addition, the conference report will give a special advantage to industries located in producing States by exempting them from the incremental pricing provisions of the bill.

The original administration bill, which I opposed on the grounds that the regulated gas prices it established were unreasonably high, is a bargain for consumers when compared with the conference report. The additional cost of the conference report to consumers over the present system will come to an agreed upon $29 billion. It will cost at least $14 billion over the administration's original proposal. And last minute "corrections" in the compromise will reportedly add another $12 billion, or a possible total of $41 billion between now and 1985, or $27 billion over the President's original bill.

Even the CBO, which arrives at lower figures than the DOE, says that gas producers will be enriched by $20 billion between now and 1985 at the expense of the American consumer. And for what? For .7 tcf of extra natural gas in 1985, or a 3.5-percent increase over the amount otherwise expected. That translates down to an added cost for this new gas amounting to between $16 to $60 per mcf (depending upon whether you use the $11 billion figure used by the conference committee, the $20 figure used by the CBO, or the $29 billion figure used by the DOE, plus the unconfirmed $12 billion estimated cost of the last minute changes made in the conference committee report). Using any figure, it is understandable why the esteemed chairman of the Senate Finance Committee, who is known and recognized as an able spokesman for the industry, says:

> I would first like to make it abundantly clear that I am not opposed to the so-called natural gas compromise because of price. The new gas price called for in the conference report compares favorably with the prevailing unregulated intrastate market price and, therefore, is not an issue with me.

The protection from sudden, sharp price increases that residential consumers would have enjoyed under the bills passed by both the House and the Senate does not exist in the compromise legislation. I should point out that, after the DOE arrived at this conclusion, it was urged to change its original unpressured and unbiased assumptions. Thereafter, the DOE energy information administration reversed itself. We believe in its first conclusion that was independently made. That protection—which took the form in the House and Senate bills of requiring industry to bear the main burden of bringing expensive new gas into the system—disappeared altogether in conference. In a reversal of the clear intent of both Houses, the conference report lowers prices for industry and shifts much of the cost of new supplies to homeowners and small businessmen—those who can least afford to bear it.

Under the House bill, residential consumers would pay $2.89 per mcf by 1985, while industrial users would pay $2.78—or a difference of 11 cents.

Under the Senate bill, the difference would be 5 cents—$2.92 for residential users, $2.87 for industry.

Under the compromise, the difference is truly staggering.

Under the compromise, industrial users will pay $2.44; but for the average homeowner, the price will go to an astronomical $3.28.

That, Mr. President, is a difference of 84 cents. An incredible difference, Mr. President, and one that is totally unacceptable to the consumers of this country.

Mr. President, the chairman of the Committee on Energy and Natural Resources has stated on many occasions that he could not support a bill that did not include emergency authority for mandatory allocation of intrastate gas. The conference report contains no such provision.

(Mr. HODGES assumed the chair.)

Mr. METZENBAUM. Originally, we were told to be for the administration's bill because it made it possible for the President to go into the intrastate market and take gas out of the intrastate market and bring it into the interstate market. That is called mandatory allocation. I heard, as I previously mentioned, on the floor of the Senate that the distinguished chairman of the Energy Committee in the Senate said that was an absolute minimum, that unless we could get that provision in the bill, he could never be for it. That provision is not in the bill, and I hope that maybe, by my having pointed it out, he might possibly change his point of view, but I doubt it.

This topsy-turvy system wil penalize individuals who cannot readily switch from gas to other fuels. At the same time, it will reduce the incentive for industry to convert from gas to alternative sources of energy, including coal. They have taken away the incentives. It is unfair, it is unworkable. And it means that our national policy in the future will permit industrial users to burn America's remaining natural gas without restraint. It means that our national policy is not any longer to conserve our remaining gas by requiring those who can do so to convert to other fuels. The new policy embodied in this bill is to substitute gas for oil. It is a "deplete America" policy. It is anticonsumer, and it represents a reversal of what many Senators and the public thought our policy was and should be.

Both the President and Congress, at an early point, recognized the need to provide special incentives for exploration in difficult, high-risk areas, but the conference report provides those special incentive prices to gas that is already flowing. The result will be that, once again, consumers will pay more. And once again, they will get no additional production in return.

Finally, Mr. President, all Senators should be aware that this bill, for all the cost, complexity, and economic uncertainty it entails, will produce very little in the way of new gas production.

The administration claims that passage of the gas bill will, by 1985, reduce our oil imports by 1.4 million barrels per day.

That is a substantial figure. It is also a misleading one.

That figure includes a projected savings of the equivalent of 400,000 barrels per day because of the projected delivery by 1985 of Alaskan gas to the markets in the lower 48 States.

The arrival of Alaskan gas will be welcome, particularly in my part of the country.

But it is, I believe, misleading to attribute our supply gains from Alaska to passage of this bill. Congress has already expressed its support for construction

of the gas pipeline and although Alaskan gas pricing provisions happen to be included in the conference report, there is no reason whatever to believe that they cannot and should not be treated legislatively and affirmatively by this body and the House as well.

The administration figure also includes an estimate that we will gain the equivalent of 250,000 BBL/day as a one-time-only production spurt in response to deregulation in 1985. But that is 1985, and Mr. Schlesinger himself recently stated that talk about 1985 is, and I quote, "theological."

I must confess that I do not understand his use of the term, but apparently, he was saying it in some deprecating manner when he was on the Public Broadcasting Service program on the MacNeil-Lehrer show. Only the administration knows where they got this figure. Only Mr. Schlesinger knows when he talks about 1985 as being something theological. That figure has never been mentioned before and if it is as credible as many of the other puffed up claims made by DOE, then it has little or no relevance to our deliberations.

The remainder of the savings claimed by the administration for the bill are based on an estimate that additional gas production will replace 750,000 BBL/day of imported oil by 1985.

That, Mr. President, is an extremely optimistic estimate.

The Department of Energy's own Energy Information Administration, for example, projects potential replacement savings at 500,000 barrels per day.

My staff has been advised by the Congressional Budget Office that savings will be as low as 350,000 barrels per day.

So, Mr. President, let us take another look at the administration's figures.

The administration claims that the bill will save 1.4 million barrels per day, but 400,000 barrels per day of that will come from Alaskan gas. Alaskan gas will come on line with or without this particular legislation.

That leaves a million barrels.

Of that million, 250,000 are attributed to a highly speculative production "spurt" that may or may not materialize in 1985, and I am not certain whether it is a one-time "spurt" on whether it keeps "spurting."

Discounting that, we are left with the 750,000 barrels per day that is supposed to be saved by increased gas production.

As we have seen, that figure itself is open to serious question. The more accurate estimate may be the 500,000 barrels per day projected by the Energy Information Administration, or it may be that CBO's estimate of 350,000 barrels per day is closer to the mark.

Or perhaps the administration was correct in April 1977 in estimating that the original gas bill would save no oil whatever.

But the bottom line, Mr. President, is that when we remove the Alaskan gas, and the speculative "spurts" from the administration estimate and when we conservatively discount the administration's production claims, we come to a figure that is less than half the administration's claim, and maybe even as low as a quarter.

I point this out because I am disturbed about the manner in which the administration has made its case for this bill. They reached up in the air and picked out some figure that they found convenient.

The administration has wrapped a bad bill in the rhetoric of national interest. This is not the first time they have stated figures to support their position and, sometime later, had to back up when the facts were available.

The administration has presented misleading information to the Congress and to the public on this and on other energy-related issues. In this connection, I think of the CIA report that appeared so conveniently last year at a time when top officials of the administration were attempting to create a crisis atmosphere in order to persuade the Congress to take quick and uncritical action on the administration's energy proposals.

Those figures that were used at that time were subsequently proven to be erroneous and the administration had to back up with respect to the fact presentation as it was given to us.

I see these maneuvers, and I deeply resent them. They smack to me of the scare tactics that some in the military and the intelligence establishment have used in the past to move their budget requests through the Congress. These tactics have no place in the energy debate. And above all, they should have no place in this administration.

Mr. President, I do not believe that this bill is defensible on its merits.

I do not accept the assertion that we should pass this measure because, as a top administration official put it, "It's the only natural gas bill we've got."

And I give no credence whatever to the argument that the bill is needed to strengthen the President, or to the claim that we must pass it in order to send a signal to the world that we are serious about enacting an energy program.

These are hollow arguments.

They are arguments rooted in symbolism instead of substance.

They are arguments that do not square with the facts.

Mr. President, I believe that the case against this legislation is overwhelming.

I believe that this bill is worse than no bill at all.

And I am convinced that enactment of this bill would be a disservice to the people of this country.

Mr. President, the congressional alternative that we will propose will give the Senate the opportunity to act responsibly on natural gas.

I believe that the alternative is worthy of support and I hope the Senate will see fit to adopt the alternative in place of the costly and counter-productive legislation that is now before us.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Has the Senator from Ohio concluded?

Mr. METZENBAUM. Yes.

Mr. FORD. The Senator from Montana wishes to speak. I would like to make a remark or two and yield the floor then to the distinguished Senator from Montana.

I understand that the Senator said in the beginning, and I attempted to correct him at that time when he said that the distinguished Senator from Washington said that this bill would put a trillion cubic feet per year into the interstate pipeline.

He was referring at that time only to the Alaskan pipeline, which is a part of this bill. I was sure the distinguished Senator from Ohio would not want to make any mistake as it related to the statements of our distinguished chairman of the Energy Committee.

Also, I would like to correct one thing that the Senator from Ohio has said. He made a statement the other night I thought was adequate. He did not do it today, and that is when he was quoting the vice president of Chase Manhattan Bank.

I think the Senator has a telegram from the president of Chase Manhattan which said that the remark the Senator quoted was a personal view of the vice president and not the position of the bank.

So I would like to clear the air that there are other banking institutions with equal validity of Chase Manhattan Bank that see it somewhat differently.

But I did want to make that point that the president of Chase Manhattan said that it was only a personal view of that vice president and not the opinion of the bank.

Also, I would like to say that the Senator says in his statement that the chairman of our Energy Committee said without the emergency allocation he would not be for a bill.

He defended himself a few moments earlier as it related to his statement, that the emergency allocation was in this bill and is one of the major parts of it.

Therefore, I want the Senator to be sure he did not say something about our chairman, when he is not here to defend himself, when he already answered the Senator's question.

Also, I might say to the distinguished Senator from Ohio that he said to the Senator from Washington a few moments ago that he would like him to have a copy of this motion, to recommit, the Senator was going to make. We hope it will not be given to us just at the time he makes it several days from now. I am authorized to receive it if he would like to give it to us this morning or this afternoon. I will be delighted to take it and pass it around.

Mr. METZENBAUM. In due time. In due time.

Mr. FORD. In due time.

Well, I understand what due time is. But the Senator is not——

Mr. METZENBAUM. The Senator will have adequate notice, he will not be expected——

Mr. FORD. What does the Senator consider adequate notice?

Mr. METZENBAUM. Well, I think at the time and place when I decide to bring up our motion to commit, he will

be given adequate time and the opportunity to find if it is unsatisfactory, or happy to delay——

Mr. FORD. I understand, the Senator keeps wanting to delay all the time.

Mr. METZENBAUM. I have not asked any delay at all.

Mr. FORD. I have been asking for the copy and all the Senator says is that it will be in good time and he will give it to us.

Mr. METZENBAUM. I said in due time.

Mr. FORD. In due time, the Senator's time, because he has the motion.

I yield to the Senator from Montana.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky has the floor. Does the Senator from Kentucky yield the floor?

Mr. FORD. I would like to see the Senator——

Mr. MELCHER. I yield to the Senator from Ohio.

Mr. FORD. All right, I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I thank the Senator from Montana. I just wanted to say to my good friend from Kentucky, and I shall be very brief, that all last week, including the first day I got here, I was urging the bill be called up and be brought up.

We have no desire to delay this matter. We will be prepared to move forward with it and at an appropriate time, hopefully, so that all Members of the Senate will have an opportunity to vote on a motion to commit.

Mr. FORD. I understand what the Senator from Ohio is doing. He is trying to disassociate himself from everybody with him a long time who has been objecting. I do not blame him for that.

Mr. METZENBAUM. Mr. President, that is not my desire at all, because Senator ABOUREZK, who made objection the other day, and Senator HANSEN, Senator BARTLETT, and Senator LONG, none of them had indicated any desire to keep the bill from coming to the floor. But there were certain conditions attached to it. Those conditions do not exist today and I have not heard any motion to table and I do not expect to. So it could have been brought up last week just as well as today.

Mr. MELCHER. Mr. President, one of the reasons the Senator from South Dakota (Mr. ABOUREZK) objected to bringing up the bill last week was that he feared bringing it up with an agreement that there would not be a tabling motion sometime this week against the bill, that there would not be enough Senators present, that there would be three or four on the floor, and it was necessary to have Senators here to understand the complexities of the bill, and its merits and demerits.

I find that he was exactly right. Even though there is no agreement on not having a tabling motion, there are still only three or four Senators on the floor and, notably among the absent, is the Senator from South Dakota.

The fact is that most of us know what we are going to do on the bill, whether we are going to vote for it or against it.

I was pleased to be able to listen to the Senator from Ohio in his delivery of his remarks on the conference report before us. He referred in part of his discussion to the price of hamburger and inferred that many consumers feel that the price of hamburger is too high.

Well, the fact is that the producers do not believe the price of hamburger is too high. The producers who are in the position of trying to rebuild their cow herds after a series of years of staggering losses are now realizing that the cows they sell to go into hamburger are not bringing anything too much in order to have the wherewithal of enough income on the farm or ranch to stay in business.

So I guess when we look at the price of a producer, it depends on whether or not we are consumers or producers.

The Senator from Ohio mentioned 7½ cents per thousand cubic feet as the price of natural gas only a few short years ago.

From the consumer's standpoint, that was a bonanza; but from the producers' standpoint, it did not work.

So in my State and many other States where there has been and continues to be natural gas production, we found that the wildcat operators, the independents who go out and drill wells and try to find natural gas or oil, were not going into the field to drill for natural gas. The price was much too low.

I might say, to bring this into context, that the price they are operating on is about $1.35 to $1.40 per thousand cubic feet, which is a great deal more than 17.5 cents per thousand cubic feet. Because of that price, almost all the independents in my State, based on the geologic knowledge they have, are not able to go out and wildcat for natural gas. They have told me that, for the past year, it would take somewhere in the neighborhood of $2 to $2.25 per thousand cubic feet for the sale of gas before they would be able to get into the field and drill to attempt to find it.

They have the geological information that would indicate that there are small amounts of natural gas at certain levels in certain areas in Montana, and they would feel fairly confident to go out in the field and drill—wildcat, mind you—to find out if gas could be produced. But they would not do it until the price got into a range of $2 or $2.25 per 1,000 cubic feet.

With respect to the $1.93 per thousand cubic feet which the Senator from Ohio mentioned would be the adjusted price for new gas if this conference report became law, it is necessary to take into view how that relates to the cost of other energy supplies.

I think it is fair to say that the price of $1.93 per thousand cubic feet for natural gas is substantially below what the cost would be in heating a home by using No. 2 fuel oil. I think it is fair to say that in most areas, $1.93 per thousand cubic feet of natural gas would be a better buy for a homeowner to heat his home than it would be to convert back to coal.

These are things we have to keep in mind. If our goal is to deplete the reserves of natural gas that we now know are available for use in this country, then perhaps we want a low price for it. But if we want to be realistic and practical and conserve natural gas for purposes of use in America where it best fits, in order to avoid using either fuel oil or coal, then we had better have a relaxation on the price of natural gas. Under the terms of this conference report, the natural gas prices that would be allowed would hardly rise to comparable rates for oil or coal in most homes or most industries until about 1985.

If we are going to be practical about it, what about the supply from Alaska that has been spoken of? I had the privilege of being the manager of the so-called Alaskan natural gas bill in the House of Representatives at the time of its adoption by the House. It was also adopted by the Senate, and the President signed it.

In relation to that measure, the President made the decision as to what would be the preferred pipeline company to bring that natural gas down to the lower 48, and the preferred route. They have been designated. They have been selected—if we care to use that term—as the ones that will be building a pipeline for natural gas from Alaska to the lower 48.

The owners of that company advise me that they feel that it is absolutely essential that this conference report be adopted this year. The conference report contains in its structure the so-called roll-in provisions for natural gas pricing for such new gas that is brought down to the lower 48 as is the case with Alaskan natural gas. The owners of that pipeline company tell me that without the bill, without adoption of this conference report this year, they will not be able to sell bonds in order to have financing to build that privately owned and privately operated natural gas pipeline.

I think it is also worth noting that after this conference report is adopted and after that company, through the provisions of roll-in pricing in this conference report, is able to go to the money market and to sell their bonds, and therefore gets into a position to construct that pipeline—and let us assume it takes 2 or 3 years after that to construct a pipeline—the cost of that natural gas delivered to the lower 48 will be much above what we are talking about now, in terms of $1.93, $2.25, or $2.50 per thousand cubic feet for natural gas.

So it hardly befits any practical sense of the situation we are in today to speak of the Alaskan supply being available to us to augment our supplies without this bill being enacted this year.

The Senator from Ohio (Mr. METZENBAUM) and the Senator from South Dakota (Mr. ABOUREZK) jointly have signed a letter to us, dated September 7, which we all have received. It has been widely publicized for the public. It is their intention to offer a motion for recommittal, and they list a series of supporters of their viewpoint.

I point out that the first one they list, the American Conservative Union, is on record and still maintains that the po-

sition they seek is one of full deregulation of gas.

The second one mentioned is Americans for Democratic Action, and the position of Americans for Democratic Action has been, and continues to be a position of opposing all deregulation of natural gas.

The third, the American Farm Bureau, is on record—and their letter is included with the letter from Senator METZENBAUM and Senator ABOUREZK—as wanting and still supporting full deregulation. I will read a portion of that letter from the American Farm Bureau to Senator METZENBAUM:

> We continue to believe the Farm Bureau's policy providing for immediate deregulation of natural gas pricing is in the best interests of farmers and the national economy.

Going down the list, the fourth one mentioned is the AFL–CIO, and they are on record as opposing all deregulation of natural gas. However, not mentioned is that the building trades of the AFL–CIO favor the conference report.

The Consumer Federation of America, the fifth one mentioned in the Metzenbaum-Abourezk letter, opposes natural gas deregulation.

The U.S. Chamber of Commerce is listed, and they are on record as wanting full deregulation. They want the bill recommitted, and they want action deferred on any bill until the next Congress.

The Independent Petroleum Association of America also advocates this bill being a bad bill; that it should be recommitted or killed; because they want deregulation. They hope they can get it next year.

The National Association of State Regulatory Commissioners also is listed as being in favor of a motion to recommit.

But it is clear from their letters they have a specific reason for recommital. It is on incremental pricing. They want that changed. But I believe they are on record as being for the bill otherwise.

So, the truth of the matter is that the advocates of recommital, as listed in the letter from the Senator from South Dakota and the Senator from Ohio, are a mixed bag. Some want one thing and some want the other. As a matter of fact, part of them are for total deregulation, instantaneously, some are for deregulation next year, and some do not want deregulation at any time.

Suppose their viewpoints were represented on that conference committee if there were recommital with instructions. It would be extremely difficult for such a conference committee to come back with any kind of a recommendation or any kind of an agreement whereby we could have a bill.

So I believe that it is correct to point out that the result of recommittal is (a) no agreement; (b) no bill. That is it. Recommit and no bill.

The very backers, the very endorsers of recommittal are not in agreement on what should be the terms of a different bill. So we have this choice: Do we want this bill or no bill at all?

I personally was in favor of the Pearson-Bentsen proposal as the Senate adopted it. I felt that a gradual deregulation was in the best interest of this country, and I still maintain that viewpoint.

It will be interesting when the votes are counted that we will probably see some of those who supported Pearson-Bentsen voting for this conference report and some of the others in the Senate who supported Pearson-Bentsen voting against this conference report.

But I think it is fair for me to say that those of us who supported Pearson-Bentsen, a phased in deregulation for natural gas, continue to feel that that is by far the wisest course. Why? Because I and I think all who backed Pearson-Bentsen and voted for it feel that there is a national need for finding more natural gas in the United States, that to accomplish that we have to have a better price incentive and that the price incentive for doing so would be fair and equitable and entirely practical if we tied it to the present cost and whatever the changing cost is of No. 2 fuel oil because that is what it is comparable to.

Personally I would rather have natural gas to heat my home than fuel oil. I am sure there are many industries that must have natural gas rather than No. 2 fuel oil or coal, or that will work a hardship on them and have them incur other costs.

So, if we had a phased-in deregulation that was realistic and looking at that kind of a price structure and arriving there rather quickly, as was the case in the Pearson-Bentsen approach, then I believe we would have a much superior part of the overall energy package for this country.

However, the conferees could not agree with that and so we have here a proposal that on pricing it gradually works up to a point of somewhere near the present cost of No. 2 fuel oil for natural gas that is new and also will work up gradually to a point of deregulation. It does not come as fast as I think it should. But, nevertheless, it is the only available method that I have to vote for deregulation at some point and a more superior method of pricing natural gas in comparison to other types of energy supplies.

In all cases that I have used this term of natural gas, I of course mean new natural gas. The method of describing what is new natural gas or fixing by law what is new natural gas under this conference report is somewhat complicated. I regret that. But, nevertheless, I am advised by some independent gas producers from my own State that it is workable on pricing. They do have a great concern about the necessary paperwork that will be foisted on them by the adoption of this conference report, particularly as it affects intrastate gas, gas produced in my State, for instance, of Montana, and sold within the State for use within the State.

I hope before the days of debate are concluded on this measure to have in my possession the mechanism that would be used by FERC, the Federal Energy Regulatory Commission, working with the individual State commissions on just how that paperwork would be accomplished. For instance, if an independent drills a well, a successful well, and then submits the data to the Montana Commission, first of all, to arrive at a determination whether or not it is new gas as identified under the terms of this act and then, second, when a contract for sale of that new gas has been accomplished, submits that contract between the independent gas producers, the wildcatter, mind you, and a utility firm, which might be in our case in Montana the Montana Power Co., that that is about the end of the paperwork that that wildcatter has to go through as an independent gas producer of new gas.

I am advised by officials in the Federal Energy Regulatory Commission that it will be handled in that way, the gas producer going to the State commission, the State commission establishing (a) that it is, first of all, new gas and then, second, (b), the (b) part of it being the price for that gas as established in the contract with a utility firm that will move and sell the gas to consumers in a State will be the procedure that is followed and that the old procedures of the Federal Power Commission on monthly reporting by each gas producer will not be required and that in general the State's requirements and the State's management of the reporting will govern.

If that is the case, as has been described to me by officials of the Federal Energy Regulatory Commission, which will have the responsibility for overseeing and enforcing these provisions, I think some of the problems that the independents envision in producing new natural gas within the State, the mechanism and the procedures of reporting it, and the reports that follow thereafter will be alleviated. One of their most vigorously and most understandably justified objections to the bill will have been wiped out.

I fervently hope that is the case. At a later point as we debate this issue before the Senate during the coming days, I expect to be able to substantiate that being the case under the Federal Energy Regulatory Commission's power, that that is truly their intent.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. Mr. President, before I begin my prepared remarks, it seems to me there is a need to at least try to be accurate about what is in this complex and confusing bill.

Earlier today my good friend, the junior Senator from Washington, said that new reservoirs on old leases are deregulated from nonprice controls. This is not correct.

Section 601(a) deals with nonprice deregulation. However, only new gas as defined in section 102(c) is so deregulated.

When we look to section 102(c) we see again that only gas from new leases is deemed new. So again gas from promising areas like the Baltimore Canyon, will not be freed from nonprice regulation either.

Mr. President, one of the myths being propagated with regard to this bill is that our only choice is between this bill or nothing. It is stated that the motion

to recommit that I and others will propound is only a disguised effort to kill the bill. And that the bill proposed by the motion to recommit could not be adopted. This is untrue, and I would like to provide some background on this.

The pricing provisions of the bill were the source of the months of endless debate, haggling, secret meetings and so on which finally resulted in the complex monstrosity that we have before us. However, when that process was finished in late May, there remained a number of provisions contained in somewhat similar form in both bills, which remained for resolution. These were handled quite expeditiously in a few meetings in June, and were placed into the bill with the virtuously unanimous support of the conferees on both sides of the question in both Houses. It is essentially these provisions, on emergency and surplus sales, which we propose to enact in our motion to recommit.

On the merits of these issues there is virtually total agreement. The only way in which the arguments made by the "all-or-nothing" crowd would be true would be if the conferees supporting the conference report were to adamantly insist on a "dog-in-the-manger" approach, refusing to report provisions unanimously agreed upon simply in spite at the failure of the rest of their handiwork.

I do not believe that the conferees would react in this fashion, and I do not believe the American people would stand for it. Let me address this tactical situation a bit further. The conference report could only command the barest majority of signatures of the conferees from each House. Those supporting the motion to recommit will be at most one vote short of majority support among the conferees of both Houses right now. If the motion to recommit succeeds, it is inconceivable that those who have just argued so loudly that there must be some natural gas legislation this year would be the instruments preventing adoption of the provisions whose merits were agreed on by all parties.

Finally, let me reiterate that the provisions we hope to adopt by the motion to recommit are provisions taken essentially verbatim from the language adopted by the conferees. These are not some novel or untried ideas cooked up on the spur of the moment. These are good and useful provisions adopted overwhelmingly by the conferees themselves, on which there is little dispute. It seems absurd to abandon the good parts of the work done by the two Houses of Congress and by the conferees simply by holding them hostage to the complex, repressive, and unworkable provisions that have been adopted with regard to pricing.

In fact, however, this argument is rather in line with the strategy of the proponents of this bill in other areas. In an attempt to adopt this bill they have essentially been perpetrating one of the greatest mass hostage-takings since the Middle Ages. Originally, only the other parts of the energy bill were being held hostage for the passage of the natural gas bill. Now, as we see, the attitude is to hold hostage the other good parts of the gas bill as security of the safety of the pricing and regulatory provisions. In addition, we have seen how totally unrelated issues such as the breeder reactor, steel imports, and almost any other activity with which a logical or illogical link can be forged have been "yoked unequally" with this bill.

I believe the time has come for this process to end. The time has come for the issues to be treated on their merits, and on those merits, Mr. President, there is little doubt that the outcome should be the support of the motion of recmmital, the adoption of the good and useful provisions along with the other parts of the national energy bill as acted upon by the conference committee.

A second myth being propagated about this bill is that in some way failure to adopt what has been dumped before us will be an unfavorable reflection of the U.S. Senate or on the national will of the United States. The distinguished majority leader previously stated:

> This Nation will be perceived as one that shrinks from its problems if we do not face this issue.

But what does it mean to face the issue? I have never understood that the U.S. Senate is obliged to adopt legislation simply because it is brought before it. That is why we are endowed with the power of debate and vote and endowed with the various devices to shape legislation to the national interest as we perceive it. We will certainly be facing this issue if we forthrightly declare that the bulk of the pricing provisions as reported by the conferees are bad legislation and should not be adopted and that certain provisions are good and useful and should be adopted.

Similarly, the charges made that failure to adopt this particular bill would mean that Congress cannot deal with the matter that is of vital interest to the Nation, or that "the Senate just did not have the courage and the decisiveness to act on this question" seem to me to be grossly misleading.

Perhaps what is intended by these statements is that it will be a poor reflection on the conferees and on the secret negotiators who hammered out this piece of legislation, or that it will be a poor reflection upon the staff and the members of the administration who help to draft it. If that is the argument, then so be it. If that process of secrecy, of backroom dealings and accommodations, has proven itself to be a failure, we should certainly state so forthrightly. It is certainly no reflection on the decisiveness of the thermometer that it truly reflects the temperature, or on the decisiveness of the calendar that it accurately reports what the day is. We should not revile the compass for telling us that we are going in the wrong direction.

And it will be no reflection on the character of the Senate if it accurately reports that this is a bad piece of legislation in most of its provisions and that only those that can be of use to the country should be salvaged through the motion to recommit.

In short, Mr. President, this argument that we are obliged not simply to decide this issue, but to decide it in a manner favorable to the proponents, is simply another one of a seemingly endless series of arguments which have been ingeniously devised to prevent us from focusing on the substance of the bill before us. It has been accurately said, by the senior Senator from Missouri, when we were on television together last week, that the supporters of the bill are rather loath to talk about what is in it. They would rather talk about the value of the dollar or the will of the Senate or the international prestige of the Presidency. And that itself is a sign of the weakness of the position they are attempting to foist on the Senate. And yet, all of those other factors must ultimately depend on the merits of the bill. There can be no prestige in willfully adopting a bad bill; there can be no long term support for our economy or our currency by adopting a bill that will do nothing to aid them.

Mr. President, one of the major talking points being used by the proponents of this bill is that it will produce large additional supplies of natural gas.

This is the keystone of the arguments for the bill. The argument for reducing oil imports depends entirely on this myth. Yet the argument seems very strange coming from those who last year argued that complete deregulation would produce no additional gas. How could this complex bill provide incentive for a "30 percent increase in interstate gas?" It does not.

The alleged advantages of this bill are in two major areas—price and regulatory certainty. I will deal with each of these in turn, but before I do I would like to present a brief overview of the situation of the gas producers and drillers in the United States. There is not a monolithic drilling industry in the sense that people who produce natural gas may operate in widely differing environments. Some may work on the outer continental shelf while others work on shore. Some may produce exclusively for the intrastate market while others produce exclusively for the interstate market or for both. Some have interest in shallow wells and production areas; others have interest in deep wells, so that these conditions and financial considerations may differ quite widely.

Now it is undoubtedly true that when you take this proposed bill, which is so full of nooks, crannies, gradations, splotches of color here and there that a visual representation would look like a Jackson Pollack painting, it is undoubtedly true that some producers are in such a situation that they will be better off under this bill than they would be under the status quo, at least in the short run.

And it is also true that the natural gas producers in this country, though many of them are indeed my friends, are not so devoted to principle that they would reject a proposal, whether you call it regulation or deregulation, that would genuinely encourage and allow them to produce more gas, because that is their business. In fact, many producers have at one time or another over the course of the negotiations been quite desirous of supporting a bill. The

fact is as this bill has finally emerged, as this bill now lies before us and as this bill will operate if we adopt it, the vast majority of the gas producers of the United States are opposed to it.

The Independent Petroleum Association of America, whose members drill the large majority of gas wells and find the large majority of reserves, is vehemently opposed to this bill. The local, state and regional associations of drillers and royalty owners in all of the producing States are opposed to this bill.

Many of the major producing companies, such as Standard of Indiana, Conoco, Marathon, Phillips, Getty, Sun, Pennzoil, have been willing to affirmatively state their opposition to this bill. It is true that some of the other major companies have been silent, or have been lending quiet support to the bill, although to my information no major producer has been willing to state its reasons for that support. Quite frankly, the neutrality or tacit acquiescence of such companies has been secured by the knowledge that the larger the company, the more it stands to gain or lose from future Government action either directly in the business of regulation of gas or through other governmental activities. So I think it is pretty clear that on the merits of this bill, on the substance of this bill, people who are supposed to produce the vast additional quantities of gas claimed by the supporters of the bill simply do not believe it will work.

Let us turn now to the mechanics of the bill and see just why this is the case. As a general matter what happens is that the currently unregulated intrastate market is regulated immediately and fully. This will undoubtedly lead to a relative reduction of incentive and new drilling activity in that area.

The intrastate market has produced most of the new gas finds in recent years, precisely because it was a free market, able to respond to changing needs and demands This bill would place immediate controls on that intrastate market. The price allowed for gas proven to be "new" under the complex system in the bill would be limited, today, to a price lower than some, though not most, current intrastate sales.

However, gas not considered "new" would get a lower price. In addition, the producer loses the right to renegotiate later for a better price, he loses the right to negotiate the length of his contract, and he loses the certainty that the deal he agrees to is the one that will stick. All of these matters are turned over to Federal bureaucrats. All of this has to reduce incentives, on balance.

In the interstate market, the bill junks a system of cost-based regulation that is at least relatively well understood for one that is far more complex, uncertain, and burdensome. For new drilling today, there is only one uncertainty—what is the price FERC will set for that gas. Even this uncertainty is due only to FERC's slowness in promulgating rates. Thus, in the last half of 1976, producers knew with certainty that wells drilled then, being in the 1975–76 biennium, would get the set rate of $1.42+ escalation. Drillers today know they will get the rate set for the 1977–78 biennium, although they do not yet know what that rate will be.

Under the new system, each well must be assigned a category and a price. This will require a separate State proceeding, followed by Federal review, with further judicial review and uncertainty that revenues from each well will be in jeopardy while this process goes on.

Nor is the prospect of "deregulation" beyond 1985 likely to add much incentive. For drillers now, 1985 is a long way off. As it comes closer, it will be more and more tempting to wait until after 1985 to drill, to see whether it actually comes off. The bill only guarantees deregulation for the first 6 months of 1985, and then only for some categories of gas.

The administration has tried to sell this bill as a deregulation bill, one that will bring the benefits that we had said would come from deregulation—though the administration denied any such benefits would arise at the time. In fact, however, this is also a myth. Today over 40 percent of all gas is sold in the unregulated, intrastate market. If this bill is passed all of that gas will come under regulation. One hundred percent of the gas in the country will be under regulation and price control. After a year, less than 1 percent of gas will be deregulated as high cost gas. Ninety-nine percent will remain regulated. By 1985, the best estimate of the distribution of gas among the many, many categories established by the bill is that less than 40 percent of gas would be deregulated, even assuming that deregulation sticks. After 7 years of complete regulation under this arbitrary and complex bill, we would have less deregulation than we have today. That certainly does not sound like incentive.

The above arguments, while we believe them conclusive, do require the exercise of judgment, and they are controverted by supporters of the bill. But what about the people who will have to live under these new rules, and risk their own money under them? What is their judgment?

If the bill's supporters are right, this bill will mean more production, more revenues and profits for drillers, more severance tax revenue for producing States and general prosperity for the industry. If so, why is this bill opposed by:

First. Senators from States representing 95 percent of America's gas production,

Second. The Governors of the three largest gas-producing States, and

Third. The overwhelming majority of independent producers and wildcatters and many major producers?

These are not stupid people. If they really believed this bill would make their areas better off, they would support the bill. At this later date, opposition to the bill is not a bluff. It is a simple recognition that this bill will provide less incentive for the producer than the status quo, and consequently less gas for the consumer, which is supposed to be the point of the whole exercise.

Let us look at another myth; that the bill's incremental pricing provisions are "fair, balanced and workable," and will protect consumers.

The original concept of "incremental pricing" was to insure that those who demanded supplies of new and high-priced gas received that gas, but also paid the increased cost. The incremental pricing in this bill is so badly designed that it causes higher prices for consumers, higher prices and more uncertainly for industrial users, and "an economic catastrophe" for all citizens of consuming States.

The flaws in incremental pricing are well set out in a recent "Open Letter to the United States Senate" by Charles Cicchetti, chairman of the Wisconsin Public Service Commission, and a leading advocate of fair and effective incremental pricing. He concludes:

> The so-called incremental pricing pass-through will cause industry to convert to foreign oil, move factories to gas producing states, and escalate the prices of their products.

This letter is based on the final version of the conference report as filed.

As indicated by the only full-scale study of this provision, done by the Department of Energy's own Energy Information Administration this bill will lead to higher retail residential prices than under the status quo, or under either the House or the Senate bills. The administration's claim that "the price of natural gas to industrial users will be lower than the price would have been under the Senate * * * bill" rests on this same EIA report, which they otherwise repudiate.

Further, as Cicchetti points out, industrial users will pay much higher prices than under current law, and are not likely to sit still and be hit with the double whammy of higher prices, and continued uncertain supplies due to the operation of curtailment programs. They will tend to switch where they can, usually to oil. Such switching will increase, not decrease, oil imports, and will further drive up the price to other industrial users, thus creating a "domino" effect.

Finally, this provision is very discriminatory between regions and users, on an arbitrary basis. In some areas, residences will be fully protected, and industries will not be hurt too badly if the residential load is very small and the industrial load very large. In other areas consumers will receive little protection, yet the industries being incrementally priced will be hurt badly. Some pipelines will have to price much of their gas incrementally, while others, with good long-term contracts, will be better off.

And throughout this process, FERC will be making decisions that will impose or shift literally billions in costs between users and between sections of the country. And intrastate users will not be incrementally priced at all, thus acquiring a vast advantage over the interstate users that are supposed to be the beneficiaries of this bill. It is little wonder that most of the major industries of this country oppose this bill.

(Mr. MOYNIHAN assumed the chair.)

Mr. HANSEN. Myth. The passage of this bill "Will have a direct impact on

our trade deficit, on the value of the dollar, and on the rate of inflation."

To the extent these claims have any validity, they would have to rest on the bill's actually increasing American production. As shown above, the bill will not do that. In addition, the increase in oil use through incremental pricing will actually worsen the economic situation. In the absence of such increased production, it is very hard to contend that the mere "psychological effect" of passing "an energy bill" will have much effect.

Surely we cannot believe that those who trade in dollars can be fooled by a piece of paper with "energy bill" at the top. We should also note that Canada, which is a net energy exporter, has seen its dollar fall even further than ours in the last few months. Statements by Milton Friedman, William Simon, and the Chase Manhattan Bank, which I will insert following my remarks, all indicate that passage of this bill, and fundamentally any energy bill, will have little effect on the dollar. The dollar's value rests on how many we print, and how many the rest of the world wants to hold, not on whether the President scores a legislative triumph.

Mr. President, I ask unanimous consent that the three articles to which I have referred be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HANSEN. In summary, this bill will not produce more gas, it will produce more regulation, and it deregulates less gas than is now unregulated.

As Senator JACKSON himself said, "If this bill is not a major step forward, we should defeat it."

The merits of the bill deserve defeat, but our motion to recommit will preserve the good parts of the bill, without bringing along the counterproductive regulatory baggage in this conference report.

EXHIBIT 1

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE,
*Sanford, Calif., August 22, 1978.*

HON. CLIFFORD P. HANSEN,
*Senate Office Building, Washington, D.C.*

DEAR SENATOR HANSEN: I understand that one issue that has arisen in connection with the so-called gas deregulation compromise is what effect it might have on the value of the dollar abroad.

As compared with the present situation, the proposed compromise would have minor effects in both directions on the dollar. The compromise would certainly reduce the efficiency and output of that part of the gas industry now free from control, the intrastate market. On the other hand, this is by no means clear, the compromise might provide a greater incentive for additional production from the part of the gas industry now subject to control. The effect on intrastate gas, which would hurt the dollar, would be immediate and certain. The effect on interstate gas, which might help the dollar, would very probably be delayed. The complexity of the proposed arrangements are such that it would truly take a modern Einstein to figure out when these effects would occur and how great they would be.

In any event, the dollar has not been weak because of the energy problem, and no amount of tinkering with energy legislation will have any significant or lasting effect on the dollar. The dollar is weak because of bad domestic economic policy, policy which is destroying the unrivaled capacity for growth of American free enterprise by hampering it at every turn with taxes, controls, regulations, policy which is producing inflation through excessive government spending and excessive creation of money.

The way to strengthen the dollar fundamentally is to improve these policies, to set American enterprise free, to end inflation. From this point of view, a truly fundamental energy reform, which eliminated all controls on prices as well as our present subsidies of oil imports, which abolished the Department of Energy, enabling the market to go to work to produce, price, and distribute the energy we demand—such a program would truly strengthen the dollar, not because of its direct effects on energy imports, but because it would demonstrate to the world that we were awakening from our drugged state and were prepared to set our economic policy on the right path.

Sincerely yours,

MILTON FRIEDMAN.

---

STATEMENT BY ROBERT L. SLIGHTON, VICE-PRESIDENT, THE CHASE MANHATTAN BANK

The argument that passage of the compromise gas bill would play an important role in halting the decline in the dollar and strengthening the US balance-of-payments outlook is at best highly exaggerated and at worst just plainly wrong. Adoption of the proposed legislation would probably result in a modest strengthening of the dollar in the very short run, but this improvement would not be permanent. In the longer run, the legislation could actually result in some weakening of the dollar as foreign exchange markets come to perceive that the long-run supply of natural gas in the US is as likely to be reduced as increased under the new regulatory regime.

There are two major weaknesses with the Administration's position that international implications provide a strong argument for the bill. First, the major source of weakness in the dollar at this time is not a weak current or prospective trade balance but rather worsening expectations about US inflation. Indeed, the dollar has entered a new phase of weakness in spite of widespread recognition by market analysts that the US trade deficit has peaked and is likely to decline substantially in 1979. The movement of the US trade account into a large deficit position—and concerns that growing energy imports would imply continuing balance-of-payments difficulties—were the major sources of weakness in the dollar from the summer of 1977 until the spring of 1978. The current weakness of the dollar springs from the accelerated rate of inflation in the US and the perception that US monetary policy seems designed to accommodate to increased cost-push inflation. No policy action that is not designed to affect inflationary expectations is likely to have a significant and permanent impact on the value of the dollar under current market conditions.

Second, it is by no means clear that the market will perceive the compromise bill as resulting in an enhanced long-run supply of natural gas in the US and hence an improved long-run balance-of-payments outlook. The legislation is highly complex and difficult to analyze, thus there is likely to be a short period of euphoria in which the dollar temporarily strengthens in response to the assumption of favorable supply effects. Our belief is that once market analysts have time to examine the legislation carefully, they are likely to conclude that the status quo provides at least as much production incentive as the proposed regulatory regime

SIMON CALLS GAS COMPROMISE "TERRIBLE" LEGISLATION

NEW YORK, August 24, 1978—Carter Administration attempts to force passage of bad energy legislation and an equally bad natural gas compromise on pleas that it will strengthen the U.S. dollar abroad were denounced today by former Treasury Secretary William Simon.

Simon, who was also first head of the Federal Energy Administration, acknowledged that while a "good" energy bill would assist in making the U.S. currency stronger in international markets, the fundamental cause of the disastrous decline of the dollar in world markets is the irresponsible economic policies of this Administration. "We have allowed inflation to dominate our economic affairs, and when a country debases its currency, people do not wish to own that currency. The energy legislation being considered is counter-productive and the natural gas compromise about to be taken up in the Senate," the former Treasury Secretary and energy czar said, "is not a bad compromise, it's a 'terrible' compromise. The Good Lord knows that we need an energy policy in this country, but I would prefer to have no legislation rather than bad legislation."

"The Administration's own energy enforcement authorities have made it clear," Mr. Simon noted, "that the natural gas bill is 'so complex, ambiguous and contradictory that it cannot be enforced and that the national interest will not be served by adoption of legislation which . . . is unenforceable'."

"I am in total agreement with this finding," Simon said. "Imagine the administrative chaos which would result when a Rube Goldberg agency attempts to develop regulations to implement legislation conceived in confusion and couched in cloudy language which will thrust almost every decision into the courts for adjudication."

"It is a tragedy," Simon went on, "that the Administration is no longer arguing the merits of the bill but is reduced to jawboning and arm twisting to win votes and is willing to sacrifice the U.S. economy in the vain hope of enhancing political prestige at home and abroad."

"Our international friends are not so naive as to believe that bad U.S. energy policy will lead to a stronger U.S.," Simon added, and concluded with the comment: "I really wonder if the Carter Administration is more concerned with the polls than with our energy policy."

Mr. MELCHER. Will the Senator yield?

Mr. HANSEN. I yield.

Mr. MELCHER. My friend from Wyoming and I stood together in voting for the Pearson-Bentsen proposal as the Senate passed it, that portion of the energy policy, almost a year ago. I think we stood together for the same reasons. We wanted some type of deregulation phased in, and believed it was absolutely essential if we were to have more production of natural gas in our area that there had to be a better price before people would go out in the field and wildcat.

We do not have Pearson-Bentsen before us. This is quite different.

I agree with the assessment made by my friend from Wyoming on almost all the points he raised in his delivery today. However, there is a point on recommittal that I would like to ask the Senator from Wyoming about.

If the recommittal motion were successful and only the two points were

changed in the bill as described in the August 23 letter to all of us, on which Senator BENTSEN was the first signer along with some 18 other Senators, if those were the only two points that were changed in the bill, how would these changes really benefit an independent gas producer in Wyoming or Montana?

One would provide the President with the authority needed to cope with emergencies by allocation of temporary sales and the other point is to allow interstate consumers to take advantage of surpluses in the producing States under conditions that will prevent brokering. Those are the only two points changed. How would it alleviate the problem for the independents to encourage them to feel more confident about going into the field to drill wells?

Mr. HANSEN. First, let me thank my distinguished friend from Montana for the interest he has taken in this legislation over the years, for his participation in the debate on the floor when we were debating Pearson-Bentsen, and for his attention now.

I respond by saying that the encouragement for independent producers in my State of Wyoming and his State of Montana would come about in this fashion: We would not be imposing regulation on the intrastate market. The intrastate market has provided the major incentive for additional drilling for both oil and gas because, insofar as natural gas goes, that was not regulated. As a matter of fact, about the only part of gas drilling activity that has shown any life lately has been that which was done for the intrastate market insofar as onshore drilling is concerned.

The trouble with this bill, and why, I think, there is the proposition we propose in our motion to recommit and to report back is that we would not be saddling the gas industry, those who are actually drilling, with regulation on the intrastate market, plus this other fact: Under FERC every 2 years, as my friend from Montana knows, it is the responsibility of that regulatory agency to establish a new price for all gas. That price, absent the activity in the legislation which engages us at the present time, would probably have been established earlier. They have been holding off down at the Federal Energy Regulatory Commission because of the prospect that legislation would be passed. When we make comparisons and when projections are made on what would be produced under the status quo or under the compromise or under the Senate-passed bill, Pearson-Bentsen, it has been, I think, an error on the part of the staff who have been serving the majority to assume that the comparisons can logically be made with what the price of gas is now under the old FERC definition, or what it would be under the terms of the bill.

That is part of the reason that I think the compromise we talk about would offer greater encouragement to the industry than it would have under the conference report.

Second, however, we should not overlook the fact that there is an enormous amount of regulation that will be imposed under the terms of the compromise bill. No one says that there will be fewer than 17 kinds of different gas identified. I pointed out in my remarks that first, before anyone drilling a well could say with certainty what price he would get for the gas under the compromise, he would have to pass the examination by a State regulatory agency. That would be subject to review by the Federal regulatory agency; and then, third, by court review if he wanted to go through all of the steps. So I think we have to recognize that, given the advantage and the encouragement that the gas producer now has and with the two terms that are contained in our motion to recommit—one to give the President emergency powers to allocate gas and to fix prices; and second, to permit the movement of gas from where it may be in surplus supply to areas where it is needed—with the avoidance of all of the regulatory controls that would be imposed under the terms of this bill, we can expect, subject to the limitation, the only limitation, that there can be no brokering, you certainly would expect, in times of need in one area, with surpluses in another area, that there could be a price improvement over what would happen in that particular area.

I shall just have to conclude by saying that I think that the industry is best able to speak for itself. The independents in my State of Wyoming are solidly on record that they would favor no bill at all as compared with this bill. I think that, as I recall the great number of independents that there are in the State of Montana, I suspect that the great majority of them share the view of the industry as a whole, of the IPAA as a whole, of my Wyoming producers, in saying that. They shall make up their own minds, but I shall have to say the final proof, to my friend from Montana, is best disclosed by what the independents say for themselves.

Mr. MELCHER. I thank my friend from Wyoming and I think that it would be accurate to say that the independent gas producers from Montana are opposed to the conference report. It is only fair, in saying that, also to say that some, perhaps most, feel that the pricing mechanism that is allowed under the conference report would be adequate to encourage them, to give the incentive to go out and risk their capital to see if they can find some more natural gas.

Mr. HANSEN. If my friend from Montana would yield at that point, let me just take this opportunity to make one observation.

A year ago, when my friend from Montana, whose friendship I cherish, and I were supporting Pearson-Bentsen and made the argument that greater incentive was needed, we were told then by the administration—this is just about a year ago—that there was no need at all to go above $1.75 for gas; if you went above that, nothing would happen in the way of additional production. All that would occur would be inflation. Even some of my friends, who represent important producing States, at that time were making the same argument. They did it on this specious reasoning: first, that there were only so many drilling rigs available so that a higher price would not do anything about encouraging greater production. Of course, the fallacy in that argument is simply this: given a higher price for anything, a greater effort will be made by any reasonably prudent person to get into that business. As regards the statement that there were only so many drilling rigs available, that is very true; at that time, there were in existence a definite number of drillings rigs. But if drilling rigs become valuable enough and if you have enough people wanting to get into the drilling business, there indeed will be bidding going on for drilling rigs. We know what that will do: it will drive up the price of drilling rigs.

If you make the production of drilling rigs sufficiently profitable, you will have a lot more drilling rigs produced in this country than we have today. I have made the statement that if it got profitable enough to build drilling rigs, you would find shipyards and steelmakers and automobile makers in the drilling rig business. Anyone who has observed the private enterprise economy knows that that is the way it works.

I apologize for taking so long, but I did want to get that in, because I think it spells out what was wrong with the argument that was being made against those that were offered by my friend from Montana and me last year.

Mr. MELCHER. I think my friend from Wyoming would agree, perhaps, with this belief that if you live long enough and are still around here, you see the wisdom of your original thoughts sometimes agreed to by others.

Mr. HANSEN. That encourages me to live longer.

Mr. MELCHER. I want to say on the other point that independents look at this conference report and have serious reservations on the reporting provisions that would accompany the discovery and sale of new interstate gas. It was described to me by several of my independent friends in Montana as being a requirement of the old Federal Power Commission reporting procedures and that, if that were the case, they would not go out in the field to try to find natural gas that we would probably be selling under contracts in 1979 for about $2.20 per thousand cubic feet, if they were subject to the reporting provisions that the Federal Power Commission used to require, and it does not anymore because it has one out of existence, or the authority was taken out by the Federal Energy Regulatory Commission, but still based on the Natural Gas Act, and they probably have a lot of the same reporting requirements in place yet. But if the independents were faced with those stringent reporting requirements which are very costly, and they explained it to me, a monthly report, a very detailed report, how gas was produced, the type of well and the conditions of the well, who got the gas, et cetera, they would not want to go into the field to try to find natural gas at about $2.20 per thousand cubic feet for sale in 1979 to intrastate utilities.

I find the burden of paperwork not

only to be frustrating on business, but to be extremely costly.

So I tended to believe their objection, that if it were the case and they were subject to all these reporting requirements it would be pretty much an unworkable situation for them.

I was relieved to find out from the staff and from the Federal Energy Regulatory Commission that such would not be the case, that the independent, having drilled a well successfully, found some gas, under the terms of the act, that was obviously new gas, would ask the regulatory commission in Montana to ascertain whether or not it was such gas, the commission would so find, and that part of it is not so hard to understand.

They would so find and then certify, inform the independent that it was new gas and certify in this case, the epitome of the "Great White Father" here in Washington that, indeed, an independent had found some gas in Montana and that it did fit into new gas.

So the interpretation of the new gas is placed in the hands of the State commission.

Then the next step, what is the price for that new gas, is also in the hands of the State commission, and they tell the independent. The independent sells the gas under terms of a contract, say, to a utility company such as Montana Power, for sale within the State, and that contract then is filed with the State commission. The commission approves it. Where does FERC come in? I am told FERC comes in to spot check what the State commission does.

Charlie Curtis and Mr. Smith are the two on the commission I spoke to in the last week that tell me they have no intention of ever getting bogged down in the reporting requirements, as was required under the Natural Gas Act.

The Federal Power Commission built up, I suppose, huge storage rooms of very detailed reports which probably received scant attention when they were filed.

FERC tells me they will not go through that exercise, that the bill is written to spot check the State commission. I find some comfort in that. I hope my independents in Montana will find some comfort in that. I hope they will find it workable.

They will have to carefully review it with our State commission, our State oil and gas commission, to see, will the State oil and gas commission interpret this bill as that, go along with it, described exactly by FERC—and I hope to have the definite writing signed by FERC in my possession before the debate on this subject is closed because it is an extremely important point—as regards independents and for reporting to a State commission, and not to be obligated to tons and tons of monthly paperwork by a Federal commission.

Now, the point I would like to stress with my good friend from Wyoming is this, a motion to recommit with instruction goes back then to a conference committee with the House, if they are willing—if they are willing—and in that conference committee, with a viewpoint espoused by my good friend and which I share with my good friend from Wyoming on the need for getting out of the business of regulating the price of natural gas so that we can have increased production, my friend having that point of view, and others that will vote for a motion to recommit, how would it be possible to arrive at a position of unity, a majority at least, in such a conference committee between the Senate and the House to come back with a bill?

Remember, I know my friend from Wyoming will recall, although I am a member of the Senate Energy Committee at this time, I was not a member until just recently. I participated in the debate and in the final outcome of the gas deregulation bill here in the Senate on the basis of Pearson-Bentsen. I was not a member of the committee at that time and I have never been a member of the conference committee.

So, I can join with my friend from Wyoming who can wash his hands of the result of the conference committee because he did not sign the conference report. But in all reality, what good would it do to go back to a conference committee with divergent views, absolutely 180 degrees apart, on gas deregulation as espoused by himself and others like him, and my friend from Ohio, my friend from South Dakota, who has a viewpoint of almost feeling that any type of deregulation is harmful to the people of this country?

How can a new conference committee resolve those issues?

Mr. HANSEN. I appreciate the question. I will try to make my response brief because I know the distinguished Senator from Kansas is on the floor and was told earlier that he might expect to be recognized about now.

So let me say very briefly that the two provisions we have included in our motion to recommit and to report back have the support of an overwhelming majority of Senators and of House Members. So that there was no argument about the desirability of extending the President's emergency powers which have now expired. Nor was there any serious opposition at all over the other portion of that recommittal motion which would permit the movement of gas from areas where it was in surplus to areas of greater need, through either interstate or intrastate pipelines, without getting bogged down in this great morass of Federal regulations.

I also say to my good friend from Montana, third, that the conference report was just signed by a bare majority of Senators and of House Members. I think it was 10 to 7 on the Senate side; but since, I understand, there have been some defections, and on the House side, I think, by a majority of one.

So I point out that there really is not, in my opinion, all that much likely opposition to what I should think would appeal to most people as being two actions which could be taken, which clearly would be in the national interest, which would address emergencies that would move gas from areas where it is surplus to areas where it is needed, which would not impose regulation upon the intrastate market, and which would eliminate the other things that are wrong.

When the Federal Energy Regulatory Commission took over from the Federal Power Commission, there were, I am told, some 12,000 pending applications for relief. Today there are more than 20,000 applications.

Sheila Hollis, a new enforcement officer at FERC, who came on board with the present chairman, has said that this bill is so complicated that it is going to be practically impossible to administer, that it will be an administrative nightmare. Chairman Curtis has said that they will need a large number of additional employees to administer this bill.

Mr. President, I ask unanimous consent that Bill Reinsch and David Deisley, of Senator HEINZ' staff, have the privilege of the floor during the debate and any votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. I say again to my friend from Montana that I know there are other complex things to discuss. I would be happy to join in, but I am reluctant to intrude further on the time of the Senator from Kansas. I think the Senator from Wisconsin also wishes to speak.

Mr. MELCHER. I will respond briefly, and then I will yield the floor.

Mr. President, I think the Senator from Washington is extremely honest in his presentation of this matter.

I think it is apparent that by scuttling the whole report except for two provisions which he has described, which would continue the President's authority needed to cope with emergency conditions and allocations as one of the two points that would be retained, and the second, to allow for brokering of gas by intrastate pipelines to interstate distributors—these are two points, as he has outlined correctly, which are acceptable to both the House and the Senate. But there are other points that are clearly unacceptable to both the House and the Senate. One of them is incremental pricing.

We all can find some fault with the provision that is made in the conference report for incremental pricing. But the fact is that if the conference committee would come up with exactly what is asked for by those who are advocating a recommital motion, there would be no bill at all. It would be dead.

As to the point about the independents and the paperwork that might be imposed upon them, or that they fear would be imposed upon them, in intrastate sales, apparently that is a fear that is not justified, in that they would report much the same as they do now, to their own State commission.

That also brings up the consideration that if the conference report is not adopted, all the requirements of the Natural Gas Act remain in force and all the paperwork that is required under the Natural Gas Act presumably would have to be required by the Federal Energy Regulatory Commission, even though they have stated flatly they wanted to get out from under it.

The memorandum from Charlie Curtis, the chairman of the commission, speaks

right to that point: That in terms of relief from paperwork required under the Natural Gas Act, which the Federal Power Commission, the predecessor of FERC, had to enforce and had to require, it will continue if we do not have a bill.

So the score, I suppose, in defeating paperwork would be about 10 to 1. If we kill the bill, we still would retain that 10 parts of paperwork required under the Natural Gas Act, and which has been in effect for so many years through the Federal Power Commission.

If we go the other way and agree to this conference report, apparently we can hope to get down to one, a minimal requirement of paperwork and expense.

So it appears to me that, on balance, our best out is to agree to this conference report, get it into law, strike a lot of the paperwork for everybody involved in natural gas production and the sale and distribution thereof, find out if there really are going to be any big bugs in it for the independents, and correct it promply in the next Congress.

One other grcup that has some credibility around here—maybe it is belated; in my judgment, it is belated—but the independent oil and gas producers are beginning to have credibility in Congress, and I hope with the administration.

I think we are paying them a lot more attention, listening to their beefs, their legitimate gripes and complaints, and the hamstringing they are subjected to by Government regulation. If the conference report is adopted and we run into that next year, I think we will have some opportunity in the votes to straighten out some of those particular problems.

Mr. President, I yield the floor.

WHY THE NATURAL GAS BILL SHOULD BE DEFEATED

Mr. PROXMIRE. Mr. President, in my opinion the so-called natural gas compromise bill should be defeated. We should beat it outright, on the merits, and vote it down.

DOES NOT PROTECT CONSUMERS

First of all, does it protect consumers? The answer is a loud, emphastic, ringing "No!" Under it, prices will go up and up and up. By 1985, new gas prices probably will double.

ADDS TO THE BURDEN OF REGULATION

Second, does it reduce the burden of regulation? Again, the answer is "No!"

Regulations will be more complex, more onerous, and more difficult under it than they are now. The proponents of deregulation of natural gas always had one good argument on their side; namely, that deregulation would mean less paperwork and less government than its continuance. But this bill is the worst of all worlds, because it increases regulation while it lessens protections for the consumer.

Of course, while my good friend from Montana says there will be less paperwork, anybody who has been around here very long knows how these bills are supposed to reduce paperwork. The best index is what happens to the bureaucracy. Under this bill, they say that the bureaucracy will have to increase. They are asking for more people.

DOES NOT PROVIDE FOR ADEQUATE EMERGENCY ALTERNATIVES

Third, does it carry out one of the major purposes it was intended to carry out; namely, to provide intrastate gas to the interstate system in times of great emergency? The big push came for a gas bill two winters ago when industry and consumers in areas like eastern Ohio were without gas. No. Under the bill, the emergency allocation of gas is limited to pipelines already in the interstate market.

DOES NOT HELP DOLLAR PROBLEM

Finally, does it help the problem of the dollar? No! This bill not only will not help the problem of the dollar but in my opinion will make the dollar problem worse. There is a simple, straightforward reason for this. The dollar is in trouble because of rampaging, endemic, rising inflation. This bill, which will double the price of gas by 1985 and which provides for yearly increases 3 to 4 percent or more above the rate of inflation, will make inflation worse.

And, when those who say this bill is needed to solve the dollar problem find out the reality that this bill will add to the rate of inflation, the dollar problem will get relatively worse rather than relatively better.

DOES NOT CARRY OUT ORIGINAL ADMINISTRATION GOALS

This bill does almost none of the things the administration set out to do. It does not continue price ceilings, as the administration proposed, on all but very high cost and hard to produce gas. Instead, virtually everything is finally deregulated.

It does not simplify regulation and administration, it makes it worse.

It does not integrate the interstate and intrastate systems, one of the major reasons for the bill, but provides for incremental pricing only for interstate gas and restricts emergency allocation to pipelines in interstate markets.

The bill does not limit the maximum price incentives for genuinely new gas and very high cost gas, but gives the maximum prices to a variety of old gas by providing new definitions.

So here is a bill which is anathema to the consumers, which will raise prices and significantly add to inflation, which will add to the burden of regulation for producers, which will produce no significant increase in natural gas and may actually bring a reduction, and which achieves almost none of the objectives for which the administration originally advocated it.

SYMBOLIC BILL AT BEST

But in the face of these solid, factual, adverse arguments we are told we must pass it for "symbolic" reasons. We must have an energy bill, it is said, no matter what is in the bill or how much harm or how little good it will accomplish.

And the voices in pursuit of this end have now risen in crescendo.

I am reminded that George Santayana once defined fanatacism as redoubling once's efforts after having lost sight of one's aims.

Let me now elaborate somewhat on two of the points I have mentioned, first that the bill will vastly raise prices without significantly increasing production and hence will add to inflation; and second that far from helping the dollar it could make things relatively worse for the dollar.

Mr. MELCHER. Mr. President, will my friend from Wisconsin yield at this point?

Mr. PROXMIRE. I cannot yield at this point because I unfortunately have a commitment. After I finish with this, I will be delighted to yield. I do not have a very long speech.

RAPID INCREASE IN NATURAL GAS PRICES

Since 1973 we have witnessed a phenomenal increase in new gas prices for interstate natural gas.

From the time of the Phillips decision in 1954—when the Supreme Court told the Federal Power Commission to get on with the job of regulating wellhead prices as required by the 1938 Natural Gas Act —until 1965, the price of new interstate natural gas at the wellhead remained remarkably stable at the level of 14 to 17 cents per thousand cubic feet.

In 1964 the Federal Power Commission abandoned its wellhead regulation and went to an area pricing rate. Between then and 1973, the time of the Organization of Petroleum Exporting Countries (OPEC) oil embargo, prices increased from about 16.5 to 25 cents per thousand cubic feet, or by 57 percent.

In 1974 the Federal Power Commission shifted from the area rates of 1965 to a national rate for all new gas produced after January 1, 1973. The new price was 42 cents, or an increase of 17 cents or 68 percent in one year.

In 1975 the price was raised again by the Federal Power Commission, this time to 52 cents plus an inflation adjustment of 1 cent per thousand cubic feet per year.

Then on July 26, 1976, the FPC issued the infamous opinion 770 which established a radically higher national rate for new gas of $1.42 for all new gas produced after January 1, 1975. Meanwhile the old 52 cent rate was raised to 93 cents for gas priced under it, and older gas from contracts which had expired were allowed to be sold in interstate commerce at 52 cents.

In 1931 the British cabinet was persuaded by its Central Bank that it should cut unemplovment insurance in order to restore "confidence" to the international community, particularly to the international financial community and the New York Federal Reserve.

That, of course, was a disastrous policy. Similar action here and abroad deepened the depression and caused untold misery, all in the name of "confidence".

I am reminded of this incident when I read articles by eminent political columnists saying that the President is making a vote for the gas bill a vote of confidence in the system or that we should pass the bill, no matter how bad its provisions, on grounds that it will help the dollar.

Arguments of that kind have to be made as a last desperate resort. If the bill cannot and should not be supported on its merits it is not going to either

restore confidence to the President or to our international standing or help the dollar.

Since 1973, therefore, we have seen an explosion in natural gas prices. This is shown in Table I.

TABLE I.—*New interstate natural gas prices*

| Years: | Price (cents per mcf) |
|---|---|
| 1955–64 | 14–17 |
| 1965 (area rate) | 16.5 |
| 1973 | 25 |
| 1974 (national rate) | 42 |
| 1975 | 52 |
| 1976 | $1.42 |
| 1977 | $1.57 |

Since 1953, therefore, we have seen an explosion in natural gas prices. There was an explosion in the price of interstate natural gas. The increase was not just a modest increase. It did not only double or triple or quadruple. It went up tenfold, tenfold. It went up from around 14.5 cents per thousand cubic feet to $1.57 per thousand cubic feet. That is as dramatic an example in the increase in prices as we have anywhere in our economy, a tenfold increase, outpacing inflation by four or five times.

NO INCREASE IN PRODUCTION

Did this explosion in the price of interstate natural gas bring any significant increase in new discoveries?

We have seen a geometric increase in prices—a doubling in price from 1973 to 1975 and a tripling of price from 1975 to 1977. One would expect that such a vast increase in price would produce a great outpouring of supply. It would certainly tend to do that to the degree that the markets were competitive and reacted to an increase in price.

That did not happen. There has been no overall increase in supplies since 1972. Unlike the period between 1955 and the mid to late 1960's, when natural gas prices were relatively stable, new discoveries, revisions, and extensions are far lower now than when prices were low and stable.

In the former period they averaged about 20 trillion cubic feet a year. But since 1973, they have fluctuated up and down at a level about half that of the 1955–67 period and essentially since 1967 they have fallen off very much.

Table II shows this:

TABLE II.—*Natural gas production compared to discoveries, revisions, and extensions of proven gas reserves, 1950–1975 (tcf.)*

| Year | Discoveries, revisions, extensions | Net production |
|---|---|---|
| 1950 | 12.0 | 6.9 |
| 1951 | 16.0 | 7.9 |
| 1952 | 14.3 | 8.6 |
| 1953 | 20.3 | 9.2 |
| 1954 | 9.5 | 9.4 |
| 1955 | 21.9 | 10.1 |
| 1956 | 24.7 | 10.8 |
| 1957 | 20.0 | 11.4 |
| 1958 | 18.9 | 11.4 |
| 1959 | 20.6 | 12.4 |
| 1960 | 13.9 | 13.0 |
| 1961 | 17.2 | 13.4 |
| 1962 | 19.5 | 13.6 |
| 1963 | 18.2 | 14.5 |
| 1964 | 20.3 | 15.3 |
| 1965 | 21.3 | 16.3 |
| 1966 | 20.2 | 17.5 |
| 1967 | 21.8 | 18.4 |
| 1968 | 13.7 | 19.4 |
| 1969 | 8.4 | 20.7 |
| 1970 | *37.2 | 22.0 |
| 1971 | 9.8 | 22.1 |
| 1972 | 9.6 | 22.5 |
| 1973 | 6.8 | 22.6 |
| 1974 | 8.7 | 21.3 |
| 1975 | 10.5 | 19.7 |
| 1976 | 7.5 | 19.5 |
| 1977 | 11.9 | 19.45 |

*Includes Alaska.

Source: AGA Gas Facts, Table 4, reprinted from JEC Study, p. 14.

Interestingly enough, according to a study by the Congressional Joint Economic Committee, ". . . drilling activity, especially for gas wells, has risen sharply since 1973."

Thus we have higher prices—in fact spectacularly higher prices; more drilling for gas wells; but less gas.

Some people call that the "free market." But I do not.

What are some of the reasons for this contradictory situation?

HIGHER PRICES—LOWER PRODUCTION

One reason for this is the drive for deregulation by the natural gas industry. The figures on supplies and reserves are provided by the industry. Since the oil and gas industry started its big push for deregulation after 1967, discoveries have dropped phenomenally. They have dropped from the general level of 20 billion thousand cubic feet (mcf) per year to the 6.8 to 11.9 billion mcf since 1971.

INDUSTRY REVISES ESTIMATES TO GET DEREGULATION

But much of this is merely the revised estimates of the industry of its reserves on hand. For example, in what is called the Non-Associated Texas district 3, the estimates for the amount of gas held underground in that district, originally discovered in 1935, dropped from 5.8 to 3.8 billion cubic feet, or by 2 billion cubic feet or 35 percent in the period 1970 to 1973.

ARTIFICIAL BIDDING UP TO MINERAL RIGHTS

A second reason, according to a Joint Economic Committee study is that a considerable proportion of the increase in price went not only for the increased costs of labor and equipment, such as drilling rigs and pipe, but especially in the bidding up of the price of limited mineral rights.

As the study states (p. 41):

> Such an adjustment in the value of mineral rights (basically a rent payment) will have minimal effect on incentive to develop and produce from most properties.

RAPID PRICE INCREASES INDUCE WITHHOLDING SUPPLIES

The big rise in past prices—and we can expect the same under this bill—has created an incentive to keep gas off the market, not to sell it. As the JEC study notes:

> If the rate of energy price increase is higher than the return on alternative investments—i.e., the prevailing rate of interest—a producer will do better by holding his reserve.

As the study so succinctly puts it:

> In this situation, energy in the ground is a better investment than money in the bank. (p. 42.)

The increase in typical price of new gas since 1970—when it was about 20 cents—to 1976—when it was set at $1.42 nationally—was 470 percent, or 40 percent a year.

In other words, the rapid increase in the price and anticipation of further rapid increases under this bill encourages withholding of gas from the market. Under this bill the price goes up by 3 or 4 percent more than inflation. This makes it more profitable to keep gas in the ground than to produce it.

I cannot think of any investment one can make which is guaranteed to go up 3 or 4 percent more than inflation. If there is one I am sure a great deal of money would go into it. So why would any rational natural gas producer respond to this bill by making supplies available when he can keep them in the ground? Obviously the ground is a much better bank than he could find in a bank or he could find in any stock market investment or any real estate investment that one could count on.

The best alternative, both for bringing new production onstream and protecting the plight of the consumers, would be for reasonably small but fair increases which were predictable over a fairly long period.

The anticipation of higher and higher prices has brought the worst of all worlds, higher prices, more inflation, and less gas.

WHY THE GAS BILL IS IRRELEVANT TO THE DOLLAR PROBLEM

That passage of the natural gas bill is necessary to save the dollar is a ridiculous argument. Now that all other arguments have failed, we are told it must be passed, that the United States must have an energy bill—no matter how bad its substance—and that all this is necessary to save the declining dollar.

Mr. President, this is getting like King George's head. If people cannot think of any other reason to follow some economic policy, they say, "We have to save the dollar." We have heard that over and over again.

Like the flowers that bloom in the spring, with respect to the problem of the dollar, the natural gas bill has nothing to do with the case.

Mr. TOWER. Mr. President, will the Senator yield for a question at that point?

Mr. PROXMIRE. I will yield, but not at this point. Unfortunately, I have limited time, and I shall be through shortly and be happy to yield to the Senator from Montana and the Senator from Texas.

STOCK ARGUMENT

Mr. President, that passage of the natural gas bill is needed to save the dollar reduces the plea for its passage to a stock argument. Over the years in the Senate and in politics we have heard them all. From time to time they change. Prior to and during World War II, the stock argument was that a particular action would beat Hitler and stop fascism. After World War II almost every program and every proposal was advocated on the dubious grounds that it was

necessary to stop communism. Now the stock, fashionable argument of last resort is that it is necessary to save the dollar. Let us take a look at that argument on the dollar.

ENERGY IMPORTS DROP—DOLLAR DECLINES

First of all, during the period when the dollar has been declining relative to the German mark and the Japanese yen, the imports of energy from abroad have made up a smaller proportion of our total imports than before. So as our position with respect to energy imports has improved, the dollar, with relationship to the mark and the yen, has declined. So there is no direct cause and effect relationship. If anything the opposite cause could be argued with stronger persuasion.

JAPAN AND GERMANY IMPORT MORE ENERGY THAN WE DO

Second, the importation of energy is not the basic reason for the dollar problem. Consider both Japan and Western Germany. Japan imports almost all of its energy needs, but the yen has increased in value vis-a-vis the dollar. West Germany imports a far greater proportion of its energy needs than does the United States. Yet the mark has increased in value vis-a-vis the dollar.

How is it that the dollar is said to be in trouble vis-a-vis the yen and the mark because we import too much energy but that the yen and the mark, the currency of countries which import far more of their energy needs than we do, are strong in relation to the dollar? The argument does not make sense.

INFLATION CAUSE OF DOLLAR PROBLEM

There is a very different answer, one I touched on at the beginning of this speech. The basic reason for lack of confidence in the dollar is the endemic inflation this country now faces. That is the problem. And if we pass this natural gas bill and energy prices under it go up year by year not only at the rate of inflation but 3 or 4 percent or more per year faster than inflation, which is what the bill provides for, it will be seen that this bill adds to inflation and the dollar will remain in trouble. Those are the stark, objective, basic facts about this bill. It will hurt the dollar and not help the dollar.

SOME REAL CAUSES OF THE DOLLAR PROBLEM

The dollar problem has a host of causes, some good, some bad, and some neutral.

PROBLEM A MEASURE OF SUCCESS

With floating exchange rates now prevalent in the world, to some considerable degree the dollar problem is a measure of the United States post-World War II success in restoring the economies of the Western Allies first and strengthening the economies of the Third World second.

There was a period after World War II when there was a shortage of dollars abroad. No country could buy our goods. Economies were faltering because of the lack of dollars. We had to loan or give billions of dollars to Western Europe directly through the Marshall plan and less directly to other countries through foreign aid so they would have the funds to get back on their feet and to buy our goods.

That was no economic heaven. It cost us dearly in deficits and loans and in forgoing tariff reductions by other countries.

It added to our budget deficit. It increased our national debt. It took tax dollars from American citizens and spent them for the benefit of people abroad. Sure we had a strong dollar but the economic conditions were not good.

BETTER U.S. ECONOMIC GROWTH

The dollar problem is also the result of a much faster rate of economic growth in this country than in Germany and Japan in the last few years. We recovered from the 1974–75 recession far faster than they did. Our employment grew. Unemployment dropped. Our growth rate exceeds theirs. The dollar gap is to that degree an expression of our success—faster growth, increased employment, and declining unemployment. Do we really want slower growth, greater unemployment, and less employment in order that the dollar may improve vis a vis the mark and the yen?

NOT ALL BAD

The fall in the dollar is not all bad. It makes American goods cheaper abroad and hence increases our exports. It makes foreign goods more expensive here and thus decreases our imports. Already there has been some decrease in imports from Japan. Over time this problem will work itself out provided we come to grips with our basic economic problem here at home, namely inflation.

NATURAL GAS BILL WILL NOT HELP

Passing the natural gas bill will not make it easier for American farm products to get into the Common Market, which is one basic reason our exports are not as large as they should be.

Passing the gas bill will not make it one whit easier for American firms to sell their products in Japan, because that depends to a very considerable degree on the Japanese Government and their willingness to reduce barrier on the importation of our products.

FALSE BASIC PREMISES

The basic premises on which passage of the gas bill are based are false.

First, the premises that if prices rise, and in this case they will almost double by 1985, consumption will drop and gas energy will be conserved.

That has been shown to be false because demand for natural gas is relatively inelastic to price changes. Once a house is hooked up with gas stove, a gas furnace, a gas water heater, and a gas diswasher, a family has no real alternative fuel. It has to pay the price or go cold. And as the price of natural gas has risen far faster than any savings in supply which can be made by turning down the thermostat or washing the dishes in cold water, a very little savings have come about.

Far more savings can come from a policy of no more hookups or by requiring industry to convert from gas than in raising the price which will have little effect on demand and use.

The second premise is that prices will increase the supply. But as we have seen, a 10 fold increase in the price has resulted in no new supplies at all. Another doubling of the price will not solve this problem for it will still be more profitable to keep gas in the ground because the annual increase in value of gas in the ground under this bill will greatly exceed the benefit of selling the gas and putting the return in the bank to earn interest or to invest in stocks.

Finally, the premise that the bill is necessary to solve the dollar problem is without merit.

That problem—the dollar problem—is the problem of inflation. When those abroad who say we need a gas bill to solve the dollar problem find that it will result in higher prices and more inflation, and that it will result at best in only a marginal increase in the supply of gas, or an actual decrease in supplies if recent experience is any test, they will shortly be criticizing us for taking such foolish action.

WORST OF ALL WORLDS

This bill is the worst of all worlds. Consumers do not want it. Producers do not want it. Labor does not want it. Business does not want it. Liberals do not want it. Conservatives do not want it. Almost its only supporters appear to be the central bankers in Zurich and Bonn and Tokyo who if they knew what was really in this bill and how inflationary it was would not want it either.

Mr. President, I do want to add a note relating to my own State of Wisconsin.

Charles J. Cicchetti is chairman of the Public Service Commission of the State of Wisconsin. It was Wisconsin which brought the famous suit which resulted in the Phillips decision in 1954 which told the then Federal Power Commission to get on with the job of regulating natural gas.

As a consequence the administration and the Department of Energy have called and cajoled and attempted to persuade Mr. Cicchetti that the bill before us is acceptable. In fact, some changes were made in the bill at his suggestion to improve it.

In a letter to me and to all Senators he states that this it not a deregulation bill and that a natural gas bill is not necessary in 1978. He recommends, notwithstanding the administration's attempt to persuade him otherwise, that this bill be defeated and that either this year or next year Congress pass a good gas bill whose principal provisions he outlines.

Mr. Cicchetti is an avowed expert on this subject. He knows what this bill will do to Wisconsin and the country and he is against it.

I ask unanimous consent that his letter of August 22, 1978 be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF WISCONSIN,
PUBLIC SERVICE COMMISSION,
*Madison, Wis., August 22, 1978.*

*An Open Letter to the U.S. Senate.*

DEAR SENATORS: You will soon be considering the Natural Gas Policy Act. There are two things about this bill that you should know.

This is *not* a deregulation bill. While wellhead price regulation will be phased out over the next seven years, this bill substitutes a completely new form of price and use regulation. For the first time ever, federal regulations will apply to the pricing of industrial

natural gas. A series of exemptions and special considerations are permitted, making this new federal regulation a prime candidate for special interest domination and bad public policy. Furthermore, there are numerous categories of gas under phased deregulation policing and regulating them will be a public disaster and a bureaucrat's delight.

A natural gas bill is *not* necessary in 1978. Two years ago there was a serious natural gas crisis caused by a severe winter and foolish federal and state regulation. Now there is a natural gas supply bubble caused by conservation and conversion, and a favorable Supreme Court decision in the *California vs. Southland Royalty Co.* case. Many states which prohibited natural gas hookups are now reconsidering in light of the current gas surplus. The Department of Energy officials, who cried wolf, need any gas bill (phrases like "the best this Congress will produce" abound). But, the nation can afford to wait. To argue that a bad gas bill is necessary to help the dollar in international markets represents a sophomoric understanding of current energy and international monetary situations.

A good gas bill, which the nation most assuredly needs either now or in the next Congress, should have two simple features. First, in exchange for paying the same higher prices as the intrastate market, consumers in both the intrastate and interstate markets should come under identical amounts of federal price, non-price, allocation, curtailment and end-use pricing controls.

Second, new federal regulation of retail prices should be deleted from the current natural gas bill and kept out of future legislation. The so-called incremental price passthrough will cause industry to convert to foreign oil, move factories to gas producing states, and escalate the prices of their products. The industrial abandonment of gas in the interstate market will mean the higher gas prices, and a larger portion of fixed costs, will be passed on to the residential customers. The so-called consumer-oriented legislators who support this provision either have a strange view of how to help consumers, or have little knowledge of their own state's gas markets. I urge them to contact their public utility commissions to determine what is thought of this new layer of federal regulation and preemption of state authority, all in the name of deregulation.

In conclusion, I would like to see the nation end the two-tier natural gas market that has disrupted the natural gas industry for the past five years. I would like to see the President get the international credit for his ability to lead. In my opinion, this can be accomplished by sending the present bill back to Committee with instructions to: (1) treat all states alike in every respect, and, (2) delete the present attempt to substitute one form of new federal regulation for the one being phased out. If these goals cannot be accomplished, I believe natural gas should be a principal agenda item for the next Congress. It is simply not correct to claim that we as a nation will gain international credit and create domestic energy tranquility by passing a bad gas bill.

Sincerely yours,

CHARLES J. CICCHETTI,
*Chairman.*

Mr. PROXMIRE. I am happy to yield to my friend from Montana.

Mr. MELCHER. I thank my friend from Wisconsin for yielding, and I am happy that he mentioned the 1954 Phillips case where the Supreme Court decided that the Federal Power Commission had better get on with the job of regulating the price at the wellhead.

Between the time of 1938, when the Natural Gas Act was passed, and 1954 when the Supreme Court said, "You have got more duties then you have been doing, Federal Power Commission," there was not so much paperwork by that agency. But after 1954, as a result of that Supreme Court decision and the duty of the Federal Power Commission to regulate the price of natural gas at the wellhead, we have gotten to a point now in 1978 of overwhelming reporting.

We put the Federal Power Commission out of business and put the Federal Energy Regulatory Commission in business, and said they are going to take over, among other duties, the Federal Power Commission's duties.

Here is Charles Curtis, the chairman of that Commission, reporting to us on what this bill does in terms of paperwork that they have inherited under the Natural Gas Act that the Federal Power Commission was doing. They had 10,025 cases under section 4 of the Natural Gas Act when they took over from the Federal Power Commission since fiscal 1977, and in that fiscal year had received an additional 15,769 cases, for a total workload of 25,794 cases based on section 4 of the Natural Gas Act.

What does this conference report do? I tend to agree with the Senator from Wisconsin when he says if we think we are going to pass new legislation around here and end some paperwork we are generally fooled. The only way we can end any paperwork is if we repeal some law. This conference report repeals the Natural Gas Act, repeals all of those provisions under section 4 of the Natural Gas Act for those interminable 30-day reports.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MELCHER. I would be delighted to yield. It is on the time of the Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin has the floor.

Mr. PROXMIRE. The Senator is making an interesting argument. But this is not deregulation. As I pointed out in this Chicchetti letter it is not deregulation for the reason he gives, and I would like to point out also there are something like 23 different pricing tiers.

So, as my good friend from South Dakota reminded me, Senator ABOUREZK, you can multiply what you are doing now 23-fold. If that is deregulation it is 2,300 percent more. It may be that it will not be quite that bad, I suppose, but the fact that the energy agency is asking for more personnel for the purpose of administering the legislation suggests that they have to have that to regulate it.

Furthermore, as Mr. Cicchetti points out, what this really does is to provide regulation after the date given here, regulation eventually by the industry itself and, of course, they also are likely to have more paperwork. It is true it will not be Federal paperwork, it will be private paperwork.

Mr. MELCHER. I think the confusion that arises in the mind of my friend from Wisconsin is that he is talking about pricing regulations and not addressing the question of nonprice regulation. Section 4, to which I referred, and to which Charles Curtis refers, is nonprice regulation. It is interminable reports that are required by the Federal Power Commission that will not be required because it will be repealed under this act, and those reports will be turned over to the States. The requirement for all of that will be to a State regulatory commission on the nonprice regulations, and that is the point and how you get out of some paperwork on the Federal level.

Mr. PROXMIRE. Mr. President, I yield to my friend from South Dakota.

Mr. ABOUREZK. Mr. President, I thank the Senator for yielding. Just briefly I want to ask the Senator from Montana about this 23-level pricing system that has been established in the conference report—and, incidentally, I do not call this a compromise. A compromise is an area of agreement between two opposing sides. This particular thing was not an agreement between two opposing sides. It was between two people who agreed in any event. We ought to call it not the natural gas compromise, but the Jackson-Dingell conference report or the Jackson-Dingell-Schlesinger-Carter conference report because those are the folks who agreed on it, and hardly anybody else.

In this conference report there is a 23-level pricing structure set up with 23 different kinds of natural gas and nobody, including the Senator from Montana, can tell me there is not going to be a maze of regulations, there is not going to be a series of lawsuits. In fact, since I am going to go out and practice law next year, I ought to vote for this bill, because this is going to be wonderful for lawyers out in private practice. It is going to make everybody who gets into it wealthy. They are going to be able to send all their kids to college and buy several airplanes, yachts, and homes in the process as a result of this regulation system.

I believe in regulation of natural gas pricing. But I do not believe in clobbering people with this kind of a pricing system, 23 levels.

If you think they have had trouble enforcing the oil regulations that have been written since 1973—and lawsuits to make oil companies comply with the regulations have been lost on the basis that the regulations were too complicated—what do you think will happen with a 23-level pricing system? It is going to drive them crazy. Charles Curtis, the head of the FERC, Federal Energy Regulatory Commission, has announced, now that Schlesinger has got him straightened out, where he first said "we cannot enforce this thing," he now says, "Oh, yes, we can enforce it, but we are going to have to have more money, more staff, and a bigger bureaucracy."

Enormous costs are what you are foisting upon the American public with higher prices, and on the industry as well with this kind of a regulatory bureaucracy.

Mr. PROXMIRE. May I respond? I have the floor. I say to my good friend this is not a deregulation bill anyway. Charles Cicchetti points out why. It is true—and I am reading from his letter:

This is not a deregulation bill. While wellhead price regulation will be phased out over the next seven years, this bill substitutes a completely new form of price and use regulation. For the first time ever, federal regulations will apply to the pricing of industrial natural gas. A series of exemptions and special considerations are permitted, making this new federal regulation a prime candidate for special interest domination and bad public policy. Furthermore, there are numerous categories of gas under phased deregulation; policing and regulating them will be a public disaster and a bureaucrat's delight.

Now, this is a man who has devoted his life to regulatory policy. He is chairman of probably the finest public service commission in the country. We are very proud of it, and it has a great tradition, and this is his view of how to reduce the burden of deregulation.

Mr. MELCHER. May I answer the Senator from South Dakota?

Mr. PROXMIRE. Yes.

Mr. MELCHER. I thank the Senator for yielding to me. I will answer this way, in Charles Curtis' own words:

The staff has estimated that a like number of rate applications will be received in fiscal 1978 yielding a total workload of 28,407 cases.

That is a totally unreasonable number of cases.

Continuing:

FERC's current caseload is substantial, its backlog unacceptably large. This circumstance derives from a number of causes. First, the regulatory scheme, as presently implemented, is particularly cumbersome and appears incapable of keeping pace with the dynamics of the market. Second, this Commission's predecessor, the Federal Power Commission was singularly unsuccessful in obtaining from the Congress adequate resources to perform the Commision's duties.

Generally speaking, except for gas which is committed or dedicated to interstate commerce on the day before the date of enactment, the current utility-type regulatory mechanism would be terminated. Thus, it would no longer be incumbent on producers to obtain certificate authorization for new sales in interstate commerce, dedications of new gas reserves would not be required nor would a producer need abandonment permission from the Commission to allow it to sell gas to another upon the conclusion of the contractual term. Also, in the case of sales of gas not previously committed or dedicated to interstate commerce occurring after date of enactment, tariff filings and rate increase applications would be dispensed with. This would also be true in the case of production from new onshore producing wells, new gas wells, and high-cost wells even if the gas is currently committed or dedicated . . . it is reasonable to expect that the Commission's present caseload attributable to functions now conducted under the Natural Gas Act will significantly diminish in future years.

Mr. ABOUREZK. Why would Curtis say that in one breath, and in another breath say, "I need more money and more bureaucrats?" I do not understand.

Mr. MELCHER. For one reason: Because Congress seems to have given to the Federal Regulatory Commission a great deal more authority and responsibility under the law passed by Congress than was in the hands of the Federal Power Commission. The Federal Power Commission licensed some hydropower——

Mr. PROXMIRE. That does not require paperwork. What does that mean? That means they have to exercise it by persons that require paperwork.

Mr. MELCHER. That is exactly correct; plus some coal conversion work, plus a lot of other responsibilities we give to the Federal Regulatory Commission.

Mr. ABOUREZK. But you miss my point. The point is, Curtis said that if the conference report passes, he will need more money and more bureaucrats than he would otherwise need.

I think it is fair to say that Curtis would have said that regardless of whether this conference report passes.

Mr. MELCHER. But he has said that one portion of all the forms they require under the Natural Gas Act will require a workload of more than 28,000 cases.

Mr. ABOUREZK. It is fair to say——

Mr. MELCHER. And that is not just a small amount of storage of obsolete paperwork. That is more than this whole building could hold, over the course of a couple of years.

Mr. ABOUREZK. What is fair to say is this: In response to a direct question about the responsibility under this conference report, Curtis said, "I will need more money and more bureaucrats; there is no way you can escape it."

Mr. PROXMIRE. I yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding.

A great deal has been made about the regulatory complexity under this bill, but not much has been said about the complexity in the absence of this bill.

A portion would be returned to the States for their regulatory commissions under this bill; so it would be returned to the States for their supervision, which I think is appropriate, and I think the Senator from Wisconsin would agree with me on that. Second, they already have some——

Mr. PROXMIRE. May I say it may or may not be appropriate, depending on the State, and I think the Senator has a good point. However, as Mr. Cicchetti, a distinguished public service commission regulator, said, it will also be returned to private industry under circumstances which will make it extremely difficult, and, as he said, make it a great hunting ground for special interest domination and bad public policy.

Mr. McCLURE. I understand, but that is the case that is already made. That is the case now. Every well that is drilled, they have to get new drilling cost permission. So you do not have dozens of classes of gas under current law, you have hundreds. Almost every one is a special case, in which special interests and special favors may be shown, and, because it is of limited application, it is one to which public interest would not be directed very widely, and therefore the opportunity for wheeling and dealing, if that is the suspicion, is greater under present law that under the new bill.

And I might point out, in response to the suggestion made earlier that for the first time we get into the industrial fuel, that one of the major reasons for industrial gas regulation under this bill is because of the DeConcini amendment adopted on the floor of the Senate dealing with incremental pricing. That is not something the conferees from the Senate were free to deal with in conference, because it had been added on the floor of the Senate. The Energy Committee had not put that in; it was offered and adopted on the floor of the Senate.

Therefore, that question of industrial price regulation was injected by an amendment, which I think the Senator from Wisconsin voted for.

Mr. ABOUREZK. Mr. President, will the Senator yield briefly on that point?

Mr. PROXMIRE. Yes; I yield to the Senator from South Dakota.

Mr. ABOUREZK. In the terms of the incremental pricing, the Energy Information Administration in its report and analysis on this conference report, has said that the incremental pricing provisions have been thrown out the window, that in fact homeowners will pay more for natural gas, proportionately, than will industry.

Mr. McCLURE. Will the Senator yield on that question?

Mr. ABOUREZK. He has the floor.

Mr. PROXMIRE. I yield.

Mr. McCLURE. Let me say that the Senator from South Dakota incorrectly reported what the EIA said. They said it will lead to a change in their regulations some 5 years from now, but not because incremental pricing has been thrown out the window.

Mr. ABOUREZK. No, sir, the Senate provision, which in fact was reversed in the Senate——

Mr. McCLURE. The Senator is incorrect.

Mr. ABOUREZK. Let me get a copy of that report, and read it.

Mr. PROXMIRE. Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. FORD). The Senator from Idaho.

Mr. McCLURE. Mr. President, this question of the complexity of the bill seems to go to the heart of the controversy. There are various reports about how many regulations there may be pending action. I am amazed at the number of people who are opposed to this bill because they say it is too complex from a regulatory standpoint, but at the same time they say industry can do better under FERC, because they always go to FERC and ask for relief.

They cannot have it both ways. They can either ask FERC to help them, or object to the regulatory procedure, but they cannot do both, it seems to me. Yet at the same time they are doing precisely that. They are saying this requires FERC to protect the industry, and requires FERC to do what FERC cannot do now. They cannot come out with enough regulations to decide the pending applications rapidly enough to avoid the backlog, which I think is 700 major cases and 25,000 to 35,000 minor decisions, in addition to the major ones, that are backlogged now.

No wonder the Federal Regulatory Commission comes in and says, "We will need more staff." The Senator from Montana is exactly correct; we have, by the actions of this Congress, already increased the demands upon the Federal Regulatory Commission. This bill un-

doubtedly requires some additional complexity.

That was going to be true under Pearson-Bentsen, particularly with the incremental pricing provision, which the Senate in its wisdom added. I might add that I voted against that. I think the Senator from South Dakota voted for it. If there is to be, as a matter of fact, any additional complexity because of that regulation, it should not be tagged against the junior Senator from Idaho. I did not want that. There were others who said, "We have to protect the consumer." Now because we are protecting the consumer by a regulatory process, they object that we have a regulatory process. It does not seem to me one can have it both ways by at one time condemning the regulatory process in this bill and then commending the regulatory process as the only means to protect the consumer on the other hand.

This bill, certainly in my opinion, in this Senator's opinion, is not a perfect bill. I think the Pearson-Bentsen approach was better. I know my friend from South Dakota does not agree with that at all. That does not surprise me. But, as a matter of fact, if we array this bill against the current law, it is a step toward deregulation in a structure, measured, predictable manner, with no greater complexity than is in the existing law and, in my judgment, much less complexity; a greater certainly to those who wish to produce and, therefore, since they have greater certainty, there will be greater investment. And there is the immediate advantage of releasing to the interstate market, without the interference of the regulatory commission, releasing to the interstate market that which is now blocked within the intrastate market. That is a tremendous boon to those areas of the country which are not producing States.

I know there are those who say, "Well, we could have done it under the emergency procedures under existing law," but the same people are saying, "Well, depend upon FERC to release it," and are the same ones objecting to the regulatory complexity. Can you have it both ways? Can you say, "I will depend upon FERC to release it but I cannot depend upon FERC to do these other things because they are incompetent and the complexity of regulation is far too great"?

Mr. ABOUREZK. Can I read from this announcement under prices and consumption:

Table 4 represents the projected natural gas delivered prices by sector for each of the proposals in the current regulation case. Residential prices are estimated to be lower under the House and Senate bills than the series C case due to their respective incremental pricing provisions. Incremental pricing under these two bills passes on the lower cost of old contracts to high priority consumers, largely residential and small commercial consumers. In the compromise, however, the projected residential prices are higher than in the other two proposals due to the different allocations of high cost gas to the incremental pricing pool for low priority customers. The major factors are that the Alaskan gas, transportation costs, and existing and improved LNG and SNG projects as well as intrastate gas are rolled into all consumers under the compromise proposal and are not placed in the incremental pricing pool as they are in the House and Senate bills.

Now, does that square with what I said just a few minutes ago?

Mr. McCLURE. No, it does not, as a matter of fact.

Mr. ABOUREZK. Where is the difference?

Mr. McCLURE. The Senator is referring to the Alaskan pipeline compromise that was made, and it was the judgment of the conferees that that was the only way to get that supply here. Maybe the Senator from South Dakota would rather his consumers in South Dakota go without that gas. That is certainly not my understanding of what the Senator is trying to do, to increase a shortage.

Mr. ABOUREZK. What does that have to do with what I was talking about?

Mr. McCLURE. Because the reason for the difference is the rolled-in price treatment for the Alaskan gas pipeline which was not the case in the incremental pricing provision as adopted by the Senate in the first instance. To that extent there would be a higher cost to consumers, residential consumers, than otherwise.

I go back to the old story of the fellow who went into the store, looked for something on the shelf, and asked the merchant how much for that item on the shelf. The merchant said, "That is $1.49."

He said, "I don't know why I should buy it from you. Your competitor down the street has it for 50 cents."

The merchant said, "Why don't you buy it from him, then?"

He said, "I would, but he doesn't have any."

The merchant said, "If I didn't have any, I would sell it for 50 cents, too."

Mr. ABOUREZK. That is a fine story but what has that to do with this?

Mr. McCLURE. It has exactly to do with this because the question is whether or not you are going to have Alaskan natural gas in the Lower 48 State markets.

Mr. ABOUREZK. Sorry, the question is how much of the gas price gets treated as part of the incremental pricing pool. That is the question.

Mr. McCLURE. That is what I was trying to tell the Senator, that you are not going to have it unless you roll it in. If you are saying we cannot roll it into the price, you will not have in the market.

Mr. ABOUREZK. Just a minute.

Mr. McCLURE. I will be glad to wait however long it takes the Senator.

Mr. ABOUREZK. The reason the incremental pricing pool raises prices to residential consumers as indicated by the department analysis is that the Alaskan gas price is rolled in and it makes prices higher to residential homeowners in the conference report than it does in the House or Senate bill.

Mr. McCLURE. That is correct.

Mr. ABOUREZK. That is what exists in the conference report.

Mr. McCLURE. That is correct.

Mr. ABOUREZK. There is no way to change it now unless we recommit it and go back to the conference committee.

Mr. McCLURE. That is correct. I am not arguing with my friend on that subject. It is a question of whether or not you want the gas. If you do not want the gas, go ahead and say you do not want it rolled in.

Mr. ABOUREZK. Then you do not disagree that the conference report makes prices higher for residential consumers? Do you agree with that?

Mr. McCLURE. Let me answer my friend in this way

Mr. ABOUREZK. No, do not ask. Answer it.

Mr. McCLURE. I will answer it my way, not your way. I would say in the judgment of the conferees you have a choice to make. The question is whether or not you want to protect the consumer against the high price by guaranteeing that he will not have gas to pay for. You can do that if you want to. The conferees came to the judgment that if we are going to have the pipeline built we are not going to get it unless we pay for it. My friend can argue all day long if he wants to. There is no argument between us as to the pricing effect to the consumer. The question is whether or not he has that alternative supply of gas available. If he does not, then maybe we will go down to Mexico and——

Mr. ABOUREZK. Let us assume——

Mr. McCLURE. Just a moment.

Mr. ABOUREZK. Let us assume——

Mr. McCLURE. Just a moment. Maybe my friend would prefer we go down to Mexico and pay them $2.60 per mcf. That has been suggested as an alternative. Or perhaps he would rather we pay $4.50 per mcf for LNG. Perhaps my friend would prefer that we strip mine more in the West so we do not have to depend on natural gas. Those are some of the choices, too.

Mr. ABOUREZK. Let us assume that we have the Alaskan natural gas supply, so we have that argument out of the way.

Mr. McCLURE. Let us assume it how? Let us assume we can get it without paying for it?

Mr. ABOUREZK. No; let us assume that we have it at any price you want to set on it.

Mr. McCLURE. All right.

Mr. ABOUREZK. We have it. Under this conference report, that price is rolled into the price residential consumers have to pay, which makes their price higher than the industrial users.

Mr. McCLURE. No, not at all.

Mr. ABOUREZK. No?

Mr. McCLURE. Not higher than to the industrial users.

Mr. MELCHER. Will the Senator yield?

Mr. McCLURE. I am happy to yield.

Mr. MELCHER. The existing situation is that industry gets it cheaper than the homeowners get it. What is new about that? There is nothing at all new about that.

Mr. ABOUREZK. Will the Senator agree with my analysis of the conference report?

Mr. McCLURE. Let me put it this way——

Mr. ABOUREZK. Let us not argue about whether or not we have it now.

Mr. MELCHER. If the Senator will yield to me, let me refer exactly to the Energy Information Administration analysis that the Senator from South Dakota referred to. That agency, in their analysis, used two different assumptions about what incremental pricing would do, and then it came up and showed the following retail price projections in 1985 for residential consumers.

First of all, under the Senate bill, if you could assume that the intrastate pipelines and the local distribution companies within a State would use incremental pricing, the price would have been $2.97 by 1985. But there is no reason to make that assumption because it is not required by the Senate bill, and I have never heard of a local distribution company or an intrastate pipeline company that wanted to get into the morass of incremental pricing. So if you assume that they will not use incremental pricing because they are not required to do so under the terms of the act, under the terms of the Senate bill that price would have been $3.62 for home consumers in 1985.

Under the compromise, under this conference report, that price will be $3.31 in 1985.

Now, if the Senator from South Dakota has some weird idea that, since we have the natural gas in Alaska, it is going to get down here without building the pipeline, he is operating in a never-never land. If the Senator from South Dakota has the idea that the U.S Government is going to underwrite, is going to pay for that pipeline, assume the construction costs, then I think he should stick around with us in the next Congress to see whether that could ever come about. I do not think it will ever come about.

I do not think the U.S. Government is going to enter into the proposition of paying for pipelines. I think we are going to keep the status quo. That is that the pipeline companies, based on selling bonds, based on a projected tariff, are going to have a pipeline built eventually. But let me tell him something: I think the Senator from South Dakota assumes that we can get the Alaska natural gas pipeline constructed without rolling in the wellhead price and transportation costs, and that is a fictitious thought. That will never happen. That just will not happen.

They have to enter into the bond market. Those people who want to build that pipeline, that has been designated by the President as the preferred route, the preferred company, are never going to build a pipeline unless they go into the bond market and say to those money brokers, "Here is what we can do based on the contracts for selling the natural gas." And they do not have a contract that is worth a tinker's dam until the wellhead price and the transportation price are rolled in. That is why they have come to us and they have come to the Senator, too, I think, and said to him, as they said to me, "If we are going to do anything about selling bonds, we are going to have to have this bill or some bill like it that will allow the wellhead price and the transportation costs to be rolled into the final price of gas that we transport."

That is a serious situation and the question is exactly, do you want the natural gas to come down from Alaska or not? If the Senator does not want it to come down, let me tell him something else that will happen: That oil can only be pumped out of Prudhoe Bay out of those wells for so long under the process of reinjecting the gas that comes out along with the oil, for only a certain amount of time. When the point comes where the pressure is so great that the gas cannot be reinjected, the producers of those wells at Prudhoe Bay have two choices: expensive storage for the gas, which will make it tremendously costly—five times, six times, seven times more costly, just from adding the storage to it—or they can shut down the well.

Mr. McCLURE. The Senator might add that they have one other alternative if they were permitted under our law; that is, to flare the gas, just waste it.

Mr. MELCHER. Well, we are not permitting any flaring and we are not going to because it is absolute waste. The Senator from South Dakota would not advocate it and I do not think the Senator from South Dakota would advocate that we shut down the wells to make our situation even more dastardly than it is now.

I can hardly believe that the Senator from South Dakota would represent the people of this country and say, "You are going to have to build expensive storage for that gas in order to keep producing the oil," which in turn would mean when the gas is finally brought down here for use in the lower 48, it would be five or six times more costly than under this system. If we are going to have that gas from Alaska, it is going to have to be on the basis of this. And on that basis, it will still be plenty expensive and probably be more expensive than the incremental price I have suggested here that, under the terms of the bill, will cost residential users $3.31 in 1985. For all the home owners of this country who are finding fault with the high utility bills they have from their gas companies, I sympathize, and I include myself, but it is going to be worse if we are going to continue to use natural gas.

We are faced with a limited number of alternatives. This conference report gives us an alternative that none of us really likes very well, but it is the best one we have.

Mr. McCLURE. I yield to the Senator from South Dakota.

Mr. ABOUREZK. The only thing I want to wrap up with is to say that, apparently, both the distinguished Senators agree that the conference report increases the price to residential home owners. They do not disagree with that, as they are standing there arguing right alongside of me.

Mr. McCLURE. Let me say it will only be higher if Alaska gas comes. If Alaska gas does not come, it will be no higher. All the Senator from South Dakota is asking us to do is guarantee that the Alaska gas supply will not be available to the consumers in his State.

Mr. ABOUREZK. I did not ask that.

Mr. McCLURE. Yes, he did. He may not have known he was asking that, but that is what he was asking.

Mr. ABOUREZK. I asked the Senator to concede that this great incremental pricing provision that the Senate passed, which I remember very well, because I supported it and voted for it last year in September, has been tossed out the window and what is left is a price that is higher to consumers in the conference report. He cannot disagree with it; he has agreed with it already.

Mr. McCLURE. Let me tell my friend he can repeat that as often as he wants to, but that does not change the fact. The fact is if he wants that gas down here, his consumers are going to have to pay for it.

We did not throw the incremental pricing provision out in conference, although I dearly would have liked to do that. But the Senate had voted for one, the House had voted for one, and I could not throw it out. If I had had that latitude, I would have been urging that. But we did say the incremental pricing provision cannot be realistically applied to the Alaskan gas, because if it is applied to Alaskan gas, you will not have any down here.

My friend from South Dakota can argue it as long as he wants, but there is no begging the issue that that pipeline must be financed; it cannot get gas to the U.S. market until the gas pipeline is financed; and it cannot be financed under the incremental pricing provision. It is just that simple.

When the Senator from South Dakota suggests that we must have the incremental pricing provisions applied to the Alaska gas, he is arguing that the Alaska gas should not be permitted to reach this market. The financing requirements are very simple: the people who would like to build the gas pipeline must go to prospective consumers of that gas and negotiate contracts. They must go to the prospective suppliers of the natural gas, the producers in Alaska, and negotiate a purchase price. The spread between the two must be equal to the operating costs and the financing costs of that gas pipeline. If they are unable to negotiate the contracts on both sides, here will be no financing, there will be no pipeline.

I happen to believe that natural gas in Alaska ought to be made available to our consumers in this country, rather than forcing them to the alternatives of even higher-cost gas elsewhere. The Senator from South Dakota is presuming, when he makes that statement, that we shall be able to buy a sufficient supply of gas at lower cost than we can buy it from Alaska or that the Alaska gas should not be made available to the market in this country. That, to me, is an unacceptable and an unrealistic expectation. I just do not think it is going to happen that way. That is the reason why the conferees on the part of both the Senate and the House agreed to the modification of the incremental pricing provision. The balance of the incremental pricing provision remains in the conference report. It was not junked. It was narrowed.

There were those who wanted the incremental pricing provision across the

board and the House conferees said, "In order to protect the users of electricity, the utility rates that are produced by natural gas, you have to exempt utilities from the incremental pricing provision, because that will just show up in their utility bill next month if they are forced to buy the high-priced fuel."

There was another provision, which the Senator certainly does not disagree with—at least, I hope he does not—in regard to food processing, because the price of food on the consumers' table will reflect increased energy costs just as quickly and just as inevitably as will the consumption of gas in the utility structure.

So, in addition to the Alaska gas deletion, there was also the exception for utility and there was also the exception for food processing.

Surely, that is the reason some of the big industries, for whom the Senator from South Dakota is a sometimes ally, object, because they alone are left with absorbing all the incremental costs, and they do object. That is one of the major reasons for objection to this conference report, because they think they have been singled out as the broader incremental pricing market was narrowed and it has to focus on a smaller number of people. The result, of course, is that the incremental pricing provision weigh more heavily on them than otherwise under the original Senate bill.

But to argue that the consumer of natural gas in the Senator's State or mine will pay the bill because of the Alaska gas pipeline compromise on the incremental pricing simply presumes the gas pipeline can be built without cost, which we simply cannot make.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. McCLURE. I am happy to.

Mr. HATCH. Mr. President, I ask unanimous consent that Everett Wallace, of Senator BAKER'S staff, be granted privilege of the floor during debate and votes on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABOUREZK. Mr. President, I make the same request for Sue Sadler.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I make the same request for Mike Hathaway, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Does the Senator care to ask any other question or make any other comment? If not, I will be glad to yield the floor to him.

Mr. ABOUREZK. Not at this point.

Mr. McCLURE. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, would the Senator from South Dakota (Mr. ABOUREZK) inform me if he cares to take the floor at this time?

Mr. ABOUREZK. Not at this time.

Mr. MELCHER. Does the Senator intend to expound on the issue promptly, or does the Senator know of others that would care to address the Senate on the issue?

Mr. ABOUREZK. At this point, I do not know if anybody wants to talk.

Mr. MELCHER. Does the Senator care to inform me or anybody else in the Senate if he feels that a session late this evening is necessary to accommodate those who care to address the issue?

Mr. ABOUREZK. Nobody has told me that they want to make a speech today. I can make one, to fill the dead air time, but I would have to repeat it tomorrow.

Mr. MELCHER. Does the Senator from Utah wish to speak?

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I ask unanimous consent that Mr. Tom Perry, of my staff, have the privilege of the floor throughout the pendency of this matter and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, it is very fiitting that the Senate leadership has decided to reverse the order in which we had expected to consider the four remnants of the National Energy Act.

If there is one word that is synonymous with the issue of natural gas deregulation, that word is reversal.

A brief review of the President's opportunistic gearshifting on this vital issue requires no embellishment to make my point.

In a June 16, 1976, presentation to the Democratic Platform Committee, a fellow named Jimmy Carter had this to say:

> For natural gas we should deregulate the price of only that natural gas not currently under existing contract for a period of five years.

Four months later, and barely 3 weeks before election day, Carter promised Texas Governor Briscoe and Oklahoma Governor Boren, as well as Louisiana Governor Edwards:

> I will work with the Congress, as the Ford administration has been unable to do, to deregulate new natural gas.

But 6 months later, when President Carter submitted his hastily drawn National Energy Act to this Congress, he reneged on his unqualified commitment and recommended that price controls on natural gas be continued.

To compound his breach of faith, the President—on three occasions during September of 1977—implied incorrectly that the oil and gas industry was seeking immediate and total deregulation.

The demagoguery reached a new low at an October 13, 1977, press conference when the President—in a scathing attack that startled even the liberal press—accused deregulation advocates of "potential war profiteering," said it could lead to "the biggest ripoff in history," and claimed the oil companies "apparently want it all."

Despite his advocacy of continued regulation of interstate gas and his endorsement of a House bill extending controls, for the first time, to the unregulated intrastate market, the President, on two additional occasions saw fit to insult the intelligence of his audiences.

At an October 28 question and answer session with visiting newspaper executives, the President, at one point, told his audience:

> As I said in my campaign and also as I said to the Congress when I made my energy speech last April, we are working toward deregulation of natural gas.

A week later, in another question and answer session, the President, when challenged on the contradictions in earlier remarks, replied:

> I don't believe that I've changed my position. I don't interpret it that way. My position was that I would work with Congress, as had President Ford, for the deregulation of natural gas . . . The difference is in the rapidity with which natural gas is deregulated.

I found that to be extremely interesting.

As many Senators will recall, those baffling statements triggered an outpouring of skeptical and critical editorial comment that I am sure accounts in part for the unprecedented nosedive in the President's credibility.

But the worst was yet to come.

On March 9, 1978, the President—in a statement that was both incredible and incredulous—told a news conference he was willing to accept phased decontrol of natural gas, explaining:

> This was a campaign statement and commitment of mine—that I thought natural gas should be deregulated.

In lieu of the mere skepticism and criticism that greeted the President's earlier remarks, the commentary on his March 9 statement bordered on ridicule and insult. And it is no wonder.

In the light of this sad and somewhat sickening record, I would hope that many of my Senate colleagues would have the same difficulty I am having in accepting at face value any of the current White House and DOE claims regarding the virtues of this conference report on H.R. 5289.

As I have followed this natural gas deregulation fight in the Senate, I have supported deregulation because I feel this country is in trouble energywise—not because there is not enough energy, not because we cannot engage in efforts to find new and better enhanced recovery techniques, not because we do not have the ability to come up with new technology, not because there are no alternative forms, but because we have been emphasizing the public sector over the private sector. We have been relying on a Federal bureaucracy to produce natural gas and it does not have the ability to do so.

The fact is that the only ones who ever have produced natural gas in our society are the people in the private sector, the

independent business people, the people who can go out there and find it because there are incentives to go out and find it.

I might add that the only way to get the natural gas difficulties and the energy difficulties off our backs is to deregulate the price of gas and put the incentives in the private sector, where they belong, where we can find oil and gas and their alternative forms, and get the bureaucracy off our backs.

DOE has grown to approximately 20,000 employees just since its organization. Of course, they have taken already existing employees in the Federal Government and have added to their numbers. The budget is well over $10 billion a year, and not $1 is going to find 1 cubic foot of natural gas, let alone a drop of oil. In the process, we are finding that this country is not solving its energy crisis—or, perhaps I should say its energy difficulties, because I do not believe we have a crisis now.

I recall when the famous MOP study was being undertaken. It was before the Pearson-Bentsen amendment debates, and everybody was talking about energy as a crisis in America. I made a speech on the floor of the Senate called "the Bureaucratization of Our Energy Crisis." I made the point that we are not out of natural gas, that we are not out of oil, that we are just out of the ability and the will to find it, because of overregulation by the Federal Government, among other things.

I recall that people laughed at that point, but almost everybody has come to an agreement that I was right when I made that speech, way back in the early days of my first year in the U.S. Senate.

The MOP study was unsatisfactory to this President and his administration; because it proved that if we would deregulate the price of gas to the then world price of about $2.25 per thousand cubic feet of gas, we would be awash in natural gas, substantiating my opinion with respect to the bureaucratization of the energy crisis. Well, they got rid of those people in the original MOP study and sent them away, dispersed them throughout the bureaucracy.

Then they came up with another study, and that was not satisfactory, and finally they reduced it to a third study, which I understand now that Mr. Schlesinger is suggesting we burn.

The basic conclusion of the third study also was that if we would deregulate the price of natural gas to the world price, we still would be awash in natural gas.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. MELCHER. The Senator from Utah knows that I agree with him, that deregulation, at least phased-in deregulation, such as Pearson-Bentsen, is much preferable, which I believe the Senator advocates.

Mr. HATCH. I find no fault with the Senator from Montana, other than that we disagree on this particular issue.

Mr. MELCHER. The question of regulation, however, would not be with the Department of Energy. It would be with the Federal Energy Regulatory Commission.

Earlier we established a couple of facts pertinent to the manpower needed and the paperwork necessary under existing law as compared to passing this conference report.

One of the points made was that under section 4 of the Natural Gas Act passed in 1938, amended several times, with a requirement of the Supreme Court in 1954 in the Phillips case for wellhead pricing by the Federal Power Commission, there was a tremendous increase in reporting required for nonprice regulation.

Now Charles Curtis, the Chairman of the Federal Energy Regulatory Commission, points out that they anticipate during this fiscal year 28,000 new cases under section 4 that they will have to wade through and be inundated by the paper that is generated in those cases, all of which are on nonprice regulation under section 4 of the Natural Gas Act.

We established that section 4 of the Natural Gas Act will be repealed. Those requirements on those reports of nonproce will be repealed, and even under the terms of this act, if it is adopted, the pricing regulations for what has been described as 23 different price possibilities will be taken over by paperwork required by the State commissions, that most of us think can do it better, easier, quicker, faster, and with less frustration than if we leave the section 4 of the Natural Gas Act as the law of the land enforced by FERC to require all of that reporting that goes along with it.

So in one aspect we get rid of some paperwork and some regulation that is burdensome.

But I wonder if the Senator from Utah will tell me how he views a motion to recommit with instructions of this conference report? Does the Senator from Utah view that with favor?

Mr. HATCH. At the present time, I do.

To answer the Senator's question——

Mr. MELCHER. Yes; I wish to have the answer clarified.

Mr. HATCH. I think that the motion to recommit the natural gas conference report with instructions to report back a bill that will embody provisions already agreed on by the conferees facilitating transfer of surplus and emergency gas to the interstate market is a good thing. And the motion, it seems to me, would also require the conferees to finish action on the utility and conservation portions of the energy plan which have been held hostage to the gas bill and, as I see it, these provisions would do the following:

No. 1, under adequate safeguards they would provide the President with the authority needed to cope with emergency conditions by allocations and temporary sales, as he did successfuly after the passage of the Emergency Natural Gas Act of 1977. Such authority, as the Senator already knows, has now expired.

No. 2, it would allow interstate consumers to take advantage of surpluses in the producing States under conditions that will prevent "brokering" of gas by intrastate pipelines.

If you add these factors together with the coal conversion bill, these actions would provide an energy bill that addresses our energy problems without loading excessive costs on consumers or excessive regulations on producers. It would be a national and not an emotional response to the need for action and it will not worsen our situation simply to satisfy a demand for cosmetic change.

I simply say this, that in a Scripps-Howard national editorial which was entitled "If the Gas Bill Dies," its final conclusion was as follows:

> Here is a time when doing almost nothing is better than great showboating actions to make the public think "Government is rising to the energy crisis."

Those are reasons why I feel that the motion to recommit is a good motion.

But to go further, we think that this compromise will not produce more gas than the present situation or status quo and that the regulatory complexities imposed on the intrastate market will reduce producer incentives. In addition, interstate customers will have to pay higher prices without assured new supplies, and the incremental pricing provisions will damage many industrial areas dependent on interstate sources of gas.

Those are reasons why I feel, at least at the present time, and I am still studying it and giving it every consideration that I can, at the request of a number of my colleagues and Senators here in the Chamber these are some of the reasons why I tend to support and probably will support the recommittal motion, and I think it is a wise motion.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. MELCHER. I follow the position of the Senator from Utah, and I know it is presented very forthrightly and with no shades of manipulation, but just laying it out foursquare what he feels should be done and what he feels can be done.

But we, however, have to recognize, first of all, that the House of Representatives would not likely agree to a conference, but let us assume they do.

Mr. HATCH. I think they would. If they do not, then I think the conclusion of the Scripps-Howard newspaper is probably a good conclusion.

Mr. MELCHER. Let us assume that they do and that the House of Representatives and the Senate conferees agree on a bill with just the two provisions in it that the Senator has mentioned, which are not under any debate, either in the House of Representatives or the Senate. Both of those provisions are accepted. But, however, we would be giving up the provisions that rolls in the price at the wellhead and the transportation cost of the gas, which is particularly important if the Alaska natural gas pipeline is ever going to be built.

The owners of that company have told us that without this bill they are not in a position to go in the bonding market and sell bonds. They would have to wait until Congress acted at some subsequent time, adopting such provisions, so that they would be able to go to the market and sell the bonds and then at some later date, after being financed, start the construction work on that natural gas pipeline.

We would also have to give up this repeal of section 4 of the Natural Gas

Act and keep it in perpetuity until such time as Congress acted again and repealed section 4 of the Natural Gas Act, and we would still be saddled with the almost insurmountable task of 30,000 cases under section 4 which have nothing to do with pricing but with the nonpricing regulations called for under the Natural Gas Act.

And it is implied by the Senator from Utah and by the editorial he quoted that at a future time Congress could enact a bill deregulating natural gas, and we would forego these limited steps and these very admittedly hesitant steps of getting to deregulation of natural gas by 1985 and 1987. We would forego all that on the strength that Congress would wisely and promptly act, which is presumed by him to be shortly after the new Congress convenes in 1979.

I ask my friend from Utah how Senators and House Members in Congress in 1979, with the attitude he has on gas deregulation, and which I share, how we are going to pass that in 1979 when most of the advocates for recommittal are those advocates who do not want any deregulation? They do not want it. Are they going to change? Has the Senator from Utah any assurance that the votes are there, that the support is there, in 1979 to get the gas deregulation on the basis of Pearson-Bentsen?

(Mr. SARBANES assumed the chair.)

Mr. HATCH. I appreciate the sincerity of the Senator from Montana. All I can point out to him is has the Senator from Montana any proof or can he assure me we are going to have deregulation by 1985 even if we pass this monstrosity?

Mr. MELCHER. I have no proof, but I feel we would be most likely to have it in 1987. Remember there are two cases: Part of it is 1985 and the rest of it is 1987. I tell the Senator the part that concerns me the most and our independents the most is in 1987.

Mr. HATCH. I appreciate the vociferous arguments of the Senator from Montana. But it seems to me he is arguing that the Alaska natural gas will not be produced unless this bill is adopted in all of its portions.

Here again it seems to me that the supporters of the bill appear to be counting on short memories in this body because less than 2 years ago this body adopted legislation specifically designed to facilitate the construction of the Alaskan natural gas pipeline. Pursuant to that legislation the President of the United States made a decision as to the pipeline route, the conditions for building and the procedure for insuring that the pipeline was constructed, and, if I might just finish this, pursuant to previous legislation this Congress ratified the President's decision which we had been assured would make the gas available in a timely and economical manner.

Mr. MELCHER. That is all a bunch of hogwash.

Mr. HATCH. If I can just finish, we are told the situation is such that the pipeline will not be built unless what many in this body feel is extraneous legislation is passed.

I believe, Mr. President, if this argument were true it would speak very poorly for the original decision of the President and for the decision of Congress in ratifying that decision.

On the contrary, I believe that this is essentially an argument concocted at the last minute as an ace in the hole. If there were particular deficiencies in the previous decision by the President which required correcting that can be done by specific amendment to the Alaskan Gas Transportation Act or by specific legislation.

So although I sympathize with the Senator from Montana and feel very strongly about the Alaskan natural gas pipeline, as he does, I am not so sure his arguments are entitled to at least the great weight he feels they are and they should be.

Mr. MELCHER. May I enlighten the Senator? I will go back into the history of the legislation. I was intimately involved with the legislation.

The Alaskan Pipeline Act—and that was to produce or transport the oil that could be produced up in Prudhoe Bay by the bill I managed on the House floor and managed in the conference—set the way, it gave the provisions, for the permits for the construction of that pipeline to go forward without interference by more court cases, and the pipeline was subsequently built under conditions set under that act, which were rather stringent.

But all the time that it was being built, we were well aware of the fact that you could only produce the oil out of those wells in Prudhoe Bay by reinjecting the gas as it came out, and that after a number of years—and it is indefinite, but let us say 3, 4, or 5 years—the injection of that gas as it comes out with the oil, the injection back into the well, increasingly becomes more costly, and eventually it builds up a pressure of a nature so that the gas must be taken off.

Knowing that, we attempted to expedite the clearance of the Alaskan natural gas pipeline. We had the oil pipeline under construction, almost completed at that time, almost ready to start pumping, and we passed not really timely but not altogether too late the next step to set the stage for the construction of the natural gas pipeline.

But Congress followed the same pattern as it did with the oil pipeline in Alaska. It was private industry financing, first of all, for the construction of the lines and then the building of the lines. It cost a lot of money. Money was available for the oil pipeline.

The question of the natural gas pipeline, which must be built promptly or else we are going to have a very difficult position up there for the producers of Prudhoe Bay as to what to do with the gas when they finally find it too costly to reinject it and much too costly to build storage facilities there, why, they are going to have to shut down their wells pumping oil.

The people who are going to build the natural gas pipeline under the terms of the act and under all precedents in this country of a huge pipeline in interstate commerce—the pipeline which is going to be built under all precedents concerning natural gas pipelines in this country of a great size—this pipeline is going to be built by private industry.

In order to do that they have to be able to finance it. The contractors or the company that has been designated with the preferred route, the preferred company to build it, by the act to which the Senator from Utah has referred, is not going to go through Government funds. It has to approach the private money market, and it has to be able to be in a position to sell the bonds, and they have informed me, as I am sure they have at least attempted to inform the Senator from Utah, that without the provisions in this bill that will allow for the pricing at the wellhead and the transportation costs to be rolled into the eventual costs to the consumers, that there is no way in which they can go to the money market and sells bonds, and until they can do that there will not be 1 foot of right-of-way, easements, purchased or dealt with in Canada or any private land in Alaska or the lower 48. There will not be any bonds solds, there will not be anything done.

Unless this bill is passed this year they cannot get into the money market next year with their proposition or unless there is some assurance that Congress will act at some time next year, they cannot get into the money market next in late 1979. Until you have the money in the pipeline game, you do not do anything, as in most businesses.

Mr. HATCH. I appreciate the Senator's point. However, I disagree with him. I think the other ratification of the President's decision does take care it. But let us assume it does not.

Mr. MELCHER. It does not.

Mr. HATCH. Let us assume it does not.

Mr. MELCHER. It does not have anything to do with it, as a matter of fact.

Mr. HATCH. If it does not, then I would suggest there is a very simple way of solving that problem on the motion to recommit where all that the distinguished Senator from Montana has to do is to add his concern by way of amendment to the motion to recommit as an instruction, and they will bring the bill back with the Senator's concern contained in it.

I believe the other ratification by Congress does solve the problem. But assuming I am wrong—which I think is not the case—then the Senator should make it one of the instructions on the motion to recommit, assuming that it is agreed to. If that is so, we can solve the problem that way.

Mr. MELCHER. I can assure the Senator that at the time we acted on the Alaska natural gas pipeline, it was assumed that the wellhead price for the gas and some type of rolled-in pricing would be passed by Congress, and that is the very guts of the Natural Gas Act; and that is why we are now here at this point.

Mr. HATCH. Let me say I believe you could take your language right out of the other bill, adopt it in your instructions, and it would come back and solve your problem.

Mr. MELCHER. I believe that would be naive in this case, because I do not believe about half of the people who are going to vote for recommittal will vote for a blanket authority, that a wellhead pricing of the gas and a rolled-in pricing for transportation costs along with

that wellhead price will not be acceptable. That is what they object to; they do not believe like you and I do. They are against deregulation.

Mr. HATCH. I believe the conferees on both sides will agree. I do not think it is as big a problem as the Senator from Montana thinks. I think it is a red herring that is being flashed here, to put the remainder of these awful provisions on the American people.

I think there are close sides to this question; I am trying to keep my mind open, to be informed by the best prevailing side.

Mr. MELCHER. Well, the Senator should know that those who are interested in deregulation and who signed the conference report only agreed to this provision because they could get the rest of it, the rest of this hodge-podge of stuff which I do not advocate and the Senator from Utah does not advocate.

Mr. HATCH. That is true.

Mr. MELCHER. But it is the only game in town; and if we kill this bill we do not have any. If the Senator from Utah can really believe that promptly in 1979 the House, the Senate, and the new Congress will deregulate natural gas, there would be some merit to his argument and he might even have me on board, but I do not think it is going to happen, because I believe we will have the same argument in the new Congress made by many of the same people who never wanted deregulation.

Mr. FORD. Mr. President, will the Senator yield for a question?

Mr. HATCH. I yield.

Mr. FORD. Does the Senator from Utah know what the motion is going to be, or whatever, that we take a vote on to recommit the bill?

Mr. HATCH. I have recited earlier much of what I thought the motion was going to contain.

Mr. FORD. You did? Well, what bothers me is that the Senator from Ohio said around noon today that he would allow Senators to see the motion at his pleasure. So if the Senator from Utah has a copy of the motion to recommit that will be made, the junior Senator from Kentucky would love to see it. If you have the privilege to do that, I would be delighted to get a copy of it. Will you let me have it? Will you let me have a copy of it?

Mr. HATCH. I have a draft copy of it, but I must say——

Mr. FORD. You have a "Dear Colleague" letter, I guess.

Mr. HATCH. Well, I have the "Dear Colleague" letter.

Mr. FORD. If you are going to vote on the base of the "Dear Colleague" letter, that does not necessarily mean——

Mr. HATCH. I will give you the provisions of the conference report that I think will be requested to be recommitted.

Mr. FORD. Well, if you start taking paragraphs out of some provisions, and little pieces out of the bill, and that sort of thing, I suspect we will get everybody a little bit confused.

What I would like to have is a copy of the motion that will be made for recommittal.

Mr. HATCH. I do not have a copy of that.

Mr. ABOUREZK. Will the Senator yield briefly on that?

Mr. HATCH. I yield.

Mr. ABOUREZK. When we are ready to make the motion, we will be very happy to provide it to the Senator.

Mr. FORD. That is fine; everybody is talking about what they are going to do about recommittal, but nobody will say what they are going to do.

Mr. ABOUREZK. You think you might vote for it if I show it to you earlier?

Mr. FORD. You have a better chance of getting my vote if you let me see it earlier than if I do not have a chance to see it, if I do not know what it contains.

Mr. ABOUREZK. Is that the same philosophy you used on the conference report?

Mr. FORD. No, I studied it very well; and I was at more of the meetings than you were, Senator. And by the way, you were not disinvited.

Mr. ABOUREZK. I just was not told they were being held.

Mr. FORD. Well, you were not very anxious to be at any of the hearings. I remember when you were voting proxies and other people were voting proxies, and they had to turn around and unvote the proxies because they were voted wrong, the Senator from Ohio.

So all of these things about the conference committee are not necessarily what you say, or the paper says. If you look at the votes cast by proxy, or one of them, and then later in that same conference, after the Senator left, they had to change the votes, because they had voted by proxy and voted wrong.

Mr. HATCH. Let me state what I think will be in the motion.

Mr. FORD. You are stating the things that will be in the motion?

Mr. HATCH. I think this will be the motion. I believe it will read as follows:

Mr. President, I move that the conference report on H.R. 5289, the Natural Gas Policy Act of 1978, be recommitted to the committee of conference with instructions that it be reported back with all references to the pricing of natural gas deleted therefrom, and that it embody the language contained in Titles III, IV, and VI of the conference report with such conflicting language and/or definitions deleted. The conferees are specifically instructed to report back with the following sections excluded—

Then there is a list of sections.

Mr. FORD. Will the Senator from South Dakota say, on the floor, for the record, that he agrees this is the language that will be in the recommittal motion?

Mr. ABOUREZK. I do not think it has been put in final form yet. That will be the bulk of it, but there might be more——

Mr. FORD. Or less?

Mr. ABOUREZK. More provisions.

Mr. FORD. Or less?

Mr. ABOUREZK. There could be less, yes.

Mr. FORD. But you think if you put in a couple more, you might get another vote, or a couple less you might get another vote?

Mr. ABOUREZK. We do not have any breeder reactors to promise.

Mr. FORD. How about a few blacktop roads?

Mr. ABOUREZK. We will consider that, too. Whatever you have to offer.

Mr. FORD. I do not have anything to offer. I thought you were offering.

Mr. ABOUREZK. All we can offer is another provision in that recommittal motion.

Mr. McCLURE. Mr. President, will the Senator from Utah yield?

Mr. HATCH. I am delighted to yield.

Mr. McCLURE. First of all, I think we ought to get back to the discussion earlier about the fact that the Senate had already acted with regard to the Alaska pipeline bill.

Mr. HATCH. I would be more than happy to listen to the distinguished Senator from Idaho on that point.

Mr. McCLURE. I think it quite possible that the Senate might vote for the Alaska gas pipeline provisions. Remember that the latest action the Senate has taken with respect to gas pricing is that the incremental pricing provisions shall apply. That was the last vote of the Senate on the subject to Alaskan gas as well, and if you listened carefully to our friend from South Dakota arguing earlier, that is one of the reasons he does not like this bill.

Mr. HATCH. It literally exempted the Alaska gas pipeline from the exemptions of the bill, which it imposes on every other producer.

Mr. McCLURE. That is correct.

Mr. HATCH. What is the reason for that? If this bill is so good, why would it not be imposed on everything?

Mr. McCLURE. Simply because if you analyze the Alaska gas pipeline, to be built it has to have provisions which will enable it to be financed.

Mr. ABOUREZK. Will the Senator yield on that point briefly?

Mr. McCLURE. Just a moment, if you will.

Mr. HATCH. Let the Senator from Idaho finish.

Mr. McCLURE. The conferees and those who are working on this matter in the Energy Committee have come to a pretty unanimous agreement, not totally but nearly so, that there is no likelihood that the Alaska pipeline can be built if it requires incremental pricing; that the only way it can be financed is by getting contracts from producer and consumer that assume a rolled-in pricing provision; and without that rolled-in pricing provision there is no likelihood that they can get it constructed, and hence no likelihood that they can get the financing; so that, if it has an incremental pricing provision; it simply will not be built.

In fact, the conferees, looking at that, say there is no way you can get the Alaska pipeline built under the incremental pricing provisions. The Senator from Utah has said we can get that Alaska pipeline built without the incremental pricing provisions.

The Senator from South Dakota says there is no way to get it without incremental pricing. Therefore, it casts the entire issue in doubt.

Mr. FORD. Will the Senator let me add, I suspect that the reason they are

waiting now to allow us to know what their recommittal motion might be is that they might even try to stick on the Alaskan pipeline now. That would be part of their package.

Let me ask the Senator——

Mr. HATCH. Mr. President, I believe I have the floor.

Mr. McCLURE. Would the Senator not agree that under the language he submitted that the effect would be to leave the Alaskan pipeline in there subject to the incremental pipeline provision?

Mr. HATCH. The recommittal motion I have submitted has no incremental pricing.

Mr. McCLURE. The incremental pricing is stricken in the bill or is that in the provisions which remain after striking the language?

Does the Senator from South Dakota agree? I see the Senator from Ohio has joined us. Do the Senator from South Dakota and the Senator from Ohio agree that the motion to recommit will strike the incremental pricing provision from this bill?

Mr. ABOUREZK. It depends on what is in the motion to recommit.

Mr. MELCHER. It will not have the Alaskan pipeline provision in it at all.

Mr. ABOUREZK. Does the Senator have a copy of the motion?

Mr. MELCHER. No, but I know the sentiments of the Senators from South Dakota and Ohio, and numerous people opposed to deregulation are opposed to that, because that is the very guts of the Natural Gas Act which they want to have stay in effect.

Mr. ABOUREZK. Would the Senator like to lay a little money on that?

Mr. MELCHER. Yes, I would like to lay a little bit on that.

Mr. McCLURE. What kind of a deal is the Senator offering?

The PRESIDING OFFICER. The Senator from Utah has the floor and is the Senator to whom requests to yield should be addressed.

Mr. MELCHER. Will the Senator yield so that we can complete our betting?

Mr. FORD. Will the Senator from Utah give me just a few moments to ask him, the Senator from Ohio, or the Senator from South Dakota, a question?

Mr. HATCH. I would be glad to yield.

Mr. FORD. I have a copy of a letter setting out the recommittal and the first two signatures are Senator HOWARD M. METZENBAUM and Senator CLIFF P. HANSEN, and then others. The first subparagraph under the first paragraph on the last page says:

> Under adequate safeguards provide the President with the authority needed to cope with emergency conditions for allocating and temporary sales as he did successfully after the passage of the Emergency Natural Gas Act of 1977. Such authority has now expired.

Are you saying here that you are just going to allow emergency allocation of the interstate? For example, will the motion allow allocation of intrastate gas from boiler fuel users? Section 303 of the conference report does allow for such allocations. The letter about the recommital motion implies that it will not allow such allocation. Where are we?

Mr. HATCH. It is the very same as in the original draft, as I understand it.

Mr. FORD. The Senator will have allocation of inter and intrastate gas both by the President? Does Senator HANSEN know that?

Mr. HATCH. As far as I know.

I am not going to make the motion.

Mr. FORD. You are going to support something they have probably——

Mr. HATCH. I am going to do all that I can, realizing that any Senator can amend, any Senator can change it, and any group of people can get together. The Senator asks what I know about it today and that is the best I have.

Mr. METZENBAUM. Will the Senator from Utah yield?

Mr. HATCH. I yield.

Mr. METZENBAUM. I think the Senator from Kentucky was adequately answered this morning and that in due time he will be apprised if that is to be included in a motion to recommit. Nothing much has changed in the last several hours.

Mr. FORD. If he is discussing me, can I have him back?

Mr. HATCH. Yes.

Mr. FORD. The Senator from Utah was defending your position.

Mr. METZENBAUM. And very ably.

Mr. FORD. He indicated he was going to vote for recommital. He was trying to explain what was in the motion for recommital. Then the Senator from South Dakota was trying to say what might or might not be in it. Now he is even thinking about adding the Alaskan pipeline as part of the direction to come back for recommital. All I ask him was would there be allocation of intrastate gas. I was asking if there would be something in the motion that would allocate intrastate gas.

Mr. METZENBAUM. Does the Senator from Kentucky suggest that that would be there?

Mr. FORD. Section 303 of the conference report does allow for such allocation.

Mr. METZENBAUM. Under that condition?

Mr. FORD. When there is an emergency and the President orders boiler fuel users to stop burning natural gas.

Mr. METZENBAUM. Is it not a fact that there is nothing in the bill that permits the allocation of intrastate gas into the interstate market which was the sine qua non, that about which there was nothing according to a number of members of the Senate Energy Committee, and that is not in the bill and the President said that was a necessary condition?

Mr. FORD. Under emergency conditions it is in the bill, Senator. It is in the bill.

Mr. METZENBAUM. That portion that will be in for the limited period you are talking about will be in the motion to recommit.

Mr. FORD. Oh, you are going to take intrastate gas and put it in the interstate pipeline? That is a fact?

Mr. METZENBAUM. Yes.

Mr. FORD. Is Senator HANSEN for that?

Mr. METZENBAUM. We have said that we are going to be agreeable to taking intrastate gas and moving it on an interstate basis or through an interstate pipeline without it becoming subject to FERC regulations. We have said that consistently.

Mr. FORD. I do not see how you are going to get agreement among yourselves.

Mr. METZENBAUM. We only have the same provision that is in the conference committee report at the moment.

Mr. FORD. That is not what the letter says that you signed. It is right there, bare cut. You ought to read it yourself.

Mr. METZENBAUM. I am looking forward to that.

Mr. MELCHER. Will the Senator yield?

Mr. HATCH. I yield.

Mr. MELCHER. Is it not obvious that the group that is going to back the motion to recommit is never going to come to an agreement on what they want to vote on the provisions for recommittal, the instructions they want to tie in? How could the Americans for Democratic Action and the National Farm Bureau ever agree on natural gas? Yet those are the proponents for a motion to recommit.

Mr. METZENBAUM. We also have the American Conservative Union. Do not leave them out.

Mr. MELCHER. They are there, and the Senators who are going to vote for recommital are there, because they have different ideologies. They are that far apart, and they are never going to come together.

If the motion to recommit would prevail, there is never going to be a bill, because there will never be agreement among all those people. I do not believe that the group that wants the recommittal motion—there, there, others—is ever even going to agree on what they want as instructions in the motion to recommit, if we stayed here until Christmas or on into the next year. We might as well get on to the motion to recommit, in whatever form it is going to be, and vote it down.

Mr. HATCH. I do not think that the Americans for Democratic Action and the Americans for a Conservative Union really will make the decision. I think it will have to be the compromise made by the Senators here. I have to admit it will take——

Mr. MELCHER. There is plenty of evidence to show there is no compromise.

Mr. HATCH. It will take plenty of prayers to get it done.

Mr. McCLURE. Is the Senator from Utah implying that there have been secret meetings for a new compromise?

Mr. HATCH. I would say only that the Senator from Idaho and some of the folks opposing this motion would know.

Mr. McCLURE. I do not know whether you have been having secret meetings or Senators ABOUREZK and METZENBAUM have been having secret meetings about whether to recommit.

Mr. METZENBAUM. The Senator from Idaho would have more information than we both as to secret meetings with the President of the United States and the conferees.

Mr. McCLURE. I have not been invited to those meetings.

Mr. METZENBAUM. We have not been invited to the meetings having to do with the breeder reactor. We do not hold secret meetings. We have our meetings in the sunshine.

Mr. HATCH. I point out that——

Mr. McCLURE. The Senator will not even tell us what is in the proposed motion to recommit and he talks about not——

The PRESIDING OFFICER. The Senate will be in order.

In response to the query by the Senator from Utah as to who has the floor, the Chair informs the Senators that the Senator from Utah was earlier recognized and continues to hold the floor.

Mr. McCLURE. Will the Senator from Utah yield?

Mr. HATCH. I shall be happy to yield to the Senator from Idaho, but I say this: If there have been secret meetings, I do not think they have been on the side of those who are against this bill. Knowing and trusting and believing in the Senator from Idaho as I do in this matter, even though we are on the other side at the present time, I should hope that he did get the commitment from the President that I believe he got, and that certainly was not done in a public meeting.

Mr. McCLURE. Will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. McCLURE. I keep hearing this talk about what is going to be in the motion to recommit. I can only assume that somebody has been talking about what is going to be in the motion to recommit. I know I have not. We have been trying to find out. The Senator from Ohio says that, by and by, we will learn. The Senator from Utah has tried to outline what he expects. All I can assume is that there have been some conversations somewhere. I do not care how you tag it, that is a secret meeting in my book.

I only raise that question, I say to my good friend from Utah, because a number of other people have been critical of the means by which the conferees arrived at an agreement.

Mr. HATCH. I appreciate that from the Senator from Idaho.

Mr. McCLURE. If the Senator will yield further, I only want to stress this, because I think the Senator from Utah does not approve of or voted against the DeConcini amendment with regard to pricing.

Mr. HATCH. The Senator is correct.

Mr. McCLURE. I know my friends from South Dakota and Ohio are in favor of it. The motion to recommit is going to deal with that question one way or another: either we are going to have an incremental pricing provision or we are not. From what the Senator said, the incremental pricing provision remains in the bill.

Mr. HATCH. That is right, but it is a total, far cry from what the DeConcini amendment is.

Mr. McCLURE. Am I correct in assuming, then, that the Senator from Utah understands that the others who are opposed to the compromise, for opposite reasons, are going to accept the incremental pricing provision——

Mr. HATCH. I cannot speak for other Senators, who are either on the floor of the Senate or who belong to the Senate, but I believe a compromise can be brought about on the motion to recommit. I shall be surprised if it is not, but anything is possible in this august body, especially when we have, if they are advocates of the ADA and the ACLU, then I suspect that would be the situation.

I think the Senator from Idaho is familiar with the situation.

I yield to the Senator from South Dakota.

Mr. ABOUREZK. I want to clarify something, if I might, as long as the Senator from Idaho is here.

The Senator from Idaho, I think very openly and very honestly, released a letter which purported to describe in detail an agreement made between him and the President regarding the nuclear breeder reactor. Subsequently, the White House, the President and the Secretary of Energy, denied ever having seen him. They did not even know who he was.

Mr. McCLURE. Would the Senator yield on that point?

Mr. HATCH. Yes.

Mr. McCLURE. May I correct that statement?

Mr. ABOUREZK. I just want to clarify what the agreement was.

Mr. McCLURE. The President and the Secretary of Energy have consistently said, yes, there was an agreement; yes, we do have an understanding; yes, those are the figures; yes, that is the proposed program on the breeder reactor program. So there has been no denial.

Mr. ABOUREZK. That is what I have been reading, that there is a denial.

Mr. McCLURE. Maybe I do not read the same things the Senator reads.

Mr. ABOUREZK. Would the Senator describe what the agreement was so it will be on the record?

Mr. McCLURE. I shall be glad to bring it in for the record and put in the RECORD. I do not think it is fruitful for discussion right now. It has nothing to do with the natural gas bill.

Mr. ABOUREZK. Was the agreement in return for his signature on the conference report?

Mr. McCLURE. It was not. I have said that repeatedly and the President has said that repeatedly.

Mr. ABOUREZK. Just out of the blue, then, they decided to put a breeder reactor in Idaho?

Mr. McCLURE. No, if the Senator will yield further, this was not out of the blue. As the Senator knows, this has been under discussion, under debate, within the Energy Committee for months. It has been an ongoing discussion and perhaps grew out of the same concern for the statement of energy policy and the position of various people in this country, an understanding by people outside of this country of what this country has as a matter of basic energy policy: Is there a natural gas bill? Is there an energy bill? Is there a breeder reactor program? Is there a nuclear program? It grew out of that discussion.

Certainly, I know the Senator was not there when we were discussing the so-called Jackson-Church-Johnston compromise. I think the Senator did vote on that in the Energy Commission. I know that the Senator was there at least during a portion of the debates on the Melcher amendment that was offered in the Energy Committee on the nuclear program, on the Department of Energy authorization. I know that the Senator knows that this has been going on for weeks, and it should not be surprising that the Senator from Idaho has feelings about it. I have expressed them openly in the committee and elsewhere. It is a matter that I have been discussing with them for a long, long while.

Mr. ABOUREZK. I understand that. What is not clear to me yet is why, since the administration had vehemently opposed the breeder reactor program for months and months—in fact, I was one of those who was asked by the administration to oppose it in the Energy Commitee, which I did. They did not even have to ask me; I would have done it anyway.

Mr. McCLURE. I am glad to know that the Senator——

Mr. ABOUREZK. If the Senator knows—though he may not know—I wish he would tell me: Why would they suddenly, just when they need his signature on the conference report, reverse themselves and come out in favor of the breeder reactor?

Mr. McCLURE. Will the Senator yield further so I may respond?

Mr. HATCH. I shall yield for one more comment. Then I should like to continue.

Mr. McCLURE. Let me say to the Senator from South Dakota I know that, from his wealth of experience and his deep cynicism about the political processes, he must make an assumption concerning agreements that come about.

Mr. ABOUREZK. All I know is what I read in the papers.

Mr. McCLURE. No, the question is perhaps better addressed to the administration than it is to me. I do not know what motivated them. I cannot tell exactly how. They did not consult me earlier in regard to the program. But I have consulted with them concerning it. They did not ask me to oppose it as, apparently, they did my colleague. I am glad to know my colleague is so close to the White House. I have not been that close to them on the nuclear programs. But I have been discussing with them, and they have not asked for my help on the nuclear program, but we did discuss what ought to be in the nuclear program. That eventually evolved to the point of an understanding as to what should be in the nuclear program.

The Senator from Idaho did not make any extortionate demands on them, that they agree or else, but I have seen the opponents of the breeder reactor program make extortionate demands: You go back on that or we oppose your natural gas bill. The linkage that was established was certainly not established by the Senator from Idaho. It has been established by those who are opposed to the breeder reactor program, a program which I happen to favor.

I hope that we shall be able to—if the Senator is at all interested, I shall send him a copy of my letter to the President and the press release so he may have full information. It has been in the public domain for weeks.

Mr. ABOUREZK. I would appreciate that. I would like to read it.

Mr. McCLURE. Perhaps the Senator has not read those.

Mr. ABOUREZK. I am grateful to the Senator for clarifying that matter, because as he said, in my mind, it seemed to me a quid pro quo. I am glad to hear him deny it here, although I understand that he cannot deny it on behalf of the administration.

Mr. McCLURE. If the Senator will yield further, I cannot speak for the administration, except that I know what they have said publicly and privately with respect to the question, was there a trade? There was not. There was a mutual coming to agreement upon two things that needed compromise.

The Senator has suggested that this is a reversal of administration program or policy position on the breeder program. The President has repeatedly denied that that is true, just as he denied that there was any change in his position with respect to deregulation of natural gas. I leave it to my friend from South Dakota to judge both positions, because I am sure he will do so regardless of what I say.

Mr. ABOUREZK. In other words, there is as much integrity in that breeder reactor position as there was in his position on natural gas.

Mr. McCLURE. I happen to approve of the position he has taken on natural gas, not because it is all that I would want, and I happen to approve of the agreement that the President has made with me on the breeder reactor program, not because it is all that I would want. I would like to see the Clinch River breeder reactor built now. I would like to see the commitment to go ahead with it now. But the nature of compromise between conflicting views says let us find an acceptable middle ground which we can occupy and move both programs forward.

Mr. ABOUREZK. The Senator said there was a compromise reached in two areas. One was the breeder reactor. What was the other?

Mr. McCLURE. The natural gas bill is a compromise between conflicting views.

Mr. MELCHER. Since the Senator from Idaho——

Mr. ABOUREZK. But was that the compromise discussed?

Mr. McCLURE. Excuse me?

Mr. ABOUREZK. Was that the compromise the Senator discussed?

Mr. McCLURE. We have discussed both those issues, among others involved in the energy program, just as the Senator from South Dakota and the Senator from Idaho have discussed it.

Mr. MELCHER. Since the Senator from Idaho has used my name in terms of the——

Mr. ABOUREZK. May I ask another question?

Mr. HATCH. I am happy to yield and then I would like——

Mr. ABOUREZK. I am curious if the discussion came up at the same meeting.

Mr. McCLURE. I would say that discussions of both matters have gone over a long period of time. There have been meetings in which both have been discussed, as other issues were discussed.

The junior Republican Senator from Idaho does not get to the White House as often as some other people on the other side of the aisle, and I have to use that opportunity, when there, to discuss whatever I have on my mind. I might not get back inside. So I am very happy to discuss whatever I have of concern to me when there.

Mr. ABOUREZK. I can give the Senator a formula for not getting back inside.

Mr. HATCH. I think the distinguished Senator from South Dakota knows a great deal about that and I would tend to believe that formula.

If I could, I would like to yield to the distinguished Senator from Texas.

Mr. MELCHER. Will the distinguished Senator from Texas yield me 30 seconds?

Mr. TOWER. I am delighted to.

Mr. MELCHER. I thank the Senator.

Since the Senator from Idaho mentioned a Melcher amendment in terms of the Clinch River breeder reactor, let me state that that is an amendment that was adopted in committee. Since the energy authorization bill is before us in the Senate, it will be in the bill and the Senate will have the opportunity to either approve it or reject it, or have a third alternative on modifying it.

It will be the pertinent provision dealing with whether or not the Senate and the House want to give the authority to the President to, first of all, cancel out the Clinch River breeder reactor, and second, to go on from that point with just the opportunity to engage in more experimentation, more research work, to determine whether a suitable method of using nonproliferating nuclear material in a breeder program would be practical, and report back to Congress on their recommendation, one way or the other, in 1981, and then Congress to decide at that point whether Congress wants to authorize further work on such a plan.

It is what the committee accepted. All the talk about what kind of an arrangement the President might agree to, if the House and Senate passed those provisions, that is all the opportunity the President and the executive branch will have.

Mr. McCLURE. Will the Senator from Texas yield just a moment so that I might respond?

The PRESIDING OFFICER. Does the Senator from Texas seek recognition?

The Chair recognizes the Senator from Texas.

Mr. TOWER. I yield 1 minute to my distinguished friend from Idaho.

Mr. McCLURE. I thank the Senator.

Let me just indicate that the chairman of the Energy Committee (Mr. JACKSON), Senator CHURCH and Senator JOHNSON, had offered a compromise that would allow the President to cancel the Clinch River breeder reactor program in return for certain base program improvements. That amendment was killed, that offer in the committee was killed on a tie vote of 9 to 9.

The Senator from Montana offered the amendment which he has now described, which also failed, with the junior Senator from Idaho abstaining.

I then changed my vote to vote in favor of it, not because I approved the agreement, but because it was necessary to get off dead center and get it to the floor.

The Clinch River breeder reactor is the core of a controversy. I would hope when we get to the floor of the Senate with the DOE authorization bill we will be able to debate in full what the breeder reactor program ought to be.

I would just remind my friends who may be concerned about what is in the agreement and the proposed compromise the President and I have agreed upon, it is a halfway point between the DOE authorization bill as reported by the Senate committee and the Appropriations Committee action dealing with the same provisions, the Appropriations Committee having agreed to spend more money on the breeder reactor program than on the liquid metal fast breeder reactor program than I have agreed to with the President in exchange with an assurance in 1980 and 1981, and the Presidential support, or at least agreement, not to veto or oppose those actions.

That is all set forth in a great deal of detail which has been released to the press and the public.

Mr. President, I thank the Senator from Texas for permitting me to make that explanation.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. Mr. President, it is my firm conviction that this natural gas conference report does not deserve the approval of the Senate. At best, its enactment would do little, if anything, to increase our domestic supply of natural gas or to reduce foreign oil imports. More likely, its approval would tend to aggravate rather than solve this Nation's domestic crude oil and natural gas supply problems. Certainly its approval can have no significant or lasting effect on the strength of the dollar in foreign exchange markets.

As a proponent of legislation to deregulate new natural gas, I believe that enactment of this gas pricing compromise can be justified only if it will substantially contribute to achievement of the goal of unregulated, market-determined gas pricing at an early date. I must conclude that this bill is not designed to achieve that goal. In fact this bill, rather than moving toward less regulation, actually provides for a dramatic increase in the scope of Federal regulation.

For the Nation's natural gas producers, its enactment would mean a staggeringly complex new regulatory scheme which would reduce price certainty and significantly increase the regulatory cost of exploring for and producing gas. This additional regulatory burden will be especially heavy for the Nation's smaller gas producers, including most of the independents, and it is the independents who find most of the natural gas reserves in the United States and who drill most of the producing gas wells.

Not only does this bill expand the scope and complexity of Federal regulation of the interstate market, but it extends this regulation to the now unregulated market for natural gas produced and consumed in the same State. Many independent gas producers have chosen to operate in the intrastate markets not only because of the price incentives available there, but also because of the absence of costly Federal regulation. Extensive regulation imposes costs on the regulator and regulated alike, and the bill will increase the cost of regulation substantially.

Enactment of this bill will impose on the Federal Energy Regulatory Commission—the regulator—an almost impossible task of administration and enforcement. "Virtually impossible * * * to enforce" is how the FERC Director of Enforcement described it, and the provisions which led to that conclusion remain essentially intact despite changes subsequently made in the bill.

Even now, FERC has a backlog of approximately 10,000 pending wellhead pricing cases, and under current law the Commission regulates less than 60 percent of the gas produced. This bill mandates what is essentially a well-by-well evaluation to determine which of the numerous pricing categories applies to the gas produced from each individual well. With about 10,000 new gas wells drilled each year in the United States, it is apparent that this additional burden of regulation and review will only further increase the backlog and result in months and years of additional delays. Even if the bill is enforceable, as its proponents contend, FERC Chairman Charles Curtis has already conceded that the Commission will need significantly increased funding for a substantial number of new Federal regulators to do the job.

The States would suffer further encroachment of their authority and responsibility under the bill. With respect to wellhead pricing, not only does the bill initiate Federal control of intrastate gas, but Federal regulation would for the first time also be extended to cover natural gas owned by States and municipalities. In Texas and some other States, the volume of State-owned gas production is significant and the revenue derived from its sale helps to serve beneficial public purposes.

The prospect of all of this new Federal regulation leading to meaningful deregulation seems to me remote, at best. Despite what the bill and its proponents say about deregulation of some categories of natural gas in 1980, 1985, 1987, or 1989, it is my view that analysis of the bill in the context of our experience with oil price regulation leads inescapably to the conclusion that this is not a deregulation bill in any real sense of the word. The pricing mechanism established by this natural gas bill is strikingly similar to the oil pricing scheme created by the Energy Policy and Conservation Act of 1975. The EPCA was also a compromise measure and it too was promoted as a way to achieve gradual price decontrol. The curious idea behind that law and the current bill as well is that you extend the coverage of price controls now so that you can later remove them.

The EPCA extended then existing oil price controls to cover "new oil" which was then exempt. The law also provided for gradual increases in the ceiling prices and set June 1, 1979, as the date for completion of the phased removal of all controls on domestic crude oil.

However, that is not what has happened under the oil pricing law. Rather than gradually increase in real terms, oil prices have been frozen and even rolled back several times. Under the present administration, oil prices have not even been allowed to rise to the level permitted under the law. Further, if the repeated statements of the administration have any meaning, the clear prospect is that these oil price controls will be extended and continued indefinitely. I believe that a similar continuation of an expanded system of Federal price controls is precisely what can be expected to result from this compromise gas bill.

Even if one takes on faith this bill's promise of some ultimate price deregulation, I think it is apparent that the bill will significantly reduce incentives for natural gas exploration and production during the period in which controls remain in effect. Exploration and production incentives are determined not only by wellhead prices and the degree of price certainty, but also by consideration of regulatory cost. The regulatory costs imposed on producers by this bill would be substantial. Together with the price ceilings, these regulatory costs will have the effect of decreasing overall incentives to producers.

In the interstate gas market, this bill would result in little, if any, increases in wellhead price ceilings relative to those which would likely be applicable under new rates promulgated under existing law. The extension of price controls to the intrastate market will reduce wellhead price revenues substantially below those which producers could otherwise expect to receive in the absence of the bill. In both the interstate and intrastate gas markets, the added regulatory cost imposed by this bill would be substantial. Especially for those many independents now operating primarily in the intrastate markets, this bill will have a chilling effect on producer incentives.

For all of these reasons and others, Mr. President, it is quite clear to me that final approval of this natural gas conference report would not serve the national interest. It is apparent that the bill is designed not to add to overall supply but rather to shift shortages around in the short run by bleeding the intrastate markets. To adopt this bill to establish long-term pricing policy for natural gas is to perpetuate the current shortage of domestic gas and to opt for continued reliance on OPEC oil and import liquefied natural gas, at prices well in excess of those which are allowed our domestic energy producers.

This bill will not significantly increase the Nation's supply of natural gas, but it will lead to greatly increased Federal regulation. Its approval will contribute nothing to the solution of our domestic energy supply problems and it can in no meaningful way improve our domestic or international economic situation. I urge the Senate to reject this conference report and send it back to committee, with instruction. I believe that will provide Members of this body with a satisfactory alternative.

Mr. FORD. Mr. President, will the Senator from Texas yield for a question or two?

Mr. TOWER. I am delighted to yield.

Mr. FORD. Most of the Senator's comments—and I am about like the lamb charging the lion, trying to ask the Senator from Texas about oil——

Mr. TOWER. When somebody says that to me, I start looking behind me, to see what is gaining on me.

Mr. FORD. The Senator has referred to the bill primarily, and then right at the end——

Mr. TOWER. The Senator probably was going to say that he is just a country lawyer. Lyndon Johnson used to say, "When somebody says he is just a country lawyer, hold on to your pocketbook."

Mr. FORD. I say to the good Senator from Texas that I am not a lawyer.

Mr. TOWER. Neither am I, and I am tempted to say that I am delighted that there are at least two of us here who are not.

Right at the end of his fine statement, the Senator said that he hopes Senators will vote for recommital with instructions.

What are we going to vote on in that recommittal motion? Does the Senator know?

Mr. TOWER. It is my understanding that the motion that will be offered will be to recommit, with instructions to report a bill that, in effect, strips out the controversial gas pricing provisions, reports those provisions of the bill which are pretty generally acceptable to most Senators including provisions for extension of emergency allocation and temporary sales authority.

Mr. FORD. Is the Senator saying that he is going to support some legislation that would direct the President to go into intrastate gas out of the Senator's State into incremental pricing?

For example, will the motion allow elimination of intrastate gas from boiler fuel users?

Mr. TOWER. It is my understanding——

Mr. FORD. People do not really know what the recommittal is going to be, do they?

Mr. ABOUREZK. That is because it has not been filed.

Mr. TOWER. I am talking about my understanding of what is going to be filed. I am not going to blindly commit to any kind of instruction until I see it.

Mr. FORD. The Senator from Texas has not seen it yet, either?

Mr. TOWER. It is my understanding that this is generally what is agreed on by people who want to see this bill recommitted.

Mr. FORD. Is the Senator going to vote, for example, for a motion that would allow allocation of intrastate gas from boiler fuel users?

Mr. TOWER. I am not going to vote for extensive intrastate allocation authority that permits——

Mr. FORD. Oh, you are not.

Mr. TOWER. Wait a minute. I am not through [continuing] that permits some bureaucrat here in Washington to make a decision as to who needs our gas most.

Mr. FORD. Then, the Senator really is not in favor of the "Dear Colleague" provision is the recommittal proposal, and that carries very specific language, and the Senator signed it.

Does the Senator have a little trouble deciding what he signed?

Mr. TOWER. No, I have no difficulty at all. I am just trying to determine specifically what the Senator from Kentucky is referring to. It is my understanding that the Senator is referring to the Glenn amendment gas. Is that correct?

Mr. FORD. Yes, sir. Well, it is the authority to allocate the gas, and that is what the Senator refers to in section 303 of the bill.

Does the Senator want me to ask for a quorum call while he finds out what he signed?

Mr. TOWER. No. I know what I signed. I just do not have a copy of the letter here.

(Mr. PAUL G. HATFIELD assumed the chair.)

Mr. FORD. If the Senator wants an explanation of the provision I will be glad to give it to him. It is page 104 of the conference report, the first full paragraph.

Mr. TOWER. The Senator has a copy of the bill. The Senator has me at a disadvantage. He has a copy of the letter.

Mr. FORD. I thought that the Senator signed the letter that stated what——

Mr. TOWER. I signed the letter, but I do not have a copy of it in front of me.

Mr. FORD. Here is one here. I never sign a letter until I know what is in it.

Mr. TOWER. I know what is in it. I do not have details of the exact wording.

As I understand it, the Glenn amendment provision is in section 607, subparagraph 1. In order to assist in meeting natural gas requirements for high priority users of natural gas the President may by order allocate supplies of natural gas, the use of which has been prohibited by the President pursuant to authority under section 607 of the Public Utility Regulatory Policy Act of 1978 relating to the use of natural gas as a boiler fuel during any natural gas supply emergency.

This is an authority that does currently exist in the public utility rate bill.

Mr. FORD. That is right.

Mr. TOWER. Is that correct?

Mr. FORD. Interstate pipeline.

Mr. TOWER. That is right.

Mr. FORD. Interstate.

Mr. TOWER. This refers to authority the President already has in the public utility bill.

Mr. FORD. But the Senator refers in the letter to the provisions in the bill. The provisions in the bill allow the President to allocate intrastate gas. When the Senator refers to that provision in the bill I accept the point that he is taking that part out of the conference report and going to say in his motion of recommittal with instructions that that will be the part that he is giving the President which includes the authority to allocate intrastate as well as interstate gas supplies.

Mr. TOWER. The thing is if we would remove regulation altogether we would not need the allocation authority. We have already passed allocation authority. I do not necessarily agree with that.

Mr. FORD. I thought the emergency powers had expired.

Mr. TOWER. It has expired.

Mr. FORD. It has expired.

Mr. TOWER. To begin with, to be able to recommit this thing you have to make it as attractive to as many people as possible. For my part, I may not fully support every provision of this recommittal instruction, but legislation is after all the art of the possible.

Mr. ABOUREZK. A matter of preference.

Mr. TOWER. I would prefer to have those provisions rather than the extensive regulatory authority over intrastate gas which I think would have a stifling effect on the production of intrastate gas.

Mr. ABOUREZK. Mr. President, will the Senator yield?

Mr. TOWER. If the Senator will allow, when you couple the allocation authority with the authority to regulate all the other aspects of intrastate gas you run the risk of reducing the amount of production and jeopardizing the supply of gas. We have a surplus of intrastate gas. Why? Because the price was allowed to rise to a market regulated level. That is why we have it, and that is why there is some gas to spare. If regulation is not extended to intrastate gas, then it can be produced for availability under an emergency situation.

Mr. ABOUREZK. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from South Dakota.

Mr. ABOUREZK. Mr. President, I shall take a few minutes to read a news story filed by United Press International, September 11. That is today:

WASHINGTON.—Gas home heating bills will increase sharply in the Midwest if the natural gas bill is approved, spokesmen for industry and regulatory agencies said Sunday.

The officials, in a series of telephone interviews, predicted heavy industry will switch from natural gas to oil if the compromise legislation to phase out price controls becomes law.

W. R. Wilson, Inland Steel's senior vice president for energy, said the bill would "certainly raise the price" of natural gas in the Midwest, prompting industry to convert to oil.

"We have the capability of making switches. . . . and we would probably put in more equipment to do that," he said.

The Northern Indiana Public Service Commission, which sells Inland Steel much of its gas, said the bill will force industry to switch to oil or "relocate to gas-producing states."

"Industry relocating means loss of jobs in Indiana," a spokesman said.

NIPSCO said a survey of its customers indicated the bill would cause enough switches from gas to lead to the loss of 24 percent of the utility's revenue.

"This revenue loss must be borne by the remaining customers and would result in an increase to residential customers of not less than 15 percent or $60 per year," the spokesman said.

The utility said ultimate industrial revenue loss could increase residential bills as much as $189 a year.

The Wisconsin Public Service Commission, which regulates the State's utilities, forecast "an economic catastrophe" in the State if the bill is approved.

"Wisconsin's industry would be forced to convert to higher priced energy, probably foreign oil," a spokesman said. "Wisconsin would lose jobs to energy producing States."

The Carter administration has insisted that the bill will increase production, reduce America's dependence on foreign oil and help regain international confidence in the troubled dollar.

I thank the Senator for yielding.

Mr. FORD. Mr. President, will the Senator from Texas allow the Senator from Kentucky to make an observation?

Mr. TOWER. I am delighted to yield for that purpose.

Mr. FORD. There are two things here. The Senator from South Dakota, as a regulator, likes that statement. I am sure the Senator from Texas, who is a deregulator, does not necessarily approve of that statement.

This morning the Senator from South Dakota was arguing that incremental pricing is no good, because it would put the load on the homeowner, the consumer. But now he comes in with great pride and reads this statement which says that industry is going to carry the big load and industry itself says it is going to carry the big load. So it means to me that this latest statement says that the consumer will be protected and the industry will be carrying the load instead of the residential user.

Mr. TOWER. Let me note that different people are supporting this recommittal for different reasons.

Mr. FORD. Yes, that is true. I agree with that.

Mr. TOWER. I do not think that is an extremely well-kept secret.

Mr. FORD. But the Senator from South Dakota has been on both sides of the same question in 1 day.

Mr. TOWER. That is between the Senator from Kentucky and the Senator from South Dakota. I am expressing my own views as to why I oppose it here. If they are not consistent with the views of others who are opposing it, so be it. We are more interested in numbers than rationale at this point, and I think the numbers are growing, and I think for very good reason. It is generally recognized this is not a good piece of legislation. Maybe some have bought the specious argument that this bill is going to help stop the slide of the dollar in international monetary markets, but that is certainly not the case. That is a massive delusion, and I think that perhaps Senator PROXMIRE and I may engage in more discussion tomorrow on that matter, hopefully to help disabuse some people of that notion.

Mr. FORD. Will the Senator allow us to get back to the original question about the allocation of intrastate gas?

Mr. TOWER. Go right ahead.

Mr. FORD. The Senator got off of it and went into regulation or deregulation, but in this Dear Colleague letter, which

the Senator signed, there is discussion of the allocation of inter- and intrastate, and the Senator read from the proposed statute which is absolutely correct on emergency allocation authority.

But the old Emergency Natural Gas Act has expired, and it expired in April, and that old emergency act did not allow allocations of intrastate gas.

But in this "Dear Colleague" letter the Senator referred to the provision in the bill, which is section 303, which does allow the allocation of inter- and intrastate gas. Now, is the Senator for that provision?

Mr. TOWER. I would prefer not to have it, but I am realistic enough to know that to avoid getting legislation that may be worse it is prudent for those of us who are, perhaps, not entirely satisfied with this provision to go ahead and support it.

Let me note, too, that the only intrastate gas that would be allocated would be the Glenn amendment gas which the President orders freed from industrial boilers. It is not likely that we would ever have any significant volumes of intrastate gas or any other kind of gas allocated under these provisions.

I think, too, with a free market situation in the intrastate markets we could produce enough gas to meet emergency needs [commitments] without even having to preempt gas from those who are currently using it for industrial reasons.

I think, too, that we should proceed apace with our efforts at conversion rather than wastefully and needlessly use gas under boilers.

I support the idea of conversion. As a matter of fact, we have been converting in Texas for a long time. We started converting in Texas before there was any coal conversion legislation. Why? Because the price of gas was going up. That was the incentive to convert. If we would take the lid off the price of gas there would be a lot of conversion going on. Then, no doubt, somebody would suggest that we control the price of coal in interstate markets.

Mr. FORD. It has already been suggested. We voted on it on the Senate floor this year.

Mr. TOWER. Is the Senator for it?

Mr. FORD. No.

Mr. TOWER. Neither am I.

Mr. FORD. I was for deregulation.

Mr. TOWER. We in Texas buy much of the coal we use from elsewhere. We buy much of it from Wyoming.

Mr. FORD, I believe the Senator said today——

Mr. TOWER. In fact, if you allow the price of gas to go above the Btu equivalent of coal and competing fuels, people are going to stop using gas inefficiently. It is unlikely that this allocation authority will be used. If I thought there were any imminent likelihood it was going to be used, I think I probably would be unable to support those provisions under these circumstances.

Mr. FORD. I was going to remind the Senator from Texas that he called the allocation of intrastate gas evil earlier today. Now the Senator is talking about the Glenn amendment. The Glenn amendment includes intrastate gas.

Mr. TOWER. I recognize that fact.

Mr. FORD. The Senator says he does not want the bureaucrats up here allocating intrastate gas even under an emergency situation. But you are getting into that now, and if the Senator is for the "Dear Colleague" letter that the Senator signed——

Mr. TOWER. Without the accompanying regulatory power over intrastate gas.

Mr. FORD. There must be a real——

Mr. TOWER. With continuation of a free intrastate market I do not think supplies would be adversely impacted such that you would have to preempt and allocate gas, and that is the point.

Mr. FORD. Well, the Senator——

Mr. TOWER. In other words, I feel a little bit more sanguine about some limited allocation authority in the absence of the regulatory power than I would if that authority were accompanied by the regulatory power.

Mr. FORD. Well, the only thing I can say is that the Senator from his letter that he signed said he was for the allocation of intrastate gas. The Senator has just now said that he would support——

Mr. TOWER. The Senator did not say that. The Senator is talking about—what the Senator signed was a letter——

Mr. FORD. But the Senator just said a few moments ago——

Mr. TOWER [continuing]. Supporting an instruction.

Mr. FORD. By the way, could I have a copy of my letter back?

Mr. TOWER. I do not know. I may not be through with it.

[Laughter.]

Mr. FORD. But the Senator just said he would support the allocation of intrastate gas, and I think it is in the RECORD. I was somewhat surprised——

Mr. TOWER. The Senator is wrong. I did not say I would support it.

Mr. FORD. The Senator said he would vote for——

Mr. TOWER. I said I would vote for the instruction because I believe it would be calculated to result in less dangerous legislation than that contained in the entirety of the conference report, and there is a difference.

Has the Senator from Kentucky ever supported an amendment which tended to ameliorate bad legislation?

Mr. FORD. Well, I have tried not to even vote for it in the first place.

Mr. TOWER. It is sometimes prudent to support an amendment that will gut it and then vote against the bill. But, in fact, we always have to——

Mr. FORD. The Senator reminds me of a Congressman we have at home who votes against every appropriation, every tax piece of legislation, and he is the first one to announce an expenditure.

Mr. TOWER. Well, I think the Senator from Kentucky is missing the issue a little bit here. In fact, I have never been a great supporter of allocation of any kind, I do not think we need or should have mandatory allocation authority, but I recognize that under the circumstances we have to strike a compromise, and that is what I am supporting, a compromise. The allocation authority under the circumstances, in my view, is not likely to be used, especially when not accompanied by the intrastate regulatory power.

Mr. FORD. I have no further questions of the Senator from Texas. If he has no questions from me——

Mr. TOWER. I just want to set the record straight on this particular point. My supporting an instruction to report out a bill with certain provisions does not necessarily mean I support every provision in that bill any more than I would necessarily support every funding item in an armed services bill that I vote to report from committee to the Senate. We must do so to have a bill to consider.

In this instance I think it is the only way to produce any kind of energy legislation. I think the responsible posture is to vote to recommit it. In the absence of that——

Mr. FORD. With instructions.

Mr. TOWER. I intend to vote against the conference report.

Mr. FORD. Mr. President, I have no further statements to make on the bill, the natural gas conference report, this afternoon. I do not know anyone else to whom to yield the floor on that matter.

I yield to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Kentucky. I have talked to Members on both sides of the aisle, on both sides of the issue, and there seems to be no Senator at this point to speak on it.

● Mr. PEARSON. Mr. President, the conference report of the Natural Gas Policy Act of 1978 which is before the Senate today is an imperfect piece of legislation. Its imperfection arises out of the fact that it is a product of a compromise; a compromise forged from the cross currents of strongly conflicting political views, competing economic doctrines, and sharply differing interpretations as to the consequences of the bill's multitude of technical provisions.

Despite its imperfections and notwithstanding the fact that the pending compromise falls short of the Pearson-Bentsen bill previously adopted by the Senate, I have, after careful consideration, decided to support its adoption.

Mr. President, this bill is opposed on one hand by those who argue that it will result in unjustified profits to producers and excessive costs to consumers. On the other hand, there are those who argue that it does too little for the producers, that it provides too few incentives for the stimulation of new domestic gas production.

I do not challenge the sincerity of these beliefs held by each of these opposing sides. But, for me, Mr. President, it seems a matter of simple logic that the truth of the matter must lie somewhere between these opposing views. Both cannot be right.

Because this is a complex subject and a complicated bill, I cannot say with any absolute certainty precisely where on the scale the conference report comes down between these two opposing points of view. However, as a strong believer in the concept of deregulation, and I have been involved in this effort for a good long time, I am convinced that this measure is a positive step in the direction toward ultimate deregulation. And, al-

though the regulatory procedures contained in the conference report have been made unnecessarily complicated, I believe that there is sufficient flexibility in the administrative machinery provided by this bill to make it work.

Mr. President, there are those who argue that we should scuttle this bill on the assumption that the Federal Energy Regulatory Commission will, in the months ahead, make pricing and administrative changes that will substantially improve the incentives for increased natural gas production. I fully acknowledge that the FERC could, in fact, do a great deal in this regard. I recognize the possibility that indeed the FERC may do so. But I think the probability that it actually will, is not very high. The history of heavy handed regulation of the natural gas industry is long and all too clear and I frankly do not see the ingredients that would bring about a sudden and significant change in the situation. Even if the FERC did take actions to enhance natural gas production, I do not doubt that such measures would be tied up in exhausting litigation for years to come.

Therefore, I am fully convinced that legislative action is necessary. I am also convinced that if we do not act favorably on the conference report before us now, the chances for legislative action will not likely come our way for a good number of years. After President Eisenhower vetoed a deregulation bill in 1956 it was a decade and a half before the Congress was able to even seriously again discuss the issue. Circumstances today are quite different but, nevertheless, I am convinced that this is the critical moment for action. The Congress has studied and debated this issue for too long. The conflicts and the passions have been too strong. Should we fail to act now it is not likely that the Congress will have the will to take up a full scale review for natural gas policy for a good number of years.

On the other hand, if we proceed to put this particular bill into the statute books, I believe that the climate would be such that piecemeal amendments could be considered even as early as the next Congress if it were found that there are, indeed, critically serious defects in this legislation.

Mr. President, let me review some of the major reasons why I think this measure should be adopted.

First and foremost, it provides the process which will lead us ultimately to the deregulation of new natural gas pricing. It does not get us to that objective as soon as I would like and there are provisions in the bill which could, under certain circumstances, result in continued regulation beyond the target date of January 1, 1985. But I am convinced that the measure will work well enough so that by 1985, complete deregulation of new natural gas will be a politically acceptable proposition.

Second, I believe this measure does provide incentives for increased production of natural gas between now and the target date for deregulation. I do not reject the argument that the excessive regulatory aspects of the measure also provide certain disincentives, but I am convinced that the pricing incentives are sufficient to bring on an increase in new natural gas production and that the industry can adapt to the administrative procedures.

Third, adoption of this measure will bring a degree of certainty to the marketplace. This is in sharp contrast to the uncertainty which we have had during the past 3 years while the Congress has debated the natural gas legislation; a period during which natural gas production has continued to decline. Now there is no particular virtue in certainty itself, except that it is one of the important factors, I believe, that will serve to stimulate and encourage greater production. Decisions as to large scale capital investment in exploration and development could not be made with greater confidence. Likewise, users will have a much clearer picture of the future and this will have a salutary effect on their long-range planning.

Fourth, this bill will, by establishing a national pricing system, serve to bring more gas into the interstate pipeline system almost immediately. At the present there are surpluses in the intrastate market and shortages in the interstate system. I think most agree that this bill will help bring about a more effective balance. More natural gas in our interstate pipelines will help reduce the fixed per unit costs for transportation thus helping to offset the increased cost for new natural production. This helps the consuming States without penalizing the producing States.

Fifth, if this measure does in fact result in greater production, as indeed I believe it will, this should result in a lessening of our dependence on imported foreign crude oil and LNG. This means a reduction in our trade deficit. And, given the seriousness of our balance of payments problem, this is, indeed, a powerful argument in favor of adoption.

Sixth, this bill protects the residential user against sharply accelerating costs through incremental pricing. And it provides some very important provisions essential to the welfare of our farmers and small businessmen.

Seventh, passage of this measure paves the way for the adoption of a rather comprehensive national energy policy package. The final enactment of a national energy policy on which we have been working for the past year and a half, is important in it own right, in that taken together, all the parts of the package will help move us toward solving some of our more pressing energy problems.

But adoption of a national energy policy, including this natural gas bill, also has great symbolic value, both here at home and abroad. It is extremely important, it seems to me, that we demonstrate to the American people that we have the capacity to write controversial and complicated legislation on an issue which we all know is of paramount and fundamental importance.

It is also extremely important that through the adoption of this legislation we are able to demonstrate to the international community that we have the will and the capacity to move ahead with measures which deal in a positive way with the energy problem. There seems little doubt but that our failure to complete action on a national energy policy has been one of the root causes in the decline in the value of the U.S. dollar abroad.

Mr. President, this has not been an easy decision for me. I have expended much time and energy on behalf of the deregulation new natural gas pricing. I have never doubted the wisdom of deregulation. One of the great disappointments of my Senate career was that the Pearson-Bentsen bill, passed by the Senate, was not enacted into law. But I am a realist. Legislation on controversial, complex issues requires compromise. I am not happy with this particular compromise but I can accept it. Taking into account all the factors which I believe bear on this issue, I am convinced that it is in the national interest to move to adopt the confernce report of the Natural Gas Policy Act of 1978.●

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to exceed 30 minutes, with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under authority of the order of the Senate of September 8, 1978, the Secretary of the Senate, on September 8, 1978, during the recess, received a message from the President of the United States submitting the nomination of Richard T. Mulcrone, of Minnesota, to be a Commissioner of the United States Parole Commission, which was referred to the Committee on the Judiciary.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Foreign Relations.

(The nominations received today are printed at the end of the Senate proceedings.)

## PRESIDENTIAL APPROVAL

A message from the President of the United States reported that on September 9, 1978, he approved and signed the following act:

S. 2543. An act to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails.

## MESSAGES FROM THE HOUSE

At 11:01 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to H.R. 12930, an act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. STEED, Mr. ADDABBO, Mr. ROYBAL, Mr. PATTEN, Mr. BOLAND, Mr. SLACK, Mr. MAHON, Mr. MILLER of Ohio, Mr. MCEWEN, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to H.R. 12934, an act making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. SLACK, Mr. SMITH of Iowa, Mr. FLYNT, Mr. ALEXANDER, Mrs. BURKE of California, Mr. EARLY, Mr. MAHON, Mr. CEDERBERG, Mr. ANDREWS of North Dakota, and Mr. MILLER of Ohio were appointed managers of the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to H.R. 13125, an act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. WHITTEN, Mr. EVANS of Colorado, Mr. BURLISON of Missouri, Mr. BAUCUS, Mr. TRAXLER, Mr. ALEXANDER, Mr. MCHUGH, Mr. SIKES, Mr. NATCHER, Mr. MAHON, Mr. ANDREWS of North Carolina, Mr. ROBINSON, Mr. JOHN T. MYERS, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

---

At 12:18 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House has passed the following bill, without amendment:

S. 3107. An act to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy.

The message also announced that the House agrees to the amendment of the Senate to H.R. 11567, an act to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–81, and for other purposes, with an amendment in which it requests the concurrence of the Senate; and agrees to the amendment of the Senate to the title of the bill.

### ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 2928. An act to authorize appropriations for the fiscal year 1979 under the International Investment Survey Act of 1976, and for other purposes.

The enrolled bill was subsequently signed by the Vice President.

---

At 5:44 p.m., a message from the House of Representatives, delivered by Mr. Hackney, one of its reading clerks, announced that the House agrees to the amendment of the Senate to H.R. 9471, an act to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps.

The message also announced that the House has passed the following bill in which it requests the concurrence of the Senate:

H.R. 11711. An act to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974.

---

## HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 11711. An act to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974; to the Committee on Finance.

---

## ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, September 11, 1978, he presented to the President of the United States the following enrolled bill:

S. 2928. An act to authorize appropriations for the fiscal year 1979 under the International Investment Survey Act of 1976, and for other purposes.

---

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations, with an amendment:

S. 2053. A bill to promote the orderly and environmentally sound exploration for and commercial recovery of hard mineral resources of the deep seabed, pending adoption of an international regime relating thereto (Rept. No. 95–1180).

By Mr. RANDOLPH, from the Committee on Environment and Public Works, without amendment:

S. Res. 558. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to consideration of H.R. 2329. Referred to the Committee on the Budget.

By Mr. MOYNIHAN, from the Committee on Environment and Public Works, without amendment:

S.J. Res. 160. An original joint resolution to initiate preliminary studies for the restoration and renovation of the Pension Building in Washington, District of Columbia, to house a Museum of the Building Arts, and for other purposes (Rept. No. 95–1181).

By Mr. MATHIAS, from the Committee on the Judiciary, with an amendment:

H.R. 1445. An act conferring jurisdiction upon the United States Court of Claims to hear, determine, and render judgment upon the claim of Commander Edward White Rawlins, United States Navy (retired) (Rept. No. 95–1182).

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. HASKELL (for himself, Mr. LAXALT, Mr. MCINTYRE, Mr. MATSUNAGA, Mr. BENTSEN, Mr. WEICKER, Mr. GARN, Mr. LUGAR, and Mr. GRAVEL):

S. 3491. A bill to extend for 2 years and modify the Federal income tax credit for employment of new employees; to the Committee on Finance.

By Mr. MOYNIHAN (from the Committee on Environment and Public Works):

S.J. Res. 160. A joint resolution to initiate preliminary studies for the restoration and renovation of the Pension Building in Washington, District of Columbia, to house a Museum of the Building Arts, and for other purposes. Original joint resolution reported and placed on the calendar.

---

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HASKELL (for himself, Mr. LAXALT, Mr. MCINTYRE, Mr. MATSUNAGA, Mr. BENTSEN, Mr. WEICKER, Mr. GARN, Mr. LUGAR, and Mr. GRAVEL):

S. 3491. A bill to extend for 2 years and modify the Federal income tax credit for employment of new employees; to the Committee on Finance.

### JOBS CREDIT EXTENSION ACT OF 1978

● Mr. HASKELL. Mr. President, I am pleased to be joined by Senators LAXALT, MCINTYRE, BENTSEN, MATSUNAGA, WEICKER, GARN, GRAVEL, and LUGAR in introducing the Jobs Tax Credit Extension Act.

Basically, the bill extends the existing jobs tax credit which was passed last year as part of the Tax Reduction and Simplification Act of 1977. However, it does incorporate some changes which I will explain in detail.

The existing credit, which expires at the end of 1978, is designed to influence a small or medium sized employer to increase his or her payroll by offering a credit of up to $2,100 for each new employee hired.

The bill which we are introducing today has the following provisions:

First. The credit is extended for 2 years through December 31, 1980.

Second. A credit of up to $2,100 per new employee is available to any employer who increases his number of employees.

Third. The credit is limited to $25,000 per employer and therefore, provides an incentive for the creation of up to 12 new jobs per employer.

### DETAILS OF THE EXISTING CREDIT

The jobs credit is equal to 50 percent of the increase in the aggregate wage base upon which the Federal unemployment tax, FUTA, is calculated above 102 percent of the prior years FUTA base. The wage base was $4,200 per employer in 1977 and although it increased to $6,000 in 1978, for the purpose of calculating the jobs credit it remained at $4,200. It is limited to $100,000 per firm.

### MODIFICATION FROM PRESENT CREDIT

First. The existing credit contains a confusing and unnecessary requirement

that the credit cannot exceed 50 percent of the increase in total wages paid by the employer for the year above 105 percent of total wages paid in the previous year. It is eliminated.

Second. The existing credit used 102 percent of the prior year's FUTA as the threshold above which the credit is applied. Our bill reduces the threshold to 100 percent; that is, if you exceed last year's FUTA payroll you get the credit.

Modifications 1 and 2 were made so that employers will know at the time they hire new employees whether they are likely to receive the credit at the time they file their taxes.

Third. To recover the revenue lost from lowering the threshold the cap is lowered from $100,000 to $25,000 per firm.

Fourth. The credit is made elective.

Fifth. It adds the maritime industry which had been inadvertently excluded.

The revised credit will be 35 percent of a $6,000 wage base instead of 50 percent of $4,200 in the existing credit. Both approaches result in a credit of $2,100 per new employee.

SIMPLICITY

The beauty of the jobs credit is that it requires absolutely no new forms, no certification process, and no identification of the new employees. The employer simply takes his or her aggregate FUTA (Federal unemployment tax) wages paid for the year, subtracts last year's FUTA wages and multiplies that figure by 35 percent. The product is the amount of the credit for which the employer qualifies.

SMALL BUSINESS FOCUS

Small business is the sector of the economy which creates jobs. According to testimony of the National Alliance for Business (a big business group), small business accounted for almost 80 percent of the new jobs created in the past 10 years. Capital intensive big business has the investment tax credit, ADR, and other capital-related tax devices. Labor intensive small business has argued eloquently at three recent jobs credit hearings conducted by the Finance and Small Business Committees, which I chaired, that the existing jobs credit, with minor modifications, should be extended and given a fair chance to demonstrate its long-range impact.

Enactment of the jobs tax credit was at the top of small businesses' priority list last year as is its extension and simplification this year.

As the Small Business Legislative Council testified on July 26, 1978:

> In the elimination of current high unemployment the small business sector (should) be the employer of first resort, with the incentive being provided by a job creation tax credit.

The Council's member organizations represent approximately 4 million small businesses nationwide.

The National Federation of Independent Business has written approximately 175,000 of its more than half million members, urging them to contact their Senators in support of our proposal.

The Smaller Business Association of New England (SBANE) testified that it, "supports an extension of the jobs tax credit because the credit does what it is supposed to do—serves as an incentive to increase employment for the small business community."

FAILURE OF PROMOTION

There is no question that the existing credit has had less of an impact on unemployment than it could have, because of intentional lack of promotion by the administration. The Labor and Commerce Departments did next to nothing to let businesspeople know about it. The IRS enclosed a one-page slip in a mailing to FUTA payers which never made it to most of the people who make hiring decisions. According to SBANE, the Governor of Vermont became so frustrated with lack of publication of the credit that he mailed explanatory flyers to most of the businesses in his State.

REVENUE IMPACT

According to the Joint Committee on Internal Revenue Taxation if extended, the existing credit would cost $1.9 billion in calendar year 1979. This bill would cost $2.1 billion.

These estimates do not include the positive revenue impact caused by additional taxes, saved unemployment compensation, and so forth.

I intend to raise this bill as an addition to the 1978 tax bill now being worked up in the Finance Committee. Several additions need to be made to the bill in its final draft by the committee, including a provision which prevents this credit from being taken in addition to any other employment credit which might be enacted. Additionally the bill needs language allowing the credit to be elective retroactively, thereby permitting a deduction for the full amount of wages otherwise deductible without regard to the jobs credit. Assessment authority for cases of retroactive election is also necessary. These are all technical changes which the committee can make in markup.

Mr. President, with the threat to employment represented by inflation and actions to control it, a program which offers a simple, substantial, and cost-effective incentive to increased private sector employment deserves our continued support. With impending increases in the minimum wage and social security taxes the credit is that much more important.

Mr. President, I ask unanimous consent that an article from the August 26, 1978, issue of Business Week entitled "The Surprising Impact of the Jobs Tax Credit," a section-by-section analysis, and the text of the bill itself be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 3491

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Jobs Credit Extension Act of 1978".

SEC. 2. Section 44B of the Internal Revenue Code of 1954 (relating to credit for employment of certain new employees) is amended to read as follows:

"SEC. 44B. CREDIT FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES.

"(a) GENERAL RULE.—At the election of the taxpayer, there shall be allowed as a credit against the tax imposed by this subtitle the amount determined under subpart D of this part.

"(b) ELECTION.—

"(1) IN GENERAL.—An election under subsection (a) shall be made in such manner as prescribed by the Secretary.

"(2) TIME FOR FILING ELECTION.—An election under subsection (a) shall be effective for any taxable year only if filed on or before the last day for filing a claim for refund under section 6511 for such taxable year.

"(3) REVOCATION.—An election under subsection (a) for any taxable year may be revoked at any time on or before such last day.

"(c) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section and subpart D.".

SEC. 3. (a) Section 51 of the Internal Revenue Code of 1954 (relating to the amount of the credit for employment of certain new employees) is amended to read as follows:

"SEC. 51. AMOUNT OF CREDIT.

"(a) DETERMINATION OF AMOUNT.—The amount of the credit allowable by section 44B for a taxable year beginning in any calendar year shall be an amount equal to 35 percent of the excess of the aggregate unemployment insurance wages paid during such calendar year over the aggregate unemployment insurance wages paid during the preceding calendar year.

"(b) MINIMUM PRECEDING YEAR WAGES.—For purposes of determining the amount of the credit under subsection (a) with respect to any calendar year, the amount of the aggregate unemployment insurance wages paid during the preceding calendar year shall be deemed to be not less than 50 percent of the amount of such wages paid during the calendar year in which the taxable year begins.

"(c) $25,000 PER YEAR LIMITATION ON CREDIT.—Except as provided in subsection (d), the amount of the credit determined under this subpart for any employer (and the amount of the credit allowable by section 44B to any taxpayer) with respect to any calendar year shall not exceed $25,000.

"(d) ADDITIONAL 10 PERCENT CREDIT FOR VOCATIONAL REHABILITATION REFERRALS.—

"(1) IN GENERAL.—The amount of the credit allowable by section 44B for any taxable year beginning in any calendar year (determined without regard to this subsection) shall be increased by an amount equal to 10 percent of the unemployment insurance wages paid by the employer to vocational rehabilitation referrals during the calendar year in which such taxable year begins.

"(2) ONLY FIRST YEAR TAKEN INTO ACCOUNT.—For purposes of this subsection, unemployment insurance wages may be taken into account with respect to any individual only to the extent attributable to services rendered during the 1-year period beginning with his first payment of wages by the employer after the beginning of such individual's rehabilitation plan.

"(3) ONLY FIRST $6,000 WAGES TAKEN INTO ACCOUNT FOR ANY INDIVIDUAL.—For purposes of this subsection, the unemployment insurance wages paid during any calendar year which are taken into account with respect to any individual shall not exceed $6,000 reduced by the amount of unemployment insurance wages paid by the employer to such individual during the preceding calendar year.

"(4) 20-PERCENT LIMITATION.—The amount of the credit allowable by reason of this subsection for any taxable year shall not ex-

ceed one-fifth of the credit determined for such year under this section without regard to this subsection and subsection (c).

"(e) DEFINITIONS.—For purposes of this subpart—

"(1) UNEMPLOYMENT. INSURANCE WAGES.—Except as otherwise provided in this subpart, the term 'unemployment insurance wages' has the meaning given to the term 'wages' by section 3306(b).

"(2) AGRICULTURAL LABOR.—If the services performed by any employee for an employer during more than one-half of any pay period (within the meaning of section 3306(d)) taken into account with respect to any calendar year constitute agricultural labor (within the meaning of section 3306(k)), the term 'unemployment insurance wages' means with respect to the remuneration paid by the employer to such employee for such year, an amount equal to so much of such remuneration as constitutes 'wages' within the meaning of section 3211(a), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

"(3) RAILWAY LABOR.—If more than one-half of the remuneration paid by an employer to an employee during the calendar year is remuneration for service described in section 3306(c)(9), the term 'unemployment insurance wages' means, with respect to such employee for such year, an amount equal to so much of the remuneration paid to such employee during such year as is subject to contributions under section 8(a) of the Railroad Unemployment Insurance Act (45 U.S.C. 358(a)), except that the contribution and benefit base for each calendar year shall be deemed to be $6,000.

"(4) VOCATIONAL REHABILITATION REFERRAL.—The term 'vocational rehabilitation referral' means any individual who—

"(A) has a physical or mental disability which, for such individual, constitutes or results in a substantial handicap to employment, and

"(B) has been referred to the employer upon completion of (or while receiving) rehabilitative services pursuant to—

"(i) an individualized written rehabilitation plan under a State plan for vocational rehabilitation services approved under the Rehabilitation Act of 1973, or

"(ii) a program of vocational rehabilitation carried out under chapter 31 of title 38, United States Code.

"(f) RULES FOR APPLICATION OF SECTION.—For purposes of this subpart—

"(1) REMUNERATION MUST BE FOR TRADE OR BUSINESS EMPLOYMENT WITHIN UNITED STATES.—

"(A) IN GENERAL.—Remuneration paid by an employer to an employee during any calendar year shall be taken into account only if more than one-half of the remuneration so paid is for services performed in the United States in the trade or business of the employer.

"(B) EMPLOYMENT ON AMERICAN VESSEL.—For purposes of subparagraph (A), remuneration paid by an employer to a citizen of the United States for employment on, or in connection with, an American vessel (within the meaning of section 3306(c)) shall be treated as remuneration for services performed in the United States in a trade or business of the employer.

"(2) SPECIAL RULE FOR CERTAIN DETERMINATIONS.—Any determination as to whether paragraph (1) of this subsection, or paragraph (2) or (3) of subsection (e), applies with respect to any employee for any calendar year shall be made without regard to subsections (a) and (b) of section 52.".

(b)(1) Subsection (c) of section 52 of such Code (relating to special rules) is amended by striking out "December 31, 1975" each place it appears and inserting in lieu thereof "December 31, 1977".

(2) Subsection (e) of section 52 of such Code is amended to read as follows:

"(e) Change in Status from Self-Employed to Employee.—If—

"(1) during any calendar year an individual has net earnings from self-employment (as defined in section 1402 (a)) which are attributable to a trade or business, and

"(2) for any portion of the succeeding calendar year such individual is an employee of such trade or business

then, for purposes of determining the credit allowable for a taxable year beginning in such succeeding calendar year, the employee's aggregate unemployment insurance wages for such calendar year shall be increased by an amount equal to so much of the net earnings referred to in paragraph (1) as does not exceed $6,000.".

(3) Subsection (g) of section 52 of such Code is amended by striking out "$100,000" each place it appears in paragraph (3) and inserting in lieu thereof "$25,000".

(4) Subsection (i) of section 52 of such Code is amended—

(A) by striking out "$50,000" each place it appears and inserting in lieu thereof "$12,500"; and

(B) by striking out "$100,000" and inserting in lieu thereof "$25,000".

(5) Subsection (j) of section 52 of such Code is amended to read as follows:

"(j) CERTAIN SHORT TAXABLE YEARS.—If the employer has more than one taxable year beginning in any calendar year, the credit under this subpart shall be determined for the employer's last taxable year beginning in that calendar year.".

SEC. 4. Section 280C of the Internal Revenue Code of 1954 (relating to deductibility for portion of wages for which credit it claimed under section 44B) is amended by striking out "No" and inserting in lieu thereof "In the case of any taxable year for which an election is in effect under section 44B, no".

SEC. 5. Section 202(e) of the Tax Reduction and Simplification Act of 1977 is amended—

(1) by inserting "and before January 1, 1981," after "December 31, 1976,"; and

(2) by inserting "and carryovers" after "carrybacks".

SEC. 6. (a) Except as provided in subsection (b), the amendments made by this Act shall apply with respect to taxable years beginning after December 31, 1979, and before January 1, 1981.

(b) The amendments made by the section 2 and section 4 of this Act shall apply with respect to taxable years beginning after December 31, 1976, and before January 1, 1981.

(c) Section 51(f)(1)(B) of the Internal Revenue Code of 1954, as added by Section 3(a) of this Act, shall apply to taxable years beginning after December 31, 1976, and before January 1, 1981.

---

SECTION-BY-SECTION ANALYSIS

Section 2 of the Bill amends the presently mandatory credit by providing an elective credit. The election may be filed within the period of time allowed for filing for a refund. Therefore, a partnership of Subchapter S corporation which did not have taxable income against which to take the credit in its start-up years can later on take the credit and not claim the wage deduction relating to the credit. The election is retroactive.

The 102% test and the 105% test of section 51 of the Code have been eliminated by section 3 of the Bill. A 100% test has been substituted for the 102% test in section 51(a) of the Code. Therefore, the credit is still applied on an incremental basis. However, the employer will be able to more easily determine whether he is eligible for the credit, and accordingly adjust his cash-flow.

Section 3 of the Bill takes into account the changes in the FUTA wage base from $4200 to $6000. The amount of the credit remains $2100.

However, the $100,000 cap on the credit has been reduced to $25,000 in section 3 of the Bill.

Vocational rehabilitation referrals still get an additional 10 percent credit, with the same 20 percent limitation of present law.

A new subsection has been added to section 51(f) of the Code, by the bill. This section provides that the employer of a U.S. citizen employed on an American vessel is eligible for the credit. This provision is retroactive.

---

THE SURPRISING IMPACT OF THE JOBS TAX CREDIT

Despite the erratic behavior of July's unemployment rate, employment has been rising more rapidly than production for nearly a year (chart). And one of the reasons, according to small-business spokesmen and several economists, may be the unexpected success of the new jobs tax credit, a program which the Carter Administration resisted last year and which now appears ready to shut down.

Businessmen have already claimed more than $1.1 billion in tax credits under this program, according to Emil M. Sunley, deputy assistant Treasury secretary. The credits are available to companies that increase employment by more than 2% from year to year, up to a maximum of $100,000—equivalent to about 48 employees, at the maximum credit of $2,100 (50% of earnings up to $4,200 per worker).

Sunley's figure reflects claims for the equivalent of 522,000 full-time employees. And filings for 1977 are far from complete—business may ultimately claim coverage for nearly 900,000 of 1977's new hires. That would be more than 20% of the year's total gain in employment.

Congress would not be likely to turn its back on a program that really provided so many jobs, particularly in an election year. But, heeding Administration arguments that most of the credits have subsidized fast-growing companies that would have done the same amount of hiring anyway, the House Ways & Means Committee voted July 27 to replace the present credit with a drastically curtailed program. And both the full House and the Senate now seem ready to go along.

Movement in Congress to scale back the credit arises from the fact that unemployment has dropped substantially since 1977, and some legislators increasingly feel that a more tightly-focused program attacking structural employment is now more appropriate than broader hiring incentives.

SABOTAGE EFFORT?

To proponents of the credit, congressional action along these lines simply spells the success of apparent Treasury Dept. efforts to sabotage the program. "Treasury was opposed to it last year, and they want a different program this year," says William J. Dennis Jr., spokesman for the National Federation of Independent Business (NFIB). "They say they've tried to publicize the credit," he adds, "but we have our doubts."

Northwestern University economist Robert Eisner is sharper in criticizing the Treasury's performance, as reflected in a February Census Bureau survey of business response to the credit. Eisner cites the bureau's finding that only 34% of surveyed firms even knew of the credit's existence as *"prima facie* evidence of inadequate administration of the jobs credit."

But government spokesmen back up the low recognition figure with the survey's finding that only 6% of the companies that were aware of the credit increased their hiring because of it. For all the other firms who qualified, often for the maximum credit, the tax break turned out to be a veritable windfall. "People are going to claim credits for what they would have done anyhow," says Assistant Labor Secretary Arnold H. Packer.

NO DIFFERENCE

Indeed, Compugraphic Corp. in Wilmington, Mass., is just one of many companies contacted by Business Week that fit Packer's description. With employment up 300 in the past nine months, says Vice-President David W. Hepworth, "we were happy to take the maximum from the jobs program." He adds: "But it certainly made no difference to our hiring pace."

Albuquerque's Aztech International Ltd., which qualified for just $43,000 in credits, comes closer to the NFIB's view that employment received additional impetus from the program. "We had to hire to meet demand," says Aztech President Bennett King, "but we're delighted with the credit." King adds a point made by many other surveyed businessmen, including those who exhausted the permissible credit: "It will keep prices lower because it's keeping our costs lower."

Job credit proponents stress this kind of anti-inflationary impact, while also rejecting government claims that the program has only puny job-creating powers. NFIB spokesmen point out that even a small proportion of the nation's 3.5 million small businesses is sufficient to generate a lot of employment. Based on a quarterly sampling of its own 340,000 members, the NFIB estimates that more than 300,000 jobs had been created by the credit in small business alone as of July, with 4.1 percent of the companies adding an average of 2.3 jobs apiece.

University of Wisconsin economist John H. Bishop, who has applied a complex statistical model to employment and cost data for the construction, trade, and trucking industries, estimates that the credit generated about 400,000 jobs in these sectors alone by April, while also helping retailers to accept significantly lower price markups. "The danger," says Bishop, "is that if we take the credit off, there may be a drop in employment in January. And the credit also helps us on the price front."

MORE WINDFALLS

Like Bishop, Northwestern's Eisner sees the credit as having an important anti-inflationary impact, offsetting to some extent increases in labor costs that were legislated by such measures as the higher minimum wage and increased payroll taxes. "We have a tax credit of 10 percent for machinery," he argues, "and payroll taxes of 12 percent to 16 percent against employment. Let's redress the balance." Eisner, along with the NFIB, Bishop, and others, accepts the Administration's interest in a "structural" credit targeted for workers in high-unemployment categories, but he also wants something like the present credit kept in place.

The Administration itself estimates that its proposed replacement, the targeted employment credit, will take three years before it creates as many as 160,000 net additional jobs per year. Nor will windfalls be avoided: Seven or eight credits will be claimed for every hire that is actually created, according to estimates presented by Labor's Packer. Moreover, the proposal's linkage to veterans and other special groups will give rise to certification paperwork that may smother the program.●

## ADDITIONAL COSPONSORS

S. 3277

At the request of Mr. DANFORTH, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 3277, the Small Communities Act of 1978.

S. 3422

At the request of Mr. BAKER (for Mr. WALLOP), the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 3422, a bill to establish a congressional award program.

S. 3471

At the request of Mr. TOWER, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of S. 3471, a bill to postpone the increase in the minimum wage under the Fair Labor Standards Act of 1938.

UP AMENDMENT NO. 1719

Mr. HART. Mr. President, on August 23 of this year, I introduced an amendment to title VII of the Elementary and Secondary Education Act. That amendment was cosponsored by Senators DOMENICI and HASKELL, whose names I neglected to record. Because I believe their efforts in this area should be recognized, I would like to take this opportunity to record the fact that they were involved in the effort to improve the sections in title VII that strengthen parent involvement in bilingual education.

## SENATE RESOLUTION 558—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. RANDOLPH, from the Committee on Environment and Public Works, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 558

*Resolved*, That pursuant to section 402(c) of the Congressional Budget Act of 1974 the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 2329, an Act to improve the administration of fish and wildlife programs, and for other purposes.

Such waiver is necessary to permit consideration of H.R. 2329, a House-passed measure which was not received in the Senate until after May 15, 1978. Title III as reported by the Committee on Environment and Public Works contains authorizations available in fiscal year 1979. This title, however, was a provision in another bill which has already passed the Senate and was added to H.R. 2329 to expedite consideration in the House of Representatives.

## SENATE RESOLUTION 559—SUBMISSION OF A RESOLUTION AUTHORIZING PRINTING

Mr. RANDOLPH submitted the following resolution, which was referred to the Committee on Rules and Administration:

S. RES. 559

*Resolved*, That the report of the Secretary of Transportation to the Congress of the United States (in compliance with section 153 of the Federal-Aid Highway Act of 1976, (Public Law 94-280) entitled, "Highway Needs To Solve Energy Problems" be printed with illustrations as a Senate document.

SEC. 2. There shall be printed one thousand additional copies of such document for the use of the Committee on Environment and Public Works.

## AMENDMENTS SUBMITTED FOR PRINTING

### TARIFF TREATMENT OF FILM, STRIPS, SHEETS, AND PLATES OF CERTAIN PLASTICS OR RUBBER—H.R. 5285

AMENDMENTS NOS. 3581 THROUGH 3584

(Ordered to be printed and to lie on the table.)

Mr. SCHWEIKER submitted four amendments intended to be proposed by him to H.R. 5285, an act to amend the tariff schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets and plates of certain plastics or rubber.

● Mr. SCHWEIKER. Mr. President, I am today submitting a series of amendments to H.R. 5285, a House-passed tariff bill which will be the vehicle for Senate consideration of hospital cost containment legislation.

H.R. 5285 contains the text of S. 1470, the Medicare-Medicaid Administrative and Reimbursement Reform Act, recently amended by the Senate Finance Committee. While the Senate is also expected to address the broader hospital cost containment proposals of the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Wisconsin (Mr. NELSON) when it considers the medicare-medicaid bill, the amendments I am filing today are directed only to H.R. 5285, as reported.

AMENDMENT NO. 3581

My first amendment concerns exemptions from the Federal cost control program for qualified plans initiated by the States. It applies to H.R. 5285 the thrust of a bill Senator MCINTYRE and I introduced earlier this session encouraging the establishment of State hospital review commissions as an alternative to the purely Federal approach proposed by the administration. My proposal would allow States to conduct their own cost containment activities as they saw fit, as long as certain criteria were met and their cost savings equalled Federal medicare and medicaid reimbursement limits.

State programs would only be required to cover medicare and medicaid reimbursements, though new and existing programs clearly could cover all payors if they chose. Qualifying States would be eligible for Federal financial assistance to help defray startup and administrative costs incurred in overseeing medicare and medicaid expenditures. Under my amendment, States would have more flexibility in designing cost containment methodologies than under the narrow State programs exemption of H.R. 5285. The discretion of the Secretary of HEW to disapprove such programs would be sharply limited. In addition, the States themselves could determine how best to recover excess expenditures, rather than be automatically subjected to the more rigid, percentage-based payback system contained in H.R. 5285.

Mr. President, I believe we must encourage the States to attack the skyrocketing costs of health care rather than use an already bloated Federal bureaucracy to impose purely Federal controls. State and local officials are more in tune with the unique health care needs of their communities and with the specific steps which would be most effective in curbing sharply rising costs.

AMENDMENT NO. 3582

My second amendment would delete H.R. 5285's provision for establishing a Health Facilities Cost Commission. As a member of the Senate Appropriations and Human Resources Committees, I have watched the Department of HEW

grow by leaps and bounds over the past few years, with many departments and bureaus overlapping each other in functions and authority. Since HEW already is so involved in the subject of hospital cost containment, I do not understand why we need yet another Commission—one with 11 members paid at the GS–18 level—to perform the function of making cost containment recommendations to the Secretary and the Congress. Moreover, the bill does not even contain a defined cost ceiling for the Commission; instead it simply authorizes it to be funded by "such sums as may be necessary." Not only would this new element of the bureaucracy carry an uncertain cost; its apparent purpose is to lead the way toward further Federal controls. I, therefore, believe it should be deleted.

AMENDMENT NO. 3583

Mr. President, a third amendment I am offering addresses section 31 of the bill which would require a skilled nursing facility to participate in both medicare and medicaid as a condition of participation in either program. The reason for this provision, as stated in the committee report, is that many nursing homes are declining to participate in one program or the other, reducing the availability of skilled nursing facilities, and that there is a need to encourage greater participation.

Mr. President, from all indications the reason for declining participation in medicare and medicaid is unmanageable paperwork, slow collection on claims, and a host of other administrative difficulties relating to red tape and bureaucratic inconvenience. It seems to me that it would be far more effective to aim reform efforts directly at those problems rather than try to coerce SNF participation with this kind of all-or-nothing condition. Because these deterrents to participation will not be removed by the amendment, I also doubt that it will work. My amendment would delete this new provision in hopes that a more constructive approach to the problem can be found.

AMENDMENT NO. 3584

The fourth amendment I am proposing, Mr. President, would reinforce the action taken by the Senate in passing S. 2410, the Health Planning Act Amendments of 1978, earlier this summer. In that bill, we strive to establish a health planning process that established priorities at the State and local level and let them emanate to the Federal level. S. 2410 contains provisions for payments to promote the closing and conversion of underutilized facilities, but programs established under that bill would give a far greater role to the States and localities than section 3 of H.R. 5285. In addition, H.R. 5285 would establish a Hospital Transitional Allowance Board at the Federal level to oversee such payments. Because section 3 would seek to promote closing and conversion of underutilized facilities in an additional but inconsistent manner relative to the already passed provisions of S. 2410, my amendment would propose to delete it.●

## NOTICES OF HEARINGS

SUBCOMMITTEE ON ADMINISTRATIVE PRACTICE AND PROCEDURE

● Mr. ABOUREZK. Mr. President, I wish to announce that the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary, will hold a hearing on September 21, 1978, concerning the Regulatory Control Act, Senate bill 2862. The hearing will be at 10 a.m. in room 2228, Dirksen Building.●

CANCELLATION

● Mr. ABOUREZK. Mr. President, I wish to announce that the hearings scheduled for September 14, 1978, by the Subcommittee on Administrative Practice and Procedure, concerning the FBI charter, have been canceled.●

## ADDITIONAL STATEMENTS

### SENATE RESOLUTION 534—A RESOLUTION ON SOCIAL SECURITY FINANCING REFORM AND TESTIMONY OF HON. G. WILLIAM MILLER

● Mr. HART. Mr. President, on August 4th of this year I introduced a resolution Senate Resolution 534 which addressed the inflationary effect brought about by implementation of the social security tax increase scheduled to take effect early in 1979. The resolution would postpone the effective date of the scheduled increases in the social security tax for a 12-month period. The purpose of the 12-month delay is to give the Senate Finance Committee time to act upon legislation proposing alternate mechanisms of financing the social security program.

Economists now are almost uniformly of the opinion that imposition of the increased social security tax early next year would have a serious inflationary impact and would create incentives for firms not to hire workers.

On September 7, 1978, the Honorable G. William Miller, Chairman of the Board of Governors of the Federal Reserve System, testified before the Senate Finance Committee on H.R. 13511—the Revenue Act of 1978. Mr. President, I shall ask that it be in order to print the entirety of Mr. Miller's testimony in today's RECORD.

Mr. Miller addresses clearly the problem of inflation and the need for continued efforts in the battle to reduce unemployment. Specifically, I would like to direct the attention of my colleagues to Mr. Miller's statements regarding the inflationary impact of the increase in social security taxes. He suggests, as does Senate Resolution 534, that the effective date of the tax increase be delayed for 12 months, while we explicitly commit ourselves to action designed to deal realistically with the remaining long-range problems of funding social security. Mr. Miller states that inflation is our most important economic concern today, and goes on to point out that there is a great need to provide incentives for work, and that we have to take a close look at means of maintaining disposable income at its current level in order to overcome the forces of inflation. After Mr. Miller suggested that it would be desirable to defer the 1979 social security tax change, and in that way reduce taxes for individuals as well as reduce the inflationary impact of increased payroll taxes, he stated that the Board of Governors of the Federal Reserve System has estimated that the scheduled increase in social security taxes would add about one-half a percent to inflation next year. Chairman Miller states that anything that could be done to eliminate that increase should be given careful consideration.

Mr. President, I also ask that the text of Senate Resolution 534 be printed in the RECORD, and thereby place it before my colleagues once again for their consideration. The resolution recognizes both the need to effect fundamental reform of the financing structure for the social security system, as well as the need to delay changes in the tax structure that will cause us to take backward steps in our march against inflation. We most certainly cannot afford to aggravate our inflation problems. Nor can we afford to diminish the small gains we have made in reducing unemployment. I strongly urge my colleagues to join me in this effort to avoid a costly error.

The material follows:

STATEMENT OF HON. G. WILLIAM MILLER, CHAIRMAN, BOARD OF GOVERNORS, FEDERAL RESERVE SYSTEM

I certainly apreciate the opportunity to be here this morning. I do not know that taxes are the usual preserve of the Federal Reserve, but they usually influenced the entire economy and are very important in the coordination of monetary and fiscal policy, so I welcome the opportunity to give my thoughts on this subject.

All of you are familiar with the recent economic conditions, but I have prepared some charts that you might want to glance at, just to remind ourselves where we are. We have had quite a recovery from the great recession of '74–'75 with an 18 percent growth in real GNP since the trough and with 10.5 million jobs added to the payroll since that time.

While the unemployment rate is still much higher than we would like, we do have the highest percentage of Americans employed that we have ever had. So there have been some real improvements.

The problem on the job front, of course, is that much of the remaining difficulty with unemployment is structural in nature and particularly falls heavily on young people and blacks, and it deserves careful consideration.

But the main theme, I think, in looking at the economic situation generally is that we do need to maintain upward momentum, even though we have had this three and a half year period of growth, and even though that is a long upswing by historical standards, the conditions of this nation are such that we do need to continue to grow at a moderate pace that will allow us to add to the output and utilization of labor and capacity and, at the same time, to counter the inflationary pressures that have hit us so dramatically.

And we cannot afford to risk the mistakes of the past of overshooting by trying to either slow the economy down too rapidly and fall into recession by mistake, nor can we continue to grow at a level that will build the

inflationary pressures and cause difficulties later.

Inflation is our most important economic concern today. The advance in prices, which you can see in Chart 2, has been rather worrisome. We have had an almost 10 percent rate of growth, measured in CPI in the first half of the year at an annual rate. Food prices have accelerated very sharply.

If you look at the middle panel in Chart 2, you can see that in July, while there was a considerable improvement in CPI, the middle panel shows that if you take out food, that we still have a very unacceptable rate of increase in prices.

The depreciation of the dollar, of course, is one of the factors that has both influenced inflation and has been a very troublesome matter to us, and one that deserves continued close consideration.

Well, under all of these circumstances, it it would seem that Congress should weigh with great care the size and the composition of its tax program. A tax cut certainly should provide no more stimulus than is necessary to sustain moderate economic expansion. Anything beyond that would jeopardize our chances for restraining inflation.

It also seems to me that the structure of tax cuts should be very much programmed to provide incentives for work and for capital formation which are essential to overcome these forces of inflation. Congress can take a significant step by paying greater attention to the supply side effects, and I would like to discuss some of those aspects here today.

In my personal judgment, a tax reduction in the vicinity of the $15 billion effective January 1 that is being discussed in Congress is appropriate. Despite some bumpiness in recent economic activity, the balance of the economy is quite good. Yet, we do need to provide some further adjustment in private demand if we are going to sustain the growth.

If we look at Chart 3, we see that there is a continuing fairly satisfactory level of consumer attitude about buying, but there is already a fairly low rate of saving and a very high, historically high, burden of debt repayments. Consumer debt now, household debt, is at the point where about 20.5 percent of disposable personal income is required to service that debt, which is quite high.

So we have to look at disposable income and means of maintaining it to be sure that we do not create an undue burden there.

Chart 4 shows the private housing starts and this also is an area that, with some of the steps taken this spring to avoid disintermediation has continued at a fairly good level, but we could expect that with the maturity of the cycle and with the present level of rates, interest rates and available resources, that this would be tapering off.

Chart 5 shows that there has been, as is typical in recoveries from recessions, a growth in business fixed investment, but it has been rather sluggish by historical standards and only recently has reached to the peak of the prior cycle, and really is, in historical sense, lagging.

Well against this backdrop, a reduction in Federal taxes next year would provide timely support to spendable income, and without a tax cut, individuals will actually be facing substantial tax increases in 1979. You have to remember that, without a tax reduction, that we have mandated Social Security increases which will boost Federal revenues next year by $8 billion. I would like to point out that about half of that, about $4 billion, will be increased taxes on individuals. So without some tax relief, we not only have a $4 billion increase in payroll taxes, but we also have another $8 billion that will impact individuals because of the interaction of inflation and the progressive income tax structure.

Now, it is also important when thinking about tax cuts to consider the expenditure side of the budget ledger in deciding what size the tax cut should be and what can be afforded. Inflationary pressures are such that it is imperative that the budget deficit be reduced substantially below the $50 billion of this current fiscal year, and it is encouraging to see the action that has already been taken by Congress to perhaps narrow that deficit to the $40 billion area.

As a side note, I mentioned that the original plan for FY '79 contemplated a budget deficit of $60.5 billion, so reducing that to around the $40 billion level is a really outstanding accomplishment, and I think that Congress deserves a lot of credit for taking that initiative in the face of inflationary difficulties.

Well, if a tax cut is desirable and if the amount of it is on the order of magnitude that we have been talking, then the question is, how to structure it? We need to structure it to make maximum contributions for achieving our basic economic goals of full employment, price stability, and a sound dollar.

It is obvious that substantial contemporaneous tax increases for individuals suggests that a lot of the tax cut be allocated to this group in order to give them a sense of equity. Distribution of the tax cuts between the household and corporate sectors implied in the House bill appears to me to be reasonable. However, I would like to express just a few doubts as to the particular devices employed, not as to the level or the amounts.

A significant portion of the tax cuts for individuals, of course, would only offset these revenue impacts I have mentioned. It therefore might be asked, would it not be more desirable simply to defer the 1979 Social Security tax change, and in that way accomplish two things—to do part of the tax reduction for individuals in that way, but at the same time, to reduce the inflationary impact of increased payroll taxes.

The Board's staff has estimated that the scheduled increase in employer contributions to Social Security would add about one-half a percent to inflation next year, and one-half is a large number. Anything that could be done to eliminate that, I think, should be given careful consideration. A one-year deferral of the Social Security increase due to take effect next January 1 would not place an undue strain on the resources of the Trust Fund.

Nonetheless, a deferral should be considered only if there was an explicit commitment for action to deal realistically with the remaining longrange problems of funding Social Security. Last year's legislation did insure financial viability for Social Security, but with the people of this country faced with a rapidly growing financial burden and a Social Security tax that is both inflationary and regressive, it is certainly worthwhile to consider whether a deferral might not be coupled with an undertaking by Congress for a comprehensive study to reduce the funding requirements and therefore to make a permanent change in the level of taxation in this area.

I would be happy later, in the questions, to discuss some of the ways that this might be accomplished, because I am not suggesting for a moment that Social Security be deferred, or taxes be deferred or reduced in a way that would, in any way, impair the long-term financial integrity of the Social Security system; but, rather, that we look at means of improving the funding.

In considering the corporate and capital gains provisions of the House bill, I also want to focus attention today on how the proposed cuts would contribute, if at all, to enhancement of business fixed investments. The performance of capital spending in this economic expansion has not been satisfactory. Real business fixed investment has recovered much later than is the case in prior cycles. And, moreover, the growth of the nation's capital stock has not kept pace with the increases in its work force.

I would particularly call attention to Chart 6, and I think this is the most important chart that I have submitted to this Committee this morning. It shows that throughout the 1970's, the ratio of capital stock to labor has fallen ever shorter of its earlier growth trend line, and this, undoubtedly, has been a significant factor in the slower growth of productivity we have experienced over this period.

This upper panel shows this rather remarkable decline in the ratio of capital to labor and, of course, the lower panel shows the tremendous drop-off in productivity gain and, to my mind, increased productivity is one of the keys to achieving an answer to our inflation problem. The only way I know that we are going to break the cycle of wages chasing prices and prices shaking wages is to begin to get productivity gains so that prices do not have to go up in order to maintain profitability.

Capital accumulation is a critical ingredient in the long-range growth of labor activity and the raising of living standards. To compensate for the neglect of recent years, as well as to accommodate to the reality of scarcer and more expensive energy, a larger share of GNP must now be devoted to the expansion and modernization of the nation's capital stock. It will not be enough simply to reach the investment proportion of 10.5 to 11 percent that has been characteristic of past periods of prosperity and low unemployment.

In my opinion, the nation must set an ambitious goal of say 12 percent of GNP for an extended period—say, over ten years—a level that would foster more rapid improvement in productivity and faster economic growth.

The capital gains and corporate income tax cuts in the House bill would provide some impetus to business capital formation and is certainly a move in the right direction, but the question is, are these the most effective measures that might be taken at this time. And I do have some reservations.

There is considerable controversy, for example, about the effects of capital gains cuts on investment and on Federal revenues. This is not surprising. A change in capital gains treatment would work its influence through a complex and uncertain set of channels.

In assessing the impact of business capital formation, one must contend with the fact that the tax change would affect investment by both households and businesses in all sorts of assets and, therefore, in all sorts of ways. How much effect the tax cut would have on the price of corporate stock and thus on the cost and availability of equity capital is still unclear, and how this would translate into acquisition of new plant and equipment is a further uncertainty.

Yet, I would say the reduction in capital gains tax does have its advantages and its attractions. It would, for example, bring some relief to those who have been confronted with very high, real tax rates, often exceeding 100 percent because their cost base, in calculating capital gains, does not reflect the rise from inflation.

It would also benefit young, emerging companies which have little income and thus are not in a position to benefit from other changes in business taxes.

Lower capital gains taxes would encourage equity investment in such enterprises.

I would conclude that some cut in capital gains taxes would be appropriate, but I would not assign a high priority at this time to this particular tax initiative. I believe that it might have higher priority at some later time.

My reservation about the capital gains provision in the House bill extends to the corporate tax changes as well. In so far as incentives for business investment are concerned, this bill seems to use a shotgun approach rather than a rifle. It does provide for a phased liberalization of the investment tax credit, but the bulk of the corporate tax reduction occurs through a lowering of the rate structure.

Although lower tax rates would improve after-tax profits, the linkage between this improvement in cash flow and spending on new plant and equipment is a loose one. The additional cash might be channeled into any of a number of uses, including the acquisition of other firms, the purchase of securities, or an increase in dividends.

It is quite likely that a smaller gain in real investment would be achieved for a given dollar of tax revenue loss than would be the case with tax reductions that are linked directly to capital expenditures.

While some cut in the corporate tax rates is desirable, I believe greater emphasis should be placed on other, more efficient tax incentives for investment.

Accelerated depreciation is a very efficient way to encourage investment. The tax benefits of faster appreciation accrue to a firm only after new plant and equipment has been put in place. In addition, enlarged depreciation allowances would redress the serious drag on real corporate profitability that has occurred in recent years as inflation has caused replacement costs to exceed depreciation deductions by a wide margin.

Larger investment tax credits also provide direct incentives to capital formation and, therefore, are more efficient in stimulating investment than are corporate tax rate cuts.

There are, however, likely to be differences in the cost effectiveness of accelerated depreciation and investment credits, that is, the degree of investment stimulus that is achieved per dollar of tax relief. These differences will hinge on some rather technical factors, among the most critical of which is the importance that business attaches to the time pattern of income.

In my experience, as businesses are increasingly paying attention to discounted cash flow in making investment decisions, and in that regard, it is more favorable, there is more bang for the buck, through accelerated depreciation than through the investment tax credit.

I hope that these comments have been helpful for the Committee to set the stage for the questioning. I would just add that it seems to me that our problems today are very serious in this country—our economic problems are very serious. They have developed over a dozen years. They start with the advent of being involved in Vietnam, both as a divisive activity and one in which we did not elect to pay our way. We started the seeds of inflation.

This led into higher inflation rates with the experiment with wage and price controls which were ineffective and did not work properly. This led to the breakdown of the international monetary system.

We had the experience of the double digit inflation and double digit interest rates. We have had the oil embargo. We have had the great recession of 1975 and, for a dozen years, we have been having a serious, perhaps misdirection, of building our economy with the strength and productivity that it needs for the long-term.

It perhaps is time now for us to all give up some of our individual preferences and see if we can take the resources that are available for a sound economic plan and to use them as directly as possible and as honed-in as much as possible to achieve the important results of fighting inflation, of achieving productivity gains, and creating a sense of equity and fairness in our tax structure that will, in the long-term, best benefit our nation.

Thank you very much.

---

SENATE RESOLUTION 534

*Resolved,*

Whereas, the Congress enacted the Social Security Amendments of 1977 in an effort to counteract the deteriorating financial position of the social security program;

Whereas, the Social Security Amendments of 1977 called for substantial new social security tax revenues to be raised in addition to those then provided for under law;

Whereas, the increase in social security payroll taxes provided for in the Social Security Amendments of 1977 represents one of the largest peacetime tax increases in the history of the United States;

Whereas, the increase in social security payroll taxes threatens to aggravate inflation and unemployment at a time when the economy of the United States can ill afford either such effect;

Whereas, there is a pressing need to effect fundamental reform of the financing structure for the social security system; and

Whereas, insufficient consideration has been given to the alternative of using general revenues to assist in defraying the rising costs of the social security program: Now, therefore, be it

*Resolved,* That it is the sense of the Senate that—

(1) the Senate Committee on Finance consider legislative proposals offering alternative mechanisms for financing the social security system, including those that advocate the use of general revenues to fund the Disability Insurance and Hospital Insurance Trust Funds, and report out to the Senate (favorably or unfavorably) a proposal for such an alternative mechanism prior to January 1, 1979; and

(2) if the Committee on Finance and the Senate have not acted on a proposal for such an alternative mechanism prior to January 1, 1979, the increases in the social security taxes scheduled to take effect on January 1, 1979, should be deferred for twelve months and any general tax cut enacted in 1978 by this Congress should take into account any effect such deferral has on efforts to achieve a balanced budget.●

---

(At the request of Mr. BAKER, on behalf of Mr. HELMS, the following statement was submitted for the RECORD:)

MEDICARE-MEDICAID REFORM ACT—S. 1470

● Mr. HELMS. Mr. President, recently the Senate Finance Committee approved S. 1470, the Medicare and Medicaid Administrative and Reimbursement Reform Act, and reported this important legislation to the Senate as an amendment to H.R. 5285, a minor tariff bill passed by the House. My distinguished colleague from Georgia, Senator TALMADGE, the chairman of the health subcommittee, has worked for the last several years to perfect this legislation into a proposal which will improve the present Medicare reimbursement system, encourage more efficient hospital management, and, in the long run, produce substantial savings in the Federal government's expenditures for hospital care.

I understand that when H.R. 5285 comes to the Senate floor an attempt may be made to provide the Secretary of HEW with broad standby authority for imposing arbitrary cost constraints on the hospitals of this country. This amendment, though it may come disguised as a "reasonable compromise," will really be nothing more than a last minute effort to revive the Administration's hospital cost control bill—an ill-conceived, punitive, and wholly inappropriate proposal that has already been rejected by two House committees. It would, in effect, authorize wage and price controls on a single segment of our interdependent economy.

Mr. President, I will strongly oppose this amendment if it is offered, and I urge my colleagues to join me in opposing it. Rising hospital costs are a matter of concern to us all, but they are a complex problem that cannot be solved by a program of arbitrary, government-imposed price controls. Moreover, the hospital industry has voluntarily undertaken a program for reducing costs that is producing significant savings. The Voluntary Effort, developed under the auspices of the American Hospital Association, the Federation of American Hospitals, and the American Medical Association, has reported a 3.3 percentage point decline in the rate of increase in hosptial expenditures during the first 5 months of this year as compared to the same period in 1977.

This performance to date has exceeded the program's goal of reducing the rate of increase by 2 percentage points by the end of 1978. The hospitals in North Carolina are achieving substantial savings through their participation in this voluntary program, and I believe that their program and those of other states should be allowed to be carried out without the threat of government intervention. Standby cost control authority, as proposed in this amendment, can only serve to undermine the effectiveness of this nationwide voluntary effort by encouraging anticipatory charge increases on the part of some hospitals. Furthermore, this amendment negates the constitutional lawmaking prerogatives of this Congress by giving the Secretary of HEW, an unelected official, authority to make sweeping statutory changes—changes that could only be reversed by enactment of contrary legislation.

I commend Senator TALMADGE for his responsible approach to reducing hospital costs. In contrast to a program of price controls which might penalize well-managed institutions, his incentive payment system would provide increased reimbursement for efficiently-managed hospitals and reductions for institutions whose costs are out of line with those of their peers. His proposal, coupled with the hospital industry's voluntary cost reduction program, would produce a savings of at least $30 billion over the next 5 years. In addition, it would create an atmosphere of competition among hospitals that would, over time, lead to further savings. That is why I will support the bill reported by the Finance Committee and why I will oppose any 11th-hour attempts to dilute its effectiveness by providing for standby Federal controls and broad new regulatory powers for HEW.●

---

## THE RANCHER'S BEEF IS NOT ALL IN THE STEAK

● Mr. McGOVERN. Mr. President, Americans accustomed to high protein diets largely through the consumption of quality cuts of beef seldom consider the economics or technology that go into the production of the product prior to its appearance on the dinner table. Among urban consumers this phenomenon is more of a mystery than in areas where the land is closer to the people. The urban

buyer's concern with beef generally goes no further than a price judgment he is forced to make at the meat counter in the supermarket. This general lack of understanding is further compounded because few publications which urbanites read take space to explore the production process of beef, or, for that matter, the production process of any of our major food products from the raw state to the retail outlet.

I was thus surprised to read in the August 29, 1978, edition of Esquire magazine a very perceptive and accurate account of the great American steak dinner, detailing the modern economic judgments ranchers and feeders must make in starting the calf on its way to the filet mignon. A rancher must be part cowboy, part agricultural economist, part veterinarian, part marketing agent, and part prestidigitator and soothsayer if Americans are to continue the diets to which they have become accustomed. Sensing that such material, largely relegated to trade publications or farm journals, would be of interest to other Members of the Senate, I ask that an article entitled, "American Beef! Steaks Are High, But Ranchers Are Down," by Geoffrey Norman, be printed in the RECORD.

The article follows:

AMERICAN BEEF! STEAKS ARE HIGH, BUT RANCHERS ARE DOWN

(By Geoffrey Norman)

At a meeting of the Colorado Cattlemen, in Lamar, a lanky man with leathery brown skin and thin unsmiling lips calls President Carter a son of a bitch in tones that let you know unmistakably that he still thinks these are fighting words. "We don't ask for a damn thing from the government except to be left alone. But just when we start to make some money for the first time in four years, Carter steps in and says no. He's nothing but a goddamned peanut farmer." From the way the man says this, you have to think that there is something suspect about peanut farming. That it is like hairdressing or something. That it isn't manly. "Peanuts are the most heavily subsidized crop in the country. Carter got rich off the government."

The man fairly represents the feelings of the cattlemen who are gathered in Lamar for meetings and speeches, a barbecue, and a show that features authentic Indian dancing. But just about everybody else in the country is mad about beef, too—shoppers who watched the price jump 6.5 percent a month during the spring, restaurant owners, local butchers and grocers. At a small grocery back East, a friend proved to me with invoices and meat scales that he is losing a penny a pound on hamburger even before he takes out for his overhead—and he was getting complaints from agitated customers at that price.

But Americans love to eat beef. From the best steak houses in Manhattan—places with names like Frankie and Johnnie's, the Palm, and Christ Cella—to the steak houses with names like the Beef Barn or the Sirloin Saloon that you see in every self-respecting town or aspiring city to the budget places for families that only get out once a month for a meal and a movie—places where you get a rib eye, a baked potato, and a lettuce salad served cafeteria style for $5—Americans eat beef with a passion that is truly carnivorous. There are the billions of McDonald's and lesser hamburgers, all those chuck roasts, pot roasts, and rib roasts wrapped in cellophane in the supermarket meat counters; hamburgers charcoaled in backyards across the land. Americans eat 154.6 pounds of red meat a year for every man, woman, and child. Lately the figure has gone up sharply.

So when President Carter and his advisers decided to move against inflation, beef probably looked like the most natural target available. The price of beef, after all, was rising faster than most other prices. By lowering the price of beef, or at least slowing the rate of increase, Carter would be helping the consumer directly. Also, according to the press, this price decrease came at a time when President Carter was getting poor grades in the polls and was being urged to act more forcefully. So in June he took a simultaneously drastic and expedient step and allowed an increase in the quota of imported beef. It amounted to about 200 million pounds of New Zealand and Australian beef. But the impact on the beef market was profound. Consumers were alerted and began substituting other foods for beef. Producers, consequently, cut back. The price of live cattle droped ten cents a pound—almost sixteen percent—in three weeks. It was a short-term victory for Carter and the consumer. But for cattlemen, it was a disaster.

Around the farms, feedlots, and ranches of eastern Colorado, there was a feeling of bilious resentment. Men who had gone humbly to the county banker for three straight years, taking out loans to keep small farms and ranches going until the price of beef went up again, felt betrayed. They knew they might have to get out of ranching altogether so that Carter might gain a temporary point or two at the polls and the spoiled shoppers in the city could have a free ride.

It is this knowledge—the certainty that ranchers will be forced off the land for the sake of votes—as much as anything, that feeds the resentment. The land is important to these men in a way, they feel, that nothing in this world is to a politician or to most city-dwelling consumers. They have made the land produce, and it has kept them and their families alive for generations. To be forced off, to see their kind of operation give way to huge corporate farms owned by mining and oil interests and operated at a cheerful loss for tax purposes and with no regard for the real values of ranching—this is almost too much to bear.

Keith Propst's house sits among some of the rare shade trees along the Platte River, in northeast Colorado. The trees were planted by his ancestors, who came to Colorado a few years after the Civil War had soured things for them back East. There were no trees at all when they arrived.

"Buffaloes," Propst says. "There were thousands of them back then. What they didn't eat, they trampled. There wasn't a tree anywhere in the Great Plains."

Propst is president of the Colorado Farm Bureau, an organization that tries to get the best deal it can for farmers by keeping the government out of agriculture. Propst is fifty-three and has the weather-beaten face and the squint of a lifelong rancher. He also has a broad and engaging smile: Whereas most ranchers are tight-lipped and smile by raising a corner of the mouth. Propst breaks out in teeth—one of them gold—when some thing strikes him funny or he recognizes a friend.

"I can show you the figures on paper," Propst says when I arrive. We sit in his living room, pleasantly furnished and cool in the heat of late June. Propst has scribbed columns of numbers and marginal notes on a sheet of paper that he holds in big hands and spreads out on the coffee table. It is a breakdown of his costs done just the way a grocery would do it, or a boutique, or a private university. "Here is what it costs me to feed a calf. This is for my overhead. Interest. Labor. Depreciation. Veterinary. Figure all of that in, and here is what I have to sell a steer for, live weight, just to break even." The figure is fifty-four cents a pound. About five cents more than he can get that morning on the market. Every time he sells a steer, he can lose $40.

"But maybe," Propst says, "you can get a better idea of what those numbers mean after we've taken a look around." So we climb into his Scout and drive out to the range.

There are eight windmills on Keith Propst's 10,000 acres of range. They turn monotonously in the steady Great Plains breeze that blows down from Wyoming, providing all the water for Propst's cow-calf operation, which is running at about 400 animals this year. He had planned to increase the herd, but after Carter's decision he is not sure he will.

"Twenty acres of this land will support one cow and her calf. Or maybe two and a half yearlings," he says. "So I could get it up to five hundred animals if the price was right. But it's hard. Politicians go with the votes. And all the votes are in town."

The land in question stretches out bleakly in every direction, relieved by a few folds and depressions and one long sand ridge that parallels the course of the river. The thin soil is held by sagebrush and yucca grass, which the cattle cannot eat, and by grama and bluestem grass, which they can. Besides Propst's cattle, the land supports rattlesnakes, jackrabbits, coyotes, and some mule deer. On hundred fifty miles to the west are the Rockies: Aspen and Vail and great forested peaks lush with conifers. When Propst's ancestors first arrived in Colorado, the Rockies were something just to get across. Now, the real money is up in those mountains.

"Get the gate, Koger."

Propst's son—eighteen years old, thin and straight as a pencil—climbs out of the Scout. He is dressed in cowboy boots, Levi's, and a T-shirt. It is the same outfit the kids in Denver are wearing.

Propst drives the Scout down a rutted trail to the first of the eight windmills. He is out here to check them and to get on with the breeding of his herd.

"We've got an AI program going out here, and we have to check the heifers just about every day."

AI is artificial insemination.

"We're breeding Simmentals. It's a European breed that has gotten popular over here in the last ten years. But you can't import animals directly from Europe. That's to keep out the hoof-and-mouth disease. So you import the semen. Then you artifically inseminate the heifer. Her calf will be a half-breed. You artifically inseminate that calf, and you get a three-quarter-breed And so on until, theoretically, you've got a full-blooded Simmental."

There are seventy or eighty animals around the first windmill, which is paddling along faithfully, pumping water into a large holding tank. Three or four animals are drinking lazily from it; the others are idly grazing or simply standing in that cone of bovine indifference that is the expression of cows everywhere.

Propst points out half- and three-quarter-breed Simmentals." See that bull over there?" he says pointing to a bulky animal that looks muzzled. "That's what we call a Gomer. His penis has been fixed so he can't actually breed a heifer. But he still has the urge, and he'll mount one when she is in heat. That muzzle has a paint roller in it so when a Gomer mounts a heifer, he leaves paint marks on her back. When we come out and find one with paint on her back, we know right away that she's ready to breed."

Propst drives the Scout around the herd, checking the heifers for paint marks. "I don't see any that are marked up. Do you, Koger?"

"Nope."

"Well let's go take care of that one we've got over in the corral."

The Scout lurches along the ruts, springs, and shocks, creaking with each bounce. A mile from the first windmill, Propst arrives at a small corral with a squeeze chute—a nervous heifer is pacing in one of the pens. Inside an equipment trailer, there is a large tank filled with liquid nitrogen to keep the Simmental bull semen a couple of hundred degrees below zero. Propst pulls a single vial from the tank and slowly thaws it in ice water. "I don't know how they figured this system out, but it works," he says. "You've got to keep it real cold until right before you use it. Then you warm it up just so much. Too much and you kill it."

When everything is ready. Propst and his son go back outside. Propst uses a leather surrey whip to force the skittish heifer down the narrow squeeze chute. The animal bolts.

"Damn. She acts like she's crazy."

Finally the heifer moves into the chute and down to the end where Propst's son springs a head gate and she is caught. She bellows and stomps, then quiets down.

Koger does the work. He raises the heifer's tail and forces his right arm, which is covered to the elbow in a sheet of clear plastic, far up the animal's dung-encrusted anal canal. With his hand, he massages her to make her receptive. Then with his left hand he runs a long, thin plastic tube up the vaginal opening, past the cervix, The valuable semen—it costs $15 to $25 a vial—will pass through this hollow plastic tube. The animal is still skittish. While Propst is paying attention to something else and before his son can force the semen through the tube, the animal bellows and sits down.

Propst's son tears the fouled plastic sheet from his arm in disgust and tries to prod the animal to her feet. The heifer only bellows.

"Here, let me help you," Propst says. "I didn't know you were having trouble." Propst stands by with a battery-powered prod in case the heifer should try to sit again, while his son repeats the procedure with his plastic-encased right arm and the plastic tube. This time, it takes. While his son returns the equipment to the trailer and makes some notes in a record book, Propst releases the panicked heifer. She will go back to the range to find the calf she bore in March; it will be weaned in the fall; and she will bear again in the spring. This is the first day in a cycle that keeps Keith Propst and his family on the land.

Farming is perhaps the least understood and appreciated of all the ways an American can go about making his living. Nobody understands things like parity and yields and acreage quotas—except the people who must understand them or go broke and the people who make the rules. American agriculture is so successful that for most consumers, food simply comes from the grocery store. It is always there, and when the price goes up, there doesn't seem to be any good reason for it. And since food is the *essential*, price increases lead to outrage. The fact that one farmer can produce enough to feed himself and fifty-six others and that the average American spends only eighteen percent of every dollar to eat doesn't make much difference, even though those figures are remarkable in this world. Unique.

But agriculture remains about as low in the interest and esteem of most Americans as . . . as what? Blue-collar workers are having their day in movies and books; coal miners were big not long ago; truck drivers and their radios have become a folk cliché. But it will probably never happen for farmers—not because what they do is too simple (what could be more simple than driving a truck?) but because it is too hard. And because, for the most part, it gets done so well.

Talking to Keith Propst and men like him, you learn about cow-calf operations; feedlots; backgrounders; speculators; champion breeders; breeds that started in England, India, France, and Switzerland. You learn the reasons why one farmer goes with Charolais and another with Angus and the thousands of variables that enter each equation.

Keith Propst's operation is a good place to start looking at cattle ranching because he does several things. The whole point of his operation and of the entire industry is to raise cattle to slaughter weight as efficiently as possible.

With Propst, it begins out on the range with a breeding herd more or less stationary in number. He can add heifers—and their calves—when he thinks the price will justify it.

The calves feed from the udder for about six months. "One of the reasons ranchers are high on Simmentals is that they are better milk producers than the English breeds. The Swiss use them as a combination beef producer and dairy cow. So the calf will be a little heavier when she's weaned. All calves lose a little at first when you wean them. They're bawling and looking for mother for three or four weeks. It's a real stressful time for them. So that little extra counts."

After the calf is weaned, it "goes to grass." This takes the animal from about 400 to about 600 pounds. It can be done on a range or pasture or field of cutover crops, which is the method Propst uses. His short yearlings (animals that have been weaned but aren't a year old yet) feed in his corn and sugar beet fields, then go back to the range until the steers weigh about 700 pounds and the heifers about 600. These yearlings are ready for the feedlot.

Virtually all beef cattle are "finished" in feedlots. Fed properly, a yearling can gain almost three pounds a day in a feedlot and reach slaughter weight in 120 to 150 days. The steers are ready at 1,100 to 1,200 pounds; the heifers, at 900 to 1,000.

There are several advantages to the feedlot, which is no more than a pen where a number of animals are crowded and fed a carefully balanced and very rich grain diet along with some mineral supplements. The animals eat and drink, sleep and defecate—nothing more, until they are ready to be shipped for slaughter. Because they are confined and inactive, they cannot burn many calories or manufacture any tough muscle. They gain good tender weight very fast.

Propst's feedlot is small: 1,500 animals. Some have come from his own breeding herd, and some he has bought from cow-calf operations as far away as Georgia.

There are lots that feed several thousand animals bought from cow-calf operations or from backgrounders who put weaned calves on grass for the few months it takes to get them up to sufficient weight for the feedlot. It is an age of specialization in all things. But Propst breeds his own cattle, fattens them in his own lot, and raises the food—mostly corn—for the lot on his 900 acres of irrigated land along the river valley. He buys additional cattle when he thinks the price will be right and the grain to feed them when its price is low.

Then comes the hard part, the aspect of ranching that makes it so tough. When Propst's cycle is complete and when the animal that he has bred, weaned, grazed, and fattened reaches a slaughter weight almost three years after its conception—perhaps at the end of a plastic tube—Propst must sell. He cannot keep feeding the cow and waiting for a better price in a month or so. If the animal goes on eating and gaining weight, "it'll get all wastey. Too fat. The price will go down and it'll cost money to feed, besides."

Propst knows how much it has cost to bring the animal to slaughter weight, so he knows how much he is losing—or making—on each animal he sells. When every animal sells at a loss, there is only one thing to do: You cut losses by selling fewer animals—which means, ultimately, breeding fewer animals.

"This thing works in cycles, and it always has," Propst says, irritated that people can't see how *simple* it all is. "When the price is way up, everybody wants to be grazing a few steers. The big feedlots can't buy enough yearlings. So the cow-calf operations go to work and breed more animals because everybody wants them. Then pretty soon you've got a surplus. So the price falls, and everybody who was making money starts losing and wants out. The wheat farmer who was feeding sixty head when the price was up says. 'To hell with that beef stuff, I'm sticking with wheat.' So he doesn't buy any calves. The demand goes down and the cow-calf operators don't breed as much. Pretty soon the supply gets back down, and the price goes up again. That's the way it works. We're ready to take the three or four bad years if we can just count on that one good year to make up our losses. We'd like to make up a little for inflation, too. Just like everybody else."

It takes two hours to check the remaining windmills once the skittish heifer is bred Propst drives the Scout across the hard scrabble terrain and explains the intricacies terrain and explains the intricacies of his trade: when to breed; when to wean; when to castrate; salts and supplements; inoculations; machinery; weather.

"One of the things about this part of the country is that we have about as good a weather as you could want for cattle. It gets cold in the winter, but we don't see the snow they get up in some of those mountain pastures, where they have to fly in hay with a helicopter. That'll run your costs up for sure."

The Scout comes over a small ridge and below, in the shade of a bent and crippled old cottonwood tree, are eight mule deer. They are up quickly, moving across the range in single file.

"I used to hunt a little," Propst says. "But the season comes right at the busiest time for us, and I don't fool with deer hunting anymore. We do some duck hunting, though."

Propst checks the last windmill, then leaves the scrub range and drives back to the lush valley of the Platte River and home for lunch.

"There's another thing," he says as we drive along the riverbank. "The EPA [Environmental Protection Agency] has set a deadline for cleaning up the river. It's never been a fishing river. There's some fish in it, but it has always been used for farming. For irrigation. But the EPA says that if you take water out to irrigate, then it has got to go back in clean as it was when you took it out. And you can't do it.

"But that's what the EPA wants, and it'll just mean the end of farming in this valley. They keep extending the deadline. And we'll probably get an exemption through Congress. But you have to wonder if those people know *anything* about farming."

Lunch is a big hot meal, the kind that sends you away from the table, especially on a hot day, desperate for a nap: roast beef, squash, potatoes, a salad, ice cream. Nell Propst, a small woman—petite in the appropriate word, in her case—and a very gracious hostess, presides at the table and says grace. Koger and his twenty-year-old brother Joel and his sister Holly, seventeen, are there.

During lunch, I learn more about how much there is to farming. In addition to EPA and its water standards, farmers and ranchers these days must cope with the most ubiquitous and despised of all the regulatory agencies: Occupational Safety and Health Administration.

"You know what they say about farm

animals?" Nell Propst asks. Her tone is a blend of indignation and wonder. "They say you can't have livestock within five hundred feet of a house. We've always had horses in the pasture right out behind the house. We like to have them there, so we can look at them and go out and ride them when we want to. Now it's illegal."

Keith Propst laughs, and laughs heartily. "I suppose the idea was to keep people from putting workers' shacks out in the middle of the same field where they were slopping pigs. But they don't say that. It's 'no animals within five hundred feet of any house,' and that's it."

"Well, what was that other one, Dad, the one about toilets out on the range?" Propst's son asks.

"Oh, they made some ruling about how nobody could work more than three or four hundred yards from a toilet. So I'd have to put those portable Johnnies all over ten thousand acres of land to be in compliance.

Propst laughs again. It is his most engaging characteristic. When he talks about things that usually turn a man's face into a mask of nearly unmanageable anger, Propst laughs. He probably figures that it is all he can do.

"The thing is," Propst says, "there are farmers around here who would go broke if they tried to do everything right. So they just figure on doing nothing right and hope they don't get caught. Either way, they go broke. It breeds disrespect all the way down when you have these rules that don't make any sense."

At a cattle auction and a slaughterhouse, there is more to learn. A weary man who buys live animals and sells cold slabs of beef over the phone says, "I don't know why Carter is picking on us. The price of everything else is allowed to go up two or three times. Beef isn't even essential. It's a discretionary item. If you don't want to pay the price of beef, you can eat chicken or fish or pork. You know what is essential for most people: a god-damned car. You don't have any choice about buying a car in this society. I need to have a car even if it means I've got to leave eight thousand dollars sitting out in the parking lot every day. Cars go up every year, and nobody says anything."

At the auction, Propst quietly guesses the final price of each lot before the bidding starts. He is usually right and never off by more than twenty-five or fifty cents.

"Those heifers have got a little pink-eye. They won't gain so well for a week or more. Won't get much for them." He guesses forty-three cents a pound, and they sell for forty-three and a quarter.

"Those steers will go for about fifty-nine. They're good yearlings, and some backgrounder can use them for cheap gain."

"That heifer is a little too wastey for its age—probably belonged to some kid who bucket-fed it."

Two hundred miles south, in Lamar, there is more to learn at the meeting of the Colorado Cattlemen: about the way the banks have carried ranchers for the last three years.

A banker who specializes in agricultural loans says that the small banks have already reached the limit: "They just couldn't use any more of their depositors' funds. So you are starting to see some bankruptcies. Some people, who are diversified, like Keith Propst, are going ahead, but very cautiously.

"There are smaller, less diversified operators who are selling," the banker continues. "Big corporate operations come in, and they seem to be able to smell a situation that is right for a sale. They are very tough: They know when a man is desperate, and they drive a hard bargain. But they pay cash.

"But they aren't really interested in the farming end of it. I was talking to one of their people the other day, and he said they were satisfied if the land appreciated and they could increase the capital value. They weren't in it for income.

"This spring there was some optimism in the air for the first time in three years. Both the bankers and the farmers were seeing a little daylight. Then Carter made that decision. It was the most demoralizing thing he could have done." The banker speaks with genuine regret. He knows these people and has seen them through hard times before. Like them, he hates to see the land taken over by big outside money.

Finally, there was the marker. It said more than anything else would about a way of life that men like Propst value and that is threatened by inflation and the expedient measures politicians have used to fight it.

At lunch, I asked if the house was on the same site as the original Propst settlement.

"Oh, you've got to show him the marker," Nell Propst said.

After lunch, full and sleepy, I went with Keith Propst to a small plot next to his front yard. There were two blue spruce growing there. "They got those in the mountains," he said. Then he showed me the centennial monument. It is almost five feet tall, cut from marble, and it sits on the site of the original Propst cabin, in Colorado. The inscription reads:

MICHAEL V. PROPST FAMILY MEMORIAL

This marker commemorates the centennial of the settlement of the Propst family on the South Platte River near Buffalo, Colorado, which is now Merino . . . Michael V. Propst and the other family members left Pickens County, Alabama, and arrived in this area on April 7, 1876. They came . . . to find land and to build homes. They developed cattle ranches, farms, and businesses. They helped establish schools, churches, irrigation systems, and communities. They served their nation in peace and war and left a legacy of love of country and faith in the future.

"We had a centennial celebration to dedicate it," Propst says. "My brothers came in from Florida and Michigan, and my sister came from Arizona. Nell has a degree in drama, and she wrote a play that we put on. The whole thing sort of moved you." ●

## WHAT THE DOLLAR DROP COSTS US

● Mr. JAVITS. Mr. President, on August 17, I addressed my colleagues about the serious consequences of a continued decline in the value of the dollar. At the time I explored the effect of the dollar's decline on the U.S. economy and especially on inflation and suggested a three-part approach to strengthening the dollar.

The recent actions of the administration and the Federal Reserve Board with respect to gold sales and interest rate increases are positive steps; but unless accompanied by serious moves to combat inflation and improve our balance of trade, these moves will not strengthen the dollar in the long run. The foreign exchange markets are waiting anxiously for further moves, and I hope that the administration will continue to face the problem forcefully.

At the time of my speech I indicated that the administration's policy, which I labeled as the "politics of despair," would, if continued, have serious negative effects on the U.S. and world economies.

In an incisive article entitled "What the Dollar Drop Costs Us" in the September 5 edition of the Washington Star, Lee Cohn dealt with these concerns in a very intelligent and analytical manner. He provides excellent documentation in support of the view that the decline of the dollar is "making Americans poorer and their lives harder" and will have serious effects on our ability to fight inflation.

Furthermore, he says that the decline in the dollar can have only a deleterious effect on the prestige of the United States in the international arena. Not only is Mr. Cohn's analysis good economics but it is also good journalism in that it explains the problem very coherently and intelligently.

Mr. Chairman, I commend this article to the attention of my colleagues and ask that it be printed in the RECORD.

The article follows:

[From the Washington Star, Sept. 5, 1978]

WHAT THE DOLLAR DROP COSTS US

(By Lee M. Cohn)

A basic economic fact, often obscured by sophisticated theories, at last is dawning on the Carter administration: The decline of the dollar abroad is making Americans poorer.

Ordinary people always have worried vaguely that it is bad for the dollar to fall in value. Those fears reflect ignorance and outmoded nationalism, many economists contended in the past. Some of them still scoff.

Devaluation or depreciation of the dollar boosts U.S. production and creates jobs, they have argued. The Nixon administration boasted that its two formal devaluations were triumphs of strategy and policy. Until recently the Carter administration welcomed the decline of the dollar as a boon to the economy.

Now the administration is starting to wonder about the claimed benefits of a falling dollar and seeing some drawbacks—though still not recognizing all the harmful effects. For President Carter and most officials, the new perspective on the dollar is only a glimmering, not a flash of light.

Carter now is trying to halt or cushion the fall of the dollar, but it is too late to save the country from all the painful consequences. A declining dollar:

Raises prices paid by American consumers for imported and domestic goods, while cutting prices paid by foreigners for American products.

Limits the quantity and variety of goods Americans consume and enlarges foreign consumption, thus lowering standards of living in the United States and raising standards of living abroad.

Increases costs of foreign travel by American tourists and business executives, and living expenses of civilian and military personnel stationed abroad.

Encourages foreigners to invest in the United States and deters Americans from investing abroad, shifting assets and future earnings from Americans to foreigners.

Heightens pressure for oil price increases.

Erodes the value of monetary reserves, savings and other financial assets held by governments, businesses and individuals.

Creates uncertainty and turbulence, which can disrupt financial markets, discourage investment, curtail trade and depress the world economy.

Compels the United States to restrain domestic economic growth.

Weakens U.S. prestige and power in international affairs.

A negative list like this makes it difficult to believe that U.S. policies ever pushed the dollar down deliberately. Yet the Nixon administration called its two devaluations

"good for the economy and a triumph for rationality over superstition." Though less openly, the Carter administration also encouraged the decline of the dollar until recently, and still is not fully convinced that a strong rise would be a plus for the United States.

The argument favoring a declining dollar rests on the price effects and their presumed impact on U.S. production and jobs.

West Germany's mark was pegged at 3.66 to a dollar, giving it a value of 27.32 cents, before the dollar devaluation of December 1971. In the worldwide realignment of currencies carried out then, the official value of the dollar was lowered to about 3.22 marks and the mark was raised to 31.03 cents. A second devaluation in February 1973 lowered the dollar to 2.9 marks and raised the mark to 34.48 cents.

Then the leading nations gave up trying to fix currency values and decided to let them "float"—rise and fall more or less in response to supply and demand in the markets, with only limited government intervention. The dollar has dropped in 5½ years of floating to about 2 marks and the mark has risen to about 50 cents.

Since December 1971 the dollar has dropped from 360 Japanese yen to about 190. The dollar also has declined substantially in terms of most other major currencies, with the notable exception of the Canadian dollar, which has been even weaker than the U.S. currency.

At present exchange rates, an American consumer pays $5,000 for a Volkswagen priced at 10,000 marks or a Toyota priced at 950,000 yen. If the 1971 exchange rates were still in effect, a 10,000-mark Volkswagen would cost only $2,732 and a 950,000-yen Toyota would sell for $2,639.

Americans logically should buy fewer autos at the sharply higher dollar prices, and should buy more U.S.-made cars. U.S. production and employment should rise. Imports of autos and some other goods have been declining, in fact, though not to the extent indicated by theory.

On the flip side, the decline of the dollar has lowered prices of U.S. goods in foreign currencies. A $50,000 American-made machine cost a German company 183,000 marks and a Japanese buyer 18 million yen in 1971. At today's exchange rates, a $50,000 machine would cost only 100,000 marks or 9.5 million yen.

The impact of dollar depreciation on prices has helped boost U.S. exports though not as much as theoretical computations suggested.

Price effects have been diluted by competitive forces. Trying to maintain sales here, exporters and importers of foreign goods sometimes shave profit margins or reduce production costs through improved technology to limit price rises. U.S. companies may fatten profit margins by raising prices on their exports.

Foreign countries may tighten restrictions on imports and subsidize exports, offsetting part of the U.S. price advantage. Americans prefer some foreign goods for quality, style, prestige or other reasons, and are willing to pay premium prices. U.S. companies sometimes fail to understand what their foreign customers want.

Even if the decline of the dollar is fully reflected in prices and customers react according to formula it will take time and hard effort to reduce the U.S. trade deficit—the excess value of imports over exports.

At 3.66 marks to a dollar, 1,000 autos priced at 10,000 marks each earned Germany a little over $2.7 million. If the dollar's fall to 2 marks reduces sales to 900 autos priced at 10,000 marks, Germany's earnings rise to $4.5 million. To hold dollar earnings down to the previous level, it would be necessary to reduce sales to 546 autos, and deeper reductions would be needed to lower earnings.

Sale of 100 machines at $50,000 each to Germany earned 18.3 million marks for the United States under the old exchange rate. At the present rate, an increase in sales to 125 machines would reduce earnings to 12.5 million marks. To earn 18.3 million marks, the United States would have to sell 183 of the machines.

Thus, the trade account at first may get worse instead of better. Any improvement will require the American economy to climb a steep, slippery slope. Export earnings in foreign currencies will rise and import payments will decline only if the price shifts cause very big gains in the volume of U.S. sales abroad and sharp reductions of purchases.

That exposes a flaw in the theory that depreciation of the dollar is good for the country. Even if U.S. production grows and jobs are created, the decline of the dollar makes Americans poorer in a basic way: They are paying more for less goods, and earning less for producing more.

Inflation is a big element in the impoverishment. Depreciation of the dollar directly raises prices paid by American consumers for imported products. Costs of imported raw materials and components also rise, boosting prices of American-made goods with foreign ingredients. And higher prices on imports ease competitive pressures on U.S. manufacturers, allowing them to raise prices higher than customers would tolterate otherwise.

Dollar depreciation and inflation feed on each other, whipping up an accelerating spiral. As the dollar falls, inflation quickens, and faster inflation pushes the dollar still lower.

The kind of inflation caused by the dollar's decline internationally is worse for Americans than home-grown inflation, because it discriminates against them and favors foreigners. Imported goods cost Americans more than consumers in the producing countries. American-made goods are sold cheaper abroad than in the United States.

Dollar depreciation has about the same effect as a tariff increase in raising prices on imports. Like a high tariff, the decline of the dollar may protect U.S. producers and their employees from import competition, but it's hard to see why consumers should cheer higher prices.

How would a consumer in Virginia benefit if a tariff to protect jobs and profits in his state raised the prices of products made in Maryland?

Price cuts help consumers, and U.S. producers are free to lower prices whether the dollar is rising, falling or holding stable. The special wrinkle in dollar depreciation is that it reduces prices of U.S. goods sold abroad, without cutting prices on the same goods at home.

If Maryland producers cut prices on goods sold in Virginia, but held prices up in Maryland, Virginians might be pleased but wouldn't Marylanders complain?

Higher prices, by definition, reduce purchasing power. If American consumers pay more for imports they continue to buy despite the decline of the dollar, they will have less to spend for other domestic and imported goods.

To be a success, depreciation of the dollar must reduce U.S. imports and increase exports. That means Americans will consume fewer goods with less variety, while foreigners will consume more. The U.S. standard of living will decline, or will not increase as fast as if the dollar were strong, and standards of living will rise abroad. That's another way of saying Americans will be poorer and foreigners will be richer.

Total consumption of goods by Americans, not just imports, will be held down if depreciation of the dollar works as intended. If a country has a trade deficit, its residents consume more than they produce. If there is a trade surplus, they produce more than they consume.

A trade surplus may increase production and employment. But do people work just to earn money, or to buy that they want with their earnings? How will Americans benefit if they produce more goods for Germans and Japanese to consume and less for themselves?

In fact, the United States has no choice but to reduce its trade deficit and move toward a surplus to pay its way in the world. This country has been spending much more abroad than it could earn. It has been paying foreigners with dollars, which have piled up as IOUs abroad. Foreigners could have spent the dollars here. They did not because they could get more for the money elsewhere.

The U.S. trade deficit is in a sense a measure of credit extended to this country by foreigners. U.S. imports exceeded exports by $26.5 billion last year and the deficit totaled $19.3 billion in the first seven months of this year.

Now the credit is running out. Depreciation of the dollar means the OIUs are being discounted. Americans must put up more dollar IOUs to obtain 1,000 marks or 1,000 marks worth of goods. If big trade deficits continue to enlarge the glut of dollars, the discounts will be deeper.

The United States must import less because this country no longer can afford to import more, not because it benefits American consumers to import less. And the United States must export more to earn its way—to pay for imports and avoid piling up more IOUs abroad—not because it helps most Americans to sell more goods to foreigners at lower prices.

Travel is a form of consumption, and the impact of dollar depreciation is similar to the effects on trade in good. American tourists and business executives traveling abroad are paying more to obtain less, while foreigners traveling in the United States are enjoying bargains.

Discretionary foreign travel by Ameriacns will be curtailed, or will grow more slowly. Civilian workers and military personnel stationed abroad cannot afford to live as well as before, unless their salaries are raised to compensate for the dollar's drop.

Just as a foreigner can buy more U.S. goods than previously with the same amount of marks, yen or other currencies when the dollar declines, foreigners can buy more stocks in U.S. corporations, build more plants here and expand other forms of investment. It costs more for Americans to invest abroad.

Foreign investments here expand the economy and create jobs. But the investments transfer U.S. assets and future earnings to foreigners, which could make it even harder to balance international accounts. Depending on the pattern and extent of the investments, foreigners could gradually take control of important sectors of the American economy.

Curtailed U.S. investment abroad would reduce potential earnings and limit growth of American-based multinational corporations. Some Americans say multinationals shift production and jobs out of this country. However, foreign subsidiaries also buy goods from their parent companies here.

The fall of the dollar aggravates oil price problems. Most oil producers set prices in dollars and take payment in dollars. As the value of the dollar declines, the real price of oil falls. That is, $14 received by Saudi Arabia for a barrel of oil will buy substantially less in Germany and elsewhere now than a few months ago.

Pressures are growing to raise the dollar price of oil, at least to stay even. Alternatively, some oil producers want to base prices on a "basket" of currencies to protect themselves. If the dollar continued falling, the price stated in dollars would rise automati-

cally. Either way, inflation would worsen in the United States and other oil importing countries.

Also discussed recurrently, but less likely to happen, is a switch from dollars to other currencies for oil payments. That would sharply reduce demand for dollars abroad, probably leading to further depreciation of the U.S. currency.

Aside from specific consequences in trade and other areas, the decline of the dollar hurts the U.S. and world economies in ways that are harder to measure but may be even more harmful.

The dollar is the world's main store of value. Governments hold most of their reserves in dollars. Businesses and individuals all over the world hold savings and other assets in dollar deposits and investments. When the dollar falls, those reserves, savings and assets lose value, which can upset financial plans, weaken governments, undermine banks and corporations, and disrupt markets.

Dollar holders fearing losses unload dollars, which pushes the value of the currency still lower.

Actual losses on the dollar are painful, and uncertainty can be as damaging. If the dollar fluctuates wildly and no one can reasonably estimate its value next week or next year, it is difficult to negotiate prices on goods to be delivered or terms of loans. Companies cannot predict confidently whether potential investments would pay off.

To protect themselves, investors and business executives may demand big premiums to cover risks, or they may play safe by curtailing investments, orders and other commitments. Such caution can reduce international trade, curb economic expansion and perhaps push the world into a recession or depression.

Even if severe disruptions can be prevented, the United States must defend the dollar and the defensive actions will include tigher credit and budget policies. The purpose is to restrain the U.S. economy in order to fight inflation, limit imports and increase exports. Restrictive policies may curb economic growth throughout the world, not just in the United States.

Beyond economic consequences, depreciation of the dollar hurts the United States in world politics. A sagging dollar limits what this country can afford to do abroad. The dollar's fall reflects unfavorably on management of the American economy and shakes confidence in U.S. leadership internationally. U.S. prestige and clout suffer.

The decline of the dollar signals that the U.S. economy is weakening. No country with a weak economy can be strong in world politics.

This nation's political stability, the depth of its financial system and the remaining strength of the economy despite recent deterioration have limited the damage so far. However, the margins of safety are shrinking rapidly.

Depreciation of the dollar is not a grand strategy. It has been forced on the United States as a result of the economy's failures and dissipation. If opportunities are not wasted, the dollar's decline can be a first step toward rehabilitating the economy.

But in the meantime, Americans will be poorer and life will be harder.●

## NATIONAL HISPANIC HERITAGE WEEK

● Mr. HART. Mr. President, the week of September 10–16 has been declared National Hispanic Heritage Week by President Carter. I am pleased by this formal recognition by the President of Hispanic people and their culture. In my home State of Colorado, persons of Latin descent comprise a large percentage of the population, and their contributions and culture have left an indelible imprint on our western way of life—from the names of our towns and streets, to the clothes we wear, to our rodeo and ranching vocabulary.

Executive branch officials will be conducting hearings in selected cities across the Nation, including Denver, to hear the views of Hispanic people on current economic and social issues. I intend to study carefully the testimony presented at these hearings, and intend to do my best to work with the administration in its efforts to meet the needs identified.

Again, I commend the President on his efforts to recognize, understand and assist the Hispanic/Chicano community. I hope that the President will continue his efforts in this direction, and join my colleague Senator PERCY in urging the President to fill one of the two vacancies for the position of Commissioner in the Equal Employment Opportunity Commission with a person of Hispanic descent. Although Hispanic people constitute the second largest minority in this country, there is not currently an Hispanic Commissioner in the EEOC to represent their interests and needs. It would be a visible and substantial demonstration of administration concern if the President provided Hispanic participation in the important work of this Commission.●

## EDITORIAL OPPOSES D.C. REPRESENTATION IN CONGRESS

● Mr. TOWER. Mr. President, the resolution proposing a constitutional amendment giving the citizens of the District of Columbia full voting representation in the Congress of the United States is now before the legislatures of the several States for consideration.

The rationale for and against approval of this issue has been both extensive and varied. One of the best arguments against its adoption has been presented in an editorial appearing in the August 31, 1978, edition of the Groesbeck Texas Journal.

In order that my colleagues and others may have the benefit of its contents, I request that the subject editorial be printed in the RECORD.

The editorial follows:

DO WE WANT A NEW STATE 1/14TH SIZE OF LIMESTONE COUNTY

Many, many bad ideas have come out of Washington down through the years, but the worst and most sinister idea ever hatched in the halls of state in our Nation's Capitol broke forth from the shell of skulduggery up there last week.

This very bad idea is to add a 51st state to the United States and to make this 51st State the City of Washington, D.C., with a population of 756,510 residing in an area of 67 square miles, approximately one-fourteenth the size of Limestone County.

But size and population has nothing to do with whether or not the District of Columbia should be a state. It should not become a state because that would go directly contrary to the purpose of its creation.

The District of Columbia and the brand new city of Washington were created in 1790 to be the nation's capital. Congress convened there for the first time in 1790 and has been convening there ever since. Prior to the establishment of the seat of government in Washington, D.C., the capital had been at intervals in four different states, Pennsylvania, Maryland, New Jersey, and New York.

During this period of uncertainty as to which state the capital of the world's newest nation should be located, the compromise plan evolved that the capital would be located in one of the thirteen states but in a district separate and apart from all the states. The creators of this nation not only desired that all men have equal rights but that none of the thirteen states should have advantage over the other twelve by having the nation's capital located within its boundaries.

Both Virginia and Maryland ceded contiguous land for the creation of the District of Columbia but only that of Maryland was used. The wisdom of this arrangement has been praised throughout the world.

Why is that now 188 years later the majority membership of the House of Representatives and the U.S. Senate has suddenly decided that the Congress of 1790 was wrong? There are several reasons and each of them is bad, selfish, and sinister, and most of them induced by political pressure and intimidation.

These reasons will be discussed in future issues of The Journal. Right now let's praise those founding fathers who created the District of Columbia for also undergirding their new nation with a Constitution that is not too easily changed. In order for the District of Columbia to become the 51st state it will take ratification by 38 of the present 50 states for the U.S. Constitution to be amended to make this possible.

Let us hope that none of the fifty states is so foolish as to ratify this preposterously foolish amendment, and let us take particular pains to see that the Texas Legislature doesn't.●

## LIBERALISM IS NOT DEAD

● Mr. MCGOVERN. Mr. President, during the clamor of recent times predicting the death of liberalism, I have been among those who have denied that liberal government is over. I believe, in fact, that a positive, dynamic role for the Federal Government is both a necessity and a desirability in American society. That has been my view for many years, and I see nothing in the current complexity of American life to indicate a diminishing role for government.

It is thus with some personal pleasure and satisfaction that I read Mr. William Greider's excellent piece in yesterday's Washington Post, supporting this view in a most compelling way. Mr. Greider, one of our most perceptive political writers, bases a considerable portion of this article on an important new book by Professor Edward R. Tufte, entitled "Political Control of the Economy."

I ask that this seminal article by Mr. Greider be printed in the RECORD.

The article follows:

(By William Greider)

Every few years, something comes along in public affairs, an outburst of public anger or stupendous scandal or whatever, which provokes a chorus of premature obituaries. Liberalism is dead. The New Deal is over, finally. Government is too big, too powerful. The people have spoken.

We are in one of those seasons now, stimulated mainly by the genuine public rage at government and taxes.

Corporate propagandists are busy proclaiming a new era of laissez-faire in which business is free at last, free at last from the heavy hand of meddling bureaucrats.

The anvil chorus of political pundits has

identified a "conservative tide" sweeping the land and boiled it down to simple-minded shorthand: The voters want less government, and that is what the smart politicians are promising them.

This fashionable chatter is not totally bilge. But it's mostly bilge.

The businessmen and political seers who think the nation is heading into an era of less government are setting themselves up for a severe case of whiplash, for the political necessities are headed in the opposite direction—toward greater government spending, toward much more serious government intervention in the private economy. If you're looking for a shorthand phrase, it might be more accurate to predict a period of "neo-liberalism."

Here is an alternative version of what to expect, a forecast which is prudently based upon the fundamental economic-political rhythms of modern American democracy:

Sometime in the next 15 months, the Carter administration, notwithstanding its previous rhetoric, will become strikingly more "liberal"—perhaps abruptly so. Congress, despite the usual carping and criticizing, will go along happily with this leftward turn.

This "liberal hour" for Jimmy Carter will be expressed in many ways. A plausible hunch list would include the following:

The Carter government will move to implement direct control over price increases, perhaps wage increases too, once all the voluntary measures have failed to control inflation. Simultaneously, it will begin to pump up the national economy, creating a government-induced boomlet, a temporary prosperity that will extend through 1980.

This will be accomplished by pulling the economic levers available to every president and usually used at election time: By loosening fiscal policies to step up economic growth, stimulating more production, more jobs. By delivering huge chunks of additional cash to voters through tax cuts and increased social-welfare programs. By leaning on federal agencies to step up their distribution of federal largesses, the billions of dollars in government grants which add jobs, construction projects and other tangible benefits to local economies.

If Jimmy Carter does all these things, if he does them wisely and well, his current low standings in the public opinion polls will become as irrelevant as last season's batting averages. By 1980, a grateful citizenry will reelect him to a second term.

If Carter rejects these economic imperatives or botches them or waits too long in his response, then he may well be remembered as the first one-term president since Herbert Hoover. In politics, courageous principle translates as stubborn foolishness, after one loses the election.

Does all this sound far-fetched? This scenario for Carter is a precise description of what Richard Nixon did to win reelection in 1972, confronted with quite similar problems—soaring inflation and sagging popularity. In general terms, leaving aside the extreme "liberal" solution of wage-price controls, the scenario describes the left-ward economic turn taken by every modern president, save one, as they approached national elections. The exception was Dwight D. Eisenhower, who stuck with his conservative economic policies and won a landslide victory anyway (but Ike's policies lost Congress to the Democrats three times and lost the 1960 presidential election for Nixon.)

Jimmy Carter, in any case, is not Ike. At the moment, Carter's unpopularity is more comparable to Nixon's in the spring of 1971, when the pundits were likewise predicting that Nixon would be a one-term president.

What changed, among other things, was that Nixon suddenly imposed old-fashioned liberal remedies in the grossest manner. An awkward regulatory lid was clamped on all prices and wages. The spigots were opened for an awesome pump-priming of federal dollars. By the autumn of 1972, Americans were "feeling good." The GNP in the final quarter of that election year jumped upward by an extraordinary 11.5 percent—nearly three times the normal growth rate. Nixon aided by the ineptness of his Democratic opposition, won by an historic landslide.

It is fatuous, of course, to predict flatly that this president will follow the exact behavior of that president or any other president. History doesn't repeat itself mindlessly. But history does offer us patterns and probabilities in public affairs, a strong cycle which reoccurs with such regularity that these patterns—not the short-term controversies and outbursts—are the true baseline for judging the shifts and turns of public policy.

No one, of course, would argue that Nixon's economic tricks were the only factor in this '72 landslide, that any president has omnipotent control over the economy, or that economics is the only issue in presidental elections. But the "liberal hour" is a fundamental rhythm in national politics, usually ignored and often misunderstod, yet crucial to most elections.

It was the late Adlai Stevenson, a man of ideas as well as wit, who coined that phrase. There is a brief period in American politics, he said, that moment just before national elections, when even the most obdurate conservatives bend themselves toward the liberal political ideas which serve the "greater good" and, of course, the greater number of voters. Every politician in national life knows this intuitively, the smart ones anyway, but it is hardly a fit subject for public debate. It just happens, year in and year out, without any headlines.

Fortunately, the political-economic cycle of the "liberal hour" now has been confirmed in an important new book, "Political Control of the Economy," by Yale political scientist Edward R. Tufte. With persuasive evidence, Tufte describes the biennial economic surges which flow from politics in even-numbered years of federal elections, strongest in the years when incumbent presidents are seeking reelection, but also present in "off-year" election seasons like 1978 when Congress is on the ballot.

The rhythms are quantified by Tufte: With extraordinary consistency, the American economy prospers more in election seasons. Unemployment is lower. Inflation is more likely to be under control. The national economy grows at twice the normal rate. Real disposable income—the cash which people have to spend after taxes, after inflation—increases twice as fast when a president seeks reelection as it does in odd-numbered years.

Tufte also found that the Federal Reserve Board, notwithstanding its alleged independence from politics, usually cooperates with the political surge in the economy. Except for the Eisenhower years, the rate of growth in the money supply usually increases in the biennial periods prior to presidential elections, and decreases afterwards.

The techniques of political management which produce these surges are also described, with great clarity, by Tufte. Some are obvious and well known: the government cuts taxes in election years but raises taxes in odd-numbered years. It increases the direct distribution of money to voters in election years. Social Security benefits, veterans' pensions and other social welfare programs.

Other techniques, revealed by Tufte's research, are not so obvious. Most government grant programs, he discovered, also go through a mysterious autumn surge of distributing cash in presidential election years. In the fall of 1972, for example, the quarterly flow of federal grants jumped by an extraordinary $12 billion, up by one-third. After the election, when Nixon began impounding every program in sight and turning off the spigots, the federal outlays shrunk dramatically.

Tufte asserts—and the political memos from the Nixon White House confirm—that intense political pressure was exercised on federal agencies all over the town, pushing them to deliver the bucks faster. Most sensible bureaucrats will cooperate with their president when he tells them to spend more.

WIDE PUBLIC SUPPORT

Reasonable citizens will disagree about the propriety of the "liberal hour," based on their ideological preferences or their notions of how government is supposed to behave. Conservatives or good-government reformers, reading Tufte's account, might shrink in horror at this portrait of politicians "buying" votes with the taxpayers' own money.

Liberals (and probably the overwhelming majority of the populace) probably would look at it differently. They might argue that, for a few months of a year at most, the electoral season forces politicians to worry about the masses of people, the working stiffs and the poor and the ordinary folks. The rest of the time, American politics is skewed toward serving more powerful and more conservative interests.

The strength of Tufte's analysis, the quality which sets him apart from so many purist theories of his academic colleagues, is that Tufte accepts the natural conflict between these two viewpoints as an inherent tension of democracy. The distinctions are not subject to easy definition or goo-goo reforms. An elected government which responds to public need and desire can always be accused of pandering. That does not make unresponsive government more clean or more desirable.

But do the American people really want these "liberal" policies? The answer is clearly yes, though that may come as a shock to those who are promoting the conservative revolt. If we define "liberal" in the old-fashioned way, bequeathed by Roosevelt's New Deal, the activist government which intervenes in the market economy, controlling the behavior of private corporations, stimulating growth and curbing corporate excesses, the American people are still very "liberal."

This is not a new trend or a seasonal anxiety—it is a more or less permanent fact of public opinion. Poll after poll has shown that the general public, when asked about issues of government intervention to manage the economy, is permanently to the left of the political establishment, Republican and Democratic, which decides those questions.

For instance, if Carter does move to wage-price controls, however reluctantly, he will find that popular political support is there waiting for him. His friends in business will be furious. Labor leaders will scream, having been burned in 1972 by the Republican-administered controls. But the public, according to Gallup, wants controls, 52 to 37 percent, as it always does when inflation becomes a severe problem.

In political terms, the hard choice for Carter would be how to impose controls. He could do it with a Republican bias, as Nixon did, or with a Democratic bias, holding down prices first and counting on that control to dampen wage inflation.

There are numerous other examples of the leftward tilt of public opinion. The public for years has endorsed the idea of government action to guarantee every American a job, yet that concept, embodied in the Humphrey-Hawkins bill, cannot win congressional passage.

The public favors the radical approach of rationing to conserve oil and gas—in prefer-

ence to the conservative solution of price and tax increases proposed under Carter's energy plan.

The public wants more regulation, not less, to clean up pollution. Indeed, cleaning up the air and water, even if it costs a lot more, is one goal on which the American people are unified. Aside from seasonal fluctuations, they do not want to retreat to laissez-faire.

The principal liberal idea which does not have majority support in popular opinion is the guaranteed annual income. A majority is against that, though the opposition is declining gradually, not increasing.

Why have these "liberal" ideas not become permanent government policy, if so many people want them? Again, the answer is a manner of political theology. A conservative might say that, mainly they are bad ideas which would be ruinous to the national well-being. Therefore, Congresses and presidents embrace them reluctantly or not at all, and then only when political fortune requires it.

A left-leaning spectator might answer that these "liberal" goals are examples of how unrepresentative the American government is, how politicians are more sensitive to narrow, intense objections to change, not to a general progressive atmosphere.

Except for periods of great upheaval and stress, like the Depression which spawned the New Deal, American politics moves quite slowly toward new ideas. National health insurance, for example, has been on the agenda for 30 years, long supported by a majority of Americans. Yet it is not enacted. But if American politics moves slowly—at a conservative pace—it moves toward liberal goals. There are very few exceptions to that rule, especially since 1932.

THE NEO-LIBERAL CONGRESS

Skeptical readers can test Tufte's analysis in the present season, when so many politicians are preaching empty sermons about less government. It is certainly true that the voters are angry about high taxes and slothful government, about programs that waste money or don't work (we can all say amen to that). And it is also true that Congress has taken selected whacks at this and that program, demonstrating its dedication to lean and small.

But, meanwhile, Congress is behaving in this election year pretty much the way Tufte's thesis would predict. It is enacting a tax cut of approximately $17 billion. It is raising veterans' pensions $700 million to $1 billion. It has set up Social Security increases so that millions of grateful recipients received bigger checks this June, increases worth nearly $6 billion a year (the tax boost to pay for that increase won't hit wage earners hard until next year, after the election).

A new wrinkle now has been added to these "feel good" levers—the federal budget calendar was shifted to begin on Oct. 1. This means the annual surge of new budget spending in all federal programs will occur at the best time for politicians—one month before the election.

If you listen closely to this season's political rhetoric, there is even a strong strain of neo-liberalism emanating from Republican conservatives. The Kemp-Roth tax cut proposal, embraced by the GOP, sounds like a pumped-up version of old liberal dogma—generous tax cuts reduce federal deficits by priming the economy.

Rep. Jack Kemp, who is the new Republican glamor stock, appears to have a sharp focus on these contradictions, judging from his press clippings. Kemp is an unorthodox conservative who wants an activist government in some areas, less in others. He rejects wholesale cuts in federal spending. He wants to spend more on defense, more on cleaning up air and water pollution. He praises John F. Kennedy and criticizes Herbert Hoover. Rep. Kemp, in short, has read a little history.

Back at the White House, Jimmy Carter on some days sounds very much like a Republican.

The other day, he praised the Federal Reserve Board for raising interests rates—liberal heresy. He struggles to reduce the federal deficits—conservative dogma. He proposes an energy plan designed to curb consumption by raising prices and taxes—a modified market approach which Carter asserts will help fight inflation. Whether he is right or not, individual voters are not likely to see it that way. Most consumers do not believe that higher prices at the gas pump or higher home heating bills will help them fight inflation.

POLITICAL DYNAMITE

Carter's conservative economic policies have been variously attributed to his character or his Georgia origins or to different neo-conservative and Republican experts who advise him. But there is at least one additional explanation: Carter is a Democratic president confronted with an economic problem—inflation—that traditionally demands Republican remedies. Tufte puts it this way:

"To win reelection, Carter must solve the most salient problem and that seems to be inflation. The next most important thing for him to do is behave like a Democrat and there's a lot of tension between those two things."

If inflation could somehow be set aside, Carter's performance as an economic manager looks pretty good. Since his inaugural, the unemployment rate has been dropping, slowly but steadily. Real disposable income is growing at a healthy rate. The nation's economy is recovering steadily from the Nixon-Ford recession, jobs are increasing.

Yet people are angry—mad as hell, you might say—and none of these accomplishments will count for much if the inflation rate continues near or in double digits. The general aggravation may be summarized in the following:

In 1973, the mythical average worker portrayed in labor statistics earned $146.50. By this spring, five years later, his wages were up handsomely to $212. He deserved more money because his productivity increased steadily during that period. Yet everyone knows, from personal experience, that the wage increases are unreal. The average wage level, when adjusted for inflation, have been sitting still for five years—no real increase from 1973 to 1978.

This is dynamite in American politics, a fact which threatens all the old rules, for all Americans have come to expect, especially since World War II, a steady improvement in their lives, what they buy and enjoy, the basic comforts and, yes, the luxuries too.

If this period of stagnation continues, millions of Americans will feel cheated, and then politics will continue to be angry. But history tells us that popular opinion moves toward government-imposed solutions in times of economic stress, not away from them.

Who is getting hurt the most? It is not so clear. The statistics tell us that, in general, everyone feels squeezed, but at least half the wage earners are losing ground—earning more pay and taking home less real income. The victims apparently do not fall into neat categories of Republicans or Democrats, professional or blue collar. When Dr. Gallup asks people who is mad about inflation, there are minor variations between groups but the short answer is: Most people are mad, young and old, rich and poor.

The relevant political point for Carter, however, is that his natural constituency, the Democrats who elected him in 1976, are the voters most favorably disposed to government controls. In short, it would be politically plausible for him to move in that direction.

The president obviously has not chosen at this point, though his economic advisers are turning up the heat on their anti-inflation warnings, promising tougher "guide lines" and other devices to cajole labor and business into restraint.

If one were cynical, it would make political sense in Tufte's cyclical terms for Carter to let unemployment rise a little in the next six months or so, dampening federal spending and the gross inflationary impulses in the economy. Then, as the election season approaches, assuming that inflation has abated, he can open up the spigots again and make everyone "feel good" for 1980.

President Carter does face one unique tactical problem, different from his predecessors. Carter's "liberal hour" must come earlier than most. He must aim his economic management not merely at 1980, but at next summer and fall when Democratic rivals like Gov. Jerry Brown will be deciding whether to challenge an incumbent president in the Democratic primaries. If Carter wants to avoid those potentially ruinous challenges, he must make everyone "feel good" about him much earlier than the autumn of 1980.

MORE DEMOCRACY, NOT LESS

None of this has really addressed the most important question about the "liberal hour." Is it bad for the country? Political experience tells us that the pre-election "liberal" tilt is good politics. In the short run, it helps to win elections. But, in the long run, do these policies distort the economy and produce a painful hangover?

Tufte, for one, is not prepared to condemn the political-economic cycle by itself. It represents democratic control of economic policies, and he does not relish the typical reform proposal—to "clean up" government decision-making by insulating it from dirty old politicians and turning it over to high-minded but non-elected technocrats. This remedy has been applied again and again by 20th century reformers, to problems of every variety, but it does not seem to have eradicated political corruption.

Tufte's solution to the sleazier political manipulation is more democracy, not less. The two modern examples of presidents who grossly damaged the economy by their political manipulation both depended upon deceit and secrecy.

Nixon's overheated economy in 1972 produced a boom-and-bust recession and aggravated the inflation which still haunts us. Lyndon Johnson deceived the nation and the Congress about the true cost of the war in Vietnam, a political trick which caught up with him eventually and set off a decade of high inflation.

In both cases, Tufte argues, a vigilant press and a full-blown political debate might have prevented these presidents from their damaging excesses. Tufte writes:

"The mistakes were not made because gluttonous voters were possessed with 'inflationary bias' or because of 'voter myopia' (except insofar as politicans failed to reveal their economic priorities), or because of an excess of democracy in economic policy-making. Quite the contrary. The operating assumption made by those who undertook and secretly pursued these mistaken policies was, I believe, absolutely correct: Sleazier efforts at manipulating economic policy for short-run advantage cannot survive public scrutiny."

That is a fancy way of saying that the American people aren't dumb, if someone will tell them the facts. Over time, they catch up with most charlatans. Over time, they support policies which are truly in their self-interest. That is another way of saying that democracy will work, if people will let it.●

## PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control

Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on September 8, 1978.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, Room S-116 in the Capitol.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., September 8, 1978.*
In reply refer to: I-6889/78 ct
Dr. HANS BINNENDIJK,
*Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA, Director.*●

## ERA EXTENSION: WHAT THE POLLS SHOW

● Mr. GARN. Mr. President, if House Joint Resolution 638 reaches the floor of the Senate we are sure to hear a lot about the results of this or that poll. In fact, I have already cited a number of polls in this regard in my testimony on extending the period for ratification of the amendment. My testimony was presented before the Subcommittee on the Constitution of the Senate Judiciary Committee and is reprinted in the RECORD of August 7, 1978. One of the major topical headings of that testimony was "Amending the Constitution According to Gallup and Harris." Clearly, polls provide insufficient reason for amending the Constitution, and any attempt to connect polls results with Senate action on constitutional issues must fall flat on its face. I noted, for example, that we are not following the polls showing a majority of the American people favoring a balanced budget, changing the electoral college, limiting congressional terms, and so on.

However, polls serve a certain purpose and, as politicians, it is unlikely that we will ignore them. Therefore, I wish to call the attention of our colleagues to two recent polls regarding extension of the ratification time limit.

The Associated Press-National Broadcasting Co. news poll (AP-NBC) taken in August 1978, showed the following results to this question:

The deadline for States to ratify the Equal Rights Amendment is next March. Do you think that deadline should be extended another 7 years, or don't you think so?

| | Percent |
|---|---|
| Yes—deadline should be extended | 34 |
| No—deadline should not be extended | 55 |
| Not sure | 11 |

The second poll was conducted by Opinion Research Corp. (ORC) Princeton, N.J., and was also done in August. The ORC survey asked the following questions, and produced the results shown:

1. In order to add an amendment to the U.S. Constitution, a resolution must be passed by Congress and then approved by 38 states. As with every other Constitutional amendment in the past 60 years, the Equal Rights Amendment, passed by Congress in 1972, specified that it would become part of the Constitution if the necessary number of states approved it within seven years. The seven year time limit expires next March. Some people now want to extend the time limit for an additional three years and three months so that states that have not yet approved the Equal Rights Amendment might do so.

Do you favor or oppose changing the Equal Rights Amendment resolution order to extend the time for states to approve the Equal Rights Amendment?

| | Percent |
|---|---|
| 1. Favor | 45 |
| 2. Oppose | 39 |
| 3. No opinion | 16 |

2. Some people say that because the average time for approval of the 26 existing amendments to the U.S. Constitution has been one year and four months, and that the longest time ever needed for any amendment was three years and eleven months, the time limit for the Equal Rights Amendment should not be extended beyond seven years.

Other people say that even though ERA has been debated for 6½ years, it still has not had a fair chance to be ratified. Do you feel that ERA has had a fair chance to be ratified or not?

| | Percent |
|---|---|
| 1. Yes, had fair chance | 61 |
| 2. No, did not have fair chance | 26 |
| 3. No opinion | 13 |

3. Among states which have approved ERA are several which originally voted against it. Several other states have changed their votes from approval to disapproval. Some people say that once a state has voted for ERA it should not be permitted later to vote against it. Others say that a state should be permitted to change its vote either way up to the deadline.

Do you favor or oppose a provision that would allow states to change their votes within the specified time limit?

| | Percent |
|---|---|
| 1. Favor | 61 |
| 2. Oppose | 28 |
| 3. No opinion | 11 |

●

## THE FEDERAL OIL SHALE COMMERCIALIZATION TEST ACT

● Mr. HASKELL. Mr. President, it is with considerable sadness and disappointment that I take the floor today to report on the Carter administration's lack of response to my bill, S. 419—the Federal Oil Shale Commercialization Test Act.

The Senate passed this legislation on June 27, 1978, by an overwhelming bipartisan vote of 61 to 23. I think it is indicative of the wisdom of and widespread support for this proposal that it passed the Senate by such a margin even while the major components of the President's energy bill were and are locked in controversy. There is a general frustration throughout the land with our inability to arrive at a national energy policy. S. 419 could have constituted a major portion of such a policy—a portion which would emphasize our urgent need for alternative sources of liquid fuels to replace imported foreign petroleum.

I do not think it necessary to elaborate on the need for this legislation. However, I would like to briefly remind my colleagues of the facts.

First, there is no doubt that we do now face and will continue to face a liquid fuel shortage which can either be addressed by imports or alternatives. Oil shale constitutes one of the most attractive of such alternatives.

Second, oil shale is an enormous if not fabulous national resource. Approximately 2 trillion barrels of oil shale are estimated to be contained in deposits lying in Colorado, Utah, and Wyoming. Of this total, an estimated 600 billion barrels, an amount approximately equal to the entire world's known petroleum reserves, is in high grade deposits.

Third, oil shale technology is now at the point where commercial testing should commence. Government tests have shown it can be refined into high quality jet fuel.

Fourth, and perhaps most important, there is no on-going commercial test of oil shale technology in the United States today.

These four basic facts lead to an obvious conclusion—enactment of a program to test the commercial potential of various oil shale processes to determine whether and to what extent oil shale represents a viable alternative source of liquid fuel should be made a high priority goal of this 95th Congress.

Unfortunately, Mr. President, in spite of these facts, the solid support which this bill received in the Senate and a stated willingness on the part of the House Armed Services Committee Subcommittee on Seapower and Strategic and Critical Materials to hold hearings on the bill in the House, the Carter administration has seen fit to obstruct such proper consideration by delaying a response to that subcommittee chairman's, Representative CHARLES E. BENNETT, request for departmental reports on the legislation.

Chairman BENNETT requested reports from the Departments of Defense, Energy, and Interior on July 14, 1978, and has yet to receive any response. On August 17, 1978, I wrote to the Secretaries of these Departments asking that they expedite their responses. One week later, I was personally assured by spokesmen for two of them that the reports would

be forthcoming immediately. None have been received by the subcommittee.

It is obvious that time is now very short and that passage of S. 419 in this Congress is only a slim possibility. It need not have been so. I made every effort to work with the Carter administration throughout the consideration of S. 419 in the Senate. My bill offered a workable oil shale proposal. At the time it was introduced and for a year thereafter, the Carter administration had no alternative oil shale proposal except to rely on a forlorn hope that the world price would stimulate development.

I think it is a shame and a tragedy that, despite professions of extreme interest in a national energy plan, that this administration has not only refused to endorse and assist in the enactment of the Federal Oil Shale Commercialization Test Act, but has obstructed the efforts of its supporters. Perhaps, as our reliance on Arab oil continues to grow and as our balance-of-payments picture continues to darken, the Carter administration will one day wake up to the need to develop alternative sources of liquid fuel such as oil shale. However, should this ever happen, we will have to suffer the consequences of the sorry record of delays which we are now experiencing in this Congress.

Mr. President, I ask that my letters to the Secretaries of Defense, Energy, and Interior be printed in the RECORD at the conclusion of my remarks.

The letters follow:

COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
*Washington, D.C., August 17, 1978.*

Hon. JAMES R. SCHLESINGER,
*The Secretary of Energy,*
*Washington, D.C.*

DEAR MR. SECRETARY: The question of the source of this Nation's future liquid fuel supplies continues to go unanswered. Once the temporary impact of the opening of the Alaska pipeline is absorbed, we will again be on the path of ever increasing reliance on foreign oil.

This dilemma can be partially addressed in various ways, including emphasis on conservation, solar energy, and other new sources of supply. However, the fact remains that liquid fuels will continue to constitute a very significant segment of domestic demand and new sources of liquid fuel supplies must be found.

One potential source of liquid fuels is the vast oil shale deposits in the West. These deposits contain almost twice the total world supply of crude oil in high grade shales alone. Yet, there is not a single on-going commercial test of oil shale technologies in the United States today, almost five years after the OPEC oil embargo.

On June 27, 1978, the Senate took a major step toward remedying this situation. On that day, it passed, by an overwhelming, bipartisan vote of 61–23, the Federal Oil Shale Commercialization Test Act, S. 419.

I introduced this bill in early 1977 at a time when it became clear to me that a Federal program such as the one contained in S. 419 was needed to test our oil shale potential. Although this administration has variously opposed, seemed to endorse and finally apparently become neutral on this legislation, I have been successful in convincing my colleagues in the Senate—on both sides of the aisle—of the need for this bill.

At the present time, the bill rests in two committees of the House of Representatives, the Committee on Armed Services and the Committee on Interior and Insular Affairs. The Chairman of the Subcommittee on Seapower and Strategic and Critical Matters, the Honorable Charles E. Bennett of Florida, has assured me that he will give this legislation an expeditious hearing upon receipt of departmental reports from your department and two others. Although Congressman Bennett requested these reports on July 14, 1978, he has as yet received no response.

I am sure you will recall our conversation of April 26 of this year during which you informed me that the Department of Energy would remain neutral on S. 419.

I hope, however, that you will submit your analysis of the benefits and negative aspects of the program.

Therefore, I urge you to complete the preparation of the requested comments. Without them, it will be very difficult for the Congress to work its will on this important energy legislation.

I hope I can expect a response one week from today.

Sincerely,

FLOYD K. HASKELL,
*U.S. Senator.*

---

COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
*Washington, D.C., August 17, 1978.*

Hon. CECIL D. ANDRUS,
*The Secretary of the Interior,*
*Washington, D.C.*

DEAR MR. SECRETARY: The question of the source of this Nation's future liquid fuel supplies continues to go unanswered. Once the temporary impact of the opening of the Alaska pipeline is absorbed, we will again be on the path of ever increasing reliance on foreign oil.

This dilemma can be partially addressed in various ways, including emphasis on conservation, solar energy, and other new sources of supply. However, the fact remains that liquid fuels will continue to constitute a very significant segment of domestic demand and new sources of liquid fuel supplies must be found.

One potential source of liquid fuels is the vast oil shale deposits in the West. These deposits contain almost twice the total world supply of crude oil in high grade shales alone. Yet, there is not a single on-going commercial test of oil shale technologies in the United States today, almost five years after the OPEC oil embargo.

On June 27, 1978, the Senate took a major step toward remedying this situation. On that day, it passed, by an overwhelming, bipartisan vote of 61–23, the Federal Oil Shale Commercialization Test Act, S. 419.

I introduced this bill in early 1977 at a time when it became clear to me that a Federal program such as the one contained in S. 419 was needed to test our oil shale potential. Although this administration has variously opposed, seemed to endorse and finally apparently become neutral on this legislation, I have been successful in convincing my colleagues in the Senate—on both sides of the aisle—of the need for this bill.

At the present time, the bill rests in two committees of the House of Representatives, the Committee on Armed Services and the Committee on Interior and Insular Affairs. The Chairman of the Subcommittee on Seapower and Strategic and Critical Matters, the Honorable Charles E. Bennett of Florida, has assured me that he will give this legislation an expeditious hearing upon receipt of departmental reports from your department and two others. Although Congressman Bennett requested these reports on July 14, 1978, he has as yet received no response.

I am aware that the Department of the Interior opposed S. 419 in 1977. However, since that time virtually all of the items to which the Department objected have been deleted.

In my judgment, it would be in the interest of the Department to endorse S. 419 as an approach to testing oil shale technology which would mesh and not conflict with the Department's existing prototype oil shale leasing program. The program established by S. 419 tests technologies. If these tests prove successful, these technologies can be employed in the development of the leases issued under the Department's program. Moreover, the tests are most likely to occur on the lands of the Naval Oil Shale Reserves and not on public lands—a point to which Interior objected initially.

Therefore, I urge you to reconsider your position on S. 419. It is my firm judgment that such an effort would speed oil shale testing in general and the successful pursuit of the Department's program in particular.

In any event, I ask that the Department complete the preparation of the comments requested by the House committee. Without them, it will be very difficult for the Congress to work its will on this important energy legislation.

I hope I can expect an early response from you regarding my request.

Sincerely,

FLOYD K. HASKELL,
*U.S. Senator.*

---

COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
*Washington, D.C., August 17, 1978.*

Hon. HAROLD BROWN,
*The Secretary of Defense,*
*Washington, D.C.*

DEAR MR. SECRETARY: The question of the source of this Nation's future liquid fuel supplies continues to go unanswered. Once the temporary impact of the opening of the Alaska pipeline is absorbed, we will again be on the path of ever increasing reliance on foreign oil.

This dilemma can be partially addressed in various ways, including emphasis on conservation, solar energy, and other new sources of supply. However, the fact remains that liquid fuels will continue to constitute a very significant segment of domestic demand and new sources of liquid fuel supplies must be found.

One potential source of liquid fuels is the vast oil shale deposits in the West. These deposits contain almost twice the total world supply of crude oil in high grade shales alone. Yet, there is not a single on-going commercial test of oil shale technologies in the United States today, almost five years after the OPEC oil embargo.

On June 27, 1978, the Senate took a major step toward remedying this situation. On that day, it passed, by an overwhelming, bipartisan vote of 61–23, the Federal Oil Shale Commercialization Test Act, S. 419.

I introduced this bill in early 1977 at a time when it became clear to me that a Federal program such as the one contained in S. 419 was needed to test our oil shale potential. Although this administration has variously opposed, seemed to endorse and finally apparently become neutral on this legislation, I have been successful in convincing my colleagues in the Senate—on both sides of the aisle—of the need for this bill.

At the present time, the bill rests in two committees of the House of Representatives, the Committee on Armed Services and the Committee on Interior and Insular Affairs. The Chairman of the Subcommittee on Seapower and Strategic and Critical Matters, the Honorable Charles E. Bennett of Florida, has assured me that he will give this legislation an expeditious hearing upon receipt of departmental reports from your department and two others. Although Congressman Bennett requested these reports on July 14, 1978, he has as yet received no response.

The Department of Defense, through the Navy's research arm, has been exploring the jet fuel potential of petroleum produced

from oil shale for some time. It is my understanding that the testing of the first batch of shale oil refined to Navy specifications under this program was very encouraging. The Navy is continuing to test the potential uses of shale oil by refining an additional 100,000 barrels.

However, no matter how promising oil from shale may be as a military fuel, it will be of no value if it cannot be extracted from the rock. Additionally, the Naval oil shale reserves can provide very little in terms of safeguard against a petroleum supply interruption if we do not have the technology to recover it.

Therefore, it appears to me that enactment of S. 419 should be of great interest to the Department of Defense. Whatever your position, I urge you to complete the preparation of the comments requested by the House committee. Without them, it will be very difficult for the Congress to work its will on this important energy legislation.

I hope I can expect a response one week from today.

Sincerely,

FLOYD K. HASKELL,
*U.S. Senator.*●

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CORRECTION OF VOTE—S. 1423

Mr. McGOVERN. Mr. President, on September 7, on final passage of the Judicial Tenure Act, S. 1423, I was recorded as not voting. I was here and cast a "nay" vote. Indeed, my vote was so recorded by the unofficial recorder, Mr. Patrick Hynes, but was missed by the official recording the vote.

I ask unanimous consent, under those circumstances, that my vote be recorded as I voted. I point out that this change will not affect the outcome of the vote.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, this matter was brought to my attention this afternoon. While it is an extraordinary thing to change a roll call vote, I think it also would be extraordinary not to accept the representations just made by the Senator from South Dakota. Since it does not change the result, since he was kind enough to bring it to our attention before making the request, and since he was in the Chamber and did vote, we have no objection to the RECORD being changed in accordance with the request made by the distinguished Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, I thank the distinguished minority leader.

## FEDERAL TRADE COMMISSION AMENDMENTS OF 1977—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, Mr. FORD is about to present a conference report on H.R. 3816. I ask unanimous consent that the time on that conference report, which deals with the Federal Trade Commission Act amendments, be limited overall to not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I submit a report of the committee of conference on H.R. 3816 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3816) to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of September 8, 1978.)

Mr. FORD. Mr. President, this legislation is the result of two extensive conferences. The only significant changes in this legislation from the version that was passed by the Senate by voice on February 22, 1978, are that there is now a two-House legislative veto provision contained in the bill with provision for a Presidential override of such veto and the equitable relief provisions have been deleted. Although the Senate has, in this conference, substantially accommodated the strong views of the House in regard to equitable relief and legislative veto, I still believe that this is a conference report that should receive the support of the Senate.

Mr. President, this conference report, I think, has been cleared on the other side. I do not want to take any more time of the Senate; therefore, I yield back the remainder of my time and move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SENATOR CHURCH: KUDO OF THE MONTH FOR OLDER AMERICANS

Mr. MELCHER. Mr. President, Senator FRANK CHURCH has served on the Committee on Aging with distinction since it was created in 1961.

During the past 7½ years he has provided superb leadership as its chairman.

He has grappled with important day-to-day issues facing older Americans. These concerns may not always appear on the front pages of newspapers, but they are enormously important for the elderly, including:

Inadequate income in retirement;
Age discrimination in employment;
Quality care in nursing homes;
Gaps in medicare coverage;
Transportation difficulties;
Inflation; and
Tax relief.

He has also proved to be a resourceful and skillful legislator. One measure of his success is that he has never lost a floor amendment for the elderly since being named chairman of the Committee on Aging. And, most of his Senate-passed amendments have become law.

Over the years, he has been instrumental in the drive for many victories for older Americans:

The 20-percent social security increase in 1972;

A cost-of-living adjustment mechanism to make social security inflation-proof for the elderly;

A two-step, 11-percent social security increase in 1974;

Establishment of a community education program to provide recreational, educational, and other community services for the young and old alike;

Numerous improvements to the Older Americans Act;

Improved social security protection for elderly widows;

Expansion of the senior community service employment program to provide increased job opportunities for persons 55 or older in a wide range of fulfilling activities;

Reduced air fares on a space-available basis for older Americans;

Increased tax counseling assistance for elderly taxpayers;

Additional tax relief in taxable year 1976 averaging $182 for 165,000 elderly taxpayers who would be adversely affected because the new tax credit for the elderly replaced the former retirement income credit.

Since being appointed to the Senate Committee on Aging, I have been impressed by Senator CHURCH's leadership, his decency, and his ability to understand complex issues.

Jack Anderson selected Senator CHURCH for his "Kudo of the Month" award in the September edition of 50 Plus, and deservedly so. He describes Senator CHURCH as the "hero of the aging" who "has been doing the kind of legislative job that can have important results for folks over 50."

Mr. President, I ask unanimous consent that the article by Jack Anderson be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KUDO OF THE MONTH

(By Jack Anderson)

The Kudo of the Month goes to that boyish-looking hero of the aging, Idaho's Senator Frank Church. Like a marshal in the Old West—hard-working, often unappreciated, and without fanfare—he has been doing the kind of unglamorous legislative job that can have important results for folks over 50.

His Special Committee on Aging is taking a hard, close look at the Medigap insurance huckstering that I have described on the opposite page. The investigation could lead to stricter disclosure requirements on insurance policies purporting to supplement Medicare.

Church also held three days of hearings on "The Graying of America." He explored the financial implications of our growing senior citizen population on federal programs.

And, finally, Church has pushed successfully for a White House Conference on Aging to be held in 1981. If past conferences of the elderly are any indication, this won't be just speeches and a Rose Garden ceremony.

## CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order Nos. 1083, 1084, 1085, 1091, and 1092.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I rise only to advise the distinguished majority leader that the calendar order numbers that he identifies are cleared on our calendar, and we have no objection.

Mr. ROBERT C. BYRD. Mr. President, let me state to the distinguished minority leader that I was in error in respect to order No. 1092. It should have been 1093 instead of 1092; so I make that correction.

The PRESIDING OFFICER. The clerk will report the first measure.

## FEDERAL RECORDS COUNCIL

The bill (H.R. 8112) to repeal chapter 27 of title 44, United States Code, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1160), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this bill is to abolish the Federal Records Council, as established by the Administrator of General Services Administration, under authority granted in chapter 27 of title 44, United States Code. Additionally, the bill will repeal chapter 27 of the above referenced title.

BACKGROUND

When the Federal Records Council was established in 1950, records management programs were relatively unknown in the Federal Government and it was believed that the Federal Records Council could perform a valuable function by providing direction and leadership in the early stages of records management programs.

The Council was active during the late 1950's and early 1960's but as agencies' records management activities became more sophisticated the Council's direction was no longer necessary. Gradually, the Council's meetings became infrequent and eventually stopped altogether. The Council's inactive status has not hindered advances in record management.

The original language on H.R. 8112 inadvertently failed to delete from the table of chapters of title 44, United States Code, the reference to chapter 27. This technical amendment conforms the table of chapters to reflect the substantive aspect of the bill, deletion of chapter 27 of title 44.

## NATIONAL ARCHIVES TRUST FUND BOARD

The bill (H.R. 12915) to amend sec. 2301 of title 44, relating to the National Archives Trust Fund Board, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1161), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD as follows:

PURPOSE

The purpose of this bill is to amend section 2301 of title 44, United States Code, to fill the existing vacancy on the Trust Fund Board created by the abolition of the Senate Post Office and Civil Service Committee. Additionally, this legislation will replace the congressional representatives on the Board with the Secretary of the Treasury and the Chairman for the National Endowment for the Humanities. These replacements are designed to remove any possible conflict of interest which might arise by having congressional representatives serve on executive branch boards and/or committees.

BACKGROUND

The National Archives Trust Fund Board was established in July 1941 (44 United States Code, sections 2301–2308), to receive and administer gifts or bequests of money, securities, or other personal property, for the benefit of the National Archives.

As a result of several congressional committee reorganizations, the membership of the Board has come to consist of the Archivist of the United States, as Chairman, and the chairman of the House Government Operations Committee and the chairman of the Senate Post Office and Civil Service Committee. However, since the Senate committee no longer exists, one position is vacant.

The legislation was introduced at the request of the Administrator of General Services Administration and has the support of the administration.

## SENATE PAYROLL DEDUCTIONS FOR CHARITABLE CONTRIBUTIONS

The Senate proceeded to consider the bill (S. 2376) to authorize withholding from salaries disbursed by the Secretary of the Senate and the Architect of the Capitol for contributions to certain charitable organizations, which had been reported from the Committee on Governmental Affairs with amendments as follows:

On page 1, line 8, strike "them" and insert "the Secretary or who are employees of the Architect, including employees of the Botanic Garden or the Senate Restaurants";

On page 2, beginning with line 6, strike through and including line 11, and insert in lieu thereof the following:

(2) Upon request by such an individual specifying the amount to be withheld and one Combined Federal Campaign Center in the Washington metropolitan area to receive such amount, the Secretary, the Architect, or any other officer who disburses the pay of such individual, as the case may be, shall—

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) for purposes of this Act, the term—

(1) "Secretary" means the Secretary of the Senate; and

(2) "Architect" means the Architect of the Capitol.

(b)(1) The Secretary and the Architect shall notify individuals whose pay is disbursed by the Secretary or who are employees of the Architect, including employees of the Botanic Garden or the Senate Restaurants of the opportunity to have amounts withheld from their pay pursuant to this section for contribution to national voluntary health and welfare agencies designated by the Chairman of the Civil Service Commission pursuant to Executive Order 10927, dated March 19, 1961.

(2) Upon request by such an individual specifying the amount to be withheld and one Combined Federal Campaign Center in the Washington metropolitan area to receive such amount, the Secretary, the Architect, or any other officer who disburses the pay of such individual, as the case may be, shall—

(A) withhold such amount from the pay of such individual; and

(B) transmit (not less than once each calendar quarter) the amount so withheld to the Combined Federal Campaign Center as specified in such request.

(c) The Secretary and the Architect shall, to the extent practicable, carry out subsection (b) at or about the time of the Combined Federal Campaign and other fundraising in the executive branch of the Federal Government conducted pursuant to Executive Order 10927, dated March 18, 1961, and at such other times as each such officer deems appropriate.

(d)(1) No amount shall be withheld under subsection (b) from the pay of any individual for any pay period if the amount of such pay for such period is less than the sum of—

(A) the amount specified to be withheld from such pay under subsection (b) for such period; plus

(B) the amount of all other withholdings from such pay for such period.

(2) No amount may be specified by an individual to be withheld for any pay period under subsection (b) which is less than—

(A) 50 cents, if the pay period of such individual is biweekly or semimonthly; or

(B) $1, if the pay period of such individual is monthly.

(e) This section imposes no duty, burden, or requirement upon the United States, the Senate, or any officer or employee of the United States, except as specifically provided in this section. Nothing in this section shall be deemed to consent to the application of any provision of law which has the effect of subjecting the United States, the Senate, or any officer or employee of the United States to any penalty or liability by reason of the provisions of this section. Any paper, form, document, or any other item filed with the Secretary under this section is a paper of the Senate within the provisions of rule XXX of the Standing Rules of the Senate.

(f) The Secretary and the Architect are authorized to issue rules and regulations they consider appropriate in carrying out their duties under this section.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third third time, and passed.

The title was amended so as to read:

A bill to authorize withholding from salaries disbursed by the Secretary of the Senate and from certain employees under the jurisdiction of the Architect of the Capitol for contribution to certain charitable organizations.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1162), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this bill is to authorize withholding from salaries disbursed by the Secretary of the Senate and from salaries of employees of the Architect of the Capitol for contributions to certain charitable organizations associated with the Combined Federal Campaign.

The amendments are technical in nature and are intended to assure that the bill's coverage includes all employees under the jurisdiction of the Architect of the Capitol.

STATEMENT

Executive Order 10927, March 18, 1961, authorized the Civil Service Commission to make arrangements for national voluntary health and welfare agencies to solicit funds from Federal employees and members of the Armed Forces at their places of employment or duty stations. Public Law 87–304, September 26, 1961, provides authority for the head of each department in the executive branch to establish procedures under which employees are permitted to make allotments or assignment from their compensation to be remitted directly to the designated recipient. With regard to the efforts of the Combined Federal Campaign, these procedures are commonly referred to as voluntary payroll deductions.

In contrast to the procedures established in the executive branch, neither the Senate, nor the Architect of the Capitol has established systems by which employees may have amounts voluntarily withheld from their paychecks for the purpose of contribution to the Combined Federal Campaign.

BACKGROUND

The Combined Federal Campaign of the National Capital area is a once-a-year solicitation on behalf of the 120 voluntary health and welfare agencies of the United Way, 11 national health agencies, and 6 international service agencies. The Combined Federal Campaign brings the solicitations of all these charitable agencies together for the benefit of both the charitable agency and the Federal employee.

The provision for voluntary payroll deductions was seen as critically important when the Federal campaigns were authorized by Executive Order 10927, March 18, 1961, to deal in a meaningful way with a growing multiplicity of separate fund drives. It was recognized that a single gift, to replace many gifts, would have to be relatively large, and that a pledge gift paid over time through payroll deductions would be the only way most contributors could give such a large amount. It should be noted that most large employers in metropolitan Washington, provide payroll deduction privileges for employees supporting the Combined Federal Campaign.

The House of Representatives adopted a similar measure earlier this Congress in House Resolution 12 which became effective in January 1978. Under the provisions of that resolution, employees in the House may voluntarily have payroll deductions contributed to the Combined Federal Campaign in the Washington metropolitan area.

## NATIONAL AQUACULTURE POLICY ACT OF 1978

The Senate proceeded to consider the bill (S. 3408) to provide for the development of aquaculture in the United States, and for other purposes, which had been reported from the Committee on Agriculture, Nutrition, and Forestry and the Committee on Commerce, Science, and Transportation, jointly, with an amendment in the nature of a substitute.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VITIATION OF ACTION

Mr. ROBERT C. BYRD subsequently said:

Mr. President, I ask unanimous consent that the action taken on Calendar No. 1091 be vitiated, inasmuch as the measure had not been fully cleared all the way around.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is restored to the Calendar.

## SALT RIVER PIMA-MARICOPA BOUNDARY MODIFICATION

The Senate proceeded to consider the bill (S. 3002) to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes, which had been reported from the Select Committee on Indian Affairs with amendments as follows:

On page 9, line 1, after "Service" insert "Reserve";

On page 9, line 4, strike "southwest" and insert "southeast";

On page 11, line 10, strike "There" and insert "Effective October 1, 1979, there";

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

FINDINGS AND POLICY

SECTION 1. (a) The Congress hereby finds that—

(1) the Salt River Pima-Maricopa Indian Reservation was established on Federal lands for the purpose of providing a place for members of the Salt River Pima-Maricopa Indian community to live in peace and prosperity with other persons in Arizona;

(2) at the time of the creation of such reservation, a portion of the south boundary was established to follow the course of the Salt River;

(3) the United States granted patents for, and leaseholds and other interests in, lands adjacent to such boundary for sand and gravel excavation and for other purposes to persons who were not members of such Indian community;

(4) subsequent to the establishment of such boundary, the course of the Salt River shifted, creating uncertainty with respect to the precise location of such boundary; and

(5) by an Executive order, the Secretary of the Interior located and permanently fixed such boundary in a location which included within such reservation, lands for which the United States had previously issued patents, leaseholds, and other interests, causing confusion and an ongoing controversy between such Indian community and persons holding such patents, leaseholds, and other interests.

(b) The Congress hereby declares that it is the policy of the Congress to resolve, without costly and lengthy litigation, the dispute between the Salt River Pima-Maricopa Indian community and the persons referred to in subsection (a)(3) over the location of the south boundary of the Salt River Pima-Maricopa Indian Reservation.

MODIFICATION OF SOUTH BOUNDARY

SEC. 2. The south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona (hereinafter in this Act referred to as the "reservation"), created by the Executive order issued on June 14, 1879, shall be modified in accordance with the provisions of sections 3 and 4 of this Act. Any portion of such boundary established by this Act shall be fixed and permanent and not ambulatory.

RESERVATION LANDS

SEC. 3. (a)(1) The Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") shall acquire by purchase or condemnation the lands described in paragraph (2). Upon acquisition, such lands shall be added to the reservation. The acquisition of lands under this subsection, and payment for such lands under section 5(b) of this Act; shall be deemed to have been pursuant to condemnation by the United States.

(2) The lands authorized to be acquired in paragraph (1) are located in township 1 north, range 5 east, Gila and Salt River base and meridian, Arizona, and are those portions of the land in—

(A) the south half of the southeast quarter of section 8 of such township, and range;

(B) the south half of the southwest quarter of section 8 of such township, and range; and

(C) the southwest quarter of the southeast quarter of section 4 of such township and range;

which lie north of the boundary line representing the middle of the south channel of the Salt River and the south boundary of the Salt River Indian Reservation as shown of record on a map entitled "Township 1 North, Range 5 East, of the Gila and Salt River Meridian, Arizona, Dependent Resurvey and

Survey of the South Boundary of Salt River Indian Reservation" which consists of four sheets, dated August 17, 1972, and is on file and available for public inspection at the Department of Interior, Bureau of Land Management, Washington, District of Columbia.

(b) Upon the acquisition of the lands described in subsection (a), the reservation shall include all lands in township 1 north, range 5 east, Gila and Salt River base and meridian, Arizona, lying north of that boundary line representing the middle of the south channel of the Salt River and the south boundary of the Salt River Indian Reservation as shown of record on the map referred to in subsection (a)(2), except for any portion of the following parcels of land:

(1) the north half of the northwest quarter of section 18 of such township and range;

(2) the north half of the northeast quarter of section 18 of such township and range;

(3) the north half of the southeast quarter of the northeast quarter of section 8 of such township and range;

(4) the northwest quarter of the northwest quarter of section 9 of such township and range;

(5) the northeast quarter of the northwest quarter of section 9 of such township and range;

(6) the southeast quarter of the northwest quarter of section 3 of such township and range;

(7) the north half of the north half of the southwest quarter of section 3 of such township and range;

(8) the southwest quarter of the northeast quarter of section 3 of such township and range; and

(9) the northeast quarter of the northeast quarter of section 3 of such township and range.

(c) The boundary of the reservation shall be extended to include the following parcels of land:

(1) in township 2 north, range 6 east, Gila and Salt River base and meridian, Arizona—

(A) the area between the reservation boundary created by the Executive order issued on June 14, 1879, as amended, and a line parallel to and 150 feet north of the concrete canal lining on the northerly edge of the South Canal within the west 1,000 feet of section 13 of such township and range;

(B) any portion of the southeast quarter of the southeast quarter of section 14 of such township and range lying south and east of the reservation boundary created by the Executive order issued on June 14, 1879, as amended;

(C) the area between the reservation boundary created by the Executive order issued on June 14, 1879, as amended and a line parallel to and 150 feet north of the top of the concrete canal lining on the northerly edge of the South Canal in sections 24, 23, 22, and 27 of such township and range and the east half of sections 28 of such township and range, except for approximately 16 acres of land described as that part of the west half of the southwest quarter of section 27 of such township and range lying north of the South Canal;

(D) the area between the reservation boundary created by the Executive order issued on June 14, 1879, as amended, and the north line of the south half of the southwest quarter of section 28 of such township and range;

(E) the area between the reservation boundary created by the Executive order issued on June 14, 1879, as amended, and the north line of the south half of the south half of sections 29 and 30 of such township and range; and

(F) the north 600 feet of the Granite Reef Reserve in lots 2 and 3 of section 13 of such township and range; and

(2) in township 2 north, range 5 east, Gila and Salt River base and meridian, Arizona, the south 450 feet of the Evergreen Reserve in the west half of the northwest quarter of the northwest quarter of the southeast quarter of section 23.

(d) Any lands added to the reservation under this Act shall become a part of the reservation in all respects and upon all the same terms as if such lands had been included in the Executive order issued by the President on June 14, 1879, as amended, except that such lands shall remain tribal lands and shall not be subject to allotment to individual Indians.

STATUS OF ARIZONA CANAL AND OTHER RECLAMATION PROJECT LANDS

SEC. 4. (a) The United States shall have, free of any claim of Indian title or trusteeship by the Salt River Pima-Maricopa Indian community, all rights and interests in, and absolute and unqualified title to, the following parcels of land:

(1) those portions of the Arizona Canal right-of-way within the exterior boundaries of the Salt River Indian Reservation as defined by the March 29, 1913, accepted United States general land office resurveys of township 2 north, range 5 east and township 2 north, range 6 east of the Gila and Salt River base and meridian, Arizona, and supplemental surveys dated September 30, 1924, plats of which are of record in the Arizona State Office of the Bureau of Land Management, United States Department of the Interior, Phoenix, Arizona;

(2) that portion of the reservation in section 13, township 2 north, range 6 east, Gila and Salt River base and meridian, Arizona, lying between the southerly prolongation of the west line of lot 2 and the southerly prolongation of the east line of lot 3 of section 13 and lying between the southerly boundaries of lots 2 and 3 and the southerly reservation boundary created by the Executive order issued on June 14, 1879, as amended;

(3) United States Reclamation Service Reserve (Granite Reef), which consists of lots 2 and 3 in section 13, township 2 north, range 6 east, Gila and Salt River base and meridian, Arizona, except the north 600 feet of such lots 2 and 3, title to which has been confirmed in the United States for the benefit of the Salt River Pima-Maricopa Indian community; and

(4) United States Reclamation Service Reserve (Evergreen), which consists of lot 9 and the west half of the northwest quarter of the northwest quarter of the southeast quarter of section 23, township 2 north, range 5 east, Gila and Salt River base and meridian, Arizona, except the south 450 feet of such Reserve, title to which has been confirmed in the United States for the benefit of the Salt River Pima-Maricopa Indian community.

(b) The reservation boundary shall be modified to exclude from the reservation the parcels of land described in paragraphs (1) through (4) of subsection (a).

COMPENSATION

SEC. 5. (a)(1) The Secretary shall determine the fair market value of those portions of the parcels of land described in paragraphs (1) through (9) of section 3(b) of this Act which lie north of the boundary line referred to in section 3(b) of this Act, and shall pay an amount equal to such fair market value or $1,964,520, whichever is greater, to the Salt River Pima-Maricopa Indian community.

(2) Acceptance of the payment described in paragraph (1) shall constitute a complete release and satisfaction of any claim which the Salt River Pima-Maricopa Indian community may have against the United States or holder of any interest with respect to any right, title, or interest in any portion of the parcels of land described in paragraphs (1) through (9) of section 3(b) of this Act which are located north of the boundary line referred to in section 3(b) of this Act.

(b)(1) Except as otherwise provided in paragraph (2), the Secretary shall determine the fair market value of each parcel of land acquired by the United States and added to the Reservation pursuant to section 3(a)(1) of this Act, and shall pay an amount equal to such fair market value to the owner, under a patent issued by the United States, of such parcel.

(2) If the aggregate of all amounts to be paid under paragraph (1) is less than the sum of $1,951,740, in lieu of such payments under paragraph (1), the Secretary shall pay such sum to the owners, under patents issued by the United States, of the parcels of land acquired by the United States and added to the reservation pursuant to section 3(a)(1) of this Act. In determining the amount of any payment to any person under this paragraph with respect to such parcels of land, the proportion of the amount of the payment to any person to $1,951,740 shall be equal to the proportion of the amount of the acreage of such parcel which such persons owns, under a patent issued by the United States, to the total acreage of such parcels.

(3) Acceptance of the payment described in paragraph (1) or (2) by any person shall constitute a complete release and satisfaction of any claim which such person may have against the United States, the Salt River Pima-Maricopa Indian community, or holder of any interest with respect to any right, title, or interest in any portion of the parcels of land described in subparagraphs (A), (B), or (C) of section 3(a)(2) of this Act which are located north of the boundary line referred to in section 3(a)(2) of this Act.

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 6. Effective October 1, 1979, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1170), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of S. 3002 is to settle a dispute regarding the location of a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and to establish as fixed and permanent the south boundary of that reservation.

The legislation would ratify an agreement reached among the Salt River Pima-Maricopa Indian Community, the United States, the Salt River Valley Water User's Association, and the Salt River Project Agricultural Improvement and Power District. It would provide compensation consisting of money and land to the Salt River Indian Community for the loss of certain reservation lands transferred to non-Indian title. It would also provide monetary compensation to those pri-

vate landowners whose lands are to be added to the Salt River Reservation as part of this agreement. The bill will thus avoid protracted and costly litigation now pending among the parties.

BACKGROUND AND NEED

OVERVIEW

The Salt River Pima-Maricopa Indian Reservation was established by Executive order on June 14, 1879. Subsequent executive orders in 1910 and 1911 enlarged the reservation to its present size of 49,294 acres, which is nearly evenly divided between tribally owned trust land and individually allotted trust land. The reservation supports an Indian population of some 2,500. The urban centers of Phoenix and Scottsdale lie immediately adjacent to the west of the reservation, and the city of Mesa lies immediately south of the reservation's southern boundary.

When the reservation was created, a portion of its southern boundary was defined as the middle of the stream bed of the Salt River. Since 1879, the river has changed course, and another channel has been formed. Upstream, it has been increasingly diverted, causing its stream beds to become dry most of the year, thereby allowing access for the removal of quantities of sand and gravel.

Two subsequent Federal surveys in 1888 and 1910 established the southern boundary of the reservation as the center of the northern channel of the Salt River. The Federal Government declared those lands south of the surveyed boundary to be public land open for entry, and numerous patents and leaseholds were issued to non-Indian individuals and entities. Permits and rights-of-way were also granted to both public and private parties.

The surveys of 1888 and 1910 have always been questioned by the Indian community. In response to a request by the tribe, an Opinion of the Solicitor of the Department of the Interior dated January 17, 1969 established the southern boundary of the reservation as the middle of the south channel of the Salt River. Finally, in 1972, the Bureau of Land Management's Department of Cadastral Surveys located the southern boundary of the reservation as the lowest point of the south channel of the Salt River. Confusion has arisen as a result of these differing boundary interpretations.

That confusion resulted in the filing on July 17, 1972, in the U.S. District Court in Phoenix, Ariz., of an action in trespass by the Salt River Indian Community (Community) against the Salt River Valley Water User's Association (Association). The Association, an Arizona corporation, is the agent of the Salt River Project Agricultural Improvement and Power District (District), a political subdivision of the State of Arizona. The Association and the District are both a part of the Salt River Project, a Federal reclamation project operating adjacent to the south boundary of the Salt River Reservation.

The District and the Association, in a separate action in the U.S. District Court in Phoenix, filed in 1974, responded to the Secretary of the Interior, alleging that the Bureau of Land Management's 1972 survey was erroneous. The actions were consolidated and on August 16, 1976 the court found for the Secretary of the Interior on the issue of the validity of the survey. The issue of damages to the Community is pending. Approximately $109,000—revenues from sand and gravel leases received by the Community from the Allied Concrete and Material Company—is being held by the court pending final determination of the boundary dispute.

Litigation continued with the filing of a complaint on April 22, 1974, amended on June 3 and July 24, 1974, by the Community against the District, the Association, the Secretary of the Interior, the Federal Power Commission, and the United States, alleging that portion of the Granite Reef Dam, the Arizona Canal, and a 69/12 KV power transmission line constituted trespasses by the District, the Association, and the United States, and as such they were liable in damages. The complaint was dismissed on March 21, 1975, but the Community appealed that portion of the judgment regarding the Arizona Canal and Granite Reef Dam to the Ninth Circuit Court of Appeals on April 16, 1975. Briefs have been filed and oral arguments are pending.

In an administrative action, the Community filed a petition on March 3, 1975 with the Federal Power Commission, seeking cancellation of the license by which the District operates the 69/12 KV power line mentioned above, on the basis that the Commission does not have jurisdiction to license, and that the terms of the license have been breached. The presiding Administrative Law Judge found for the Community, but refused to cancel the license until a valid right-of-way had been arranged. All parties have taken exception to this ruling.

In a corollary matter which may have bearing for the District and the Association, the United States brought an action on August 23, 1976 in the U.S. District Court in Phoenix to condemn some 82 acres of reservation land to construct the Salt River Siphon, a part of the Central Arizona project. The community asserted in its response that the Congress must authorize the condemnation and that the Secretary of the Interior has not complied with the National Environmental Policy Act and Federal reclamation laws.

On August 25, 1976, the Community responded with a suit against the Secretary of the Interior and Bureau of Reclamation, seeking to enjoin construction of the Granite Reef Aqueduct and the Salt River Siphon, alleging that the defendants had failed to comply with the National Environmental Policy Act and certain Federal reclamation laws. A temporary restraining order has been stipulated to by the parties and no hearing has yet been held on the preliminary injunction.

THE SETTLEMENT

After extensive negotiations, on December 22, 1976, a settlement was reached among the parties (see Appendix for full text of this settlement). Briefly, the settlement recognizes that the United States holds fee title to the Granite Reef Dam, the Granite Reef Reserve, the Evergreen Reserve, and the Arizona Canal, free of Indian title, and that the United States has authorized the Association and the District to exercise exclusive jurisdiction for purposes of reclamation over this property and those facilities. It further agrees that the Community stipulates to the reversal of its appeal and the filing of a counterclaim by the United States to quiet title to the Arizona Canal and the Granite Reef Dam in the action on appeal before the Ninth Circuit Court of Appeals, Docket No. 75-2248. The Community further grants rights-of-way for the existing 69/12 KV power transmission line and agrees to an appropriate conclusion of the action pending before the Federal Power Commission.

The Community will also abandon its claim for damages and conclude the litigation in the matter filed in U.S. District Court on July 17, 1972; it will further withdraw its defenses in the condemnation action filed by the United States on August 23, 1976, Docket No. CIV 76-588; and it will abandon its injunction action against the Secretary of the Interior and others in the matter filed on August 25, 1976, Docket No. CIV 76-601.

The Community will grant the District an easement for a proposed 230 KV electric power line across the reservation; and it will grant to the Salt River Project a 50 year lease to 80 acres of sand and gravel land for extraction and sanitary landfill purposes. It also will grant a lease to the Salt River Project for refuse dumping purposes, and, along with the District, will make diligent good faith efforts to bring about the filing of a Cadastral survey of certain reclamation withdrawn lands in dispute.

THE LEGISLATION

S. 3002 will resolve the boundary dispute and provide compensation to both the Indian Community and those private landowners whose land will now become part of the reservation. Specific monetary amounts are authorized, and fair market values will be utilized to determine the exact rate of compensation for both the tribe and the non-Indians. It gives clear title to those lands in dispute in the trespass litigation between the tribe and the Salt River Project, as described in Section 4 of the bill.

This legislation also modifies the Executive Order of June 14, 1879, by the inclusion of the additional land now to become a part of the south boundary of the reservation. Section 3 specifically describes the land, and provides an exact description of the location of the boundary in the riverbed. It should be noted that the comment of the Department of the Interior with respect to retroactive inclusion of the lands in this settlement (see sections 3(c) and 3(d)), as part of the original reservation will constitute a full release and satisfaction of any claim for the depletion of these lands through sand and gravel extraction. This is accomplished by payment of fair market value as provided in Section 5(a).

LEGISLATIVE HISTORY

S. 3002 was introduced by Senator Goldwater on April 27, 1978. A similar measure, H.R. 12344, was introduced on April 25, 1978 by Mr. Rhodes, for himself and Mr. Stump, Mr. Rudd, and Mr. Udall. A joint hearing was held by the House Subcommittee on Indian Affairs and Public Lands and the Senate Select Committee on Indian Affairs on July 14, 1978. Mr. Goldwater, Mr. Rhodes, representatives of the City of Mesa, Arizona, the President of the Salt River Pima-Maricopa Indian Community, and the Director of Government Relations for the Salt River Project all testified in favor of the legislation.

On July 26, 1978, the full committee of the House on Interior and Insular Affairs ordered the bill reported. A legislative report was filed August 16, 1978.

## VICTIMS OF CRIME ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 895 with the understanding that no more than 30 minutes would be needed overall thereon, to be under the control of Mr. KENNEDY and the minority leader or his designee.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 551) to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Victims of Crime Act of 1978".

ADMINISTRATION

SEC. 2. (a) The Attorney General of the United States (hereinafter referred to as the "Attorney General") shall administer the provisions of this Act. The Attorney General shall not delegate primary responsibility for administering the provisions of this Act unless such delegation is made to an individual who is compensated at the rate provided for level II, III, IV, or V of the Executive Schedule under subchapter II of chapter 53 of title 5, United States Code.

(b) There is established an Advisory Committee on Victims of Crime (hereinafter referred to as the "Committee") which shall advice the Attorney General with respect to the administration of this Act and the compensation of victims of crime. The Committee shall consist of nine members, one of whom shall be designated the Chairman, all appointed by the Attorney General. Seven members of the Committee shall be officials of qualifying State programs. The Committee shall meet at least two times each year, and at such other times as the Attorney General may direct. The term of office for each member of the Committee shall be one year. The Committee shall exist for a period of three years from the date of its establishment.

(c) While away from their homes or regular places of business in the performance of services for the Committee, members of the Committee shall be allowed travel and transportation expenses, including per diem allowance, in the same manner and to the same extent as persons employed intermittently in the Government service are allowed travel and transportation expenses under subchapter I of chapter 57 of title 5, United States Code.

POWERS OF THE ATTORNEY GENERAL

SEC. 3. (a) Subject to the availability of amounts appropriated, the Attorney General shall make an annual grant and may make supplemental grants for compensation of victims of crime to each State program that qualifies under section 4. Except as provided in section 5, the grants made to a qualifying State program under this Act with respect to a Federal fiscal year shall equal—

(1) 100 per centum of the then current cost, as determined by the Attorney General, of paying compensation for personal injury or death for such fiscal year for qualifying crimes that are described in section 7(8)(B); and

(2) 25 per centum of the then current cost, as determined by the Attorney General, of paying compensation for personal injury or death for such fiscal year for qualifying crimes that are described in section 7(8)(A).

Grants under this section may be made in advance or by way of reimbursement. The Attorney General shall not have the power to modify the disposition of any individual claim that has been processed by any State program.

(b) For the purpose of carrying out the provisions of this Act, the Attorney General is authorized to—

(1) promulgate such rules, regulations, and procedures as are necessary to carry out the provisions of this Act, including rules and regulations regarding the data to be kept by State programs receiving funds under this Act and the manner in which these data shall be reported to the Attorney General; and

(2) approve in whole or in part, or deny, any application for an annual or supplemental grant under this Act.

QUALIFICATIONS OF STATE PROGRAMS

SEC. 4. A State proposing to receive payments to carry out a State program under this Act shall submit an application to the Attorney General at such time and in such form as the Attorney General shall prescribe by regulation. A State program for the compensation of victims of crime qualifies for grants under this Act if the Attorney General finds that such program is in effect in such State on a statewide basis during any part of the Federal fiscal year with respect to which grants are to be made and that such program substantially complies with the following criteria:

(1) The program offers—

(A) compensation for personal injury to any individual who suffers personal injury that is the result of a qualifying crime; and

(B) compensation for death to any surviving dependent of any individual whose death is the result of a qualifying crime.

(2) The program offers the right to a hearing with administrative or judicial review to aggrieved claimants.

(3) The program requires as a condition for compensation that claimants cooperate with appropriate law enforcement authorities with respect to the qualifying crime for which compensation is sought.

(4) The program does not have a limitation based on the financial means of the victim or any surviving dependent.

(5) There is in effect in the State a requirement that appropriate law enforcement agencies and officials exercise reasonable care to insure that victims of qualifying crimes are informed of—

(A) the existence of a State program of compensation for injuries sustained by victims; and

(B) the procedure for applying for compensation under that program.

(6) There is in effect in the State a law or rule that the State is subrogated to any right of action the victim, or a dependent of the victim, has against the perpetrator of the qualifying crime for personal injury or death resulting from the qualifying crime, to the extent of any money paid to the victim or dependent by the program.

(7) The program does not require any claimant to seek or accept any benefit in the nature of welfare unless such claimant was receiving such benefits prior to the occurrence of the qualifying crime that gave rise to the claim.

(8) The program requires denial or reduction of a claim if the victim or claimant contributed to the infliction of the death or injury with respect to which the claim is made.

(9) There is in effect in the State a law or rule that, in addition to or in lieu of any other penalty, a perpetrator of a crime may be required to make restitution to any victim or any surviving dependent of any victim for that crime.

(10) The program does not require that any person be apprehended, prosecuted, or convicted of the qualifying crime that gave rise to the claim.

LIMITATIONS ON FEDERAL GRANTS

SEC. 5. In computing the annual cost of a qualifying State program for the purpose of establishing the amount of Federal grants under section 3, there shall be excluded from such cost any amount for administrative expenses incurred in carrying out the program, any amount for which the program has received proceeds pursuant to section 4(6) or for which the victim or any dependent has received restitution pursuant to section 4(9), and any amount representing State compensation awards—

(1) for pain and suffering;

(2) for property loss;

(3) to the extent the amount of any award to a victim, or the aggregate amount of any awards to the surviving dependents of a victim with respect to such victim, exceeds $50,000.

(4) to any claimant who is entitled to receive compensation for personal injury or death from any source, other than from a compensation program assisted under this Act or from the perpetrator of the qualifying crime, up to the amount of that compensation;

(5) to any claimant whose award would be for an amount less than $100 or for lost earnings or loss of support computed on the basis of less than five work days;

(6) to the extent the amount of any award for loss of earnings to a victim, or the aggregate amount of any awards for loss of support to the surviving dependents of a victim with respect to such victim, exceeds $200 per week;

(7) to any claimant who failed to file a claim under the State program within one year after the occurrence of the qualifying crime, unless good cause for such failure to file has been found by the appropriate State agency; and

(8) to any claimant who failed to report the qualifying crime to law enforcement authorities within seventy-two hours after the occurrence of that qualifying crime, unless good cause for such failure to report has been found by the appropriate State agency.

REPORT OF THE ATTORNEY GENERAL

SEC. 6. Not later than one hundred and thirty-five days after the end of each Federal fiscal year in which grants were made to State programs under this Act, the Attorney General shall submit a report to the House and Senate Committees on the Judiciary. The report shall include—

(1) with regard to each qualifying State program—

(A) the number of persons compensated;

(B) a statistical presentation of—

(i) the kinds and corresponding amounts of loss compensated;

(ii) the range in monetary value of claims awarded;

(iii) the reasons for denial of claims; and

(iv) the types of crimes that resulted in claims;

(C) a description of the administrative mechanisms and procedures used in processing claims, including claims for emergency assistance if the program provides for such assistance;

(D) the time required to process claims, including claims for emergency assistance if the program provides for such assistance;

(E) efforts made to publicize the program;

(F) administrative expenses; and

(G) the number of qualifying crimes described in paragraph (8)(B) of section 7 that were compensated; and

(2) with regard to the activities of the Attorney General in carrying out the provisions of this Act—

(A) an itemized statement of grants and expenditures;

(B) copies of all rules promulgated pursuant to section 3(b); and

(C) projected expenditures for the Federal fiscal year in which the report is required to be submitted.

DEFINITIONS

SEC. 7. As used in this Act—

(1) "administrative expenses" includes any fee awarded by the State agency administering a State compensation program to any claimant's attorney, if such fee is paid in addition to, and not out of, the amount of compensation awarded to such claimant;

(2) "claim" means a written request to a State compensation program for compensation for personal injury or death made by or on behalf of a victim, or any surviving dependent of a victim, of a qualifying crime;

(3) "compensation for death" means compensation for loss that is the result of death caused by a qualifying crime, including—

(A) all appropriate and reasonable expenses necessarily incurred for funeral and burial expenses; and

(B) loss of support to any dependent of a victim, not otherwise paid as compensation for personal injury, for such period as the

dependency would have existed but for the death of the victim;

(4) "compensation for personal injury" means compensation for loss that is the result of personal injury caused by a qualifying crime, including—

(A) all appropriate and reasonable expenses necessarily incurred for ambulance, hospital, surgical, nursing, dental, prosthetic, and other medical and related professional services and devices relating to physical or psychiatric care, including nonmedical care and treatment rendered in accordance with a method of healing recognized by the appropriate State agency;

(B) all appropriate and reasonable expenses necessarily incurred for physical and occupational therapy and rehabilitation; and

(C) loss of past and anticipated future earnings;

(5) "dependent" means, with respect to any State compensation program, any dependent as defined by such State for purposes of such program;

(6) "personal injury" means, with respect to any State compensation program, personal injury occurring in such State as defined by that State for the purposes of such program;

(7) "property loss" does not include expenses incurred for medical, dental, surgical, or prosthetic services and devices;

(8) "qualifying crime" means—

(A) any act or omission that is criminally punishable under any statute of a State and that such State designates as appropriate for compensation under its program; or

(B) any act or omission that would be a qualifying crime under subparagraph (A) except for the fact that such act or omission is subject to exclusive Federal jurisdiction; and

(9) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, or any other territory or possession of the United States.

AUTHORIZATION

SEC. 8. For the purpose of carrying out the provisions of this Act, there are authorized to be appropriated $40,000,000 for the fiscal year ending September 30, 1979; $50,000,000 for the fiscal year ending September 30, 1980; and $60,000,000 for the fiscal year ending September 30, 1981.

EFFECTIVE DATE

SEC. 9. This Act shall be effective on the date of enactment, except that section 2(b) of the Act shall take effect six months after the date of enactment of this Act.

Mr. KENNEDY. Mr. President, one issue which has concerned every Member of this Chamber at one time or another is the problem of crime in our Nation. While we may not always agree on how best to resolve that problem, we have all attempted to deal with the complexities of this issue.

We have all felt the rippling effect crime has upon the citizens of this country. We have recognized its devastating effect on the fabric of our society. We have witnessed how it has eroded our security, heightened our fears, and violated our lives.

Our attempts to deal with this serious problem have spanned a broad range of efforts. We have enacted laws which provide strict penalties for criminal activity. We have provided increased law enforcement resources to detect, prevent, and prosecute offenders. We have established programs which, indirectly at least, attempt to deal with the root causes of crime. We have set up agencies to make funds available to assist all levels of the criminal justice system. And we have spent hundreds of millions of dollars on the care, treatment, and rehabilitation of offenders in the hope that they might become productive and law-abiding members of our society.

Our attention has been focused on the needs of the criminal justice system on the one hand, and on the needs of the criminal offender on the other. These efforts, however, have almost completely failed to give anything but nominal recognition to victims of crime. Granted, some efforts have been made: Restitution programs have been set up, victimization surveys have been conducted, rape crisis centers have been established, and witness assistance programs have been initiated. These programs, as laudable as their goals and purposes are, have generally been fragmented overburdened and understaffed. They have tended to serve only a very miniscule portion of the victim population in isolated geographic areas.

I do not mean to criticize these programs, nor do I mean to disparage their efforts or belittle their achievements. My point simply is this: there are literally hundreds of thousands of victims of personal crimes that we have completely forgotten and totally ignored. These people have become victims, because our society and this Nation have been frustrated in their attempts to deal with the crime problem. These people are victims, because we have been totally unable to prevent crime, to deter criminals, and to provide a safe environment for all citizens to live in.

A crime-free society may always remain a dream, but this reality should not lessen our efforts to achieve this ideal. Crime should not be the price of progress and development in a civilized society. But if it is in fact the price that must be paid, that price should not be borne solely and disproportionately by innocent victims of those crimes. There is no logical, social, political, or human reason why a citizen who is assaulted, brutalized, injured, or maimed as a result of a criminal act should be required to bear the economic burden resulting from medical expenses and lost wages in addition to the physical suffering and property loss.

Mr. President, a recent study funded by LEAA noted that each year there are nearly 6 million victimizations involving contact with the criminal; 38 percent (2,271,880) of the cases involve instances where the victim was attacked; 27 percent (1,589,832) of these cases involve injury to the victim; 10 percent (580,505) of those injured required medical attention; and 7 percent (428,390) required hospital treatment. Many of those who were injured and received treatment were covered by some type of medical insurance, but 76,696 of the victims had unreimbursed medical expenses amounting to $22,575,545, which they had to bear themselves.

Seventy-five percent (57,520) had unreimbursed medical expenses of less than $100. The remaining 25 percent of the victims (919,176), however, had unreimbursed medical expenses which amounted to 91 percent of the total amount of unreimbursed medical expenses ($20,523,296). What is even more striking is that 2 percent (1,716) of this victim group had to personally absorb 46 percent ($10,296,000) of the unreimbursed medical costs. These figures demonstrate unequivocally the unequal price victims of crime must pay for being an innocent victim.

There is another side to our responsibility for trying in someway to make the victim of a crime whole again. Without their cooperation in reporting, identifying, apprehending, and testifying against the perpetrator, the law enforcement task would be impossible to perform. Regardless of the reasons for their cooperation, the victim's cooperation in bringing a criminal to justice and getting the perpetrator off the streets is an indispensible function of the criminal justice system. It is their assistance which makes our society just a little safer—a benefit we all share in. Is it fair by any imaginable standard then that we require these same victims to bear the economic burden resulting from lost earnings and medical expenses?

Mr. President, a number of States have already begun addressing this problem and providing assistance to crime victims. Many of these programs have operated successfully for a number of years. My own State, Massachusetts, initiated a program 10 years ago. Last year, the program distributed nearly $1 million to victims of crime for unreimbursed medical expenses and lost earnings. Let me take just a few more minutes and tell you about some of the people helped by this program:

Bill D., a 23-year-old trucking company employee, earned $120 a week. He used $75 of his take-home pay to take care of his father, who had polio, his mother, who had lost one of her hands, and his brother, who had cerebral palsy. On October 10, 1977, Bill was driving down a road and was stopped by a man who Bill thought wanted directions. The man grabbed Bill, pulled him out of the car, stabbed him to death and stole what little money he had. Bill's family received the maximum award of $10,000 which helped them to begin a new life without Bill.

Fred W., owned and operated a small liquor store. On Christmas Eve of last year, he left the store to deposit the store's daily receipts, and then he planned to go home and celebrate the holidays with his elderly wife. As he got in his car, a man approached him, attempted to rob him, and shot him to death. Fred's widow received an award of $10,000, which helped her to pay burial expenses as well as provide her with a minimum of financial support.

Robert O., was a 29-year-old high school teacher. Early one morning a man pounded on the door of his house and identified himself as a police officer. Robert opened the door, and two men rushed in, shot him in the head, and robbed him. As a result of this attack, Robert is now paralyzed from the waist down, and has suffered permanent brain damage which caused him to lose his teaching job. He received $10,000 from

the program which helped to defray medical expenses and to pay for intensive physical therapy.

Eleanor C., a 75-year-old resident of Boston, was walking down the street one day when she was assaulted and robbed. She suffered broken bones in her face, hand, and shoulder, and was knocked unconscious. After her hospitalization, she needed nursing assistance at home and transportation to and from the hospital where she went for therapy. None of these latter costs were covered by medicare, and the Massachusetts program awarded her $650 for these expenses.

Allieu M., a world-ranked marathoner, was assaulted one day while training by six people merely because he was black. He suffered serious injury in addition to having his teeth kicked out. He did not have any medical insurance, and his $2,500 in medical expenses were covered under the program.

Paul K., a truckdriver for a Boston newspaper, was robbed, shot, and stabbed one day while working. He had $7,000 in medical expenses which were paid by insurance, but lost over $6,400 which was not covered by workmen's compensation. The program reimbursed him for his lost earnings.

These are just a few of the many examples which I could relate to you about the victims which our program has helped. I am sure that these examples could be multiplied by every Senator whose State has a similar program.

Recently my staff completed a study of existing victim compensation programs throughout the country which showed that nearly $17.5 million had been provided for crime victims. Under the provisions of S. 551, the Federal share for these programs would have been approximately $4.4 million, far less than is presently authorized for the program. The following table provides a detailed breakdown of each of the State programs which have existed for more than 1 fiscal year, the total program costs, the total amount of payments to victims, and the total administrative costs. I have also included the ratio of administrative costs to total program costs which clearly shows that the States are operating their own programs very efficiently.

| State and budget year dates | Percent | Total administrative expenses | Total payments to victims | Total program costs |
|---|---|---|---|---|
| Maryland: | | | | |
| June 30, 1977 to July 1, 1978 | 11 | $139,122.00 | $1,133,383.00 | $1,272,505.00 |
| Delaware: | | | | |
| July 1, 1977 to June 30, 1978 | 37 | 87,941.82 | 146,872.92 | 234,814.74 |
| Virginia: | | | | |
| July 1, 1977 to June 30, 1978 | 23 | 31,076.10 | 103,268.83 | 134,344.93 |
| New York: | | | | |
| Apr. 1, 1977 to Mar. 31, 1978 | 15 | 739,317.00 | 4,313,078.00 | 5,052,395.00 |
| New Jersey: | | | | |
| July 1, 1977 to June 30, 1978 | 15 | 167,298.00 | 919,046.11 | 1,086,354.11 |
| Ohio: | | | | |
| July 1, 1977 to June 30, 1978 | 20 | 316,326.54 | 1,242,753.00 | 1,559,079.54 |
| Pennsylvania: | | | | |
| July 1, 1977 to June 30, 1978 | 24 | 237,586.00 | 746,320.00 | 983,906.00 |
| Wisconsin: | | | | |
| Jan. 1, 1977 to Dec. 31, 1977 | 22 | 56,201.35 | 201,912.31 | 258,113.66 |
| Kentucky: | | | | |
| June 30, 1977 to July 1, 1978 | 27 | [1] 24,417.15 | 66,902.16 | 91,319.31 |
| Minnesota: | | | | |
| July 1, 1976 to June 30, 1977 | 15 | 40,860.00 | 224,278.34 | 265,138.34 |
| North Dakota: | | | | |
| July 1, 1976 to June 30, 1977 | 39 | $16,567.24 | $26,161.22 | $42,728.46 |
| Washington: | | | | |
| July 1, 1977 to June 30, 1978 | 14 | 155,925.00 | 983,610.00 | 1,139,535.00 |
| California: | | | | |
| July 1, 1977 to June 30, 1978 | 15 | 867,306.96 | 5,025,288.84 | 5,892,595.80 |
| Alaska: | | | | |
| July 1, 1976 to June 30, 1977 | 20 | 74,985,31 | 120,968.07 | 195,953.38 |
| Massachusetts: | | | | |
| July 1, 1977 to June 30, 1978 | | [2] NA | 915,391.78 | NA |
| Hawaii: | | | | |
| Jan. 1, 1977 to Dec. 31, 1977 | 20 | 56,944.00 | 223,863.55 | 280,807.55 |
| Illinois: | | | | |
| June 30, 1977 to July 1, 1978 | | [2] NA | 1,082,214.26 | NA |
| Total payments to victims | | | 17,475,312.39 | |
| 25 percent Federal share | | | 4,368,828.10 | |

[1] Cost of claim investigators only. Total administrative cost combines victim compensations and Board of Claims—$248,665.98. Breakdown not available.

[2] Administrative costs combine Attorney General's office, Court of Claims and victim compensation program. Breakdown not available.

Note: Florida program established January 1978. Michigan program established October 1977. Oregon program established January 1978 (victim payments $126,000 to date). Tennessee program established July 1978. Indiana program established June 1978. Kansas program established August 1978. Nevada has a "good samaritan" policy where the victim is awarded compensation only if he was harmed while attempting to prevent a crime. Last fiscal year (June 30, 1977 to July 1, 1978) there was only 1 award amounting to $5,000.

Mr. President, I would be hard pressed to think of a better example of money well spent. In many instances, especially in the case of elderly victims which has deeply concerned me for many years, the assistance provided by these State programs was the difference between financial security and severe economic hardship. In the amendment which my distinguished colleagues, the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Wyoming (Mr. WALLOP), and I have introduced, special emphasis was placed on the elderly crime victim. We have included a provision which allows the States to waive the deductible provisions in instances where the crime victim is an elderly person. It is our strong desire and fervent hope that the several States will adopt this measure and take special care of our senior citizens who are not only more susceptible to becoming a crime victim but also more likely to suffer serious injury and severe financial hardship as a result of the crime.

Mr. President, S. 551 is the culmination of years of effort and concern for the forgotten victims of crime. Our work today stands as a special tribute to the man who spearheaded that effort and kept that concern alive. I am speaking, of course, of the former Senator from Minnesota, Mr. Humphrey, whose entire life and work was epitomized by a sense of human caring which continues to permeate this Chamber and inspire us all. It is principally because of his tireless efforts and because of his genuine concern that this important legislation has come to fruition. It is indeed sad that he cannot be here today to see the results of his dedication. But the challenge and inspiration he has left as his legacy certainly are present. It is that influence which has guided us in the past and brings us together today to act upon this legislation.

I urge all of my colleagues to join with us in adopting this legislation.

Mr. MATSUNAGA. Mr. President, I rise in support of S. 551, the proposed Victims of Crime Act of 1978, and urge my colleagues to join me in support of this important measure.

Mr. President, the enactment of the legislation before the Senate today designed to provide Federal assistance to the States for the purpose of compensating victims of crime is long overdue. As my colleagues well know, the Senate has long supported the idea of compensating victims of violent crime. In each of the past three Congresses, the Senate has approved some form of victims compensation legislation, only to watch similar measures die in the House of Representatives. During the current Congress, the Senate passed S. 1437, the Criminal Code Reform Act of 1977, which contains a provision providing for the compensation of victims of Federal crimes. Most significantly, however, the Senate Judiciary Committee, on June 28 of this year, favorably reported S. 551, the Victims of Crime Act of 1978, to the full Senate. This bill was introduced last year by the late Senator Hubert H. Humphrey and cosponsored by 20 Members from both sides of the aisle. I am proud to be one of the original cosponsors of the Senate bill, which I first introduced in a slightly different form in 1965, while a Member of the House of Representatives.

Mr. President, we are closer today than even before in the long history of this legislation to the enactment of a comprehensive crime victims compensation law. Support for the proposed Victims of Crime Act has been bipartisan and has come from national, State, and local groups and organizations not always found on the same side of the crucial issues of the day.

The act has been endorsed by officials, both Democrat and Republican, of many States with and without established crime victim programs. It has been endorsed by numerous and diverse groups and organizations such as the National Conference of State Legislatures, the National District Attorneys Association, the National League of

Cities and the U.S. Conference of Mayors, the American Bar Association, the National Council on Crime and Delinquency, the National Retired Teachers Association, the American Association of Retired Persons and the National Council on Senior Citizens, the International Conference of Police Organizations and the Fraternal Order of Police, the International Association of Chiefs of Police, Americans for Effective Law Enforcement, the National Moratorium on Prison Construction, the United Automobile Workers, and the Americans for Democratic Action.

Furthermore, President Carter last year announced his administration's full support for victims compensation legislation and urged the Congress to pass such a bill. I might remind my colleagues that the Ford administration also endorsed similar legislation during the 94th Congress.

The single most important signal of support, however, came last year from the House of Representatives. The House passed, for the first time, a victims compensation bill very similar to the legislation we are considering today. Indeed, I was particularly pleased about this action in the other body because of the fact that as as a Member of the House, I fought long and hard for the passage of this legislation. I am sure that the other cosponsors of S. 551 join me in commending the distinguished chairman of the House Judiciary Committee, PETER RODINO, and the other members of his committee for this long-awaited accomplishment.

Mr. President, it is now up to the Senate to take final action on the Victims of Crime Act. S. 551, is designed to provide federal assistance to qualified state programs for the purpose of compensating all victims of crime for losses resulting in physical injuries or death. State programs will be entitled to a Federal reimbursement of 25 percent of the costs of compensating victims of State crimes and 100 percent of the costs of compensating victims of federal crimes. This legislation will enable those States with crime victim compensation programs to favorably respond to more crime victims than ever before. It will assist more eligible victims by defraying the high cost of medical care and providing reimbursement for lost wages.

Mr. President, two of the important goals of the Victims of Crime Act are: first, to provide Federal financial assistance to insure the continuation of existing State victims programs, and second, to provide an adequate incentive to encourage States to establish victims compensation programs. In this respect, I join the Senator from Minnesota (Mrs. HUMPHREY) in hoping that the 25 percent Federal share established in this legislation will be increased during the next Congress.

Under S. 551, States are required to provide 75 percent of the costs of compensating victims of State crimes, as well as carry the full administrative costs of their programs. While I am convinced that the Federal assistance provided in the bill will provide financial relief to overburdened State programs and encourage other States to establish programs, I believe that a higher level of Federal reimbursement is necessary in order to insure the full attainment of goals of the Victims of Crime Act. I am hopeful that after reviewing the report of the Attorney General on the act, which is required by section 6 of S. 551, the Senate will have a better picture of the costs of State programs and take legislative steps to increase the Federal contribution to 50 percent of the costs of compensating State crime victims. At that time, I will also urge the Senate to consider applying such an increased Federal percentage to the total costs of state programs, rather than just to the costs of paying compensation.

Mr. President, S. 551 stands out from other crime victims compensation bills considered by the Senate in the past in that it addresses, to some extent, the difficult and unique problems of elderly crime victims. It has been brought to our attention that elderly victims, nearly half of whom live at or below the poverty level, experience monetary losses as a result of crime more often and more severely than any other segment of our population. S. 551, as introduced and reported, would unintentionally exclude many elderly victims because of a provision limiting Federal reimbursements for awards to claimants of less than $100. To insure that elderly victims are treated with special care and consideration under the Victims of Crime Act, we have amended S. 551 to provide a waiver of the $100 deductible clause for victims 62 years of age and over. I believe that this is an important and necessary modification of S. 551 in terms of assisting elderly victims and I hope that my colleagues will support it.

I might emphasize, in addition, that it is our intention in this legislation to encourage states to develop programs for the emergency compensation of elderly crime victims. The recent House Aging Committee study on elderly victimization had this to say:

> Many older people have no bank accounts from which they can withdraw funds in an emergency, that is, if robbed. They must often wait until their social security pension or supplemental security income checks arrive in the following month.

Indeed, emergency compensation payments to elderly victims are most important in view of the limited resources and special needs of senior citizens. I hope that the States will follow the lead of New York City which is the first jurisdiction to establish a program specifically designed to provide immediate, emergency financial assistance to elderly victims of crime.

Mr. President, I have heard it said from time to time that crime victims in this country are victimized first by the criminal offender and second by our own criminal justice system. Whether or not this statement is true has long been the subject of debate. However, I do believe that the plight of the innocent victim of crime in this country has had a serious impact on the functioning of our criminal justice system during these times of increasing crime and violence. While there is currently great public concern about crime in our neighborhoods, there is, ironically, a serious alienation on the part of the American public from our criminal justice system.

This alienation on the part of the public is reported and confirmed by both law enforcement officials and prosecutors. People are becoming more and more unwilling to assist in the apprehension and prosecution of criminal offenders. Those that are witnesses to crime do not want to become involved. Those who are victims of crime many times refuse to cooperate with police or refuse to press charges.

Mr. President, this desire not to become involved has an obvious and serious impact on our battle against crime. Without the full cooperation of victims and witnesses, it becomes very difficult, often impossible, to apprehend, prosecute, and convict criminals. An equally serious problem is the large number of crimes that are not reported to the public. As a result, many offenders who are dangerous to the community remain free.

Mr. President, in the final analysis, we will only be successful in our war against crime if we have the cooperation of all citizens—cooperation as victims, as witnesses, as complainants, and as voluntary obeyers of the law. Voluntary cooperation is indeed the foundation of our criminal justice system. I strongly believe that the legislation before the Senate is specially directed to reduce the alienation of the public from that system. The Victims of Crime Act will encourage both citizen cooperation with police and prosecutors and the reporting of crimes to law enforcement authorities. If this legislation would accomplish only these two goals, I believe that it would be worthy of our support.

Mr. President, Cicero said, in the first century before Christ, "The safety of the people is the highest law." In my judgment, this holds true under our Nation's constitutional system. It is the duty of our Government to provide for the general welfare of the people, particularly when it is beyond the means of the States acting alone, and beyond the capacity of the people individually, to provide for it. The enactment of the Victims of Crime Act will be an important recognition of our Government's responsibility to protect its citizens, and upon its failure to do so, compensate them for their injuries.

Mr. President, I commend to my colleagues the thoughtful and favorable consideration of the provisions of the Victims of Crime Act. I feel that the Senate should adopt this measure to show once again that our Government is not only a just government, but also a compassionate government.

Finally, Mr. President, I would like to commend the distinguished Senator from Massachusetts (Mr. KENNEDY) for his strong leadership on this important issue and his active support for this legislation in the Judiciary Committee and here on the Senate floor. I would like to thank the distinguished Senator from Wyoming (Mr. WALLOP) for his assistance in making this bill acceptable to his side of the aisle. I would also like to thank my dear colleague from Minnesota, with whom I worked very closely on this bill, for her

invaluable contribution to this measure which her deceased husband Hubert Humphrey introduced in the Senate early last year, and which will, when enacted, stand as another living memorial in his honor.

Mrs. HUMPHREY. Mr. President, I rise to urge my colleagues to support S. 551, the Victims of Crime Act of 1978.

It is clear that despite our best efforts, crime is increasing and will continue to plague society. It has become a cancer on society. It is no longer just a local problem, it is a major, national problem which continues to alienate our citizens.

S. 551 is a reasonable bill premised on the belief that the Federal Government has the constitutional responsibility and duty to provide for the general welfare, and that this includes the safety of the people.

Violent crime frequently maims and permanently injures the innocent victim, and it is certainly the Government's responsibility to assist our citizens when it is beyond their capacity to help themselves.

As we consider this bill, we should ask ourselves what is the value of being physically and mentally able to be productively employed, active members of society? I think we owe it to the innocent victims of crime when, because of society's failure to protect them, they are robbed of the ability to earn an income and to participate in society without being under the duress of a physical or mental handicap.

This bill provides that a qualified State crime compensation program is eligible for a grant equal to 25 percent of the current cost of paying victims of State crimes and 100 percent of its costs of paying compensation to victims of analogous Federal crimes. The cost of administering the crime victim compensation program would be borne entirely by the State.

My own State of Minnesota has a very successful program which is meeting the needs of victims and helping to improve law enforcement. In fiscal year 1977–78 the State spent $375,000 on its crime victim compensation program. Almost 90 percent of the budget was direct aid to the victims, who received an average claim payment of just over $1,500.

In 1974, Minnesota recognized the humanitarian need for a crime victim compensation program. Without the benefits of Minnesota's program, the victim is often left with burdensome bills and the anxiety they bring. Minnesota's program has helped alleviate the victim's anxiety and improved law enforcement by increasing citizen cooperation.

One important question which needs to be answered about the Federal role in crime victim compensation is how much will it cost? A recent Law Enforcement Assistance Administration study indicates that if the program's eligibility requirements: First, contain provisions requiring the victim to have incurred at least $100 worth of medical expenses in addition to those paid by a private insurance company; and second, require the victim to miss 1 week of work to be eligible for loss of earnings reimbursement, the total program costs, State and Federal, would be approximately $50 million. Since this bill provides for 25-percent Federal sharing of the compensation for qualifying State crimes, it is clear that overall Federal expenditures should easily fall within the authorization limits in the bill.

S. 551 contains an important step in our effort to fight crime across this Nation. A key provision of the bill provides that States cannot receive Federal funds for those crimes where the victim fails to cooperate with law enforcement authorities. This provision will assist law enforcement officers in apprehending, prosecuting and convicting suspects.

Mr. President, one of the outstanding features of this bill is its treatment of senior citizens. Although recent research indicates that the crime rate against the elderly is lower than that for other age groups, it also indicates that the psychological, physical, and economic impact of crime is considerably greater for the elderly. Victimization surveys indicate more frequent hospitalization of the elderly crime victim, subsequent to an injury, compared to other age group. In short, the problems and needs of the elderly victim are different from other classes of victims, and the elderly deserve special consideration. This bill gives them consideration by providing a waiver for elderly victims of the $100 deductible but, just as important, it should be clear to the States that we are encouraging them to provide immediate emergency payments to the elderly.

Finally, Mr. President, I would like to thank the Senator from Massachusetts for his leadership on this issue. Senator KENNEDY has been an active supporter of this legislation since it was first introduced by Hubert in 1977. I know he is as pleased as I am that it will soon become law.

Mr. MATSUNAGA. Mr. President, I am sure that the Senator from Minnesota will agree that the alarming increase in violent crime in this country in recent years has been directed toward a specific segment of our population—the elderly. As we all know, America's senior citizens are virtually defenseless against criminal assault because of their physical limitations, lifestyles, and social habits. A recent study conducted by the House Select Committee on Aging clearly shows that crime against the elderly is ever-increasing, with Americans 65 and over experiencing the greatest overall increase in crimes of violence with the exception of males between the ages of 16 and 19.

The House study reveals that our Nation's elderly—some 20 million Americans—have become the primary victims of common street and household crimes such as muggings, purse snatchings, burglaries, and confidence games. Elderly victims are not only less resilient to the trauma and personal injury of a criminal attack, but they are also very vulnerable to serious financial injury due to the fact that they live on low, fixed incomes. Other studies on the effects of crime on the elderly have found that elderly crime victims become particularly fearful of falling victim to crime again. In some cases, they place themselves under a self-imposed house arrest to the extent that they may suffer from bad health and malnutrition because they are afraid to move out of their homes for medical care and food.

In my judgment, it is clear that physically, psychologically, and financially, the elderly who have been victimized by crime suffer more hardships than any other group of Americans. I know that the Senator from Minnesota is deeply concerned, as I am, about the many problems of America's elderly citizens and will agree that if we do not begin today to address the difficult problems faced by elderly crime victims, those problems will continue to grow in size and severity. I believe that this legislation, the Victims of Crime Act, represents an important first step in this direction and for this reason is worthy of our support.

Mrs. HUMPHREY. Will the Senator from Hawaii yield?

Mr. MATSUNAGA. I am happy to yield to the distinguished Senator from Minnesota.

Mrs. HUMPHREY. Mr. President, I agree with my good friend from Hawaii that violent crime is a serious and growing problem for the elderly and that we have to do something to help the elderly victim now. As the Senator knows, more than 20 States have crime victim compensation programs. Both Minnesota and Hawaii have very fine programs.

Furthermore, 14 States with crime victim compensation programs also have provisions for emergency compensation prior to the receipt of the final award. Minnesota's and Hawaii's programs have such a provision and I know that the emergency compensation program is working well in Minnesota.

In many of these 14 States, if not in all of them, all innocent victims of crime, not just elderly victims, are eligible for emergency compensation. What I think we need to make clear to the other States who currently have programs and to those States which will develop programs is that at a minimum, the elderly should be eligible for emergency compensation. In some States, it may mean partial compensation on the same day a claim is filed. In other States, because of administrative procedures, it may take a little longer to provide emergency compensation. We need to make clear that it is our intent for States to provide the elderly emergency relief in the most expeditious manner possible. This can be done at a minimal cost, and, as the Senator from Hawaii has pointed out, there is a great need for this type of help for the elderly.

● Mr. McCLURE. Mr. President, I oppose S. 551, not because I oppose the types of systems which it seeks to fund—I heartily endorse State programs to compensate victims of criminal acts—but because Federal Government involvement is both unnecessary and destructive of the programs already in existence.

Nearly half of the States have been able to establish programs to compensate victims of crime without the benefit of S. 551. Furthermore, there is no indication that these programs have undergone the type of dire financial

hardship that would suggest the necessity of Federal involvement. To the contrary, State programs appear to have prospered without the fatherly intervention of the Federal Government.

Rather, this is one more case of the Federal Government spending money without any real indication that funding from the Federal Government is necessary for the furtherance of its social purpose.

In a post-Jarvis era, we can no longer afford this type of expenditure. It is no longer enough that a federally funded program be "nice" or efficacious—although it would help if some of the programs already in existence fit this description. We need instead to ask ourselves whether a pressing national purpose demands a Federal Government commitment as a sine qua non to its accomplishment. In this case, the answer is clearly "no."

Why, then, are proponents of this legislation so eager to entwine the Federal Government in State programs to compensate victims of crime? Part of the reason is the insatiable desire of interest groups, both governmental and nongovernmental, for increased levels of subsidization.

At least as important, however, is the feeling on the part of those of us in Washington that we can run State programs better than the States can. As a result, the bill reported out of committee would have disqualified from receiving funding a majority of the State systems currently in existence. Although the Wallop amendment does improve the bill slightly by removing some of the Federal strings, between a third and a half of State programs would still have to be legislatively altered in order for those States to qualify for continued funding under this bill.

Mr. President, the genius of our federal system is the ability of 50 governmental units to experiment with various ways of accomplishing governmental purposes. While I do not agree with every policy embodied in State programs to compensate victims of crime, I believe that States should have the right to make the types of distinctions which they deem to be reasonable.

Hence, I would not, out of hand, deny the States the right to target funding at those individuals who are most needy. Neither would I definitely circumscribe expedited procedures which States might establish in order to avoid extensive judicial proceedings. These are areas in which the States should be free to experiment for the purpose of developing systems tailored to their individual needs and philosophies. This bill, although not definitively binding on the States would, practically speaking, put an end to such experimentation.

In this respect the draftsmen of S. 551 are more candid than most legislative sponsors. Normally, the funding comes first; then, the strings. With S. 551, we can already see the emergence of the types of conditions which so inexorably flow from the receipt of Federal money. This should alert us to the fact that the States will inevitably pay dearly for the breadcrumbs embodied in this legislation.

Finally, I oppose S. 551 because of my expectation that funding will increase geometrically when the time comes for reauthorization. We have seen the same pattern before, frequently with the same cast of characters: A program is created and is provided with just enough money to lobby for more money. Two or 3 years down the line, what began as a small program becomes voracious.

This was the pattern for legal services activities, health care research programs, and protection and advocacy for the handicapped—all programs in which the Senator from Massachusetts has displayed a more than passing interest.

In view of the fact that proposals have already been made to double the size of S. 551 by increasing the Federal share to 50 percent, how can the proponents assure us that this program will not follow the path of all of the others? Will the Senate never learn from its experiences with this type of program?

Mr. President, for all of the reasons I have enumerated, I oppose this legislation.●

Mr. BAKER. Mr. President, I ask unanimous consent that the statement of the Senator from Wyoming (Mr. WALLOP) and the Senator from Alaska (Mr. STEVENS) appear appropriately in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR WALLOP

Mr. WALLOP. Mr. President, my remarks will be brief and are intended to explain the amendment to S. 551 that I am cosponsoring today with Senators Kennedy, Humphrey and Matsunaga.

The Victims of Crime Act of 1978, S. 551 is designed to serve as an incentive to states to set up and maintain compensation program for victims of crimes. The bill originally set forth ten mandatory criteria with which a state would have to comply in order to be eligible for federal funds. If a state did not satisfy all ten requirements, it could not participate in the federal program created by S. 551. The vast majority of the twenty states which had compensation programs in existence at the time the bill was introduced would have been ineligible for federal monies because they differed in several respects from the ten mandatory requirements of the legislation. To become eligible for federal monies, each of these state legislatures would have been compelled to amend the authorizing statutes for their state programs. No grace period was provided.

It is anamolous that a bill designed to encourage states to establish crime compensation plans would not fund those states that already have plans, particularly in light of testimony before the Senate Subcommittee on Criminal Laws and Procedures and the House Criminal Justice Subcommittee, which is summarized in the report accompanying S. 551, excerpts of which are as follows:

"From this testimony, and from various reports submitted to the Committee, it must be concluded that the States are administering their victim compensation programs in a commendable way. There seems to be a conscious effort to keep a firm rein on the expenditure of public funds for this purpose."

The amendment I offered during committee markup would have changed this result. The majority of the twenty existing programs would have been eligible to participate in the federal program envisioned by S. 551. Under the amendment a state would be eligible for federal funds if the state plan was in "substantial compliance" with the ten criteria in the bill. In adopting this "substantial compliance" language, the Committee accepted my contention that the requirements of the bill should not be so rigid as to penalize those states whose programs did not fully comply with the subsequently imposed federal criteria, especially where it has been demontrated that these programs were operating effectively and efficiently.

The amendment we are offering today to Section 4 of S. 551, as amended, is a refinement of the amendment adopted by the Judiciary Committee. It is the product of weeks of deliberation and discussion between Senator Kennedy and I. It avoids any difficulties in interpretation and application of the "substantial compliance" language without compromising the goals I sought to reach.

This amendment restricts federal dominance over state programs to those areas in which the federal government has a legitimate interest by reducing the number of mandatory criteria in the bill from 10 to 6. In addition, it provides that all existing programs will be funded for at least one legislative session after the effective date of this legislation whether or not they comply fully with the newly imposed federal criteria.

The effect of this amendment is to grandfather all programs in existence on the effective date of the act for at least one regular session of the State legislature which should provide adequate opportunity for state legislatures to take whatever steps are necessary to bring the state plan into full compliance with the six mandatory criteria in the bill.

Mr. President, I am satisfied that this amendment deals fairly and equitably with all the states which are presently administering victims compensation plans, and I hope that by reducing the number of mandatory criteria in the bill, many other states will be induced to participate in the program created by this legislation.

Finally, I am pleased to endorse the portion of this amendment which will make special provision for elderly victims of crime.

---

STATEMENT BY SENATOR STEVENS

Mr. STEVENS. Mr. President, one of the most appalling discrepancies of our time is the difference in treatment received between the criminal and the victim of crime. Criminals may receive free legal representation, counseling, job training, rehabilitation, medical care, etc., at great cost to the American taxpayer. But what happens to the victims of those crimes? Generally the victim is simply ignored while he or she experiences mental or physical anguish, often expensive medical and hospital bills and lost earnings. Further, as is often the case when death results from the criminal activity, dependents of the victims are left without means of support. I believe that S. 551 takes a big step in righting that injustice.

S. 551 encourages States to enact legislation to set up their own programs by providing for payment by the Federal Government of 100 percent of certain costs of compensating victims of exclusively Federal offenses and 25 percent of those costs with respect to the victims of State offenses. This bill permits the States to establish their own programs with a minimum of Federal red tape and bureaucracy.

Although the guidelines are miminal, I believe that they adequately protect the system from abuses and unnecessary costs. For example, the bill provides certain limitations on Federal grants specifying types of compensation awards for which the Federal Government will not provide funding—including payments for pain and suffering, payments for property loss, aggregate payments exceeding $50,000 to a victim on his dependents,

payments for awards of less than $100, and payments for lost earnings or lost support in excess of $200 per week for a period of less than 5 work days.

Further, Federal money will not be used to pay for administrative costs—it will be provided only to pay for the grant to the victim. Mr. President, I believe the bill before us is an equitable one. The States will bear 75 percent of the costs, as well as administer and shape their own programs. Today there are already 20 states which have their own programs. My state of Alaska, for instance, began just such a program several years ago and I believe that they have done an excellent job. It is important that programs such as this be encouraged and that other States have the opportunity to build such a program which they might not otherwise have without the passage of this legislation.

● Mr. CHURCH. Mr. President, as chairman of the Committee on Aging, I shall direct my remarks to provision in S. 551 directly affecting older Americans.

The Victims of Crime Compensation Act is especially helpful for the elderly because it waives the $100 deductible provision for persons 62 or older. This exemption recognizes that criminal victimization—even though the resultant personal injury loss may be small—may have a devastating financial impact for older Americans struggling on limited income. A $50 loss, for example, may result in unpaid utility bills, unfilled prescriptions, or missed meals. This exemption further recognizes that the older victim is most likely to be a low-income individual involved in a purse snatching or other street crime involving minor, but still serious, monetary loss due to physical injury. This bill also encourages elderly victims to come forward, report crimes, and seek assistance by prohibiting any means test or requiring claimants to seek welfare. This is consistent with other major programs for older Americans—such as medicare or the Older Americans Act—which do not impose any demeaning means test because it is cumbersome and expensive to administer.

The Committee on Aging has heard repeatedly that elderly victims frequently suffer longterm harm due to their physical frailties and fixed incomes. Many older Americans live under a form of house arrest because of fear of criminal victimization. To the extent that a Federal contribution can encourage the establishment and expansion of victims compensation programs, it can help to reduce this fear by letting the elderly know that a criminal attack need not result in crippling financial losses.

It is also my understanding that Senator KENNEDY and other Senate conferees will seek conference report language encouraging the States to establish emergency compensation procedures for elderly victims. Immediate aid is often essential for the traumatized older person. Fourteen States already provide immediate assistance. An article in the July 2 New York Daily News describes the workings of such a program administered by the dedicated staff of the Jamaica Service Program for Older Adults. Mr. President, I ask that this article be inserted in the RECORD at the conclusion of my remarks. As this article notes, the program has two beneficial effects: First, to give direct and immediate help, and second, to see that the State compensation program is functioning properly for older victims.

The inclusion of these provisions must be credited to the effective research and advocacy of the National Committee on Crime and the Elderly, working in conjunction with staff of the Committee on Aging and Committee on the Judiciary. The National Committee was founded in 1974 to develop a national program of crime prevention and assistance for older persons. It is composed of leading organizations representing and working in behalf of older Americans—the National Council of Senior Citizens, National Retired Teachers Association/American Association of Retired Persons, National Center on the Black Aged, National Council on the Aging, U.S. Conference of Mayors, and the Urban Elderly Coalition. The committee's activities are funded through the Administration on Aging, Community Services Administration, Law Enforcement Assistance Administration, Department of Housing and Urban Development, and the Ford Foundation. I salute the constructive contribution which the committee has made in improving this legislation in behalf of older Americans, and look forward to continuing to work with them so that the Nation's elderly can have less fear of being the victims of a criminal attack, and greater assurance of quick and effective aid when they are victimized.

The article follows:

[From the New York Daily News, July 2, 1978]

AGED CRIME VICTIMS GET AID FAST

(By Jack Leahy)

"I told him take everything, only please don't hurt me," said the 79-year-old Jamaica woman. "But he still knocked me down and kicked me and kicked me . . ."

The woman, still tearful and too terrified to allow her name to be revealed, was a victim of one of the human animals that roam the city's streets and apartment buildings, preying on defenseless old people.

Since April, when an emergency assistance program for elderly crime victims was started in Jamaica, more than 175 persons have been helped financially or otherwise, according to Ellen Camerieri, coordinator of the project for the Jamaica Service Program for Older Adults, 9247 165th St.

MANY NEED ASSISTANCE

"Fortunately or unfortunately, depending on how you look at it, the program is going very well," said Camerieri. "It proves that a great many crime victims need this kind of assistance."

The case of the beaten woman was typical of many others, Camerieri said. If anything, the woman was more cautious than most.

"I have my Social Security check sent directly for deposit in my bank," said the woman. "The day I was robbed, I had gone to the bank to withdraw some money I needed.

"It was an unusually large amount—more than $100—and the teller warned me not to go directly home with it because someone might be watching for me," she recalled.

"DIDN'T SEE ANYONE"

"I can't walk very far because of arthritis, but I stopped at the library for a while. When I got to my apartment, I didn't think anyone was following me and I didn't see anyone in the hallway.

"But this big man appeared from nowhere, just as I opened my door. He wore a pink nylon jacket and he took a knife out of his pocket and he said he'd cut me to pieces if I didn't give him money.

"I'd have given him anything, anything . . . he didn't have to hurt me. I would rather he killed me than make me suffer so much pain."

The emergency assistance program couldn't remove the woman's pain, but it did see that she got medical aid, daily nursing and a homemaker to help her until she regains use of her right arm, which had been immobile since the vicious assault.

FOR IMMEDIATE NEEDS

Emergency assistance is meant to be just that, Camerieri emphasized. The program is geared to provide help immediately after a crime—overnight shelter, replacement of broken locks, transportation to medical facilities, temporary homemaker service, psychological counseling, etc.—not long-term assistance that is provided for the elderly by other social agencies, she said.

"The program has a two-fold purpose," said Camerieri. "First, to help the victim directly and second, to see that state crime victim systems are functioning properly for the aging.

"We have found there is a great need for advocates to help senior citizens to negotiate with the Crime Victims Compensation Board, for example, and the Emergency Assistance for Adults program of the State Department of Social Services."

Recently, a police officer from the 103d Precinct in Jamaica, who was unusually knowledgeable about such agencies, referred an elderly crime victim to Emergency Assistance for Adults for help in moving to a safer neighborhood, Camerieri said.

"The victim was first told that she was ineligible for relocation aid," recalled Camerieri. "Then we interceded for her and she was eligible."

The Jamaica program is privately funded through the Community Service Society for an 18-month period to serve residents of the 103d, 105th, 106th and 113th police precincts.

Capt. John Kelly, commanding officer of the 103d, hailed the program for meeting "a very real need."

"When older people get ripped off, very often they shut themselves in their homes and don't go out for a week or more, even to get food," Kelly said.

LONG WELFARE LINES

"They might not have any money to buy anything until the next check comes in from Social Security," he continued. "Welfare takes time, and many oldsters feel their dignity is imposed upon if they have to wait on long lines in a welfare office.

"Some fast emergency cash or even a simple thing like getting a lock fixed can be very important at such times."

Just the fact that someone was interested in helping her boosted the spirits of 91-year-old Lydia Loebmann, who heard about the program at the Archer Ave. Seniors Center, located in the same building as the Jamaica Service Program for Older Adults.

"I was mugged and hurt in my apartment building by some young punk," said Loebmann. "He took my purse with what few dollars I had in it, along with my Social Security card and my half-fare seniors transit card.

PAID FOR MEDICINES

"The emergency assistance people were wonderful," she declared. "They paid for my doctor bill and medicines and they took care of getting new copies of my cards."

About 80% of victim referrals have come from police precincts; the remainder applied

directly to the Jamaica Service Program, Camerieri said.

"It's a very positive program," a police official said. "It could be used citywide, if we could ever come up with the money for it." ●

UP AMENDMENT NO. 1828

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mrs. HUMPHREY, Mr. MATSUNAGA, Mr. BIDEN, and Mr. WALLOP, proposes an unprinted amendment numbered 1828.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(1) On page 14, section 4, beginning with line 16, strike through and including line 23 on page 16 and insert in lieu thereof the following:

"SEC. 4. (a) A State proposing to receive payments to carry out a State program under this Act shall submit an application to the Attorney General at such time and in such form as the Attorney General shall prescribe by regulation. A State program for the compensation of victims of crime qualifies for grants under this Act if the Attorney General finds that such program is in effect in such State on a statewide basis during any part of the Federal fiscal year with respect to which grants are to be made and that such program meets the following criteria:

"(1) The program offers—

"(A) compensation for personal injury to any individual who suffers personal injury that is the result of a qualifying crime; and

"(B) compensation for death to any surviving dependent of any individual whose death is the result of a qualifying crime.

"(2) The program offers the right to a hearing with administrative or judicial review to aggrieved claimants.

"(3) The program does not have a limitation based on the financial means of the victim or any surviving dependent.

"(4) The program does not require any claimant to seek or accept any benefit in the nature of welfare unless such claimant was receiving such benefits prior to the occurrence of the qualifying crime that gave rise to the claim.

"(5) The program requires denial or reduction of a claim if the victim or claimant contributed to the infliction of the death or injury with respect to which the claim is made.

"(6) The program does not require that any person be apprehended, prosecuted, or convicted of the qualifying crime that gave rise to the claim.

"(b) If a State has a program in effect on the effective date of this Act which does not comply with the requirements of subsection (a) of this section such program shall be eligible for grants under this Act until the day after the close of the first regular session of the State legislature that begins after the effective date of this Act. Thereafter, only those programs which comply with the requirements of subsection (a) shall be eligible for grants under this Act.".

(2) On page 17, strike out lines 7 through 10 and insert in lieu thereof the following: "has received proceeds pursuant to any State right of subrogation or for which the victim or any dependent has received restitution from the perpetrator of the crime, and any amount representing State compensation awards—".

(3) On page 17, strike out line 22 and insert in lieu thereof the following:

"(5) to any claimant, other than a claimant sixty-two years of age or older, whose award would be for an".

(4) On page 18, line 12, strike out the word "and".

(5) On page 18, strike out line 17 and insert thereof the following:

"found by the appropriate State agency; and

"(9) to any claimant who failed to cooperate with appropriate law enforcement authorities with respect to the qualifying crime for which compensation is sought.".

(6) On page 22, line 22, strike out "1979" and insert in lieu thereof 1980"; line 23, strike out "1980" and insert in lieu thereof "1981"; and line 25, strike out "1981" and insert in lieu thereof "1982".

(7) On page 23, strike out lines 2 through and including line 4 and insert in lieu thereof the following:

"SEC. 9. This Act shall be effective on October 1, 1979.".

Mr. KENNEDY. Mr. President, I urge the adoption of the amendment.

So the amendment (UP No. 1828) was agreed to.

Mr. KENNEDY. Mr. President, I urge the adoption of the committee substitute, as amended.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, has the bill been advanced to third reading?

The PRESIDING OFFICER. No, it has not been.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. KENNEDY. Mr. President, I would like to add as cosponsors, Senators BROOKE, HEINZ, INOUYE, METZENBAUM, WILLIAMS, FORD, CRANSTON, and PACKWOOD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent the Judiciary Committee be discharged from further consideration of H.R. 7010 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7010) to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed immediately to the consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, I move to strike all after the enacting clause of the House bill, H.R. 7010, and that the text of the Senate bill, as amended, be inserted in lieu thereof.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate bill, S. 551, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments to H.R. 7010.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I move that the Senate insist on its amendment, request a conference with the House on the disagreeing votes of the two Houses on H.R. 7010, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. KENNEDY, Mr. BAYH, Mr. BIDEN, Mr. METZENBAUM, Mrs. HUMPHREY, Mr. THURMOND, Mr. HATCH, and Mr. WALLOP conferees on the part of the Senate.

## ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, are there any special orders entered for the recognition of Senators on tomorrow?

The PRESIDING OFFICER. Yes, there are orders for Senator GOLDWATER and Senator BAKER, for 15 minutes each.

Mr. ROBERT C. BYRD. Then, Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:30 a.m. tomorrow, rather than 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RESUMPTION OF THE UNFINISHED BUSINESS TOMORROW

Mr. ROBERT C. BYRD. I ask unanimous consent that at the conclusion of the recognition of Senators under special orders tomorrow, the Senate resume its consideration of the natural gas conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SPECIAL ORDER AND RESUMPTION OF THE UNFINISHED BUSINESS ON THURSDAY

Mr. ROBERT C. BYRD. Mr. President, are there any orders for the recognition of Senators on Thursday?

The PRESIDING OFFICER. No, there are not.

Mr. ROBERT C. BYRD. I thank the Chair. I ask unanimous consent that after the two leaders are recognized on Thursday under the standing order, the Senator from Idaho (Mr. CHURCH) be recognized, after which the Senate resume its consideration of the natural gas conference report.

The PRESIDING OFFICER. Fifteen minutes to the Senator from Idaho?

Mr. ROBERT C. BYRD. Fifteen minutes, yes. I thank the Chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the order is for the convening of the Senate at 9:30 a.m. tomorrow. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. And there are two special orders, one for Mr. BAKER and one for Mr. GOLDWATER?

The PRESIDING OFFICER. The Senator is correct.

## PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 9:30 a.m. tomorrow.

After the two leaders or their designees have been recognized under the standing order, Mr. GOLDWATER and Mr. BAKER will be recognized, each for not to exceed 15 minutes, after which the Senate will resume its consideration of the conference report on the natural gas pricing bill.

Rollcall votes could occur tomorrow. I imagine that there will be continued debate.

It has been indicated by Mr. METZENBAUM and others that a motion to recommit the bill with instructions likely will be made sometime on Wednesday. I hope an agreement can be reached for a vote on the motion to recommit.

So far as I am concerned, I would be willing to waive any rights to move to table that motion to recommit, if we could get an agreement as to a time certain for a vote up or down on the motion to recommit, so that all Senators on both sides of the aisle and both sides of the question could be alerted in ample time to make arrangements to be present for that vote.

So I look forward with hope that such an arrangement can be agreed to and that such a vote could occur on Thursday. I have discussed it with Mr. METZENBAUM and Mr. ABOUREZK, and they seem to be amenable to consideration of the proposal. I believe they have been in touch with their supporters on the minority side and on the majority side, and they have indicated that they will discuss the matter further on tomorrow.

## RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 6:02 p.m. the Senate recessed until tomorrow, Tuesday, September 12, 1978, at 9:30 a.m.

## NOMINATIONS

Executive nomination received after the recess of the Senate September 8, 1978, under the authority of the order of the Senate of September 8, 1978:

U.S. PAROLE COMMISSION

Richard T. Mulcrone, of Minnesota, to be a Commissioner of the United States Parole Commission for a term of six years, vice James R. Cooper, term expiring.

Executive nominations received by the Senate September 11, 1978:

DEPARTMENT OF STATE

Thomas R. Pickering, of New Jersey, a Foreign Service officer of the class of Career Minister, to be an Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs.

THE UNITED NATIONS

The following-named persons to be Representatives of the United States of America to the Thirty-third Session of the General Assembly of the United Nations:

Andrew J. Young, of Georgia.

James F. Leonard, Jr., of New York.

Abraham A. Ribicoff, United States Senator from the State of Connecticut.

James B. Pearson, United States Senator from the State of Kansas.

Set Charles Momjian, of Pennsylvania.

The following named persons to be Alternate Representatives of the United States of America to the Thirty-third Session of the General Assembly of the United Nations:

Donald F. McHenry, of Illinois.

Melissa F. Wells, of New York.

Angelique O. Stahl, of Florida.

John W. Hechinger, of the District of Columbia.

Richard W. Petree, of Virginia.

# HOUSE OF REPRESENTATIVES—*Monday, September 11, 1978*

The House met at 12 noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*Endeavor to keep the unity of the spirit in the bond of peace.*—Ephesians 4: 3.

Almighty God, our Father, whose love never lets us go and whose light follows us all our lives, help us to begin the tasks of this day aware of Thy presence, and eager to do our best for the good of our country.

Give to us and to our people a determination to strive for unity, a desire to live with good will in our hearts, and a devotion to the highest and best we know. Deliver us from differences which divide us, from difficulties which defeat us, and from disillusionments which dampen our spirits. Guide us in the way we should go and the work we should do as we seek to make our country great and strong and good.

In Thy holy name we pray. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3075) entitled "An act to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes."

The message also announced that the Senate insists upon its amendments to the concurrent resolution (H. Con. Res. 683) entitled "A concurrent resolution revising the congressional budget for the United States Government for the fiscal year 1979," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MUSKIE, Mr. MAGNUSON, Mr. HOLLINGS, Mr. CRANSTON, Mr. CHILES, Mr. ABOUREZK, Mr. BELLMON, Mr. DOLE, Mr. MCCLURE, and Mr. HEINZ to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 691. An act to provide for the preservation and enhancement of critical habitat for migratory waterfowl and other wetlands-dependent migratory birds of the Pacific flyway in the grasslands area of the San Joaquin Valley, Calif.

S. 976. An act to amend the Perishable Agricultural Commodities Act, 1930, relating to practices in the marketing of perishable agricultural commodities;

S. 1081. An act to amend the laws relating to the Osage Tribe in Oklahoma;

S. 1423. An act to establish a procedure in addition to impeachment for the retirement of disabled members of the Judiciary of the United States and the removal of those whose conduct is or has been inconsistent with the good behavior required by article III, section 1 of the Constitution, and for other purposes;

S 3467. An act to designate the U.S. Department of Agriculture Pecan Field Station in Brownwood, Tex., as the "W. R. 'Bob' Poage Pecan Field Station," and to designate the U.S. Department of Agriculture Meat Animal Research Center located near Clay Center, Nebr., as the "Roman L. Hruska Meat Animal Research Center";

S. 3468. An act to amend the Agricultural Act of 1949 to ensure that the interest rates

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

on price support loans for upland cotton are not less favorable to producers than the interest rates for such loans on other commodities; and

S.J. Res. 154. Joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in the International Petroleum Exposition to be held at Tulsa, Okla., from September 10, 1979, through September 13, 1979.

## HISPANIC WEEK

(Mr. BROWN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROWN of California. Mr. Speaker, I would like to bring to the attention of my colleagues the week of September 10 to 16 as "National Hispanic Heritage Week." President Carter has made this proclamation recognizing the "countless historical, cultural, and scientific contributions that Hispanics have made to the development of our country."

Many of my colleagues have asked why we need to have a "Hispanic Week." Indeed, the entire growth of our Nation is attributable, not to cultural diversity, but rather to the "melting" of the various cultures into one. However, the accomplishment of the Hispanic to which we should pay tribute is that, although they have chosen to adhere to their cultural identity, they have succeeded to make gains and thus contribute to American society. I believe that, as much as this is a tribute to Hispanic heritage, it is also a tribute to our fundamental notions of opportunity for all.

This is not to gloss over the problems that Hispanics have encountered, and continue to encounter, in their efforts to advance. Discrimination is a persistent and pervasive element of our society that must be overcome if we are to advance as a nation. But I call to the attention of my colleagues today those Hispanic-Americans who, despite the discrimination and despite the disadvantage of cultural difference, have succeeded to make contributions to our Nation's growth.

## THE LAUGHING GAS ACT?

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, everybody wants a serious and effective resolution of our quest for a national energy policy. I am afraid we are not on the right track, judging from a report in the Washington Post this morning. It carries a highly dubious endorsement of the gas compromise by a distinguished Senator who has been laboring earnestly in this area. He writes:

> Very little * * * is certain about the (natural gas) bill or its consequences, * * * No one really knows what will happen to energy prices and supplies if we pass the bill * * *
>
> But the compromise is infinitely preferable to doing nothing * * * The bill will bring some desperately needed certainty to the question of natural gas prices.

I just wonder, if "no one really knows what will happen" if we pass the bill, how can it produce "some desperately needed certainty?"

Confused? Well, you should be. The compromise itself is hopelessly confusing. The kind of contradictory endorsement quoted above, offered by the distinguished Senator, is very appropriate.

All this time I thought we were worried about natural gas prices. Now it turns out possibly to be about laughing gas. But it will not be a laughing matter for either consumers or producers if we pass this bill. Gas is not what they will get; it is what we will all take.

## CIVIL SERVICE RETIREMENT CREDIT FOR JAPANESE-AMERICAN WORLD WAR II INTERNEES

Mrs. SPELLMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 9471) to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

> Page 3, strike out lines 13 to 15, and insert:
>
> SEC. 2. (a) The amendments made by this Act shall take effect on the later of—
>
> (1) the date of the enactment of this Act, or
>
> (2) October 1, 1978.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

Mr. ASHBROOK. Mr. Speaker, reserving the right to object, I think we should know what is going on here. What does the bill purport to do?

Mrs. SPELLMAN. Mr. Speaker, if the gentleman will yield, this is a bill which has been passed, of course, by the House. The sole purpose of the bill is to authorize civil service retirement credit for periods in which people of Japanese ancestry were interned against their will in World War II internment camps.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, it would apply to those on civil service before their service was interrupted by internment; is that what the gentlewoman is saying?

Mrs. SPELLMAN. Mr. Speaker, if the gentleman will yield further, some may have been, others may not have been; but they would be given credit for the time they served involuntarily and, indeed, it was involuntary service. Our treatment of these people represents one of the most shameful episodes of our history.

We did, of course, go through this whole question and then passed this measure with an overwhelming vote in the House. The only difference between our bill, our House bill, and the other body's measure, is the effective date.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, I yield to my colleague from Iowa (Mr. LEACH).

Mr. LEACH. Mr. Speaker, this bill was passed with overwhelming support on both sides of the aisle. It was supported unanimously both in subcommittee and the full committee and it affects a very limited number of people who will under this legislation be allowed to apply to their civil service retirement credit for work performed for the Government while these individuals were interned during World War II.

Virtually every member from the State of California, virtually everyone that was closely concerned with this legislation approved it. I think it is the type of measure that this House should pass.

The Senate amendment, which is a limited one, was very carefully drawn.

Mr. Speaker, with the chairwoman of the subcommittee, as the ranking Republican, I strongly endorse it.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, one last question. I assume there were no amendments from the Senate that would not have been germane under the House rules?

Mrs. SPELLMAN. Mr. Speaker, if the gentleman will yield further, that is right. The only amendment was to make the effective date the date of the beginning of the fiscal year.

Mr. ASHBROOK. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

A motion to reconsider was laid on the table.

## CIVIL SERVICE REFORM ACT OF 1978

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 11280) to reform the civil service laws.

The SPEAKER. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 318, nays 4, answered "present" 2, not voting 108, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 11280, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Thursday, September 7, 1978, the Clerk had read through line 2 on page 144.

Are there any further amendments to title I of the bill?

Mr. HANLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as we initiate our deliberation on civil service reform today, it is my fondest hope that this legislation will move relatively smoothly and, without taking up too much time, be voted on in the Chamber at some point late this afternoon.

I would like to respond if I can briefly to some remarks on the part of my dear friend and colleague and manager of the bill, the gentleman from Arizona (Mr. UDALL), going back to Thursday night, when it was about 9 o'clock and the tempers were not that good. I would have preferred to have responded at that point but logic suggested that it was time to break it up and come back here on Monday and start anew. I have great respect for the gentleman from Arizona, Mo UDALL, and have worked closely with him from the very beginning.

I do believe, however, that the issue of civil service reform has to be put into another perspective. Certainly I know that he did not intend it that way, but the implication was that by virtue of the activity of several members of the committee that this measure was not moving and was slowed down in the committee process.

I would take issue with that implication and I would have to put it this way that any delays that have been attributed to the deliberation of this measure we have to fault the administration itself because from the very beginning the administration insisted upon expediency. As a result, that insistency agonized many, many entities, This was totally unnecessary. The implication the other evening was that everybody embraced this measure and all America was out there waiting for its enactment into law. That is not necessarily the case in its present form.

I would hope very much that certain amendments today will prevail to make this measure more palatable to most Americans.

Few disagree with the necessity for civil service reform. We all agree, and I think that this committee on the whole is committed, to reforming the civil service system. The problem happens to relate to the methodology employed by the White House in pursuit of this legislation.

As a result of which, for instance, the largest union of Federal employees, the American Federation of Government Employees, is somewhat unhappy with it. It did not have to be that way. There were compromises that could have been effected.

For instance, the American veterans' community is not happy with the legislation in this present form. It did not have to be this way at this point in time.

I could allude to a number of other entities such as the National Association of Treasury Agents, and many others, who are very unhappy with the bill. All of this was unnecessary if we could have applied sufficient deliberation to the measure but expediency was the order of the day on the part of the White House and the President, time in and time out, said that we have to have a bill this year. Well, in my judgment, if you are moving in the direction of something as complex and as broad in scope as this measure, certainly, then, it was due a decent foundation and, unfortunately, the measure that we are deliberating never enjoyed that decent foundation.

So we are going to do the best we can this day to make the measure more palatable so that we will be doing justice to the taxpayers and at the same we are not inflicting harm upon that good dedicated Federal employee.

Yes, we do have problems within our personnel complement but they are relatively few and most of the people happen to be very dedicated people who want very much to produce a day's work for a day's pay.

There are aspects of this legislation which could be unfair in this regard and we intend, through the amendment process, hopefully to effect responsible change.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HANLEY was allowed to proceed for 2 additional minutes.)

Mr. HANLEY. Mr. Chairman, we hope very much that during the course of this day, through the amendatory process, we make the measure far more palatable and far more fair to all.

Incidentally, I have the highest regard for the administration's chief technician on this measure, the Chairman of the Civil Service Commission, Allen "Scotty" Campbell, whom I regard as a great professional from the standpoint of public administration.

Unfortunately, the accelerated time frame provided the problems we have with this measure. It is unfortunate that

this situation had to prevail throughout the period of deliberation.

Therefore, Mr. Chairman, I am very hopeful that today, posthaste, but yet responsibly, we can do what has to be done to this bill so that we can say, "All right, Mr. President, here is the tool you have asked for. We are providing it for you in this 95th Congress. We would have preferred to have taken a little more time and to have done something far more responsible in the next Congress; but, in any event, we are saying, Mr. President, that this is what you have asked for; and we are going to give you the best possible bill given the environment under which we worked."

Mr. Chairman, I yield back the balance of my time.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I move to strike the second from the last word.

Mr. Chairman, I do not relish the role of speaking against quick passage of the civil service legislation, H.R. 11280, perceived by many to be a good reform vote in an election year. If the stakes were not so high I suppose that we could just let this one sail by.

To put it quite bluntly most Members of the House seem to feel that anything labeled civil service reform is better than nothing.

I would have hoped that we would have learned from the ill-conceived Postal Reform Act of 1970 that that is not the case.

Indeed the similarity between this civil service bill and the 1970 postal bill is glaring.

Just as we do today, back in 1970 we had a juggernaut of forces—many totally unfamiliar with the subject matter—descending on the Hill to lobby for passage. Is it not interesting that in the past few months the Business Roundtable has sent scores of representatives to lobby the Congress on the civil service bill despite the fact these representatives when pressed for details openly admitted they did not understand the bill?

Just as we do today, back in 1970 we had a new President pushing for a dramatic "reform" bill.

Just as we do today, back in 1970 we had broad bipartisan support. Incidentally, Republicans must have wry smiles on their faces as they watch Democrats support their bill.

If President Nixon were pushing this particular bill to open so many positions to political appointees, he would have been laughed off the floor, by my Democratic colleagues. Now we are doing this for an administration which has announced through its Secretary of Agriculture that it will soon start disciplining errant congressional Democrats by removing their friends from appointed positions.

Just as we do today, back in 1970 during consideration of the Postal Reform Act the White House had a Democratic champion for the bill, ironically the same one we find today. I do not think we want to further damage Mr. UDALL's record by passing this bill, too.

Virtually every Member of the House will agree that the postal reform bill of 1970, to put it mildly, did not solve all of the troubles of the Postal Service, as passage in the House this year of corrective legislation by a 384 to 11 vote proved. We do not have to make the same mistake with civil service reform by acting in haste.

I think that it is also important to emphasize that during consideration of this bill all Members should understand that when in some cases Mr. UDALL implies certain support for this legislation he is talking about very different forms of the bill. Indeed this bill now being discussed by Mr. UDALL is not the same one approved by the Post Office and Civil Service Committee—there are substantive differences. Contrary to the implication given by Mr. UDALL, the Federal employee unions do not support this bill.

In summary, I hope that every Member of this House will realize that a bad civil service bill would not simply hurt a few of the local Washington area members with a concentration of Federal employees, it will damage every citizen's contact with every aspect of the Federal Government.

Mr. CLAY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am pleased to announce that I have received assurances from the President that he will press for consideration and action by the other body on Hatch Act reform prior to adjournment. Accordingly, in view of President Carter's personal assurances of his intent, I deem it unnecessary to continue my effort to attach Hatch Act reform to civil service reform or to further oppose consideration of the reform measure on the House floor.

I applaud the President for his continued support to Hatch Act reform and am delighted by his assurances that he will use the powers of his office to encourage Senate consideration and action prior to adjournment. My efforts were geared to insure Senate consideration of the bill in the forthcoming House-Senate conference on civil service reform. Now, assuming that the President's efforts are successful. I feel a lessened sense of urgency for Hatch Act reform to be a part of civil service reform.

Mr. Chairman, for the consideration of my colleagues I am submitting the following letter from the President of the United States.

THE WHITE HOUSE,
*Washington, September 8, 1978.*

Hon. WILLIAM CLAY,
*Chairman, Subcommittee on Civil Service, U.S. House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: Early in my administration I proposed to Congress that the Hatch Act provisions affecting the political activities of federal employees be modified.

I was pleased that the House, under your leadership, voted overwhelmingly last year to strengthen the protections of federal employees from political coercion on the job while permitting them to freely exercise their First Amendment rights to participate in the political process. I continue to support Hatch Act reform.

Because I am concerned that the issues surrounding Hatch Act modification and Civil Service reform not become intertwined, I have consistently sought reform of the Hatch Act independent of action on Civil Service reform.

I believe separate consideration of the two bills is the best way to insure that each bill is eventually passed. This does not reflect any diminution of my commitment to fuller political participation for federal employees while affording necessary protections to the public. It does reflect my belief that the Hatch Act should not be considered together with Civil Service reform.

I share your concern that the Senate has not yet acted upon Hatch Act legislation, and intend to bring this concern to the attention of the Senate leadership. Hopefully, consideration and action will be taken without undue delay—prior to adjournment.

Your efforts on behalf of Hatch Act reform merit the appreciation of all federal employees anxious to exercise their basic political rights. I look forward to continuing our mutual efforts in support of those federal employees.

Sincerely,

JIMMY CARTER.

AMENDMENTS OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. COLLINS of Texas:

On page 137, line 12 after "(ii)" insert the following: "the Federal Bureau of Investigation,".

On page 142 after line 22 insert:

(e) With regard to employees and applicants for employment in the Federal Bureau of Investigation, disclosures described in subsection (b)(8)(A) of this section shall be made to the Attorney General or his designee. The Attorney General of the United States shall issue rules and regulations to protect employees and applicants for employment in the Federal Bureau of Investigation from the taking or failure to take any personnel action as a reprisal for such disclosure.

On page 213, line 5: after "(B)" insert the following: "the Federal Bureau of Investigation,".

On page 258, line 7: strike out 10,920 and insert in lieu thereof "10,780".

On page 258, line 13: strike out "Management." and insert in lieu thereof the following: "Management, except that the Director of the Federal Bureau of Investigation, without regard to any other provision of this section, may place a total of 140 positions in the Federal Bureau of Investigation in GS-16, 17, and 18."

On page 273, line 15: after "(B)" insert the following: "the Federal Bureau of Investigation,".

Mr. COLLINS of Texas. Mr. Chairman, I ask unanimous consent that the amendments I have offered, which are related to the FBI and are to title I, title IV, and title VI, be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. COLLINS of Texas. Mr. Chairman, I have offered four amendments which would insert identical provisions into titles I, IV, and VI of the bill. I asked and was given unanimous consent that they be considered en bloc.

My amendments exclude the Federal Bureau of Investigation from the bill on the same basis as the various national security agencies—the Central Intelligence Agency, the Defense Intelligence Agency, and the National Security Agency.

Title I of the bill sets forth merit system principles, but its prohibited personnel practices section would contradict the current status and flexibility of the

FBI. The Bureau has been exempted, for example, from considering alcoholics and drug abusers for employment—the Alcoholism Rehabilitation Act, Public Law 91–616, and the Drug Abuse Rehabilitation Act, Public Law 92–255—but under the merit system language of title I and a recent ruling by the Civil Service Commission defining "handicapping condition" to include alcohol or drug abuse, the FBI might have to consider for employment individuals with histories of alcoholism or drug abuse.

Existing law also limits the FBI from the purview of the Civil Service Commission in such areas as recruitment, qualification requirements, promotion and internal placement, career and career-conditional employment, and temporary assignments. Title I of the bill would allow active overview of the Bureau by the Merit Systems Protection Board and the Office of Personnel Management and affect the authority of the FBI Director to place up to 140 positions at supergrade levels in order to respond to the investigative priorities of the Justice Department.

Title IV should also exclude the FBI on the same basis as other national security agencies. The Senior Executive Service could place executives from other agencies in positions of high sensitivity in which demanding, rigorous or dangerous duties could be thrust upon them. The lives and safety of FBI personnel should not be jeopardized by the possibility of assignment of supervisory executives from other than law enforcement backgrounds.

Title VI on research and demonstration projects should exclude the FBI for obvious reasons. The Bureau is charged with the investigation of 78 different types of violations of criminal statutes relating to the integrity of Federal officials. The impartiality of such investigations is threatened by any program which makes it dependent on other agencies for its executive staffing or compels it to participate in exchanges of executives with these agencies. The bill's exclusion of the General Accounting Office is based on the same reasoning: The impartiality of GAO's Government-wide audits would be threatened.

Finally, Mr. Chairman, the bill as drafted empowers the President to exclude from coverage by the three titles "any executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities," but the FBI has exclusive investigative responsibility for foreign counterintelligence activities within the United States. It is therefore unreasonable to refrain from excluding it for substantially the same reasons as for exempting the other security agencies.

Mr. Chairman, I urge enactment of my amendments.

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, if I can have the attention of my friend, the gentleman from Texas, I hope maybe we can work this thing out in just a few minutes to the gentleman's satisfaction.

One of the many problems we have wrestled with in this legislation is what do we do about exempting intelligence agencies? The President's bill as originally submitted did not exempt the FBI from the bill.

I am prepared this morning to offer a substitute, and I hope to have the substitute language ready in just a moment for the gentleman from Texas (Mr. COLLINS). What my substitute will do is this—and I hope it will be acceptable to the gentleman from Texas (Mr. COLLINS) because we are giving him most of what he wants and most of what the Bureau wants—we will totally exempt the FBI from the senior executive provision of the bill. That is No. 1.

No. 2, we will exempt the FBI from the title VI experimental personnel demonstration portion of the bill which they wanted out from under.

With regard to the "whistle-blower" section, the language of the bill now permits the President to exempt the FBI from that section, and based on language submitted to us by the White House today, I think they have worked this out with the Justice Department. If the President does decide to exempt them—and he may exempt them, he will under the language of the bill be required to issue special rules and regulations so that the FBI "whistle-blowers" will be in a position to have someplace to go and so that they will have some protection. This will be done through a system to be designated by the President. This would be essentially consistent with the amendments the gentleman from Texas (Mr. COLLINS) has offered and showed me this morning.

I will have this language ready in just a moment as further discussion goes on. I hope it will be acceptable to the gentleman from Texas (Mr. COLLINS), and I hope we put this matter to rest.

I want to say that I have great regard for the FBI. This in a fine agency, but it is an agency that has suffered some agonies in the past. I know of the concern the professional members of the FBI have about the status of their agency today, and I do not want to come out here with legislation that will disrupt them further and submit them to additional agony.

I am reluctant to start exempting agencies, because many of the Federal agencies think they are special and think they ought to have special treatment. I am going to be pretty careful about exempting any other agency, but I think the FBI has made a case for the compromise I am going to offer in just a moment, as soon as the staff gets it ready for us.

Mr. COLLINS of Texas. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. Mr. Chairman, I appreciate the gentleman's yielding.

Mr. Chairman, as the gentleman knows, in our FBI present system, as far as the investigation of what they call the whistle-blowers is concerned, the present setup within the FBI involves four different places where they can go. The first one, of course, is the Inspection Staff where they have the Office of Professional Responsibility, known as the OPR.

As I understand it, in Phoenix, Ariz., in Dallas, Tex., or St. Louis, any place they live or work, they can pick up the telephone and call directly to the OPR, and in confidence they can discuss anything they want to discuss or they can make it an FBI agency matter. They have their choice of either doing it confidentially or going before FBI as a complainant.

I checked on and found out that so far this year there have been 248 citizens who reported to the FBI, to the Office of Professional Responsibility. So it is an active section of FBI. I can see why we are very aware, from the comments we have in Washington today, that we must be very certain we have all and full access for any employee.

The second referral point is that they can go to the Justice Department itself. The Justice Department has its own Office of Professional Responsibility, and that particular OPR is reporting only to the Attorney General.

Now, that was in the clarification amendment that we put into this law on the gentleman's suggestion. The gentleman from Georgia (Mr. LEVITAS) clarified this point so it now codifies the Justice Department referral. That is the way it works in practice, and it works well. It depends on a strong Attorney General, and we have a strong Attorney General.

It is interesting that last year under this provision, there was someone who reported to the Attorney General, and after a full investigation the No. 2 person in the FBI was removed. When we have a provision strong enough to remove the No. 2 executive within an agency, we do have something that is unusually strong.

Mr. UDALL. Mr. Chairman, the concern I have, if I may express this to the gentleman from Texas (Mr. COLLINS), is that the public should have confidence that there are channels within the Government so that people can "blow the whistle" on the FBI just as they can on other agencies.

We all remember our old Watergate fears, and the fear of some of our friends was that we would have been in a situation where, concerning L. Patrick Gray, if he had blown the whistle on one of his people, he would have blown the whistle and the appeal would have gone on to John Mitchell.

We want to have the President set up a channel through the agency that will satisfy most people that there is a channel available so that these matters can come forward.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of amendments to provide certain exclusions for the Federal Bureau of Investigation.

The rigorous and dangerous duties performed by the Bureau's employees do not lend themselves to some aspects of this legislation.

The best argument for exclusion of the FBI is probably the exclusion in the bill

of other national security agencies. The Bureau's domestic work is as dangerous and rigorous as that of the Central Intelligence Agency, which the bill excludes; and because the FBI is in cnarge of investigating white collar crimes throughout the Nation, we have at least as much reason for excluding it from the personnel exchanges and experiments proposed in title VI as we have for excluding the General Accounting Office. The bill rightfully excludes the GAO in order to preserve the objectivity of its audits, but the objectivity of investigations into alleged Federal employee wrongdoing is at least as important.

Mr. Chairman, I urge support of these amendments in order to conform this bill to the laws which rightfully correspond to the FBI's unique investigative needs.

Basically, Mr. Chairman, I support the package of amendments offered by the gentleman from Texas (Mr. COLLINS), but I certainly hope that we can work out this adjustment that the gentleman from Arizona (Mr. UDALL) will offer.

There are two points here, though, that I would like to make to the Members of the House. One is that the reason I would like to see a very satisfactory adjustment of this issue of the FBI is because there has been doubt on the part of some Members on this bill and it is an honest doubt.

The FBI is a sensitive agency. We should clear up any concern over how the FBI would be influenced. We can clear up some of the concerns about the bill itself. I think the entire bill will receive more support if some of these lingering doubts—that is with regard to the FBI—are cleared up.

So in that sense, I would hope that we can work out a solution to which the gentleman from Texas and the gentleman from Arizona have provided a very positive role in adding to the momentum of this bill.

There are unique problems facing an intelligence agency such as the FBI, and I think this package of amendments is necessary to clarify any questions that we do have.

Mr. UDALL. Mr. Chairman, will the gentleman yield to me for the purpose of offering amendments as a substitute for the amendments offered by the gentleman from Texas (Mr. COLLINS)?

Mr. DERWINSKI. I yield to the gentleman from Arizona.

AMENDMENTS OFFERED BY MR. UDALL AS A SUBSTITUTE FOR THE AMENDMENTS OFFERED BY MR. COLLINS

Mr. UDALL. Mr. Chairman, I offer amendments as a substitute for the amendments.

The Clerk read as follows:

Amendments offered by Mr. UDALL as a substitute for the amendments offered by Mr. COLLINS: Page 137, after line 18, insert:

"(3) If the President does not designate the Federal Bureau of Investigation, in its entirety, under paragraph (2)(B)(ii) of this subsection, functions of the Special Counsel relating to the enforcement of this section with respect to the Bureau, or any unit thereof, shall be carried out by the President (or his designee) notwithstanding any provision of law to the contrary."

Page 213, line 5, after "(B)" insert the following: "the Federal Bureau of Investigation,".

Page 273, line 15, after "(B)" insert the following: "the Federal Bureau of Investigation,".

The CHAIRMAN. The gentleman from Illinois (Mr. DERWINSKI) still has the floor.

Mr. DERWINSKI. Mr. Chairman, in order to expedite the procedure, I will yield back the balance of my time, so that the gentleman from Arizona (Mr. (UDALL) can explain his amendments.

The CHAIRMAN. Does the gentleman from Arizona (Mr. UDALL) wish to be heard on his amendment?

Mr. UDALL. Mr. Chairman, for the time being, I shall reserve my time.

Mr. LIVINGSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendments offered by the gentleman from Texas which would exempt the FBI from coverage under titles I, IV and VI of the Civil Service Reform Act.

Enactment of H.R. 11280, as written now, could effectively deprive the Director of the FBI of his prerogative to control all phases of personnel administration. Traditionally, this authority, which would be lost under title I, has been one of the keystones of the Bureau's semi-autonomous status and has provided insulation from improper external influences into matters which could compromise classified information or sensitive operations.

With the creation of the senior executive service under title IV, one can easily imagine the consequences of other agencies' officials, previously unexposed to the broad scope of criminal law enforcement, who would be entrusted with new responsibility for its leadership in the Bureau executive system.

Inclusion of the FBI under title VI would seriously threaten the impartiality of investigations the Bureau is mandated to conduct with regard to violations of criminal statutes dealing with official and political corruption.

Mr. Chairman, there can be no credible argument in favor of inclusion of the FBI in the present bill. The FBI ranks as one of the agencies in the Government most subject to oversight. It must make regular reports to six committees of Congress—Senate and House Judiciary, Intelligence and Appropriations—and is subject to oversight by the Department of Justice, the General Accounting Office and the Office of Management and Budget.

Finally, failing to exempt the FBI, like all other security agencies, from these three titles of the bill, could mean the end of the FBI as we know it—a centrally administered, tightly disciplined, responsive career law enforcement agency. Such action would create just one more agency, subject to the traditionally inefficient bureaucratic mechanisms.

Mr. Chairman, I urge this body to agree to the amendments. Possibly, if we can reach an amicable compromise through the efforts of the gentleman from Arizona, I would like to join in those efforts. I would like to see how the ultimate compromise comes down, but in the meantime I would be happy to yield to the gentleman from Texas (Mr. COLLINS) for his comments.

Mr. COLLINS of Texas, Mr. Chairman, at this time I would like to offer an amendment to the substitute amendments offered by the gentleman from Arizona (Mr. UDALL).

The CHAIRMAN. The gentleman from Texas (Mr. COLLINS) is advised that the gentleman from Louisiana cannot yield for the purpose of offering an amendment. He can yield time for debate.

Mr. LIVINGSTON. Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS TO THE AMENDMENTS OFFERED BY MR. UDALL AS A SUBSTITUTE FOR THE AMENDMENTS OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offer an amendment to the amendments offered as a substitute for the amendments.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Texas to the amendments offered by Mr. UDALL as a substitute for the amendments offered by Mr. COLLINS of Texas:

On page 141, line 20, after "(c)" inserts "(1)"; on page 142 after line 3, insert the following:

On page 142 after line 22 insert:

"(2) In the case of employees and applicants for employment in the Federal Bureau of Investigation, disclosures described in subsection (b)(8)(A) of this section shall be made to the Attorney General or his designee. The Attorney General of the United States shall issue rules and regulations to protect employees and applicants for employment in the Federal Bureau of Investigation from the taking or failure to take any personnel action as a reprisal for such disclosure.

The CHAIRMAN. The gentleman from Texas (Mr. COLLINS) is recognized.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I will be glad to yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, this amendment to my substitute is perfectly acceptable. It carries out the intent of what the gentleman from Texas was trying to do earlier.

So, if we will adopt the Collins amendment to the Udall substitute, and adopt the Udall substitute, we will have this compromise worked out.

Mr. COLLINS of Texas. Let me ask one question: It is my understanding that the President, when he wants to use this authority would go to the Attorney General. That would be the person he would turn to to follow up on this?

Mr. UDALL. The President will be empowered to set up a separate system, and under the gentleman's amendment to my substitute it would be required that it go through the Attorney General.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to my colleague from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding to me. First of all, I would like to commend the gentleman from Texas (Mr. COLLINS) on the leadership he has taken in this regard.

I have one question. I think it is impor-

tant to clarify through the chairman, the gentleman from Arizona, with respect to the language contained in the first part of his amendment to which the gentleman from Texas has offered an amendment. Under this language, would it be possible for the President to designate, as his designee, the special counsel otherwise created in this legislation for purposes of investigation in an FBI matter? Because, if that is the case, it would seem to me to defeat the purpose of the Collins amendment.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, it is very clear. The Collins amendment to my amendment states that it is ordered by the Congress that he not do it this way, that he work through the Attorney General. The President is given pretty broad powers, but I cannot imagine that he would go to the special counsel with this history we have made here today.

Mr. LEVITAS. I thank the chairman for that clarification. I think that does relieve not only myself, but others on these concerns, because I think the legislation is quite clear that the special counsel created by this legislation would not be the vehicle through which these matters would be pursued. I think it is very important because without this clarification, the FBI would be treated substantially different in the sensitive areas from the other intelligence agencies.

Mr. UDALL. The gentleman from Georgia has accurately stated what I am trying to do in this compromise.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I would ask of the gentleman from Texas, and through him the chairman of the committee, whether or not the amendment that is proposed by the gentleman from Arizona, as proposed to be amended by the gentleman from Texas, is the essence of agreements and understandings made with the chairman of the House Intelligence Committee, the gentleman from Massachusetts (Mr. BOLAND), whom I do not see on the floor today.

I would ask the gentleman from Arizona, as I just asked the gentleman from Texas, whether or not the substitute proposed by the gentleman from Arizona to be further amended by the amendment offered by the gentleman from Texas, incorporates the agreements or understandings or discussions had with Chairman BOLAND of the House Intelligence Committee?

Mr. UDALL. If the gentleman will yield, here we are dealing with another matter. That is a different matter. I have worked out an amendment with the gentleman from Massachusetts (Mr. BOLAND) which I will accept later in the proceedings on that matter.

Mr. MAZZOLI. I thank the gentleman from Arizona.

Mr. COLLINS of Texas. Mr. Chairman, I think we now have an understanding that questions will go through the Attorney General and the FBI, and I would accept the substitute with the amendment.

Mr. UDALL. Mr. Chairman, the staff tells me the Collins amendment to the Udall amendments has not been placed properly in the bill.

I would ask unanimous consent that the Collins amendment to the Udall substitute amendments be clarified as to its place in the bill as identified in the amendment at the desk.

The CHAIRMAN. The Clerk will report the modification.

The Clerk read as follows:

On page 141, line 20, after "(c)" insert "(1)";

On page 142, after line 3, insert the following:

"(2) In the case of employees and applicants for employment in the Federal Bureau of Investigations, disclosures described in subsection (b)(8)(A) of this section shall be made to the Attorney General or his designee. The Attorney General of the United States shall issue rules and regulations to protect employees and applicants for employment in the Federal Bureau of Investigation from the taking or failure to take any personnel action as a repraisal for such disclosure.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona to modify the amendment?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. COLLINS), as modified, to the amendments offered by the gentleman from Arizona (Mr. UDALL) as a substitute for the amendments offered by the gentleman from Texas (Mr. COLLINS).

The amendment, as modified, to the amendments offered as a substitute for the amendments was agreed to.

The CHAIRMAN. The question is on the amendments, as amended, offered by the gentleman from Arizona (Mr. UDALL) as a substitute for the amendments offered by the gentleman from Texas (Mr. COLLINS).

The amendments, as amended, offered as a substitute for the amendments were agreed to.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas (Mr. COLLINS), as amended.

The amendments, as amended, were agreed to.

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 141, line 20, insert "(1)" after "(c)".

Page 142, after line 3, insert the following:

"(2)(A) The head of each agency shall establish a personnel office and appoint an individual to be the head of such office.

"(B) The position to which any individual is appointed under subparagraph (A) of this paragraph shall, notwithstanding any other provision of law, be a position within the competitive service or a career reserved position within the Senior Executive Service. The requirement of the preceding sentence shall not apply if a majority of the civil service positions within such agency are excepted from the competitive service by or under any law (other than this title).

Mr. HARRIS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, this is a simple amendment, but I think a very important amendment. One of the biggest fears that is in the minds of many Federal employees today is to what extent we allow this bill to politicize the system. I think the flexibility we have talked about and the modernization we have talked about is supported by the average citizen and Federal employees alike. What they fear is who is going to implement these merit principles that are so finely pronounced in title I. What this amendment does is say that we will have in fact a personnel director that is not a political appointee. It is a competitive merit system person himself or herself who will be responsible for implementing these principles.

I would point out to my colleagues that under the bill we do centralize a great deal of the responsibility with respect to guarding the merit system principles and hiring principles enunciated in title I. No longer will we have a centralized bureau like the Civil Service Commission that will have total responsibility of making sure that merit system principles are adhered to.

There is provision in the bill to delegate this responsibility to individual agencies. I think we have had the experience in the past of agency heads saying they were not responsible for implementing it, it was the job of the Civil Service Commission, and so forth. Perhaps this delegation is a good idea, but only if we are sure who has the responsibility within each agency to guard against the politicization of the system and make sure that these merit principles are adhered to.

This amendment does one thing, somebody in that agency is a personnel officer where that agency is composed mostly of competitive people, to make sure that this person is a career person and not a political appointee.

I think it is one small step toward guarding against the appearance of, and the actuality of, in many cases, of politicizing the system, and will be a major reform in the bill as it is.

I would hope my colleagues can consider this favorably. I think it establishes a very important element with regard to a reform measure by saying simply that within each agency there is somebody responsible for safeguarding these merit principles we are enunciating, and, No. 2, that that person is not a political appointee and that person has knowledge of and understands the merit principles.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman from Virginia (Mr. HARRIS) for yielding to me.

Mr. Chairman, I rise to applaud the efforts of the gentleman from Virginia (Mr. HARRIS) and endorse the goal that he seeks.

If we truly fear the politicization of both the SES as well as the entire Federal bureaucracy, what better way to accomplish this than to permit a political appointee to decide the fate of job applications and promotions.

Casting doubt on the integrity of the hiring and promotion process, as we will if the gentleman from Virginia's amendment is not adopted, will likewise cast doubt on the independence and impartiality of Federal decisionmaking.

I urge my colleagues to support this amendment.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment is unnecessary, and it was soundly defeated in the committee.

There are really two things wrong with it. First, it mandates that every agency, however large or small, must have a full-time personnel officer-director. There are a whole variety of agencies, there are agencies such as HEW that has tens of thousands of employees and there are Federal agencies that may have a mere handful of employees. If you want a formula to increase the number of bureaucrats in every agency, however small or large, then this will do it through requiring a full-time personnel director.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I am sorry that I have not explained the amendment well enough so that my colleague understands it. There is no requirement that this person's job has to be fulltime with regard to personnel director, it simply says that somebody in that agency is the personnel director. It means that that person may have other duties, and that is not covered by this amendment at all. This in no way creates any additional requirements so far as the number of personnel is concerned, it simply designates one person in that agency as the personnel director.

Mr. UDALL. My theory is that if we accept this requirement, that even very small agencies must have an individual who is the personnel director, we will have to have some individual designated to do that.

Mr. HARRIS. That is right.

Mr. UDALL. The second point is that we will not be giving the management a little bit more freedom and flexibility.

So that in every case, whether it is HEW or a smaller agency, the personnel director has to be a career officer. I hope and I believe that in most cases they will be career officers, but clearly there are some advantages there, but to say that even very large agencies must do this, is a critical requirement to impose, especially if we are going to grant the President and the Cabinet officer freedom to put somebody in these agencies who is responsible, and then say we are going to take away the flexibility of the President and the Cabinet secretary and require in all cases that they have to be career persons in this particular personnel spot.

I urge defeat of the amendment.

Mrs. SPELLMAN. Mr. Chairman, I would like to point to a comment made by our distinguished chairman who pointed out that this is an important position and that he would hope that these people who were doing the hiring would be career people.

We are talking about attempting to keep from total politicization of the system. If we are going to have political appointees doing the hiring, we can be certain that additional political types are going to be hired.

Do we have a civil service system which we are working to retain? Do we have a merit system which we are working to preserve? If so, should we demand anything less than to have people who are professionally trained do the hiring? It has nothing at all to do with the number of people they hire. It has nothing at all to do with the number of hours which these people work in doing the hiring—whether they work at their recruitment functions full time or part time. We merely ask that career people should be hiring career employees.

Mr. Chairman, I find it very difficult to see how we can object to that. If, indeed, we are trying to protect a merit system, then I feel we can do no less than to adopt the amendment.

Mr. FISHER. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I yield to the gentleman from Virginia.

Mr. FISHER. Mr. Chairman, I support this amendment. It is one of the things which we can do to add an extra protection against undue political influence in the various departments and agencies of Government.

The personnel officer, part time or full time, as the case may be, is in a sensitive position. It seems to me that we ought to protect against loading these sensitive positions with political appointees.

This amendment would be a way of doing it very clearly, and it would then make it possible for Members, perhaps like this Member from Virginia, to support final passage of a bill; but we have to be convinced on behalf of thousands upon thousands of Government employees that here and there extra steps have been taken and that care has been taken to see that undue political influence cannot be exerted.

Mr. Chairman, it seems to me that this is a sensible, a manageable, and a logical way to achieve just that highly necessary objective.

Mrs. SPELLMAN. Mr. Chairman, I thank my colleague, the gentleman from Virginia (Mr. FISHER).

I would like to point out that we are looking out not only for those people who are Federal employees, but for all of the citizens of the United States who are served by these Federal employees; and I feel that if the people were given their choice, they certainly would want the job of hiring performed by professional staff rather than by political appointees.

Mr. Chairman, I yield back the balance of my time.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, before I give my devastating argument against the amendment, I first wish to commend the gentleman from Virginia (Mr. HARRIS) for very dramatically representing his unique constituency. We appreciate the fact that in northern Virginia one does have a substantial number of Federal employees, and they look to their Congressman for support when they feel that their interests are affected.

However, Mr. Chairman, this is a gut issue. Basically, this bill is intended to strengthen the hands of the President as the Chief Executive of the Federal Government. That is the purpose of the bill. But this amendment would restrict management in personnel matters. This amendment is one of a pattern of amendments which would turn this bill away from the direction in which it is properly headed.

A real problem with our Federal Government is its huge size and the fact that it is almost uncontrollable. A President of the United States, we must keep in mind, is not just a world figure meeting at Camp David with heads of state. He is not simply the spokesman for the aspirations of a free people. He is something more than that: He is the Chief Executive of our Government. We have shackled our Chief Executives over the years with restrictions which prevent them from effectively managing the entities over which they presumbly preside. This amendment would follow that costly path.

Mr. Chairman, I suggest that the bill before us is in this area a good bill. It is a strong bill, and I would suggest not only rejection of this amendment, but of any other amendments which would have the effect of adding new shackles to the ability of the President and his appointees to properly run this huge Federal Government of ours.

If you want to know what proposition 13 is all about, it is not just dollars and cents or objections to a tax bill. Proposition 13 mentality includes frustration over the inability of the average citizen to get proper service from Government.

Why is this frustration felt? Because the Federal Government, especially the civil service bureaucracy, often does not respond to the public interest. Frankly, the bureaucracy sometimes does not respond to the directives of a President.

What we are trying to do in this bill before us is to give the President the legitimate authority a Chief Executive should have, and on that basis I strongly recommend the rejection of the amendment.

Mr. LEACH. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. LEACH. I thank the gentleman for yielding.

The current head of the Civil Service Commission is Mr. Scotty Campbell, who has a good deal of respect on the Democratic side as well as on our side of the aisle. If this amendment were adopted, would not someone like Mr.

Campbell, who comes largely from academia and experience in State government, become ineligible to head a Federal personnel office? And is that not a good argument against adoption of the amendment?

Mr. DERWINSKI. The gentleman is using an unusual example, but the analysis is correct. If I read this amendment correctly, someone coming to head the personnel service must, in fact, under this amendment be a career official.

Mr. HARRIS. Mr. Chairman, will my colleague yield on that?

Mr. DERWINSKI. I yield to the gentleman from Virginia.

Mr. HARRIS. I thank the gentleman for yielding.

I would like to respond to both of my colleagues on that. I rise in defense not of the amendment but of Mr. Campbell. Any implication made on this floor that Mr. Campbell could not pass a civil service test I think is an unfair impugning of his ability.

Mr. DERWINSKI. Just a minute. Mr. Chairman, I reclaim my time. I do not want the gentleman to abuse my time. No one is impugning anyone. All we are trying to do is point out the basic unacceptability of the gentleman's amendment.

Mr. HARRIS. Will my colleague yield on that point?

Mr. DERWINSKI. I will yield if the gentleman behaves himself.

Mr. HARRIS. My colleague certainly does not want to put any restrictions on behavior. I am sure of that. I certainly think that the notion that was brought up by the last question that this in any way hampers bringing competent people into the personnel director position is unwarranted.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. HARRIS, and by unanimous consent, Mr. DERWINSKI was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Will the gentleman yield further?

Mr. DERWINSKI. Of course. I yield to the gentleman.

Mr. HARRIS. I thank the gentleman for yielding, but I think the point is that we are not saying here that they have to be existing in competitive service now. We say that the position has to be a competitive service position. That means that the person in that position has to be qualified; that is all. I would want to assure the gentleman that many personnel directors would and could come from outside the system. All we are saying here is that that person comes in and qualifies as a competitive employee and not just as a political hack. That is all this amendment does, and I would hope that we would not misconstrue the amendment as doing anything more than that.

Mr. DERWINSKI. Just as the gentleman was a little concerned that we not cast some reflection on Mr. Campbell, may I point out that noncareer appointees are not necessarily political hacks. Many of them are great statesmen. They are needed to rejuvenate the civil service. They are needed to bring in imagination, spirit, and creativity. So I think if we would just keep in mind that the injection of experts from acadamia or from the business world often brings the kind of leadership that we need to shake up a bureaucracy, I think in that sense the gentleman should welcome a blood transfusion for the tired Federal service.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

I think the point here is that in the bill we have pronouncements against politization of the civil service. Ninety percent of the senior executive service must be career service. There are only 10 percent who will be political appointments. They are the people we bring in from the outside to carry out the administration program. I do not think the ordinary Federal employee thinks some career Federal employee is going to be his friend any more than some competent person brought in from the outside. I think the amendment is unnecessary. It just attaches some additional restrictions.

Mr. STEERS. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, very briefly, I want to commend the gentleman from Virginia for attempting to do just exactly what it was that the gentleman from Illinois (Mr. DERWINSKI) stated that the gentleman was doing; namely, to turn this bill away from the general direction in which it is headed.

I remind the House that the Chief of Government, in addition to meeting with heads of state and also running the Federal Government, is also the Chief of a political party. This amendment would reduce, I think clearly the amount of clout that the President of the United States would have.

I was against this politicization of the bureaucracy when it was proposed by Persident Nixon. I am still against it.

The gentleman from Arizona (Mr. UDALL) has properly said that it is only 10 percent, and 90 percent and will still be governed by the civil service. I would point out to this body that if this idea is such a good one, how come we are restricting it only to 10 percent? What is good for 10 percent should be good for the other 90 percent.

Of course, the answer is that the 10 percent who would be selected would be at the top and they would be subject to the President's direction. They would be subject to politicization. We would, thereby, take an enormous step toward the spoils system which we finally got rid of 80 years ago.

Mr. Chairman, I yield to the gentleman from Virginia (Mr. HARRIS) first, then to the gentleman from Illinois (Mr. DERWINSKI).

Mr. HARRIS. Mr. Chairman, I thank the gentleman for yielding. The point the gentleman makes is an important one and should be expanded.

When we speak of 90 percent that must be qualified, that does not mean, and I hope it is not misrepresented to mean, that 90 percent has to come out of the career services. It does not. It simply means that 90 percent has to be qualified, that is all. Any percentage can be brought in from the outside. It is a question of whether they are qualified, or whether they are brought in as political appointees.

May I make the point and ask the gentleman from Illinois (Mr. DERWINSKI) and the gentleman from Arizona (Mr. UDALL) to listen to the point. If, in fact, we mean in the bill if, in fact, first, the merit principles recently set down in title I are meaningful, and, second, if we really mean 90 percent of the senior executive service are going to be competitive appointments, then should we not have a personnel director that is competitively appointed, rather than politically appointed? If 90 percent of the people that the personnel directors are going to deal with in the senior executive service and the rest are going to be competitive appointments, should not the personnel director be a competitive appointment; or should we under the bill open up, not to this President, but perhaps to some future President the opportunity of putting a fox in charge of the chicken house?

Should we allow a political appointee to be the one to implement these merit principles that we think are so important?

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. STEERS. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I do not represent a rural area, so I do not know what foxes do in chicken houses; but evidently that term applies to the amendment of the gentleman from Virginia, because the gentleman would insist, that this person who is appointed would be one who would be drawn from the ranks of civil servants and would be basically motivated to protecting the tenure of the civil servant, contrary to the public request for more efficient services.

Just to use numbers, if the gentleman from Maryland would agree with my numerical calculations, there are approximately 2 million Federal civilian employees, outside of the Postal Service. Let us assume, even for purposes of argument, that these 9,000 positions would all be political. That is just 9,000 out of 2 million, and all we are speaking of is 900 so I see no spoils system nor political grab.

I see nothing behind the basis thrust of this bill but pure governmental nobility.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HARRIS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 16, noes 336, not voting 80, as follows:

[Roll No. 745]

Mr. DENT changed his vote from "aye" to "no."

Mr. GONZALEZ changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. CLAY

Mr. CLAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLAY: On page 138, after line 5, insert a new section as follows:

"(C) on the basis of sex, as prohibited by the Equal Pay Act of 1963, 29 U.S.C. 206(d);", and redesignate the subsequent section accordingly.

On page 142, after line 14, add a new section as follows:

"(3) under the Equal Pay Act of 1963 (29 U.S.C. 206(d)), prohibiting discrimination on the basis of sex;", and renumber the subsequent sections accordingly.

Mr. CLAY. Mr. Chairman, this amendment is offered at the request of the Equal Opportunity Commission. It clarifies the statutory basis of discrimination and is intended to insure that nothing in the bill can be construed to detract from the provisions of title VII of the Civil Rights Act of 1964, as amended.

Specifically, the amendment clarifies that the provisions of the Equal Pay Act are included in allegations of discrimination, and that a trial de novo remains available to complainants in discrimination cases.

The amendment makes no changes in the bill, it simply makes explicit the intent of the bill's drafters.

Mr. Chairman, I urge adoption of the amendment.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, this amendment makes no change in existing law, it simply carries these nondiscrimination principles forward into this legislation and it is perfectly agreeable to me.

Mr. CLAY. I thank the gentleman.

Mr. DERWINSKI. Mr. Chairman, if the gentleman will yield, the gentleman from Missouri (Mr. CLAY) has very properly explained his amendment. I congratulate the gentleman for his attention to detail and his support for this legislation.

Mr. CLAY. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. CLAY).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. FISHER

Mr. FISHER. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. FISHER: Page 142, line 24, insert "(a)" before "If".

Page 143, after line 6, insert the following new subsection:

"(b) The General Accounting Office shall prepare and submit an annual report to the President and the Congress on the activities of the Merit System Protection Board and the Office of Personnel Management. Such report shall include a description of—

"(1) significant actions taken by the Board to carry out its functions under this title; and

"(2) significant actions of the Office of Personnel Management, including an analysis of whether or not the actions of the Office of Personnel Management are in accord with merit system principles and free from prohibited personnel practices.

Mr. FISHER. Mr. Chairman, I ask unanimous consent that the amendments may be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Mr. Chairman, if I may have the attention of the gentleman from Arizona (Mr. UDALL) who is managing the bill, I would say that this is a general amendment to title I, which would extend somewhat the role of the General Accounting Office in keeping track and monitoring and examining the work done under this bill. The bill, as it stands, says this: That if a Member requests a General Accounting Office study of some facet of the bill, it will be done. The GAO on its own may initiate a study. My amendment would simply extend this a little bit and specify that the GAO shall prepare and submiit annually a report on significant issues to the President and the Congress on the activities of the Merit System Protection Board and the Office of Personnel Management. This, no doubt, would result in improvements in both of the new agencies and would increase their accountability.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I will be glad to yield to the gentleman from Arizona.

Mr. UDALL. My concern about the amendment basically is that we are going to add some more to the voluminous paperwork that is produced every year. This mandates the GAO to do this, even though the GAO already has the authority to conduct investigations. They would be mandated by this amendment to make a report each year. However, my inclination is to accept the amendment offered by the gentleman from Virginia on the understanding that the Senate bill does

not have such a provision, and that possibly we may want to take a look at it in the conference. But, with that understanding, I am inclined to accept the amendment offered by the gentleman from Virginia. (Mr. FISHER), who is trying to work toward improvements on this bill.

Mr. FISHER. I thank the gentleman.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. FISHER. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I rise in support of the gentleman's amendment. This amendment is designed to insure effective accountability for the actions of the Office of Personnel Management in view of the enormous concentration of power that would be placed in the Office under the administration's proposal. One of the more serious weaknesses of H.R. 11280 is that the possibility for manipulating the civil service for personal or political favoritism is greatly increased because personnel policy would be made by an administrator serving at the pleasure of the President, instead of by a bipartisan body. Another serious weakness is the sweeping authority to be granted the Director to delegate to the agencies the functions of the Office of Personnel Management. A further loophole is the potential opening of thousands of positions formerly reserved for the competitive service to the ravages of political patronage.

The number and rapidity of changes contemplated by H.R. 11280 and Reorganization Plan No. 2 will make it virtually impossible for Congress to effectively oversee the Office of Personnel Management unless provision is made for an annual systematic review of the policies and program decisions and the compliance and enforcement actions of the Office of Personnel Management by the GAO.

Mr. Chairman, I believe this amendment is necessary to help reduce the great risk of reverting to political and personal favoritism on a grand scale in the civil service. I believe it is absolutely essential if the Congress is to have the minimum information it needs to hold the Office of Personnel Management accountable and to oversee the executive branch with regard to merit in the civil service.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Virginia (Mr. FISHER).

The amendments were agreed to.

The CHAIRMAN. Are there any other amendments to title I?

AMENDMENTS OFFERED BY MR. LEACH

Mr. LEACH. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. LEACH:

Page 137, line 4, after "which is" insert "in the Foreign Service of the United States or which is".

Page 143, line 15, after "831–835)" insert "or the authorities or responsibilities under the Foreign Service Act of 1946 (60 Stat. 999; 22 U.S.C. 800 and following)".

Page 149, at the end of the matter below line 14, insert the following new item:

"1209. Exception for the Foreign Service."

Page 165, line 15, strike out the quotation marks and the period which follows.

Page 165, after line 15, insert:

"§ 1209. Exception for the Foreign Service."

"This chapter shall not apply to the Foreign Service of the United States.".

Page 178, line 5, strike out the period and insert in lieu thereof "; or".

Page 178, after line 5, insert:

"(3) whose position is in the Foreign Service of the United States.

Page 182, in the analysis for chapter 77, insert the following new item:

"7703. Foreign Service Grievance Board."

Page 188, line 12, strike out the quotation marks and the period which follows.

Page 188, after line 12, insert:

"§ 7703. Foreign Service Grievance Board

"This chapter shall not apply to any individual who is entitled to utilize the Foreign Service Grievance Board under sections 691 through 694 of the Foreign Service Act of 1946 (22 U.S.C. 1037–1037c).".

Page 274, line 1, after "individual" insert "(other than an individual in the Foreign Service of the United States)".

Mr. LEACH (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Chairman, I also ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Chairman, the three amendments I am proposing have been prepared with the support of the Department of State and are consistent with the position taken by the full Post Office and Civil Service Committee in July, when it voted to exempt the Foreign Service from the Senior Executive Service and from provisions pertaining to Federal Labor Management relations.

The first amendment simply excludes the Foreign Service from the provisions in title I of the bill pertaining to merit system principles and prohibited personnel practices.

The second amendment excepts the Foreign Service from the authority of the Merit Systems Protection Board and Special Counsel since the service already has its own apparatus—the Board of the Foreign Service—and officer—Director General of the Foreign Services—to oversee personnel policies and practices.

The third amendment excepts individual members of the Foreign Service from the categories subject to personnel research and demonstration projects under the direction of the Office of Personnel Management.

These proposed modifications are designed to preserve the Foreign Service personel system which the Congress has taken special care to maintain over the years.

Mr. Chairman, the Foreign Service has a substantially different personnel system than the civil service involving the establishment of rank-in-person rather than rank-in-grade. I believe it would be a mistake to change the Foreign Service system through this legislative vehicle. Accordingly I urge adoption of these amendments.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendments.

Mr. Chairman, I think we are seeing the beginning of what we are going to be wrestling with this afternoon.

The gentleman from Iowa (Mr. LEACH) is a very distinguished and valuable member of our committee. He has a special concern about protecting the Foreign Service. The Foreign Service is important, and they do have special problems.

Mr. Chairman, we have been lobbied since this bill began by the Park Service and the Forest Service. I spoke with a distinguished member of the other body today who wants to exempt the Smithsonian Institution. Each one of us probably has some special agency with which we have a special relationship, and we would like some special provisions or special exemptions written into the law with respect to that agency.

With regard to the Foreign Service, in the committee the gentleman from Iowa (Mr. LEACH) offered an amendment to exempt the Foreign Service from the Senior Executive Service in this bill. I was opposed to that amendment, and he carried the day. It was a major victory for the gentleman from Iowa.

Now in these amendments he would go further. We have in title I some basic statements of principle with regard to the merit system Government-wide, and those principles include the following: that employees should be protected against arbitrary action, personal favoritism, coercion for partisan political purposes, and so on; that employees should be protected against reprisal for the disclosure of information, and so on; that employees should maintain high standards of integrity, conduct, and concern.

Mr. Chairman, these amendments exempt the Foreign Service from those provisions. I am sure that just as soon as we pass this kind of amendment, other Members on the floor will be in with similar amendments to exempt agencies for whom they have some special concern.

Mr. Chairman, I would hope that we would leave the bill as it is and not begin to make exemptions. It is going to be a long night. If we continue at the speed at which we have been going, I think we can finish the bill at a reasonable hour this evening.

This amendment is unsound. We have already made our major concessions to the Foreign Service.

Mr. Chairman, I would hope that these amendments would be defeated.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Iowa (Mr. LEACH).

The amendments were rejected.

The CHAIRMAN. Are there other amendments to title I? There being none, the Clerk will read title II.

The Clerk read as follows:

TITLE II—CIVIL SERVICE FUNCTIONS; PERFORMANCE APPRAISAL; ADVERSE ACTIONS

OFFICE OF PERSONNEL MANAGMENT

SEC. 201. (a) Chapter 11 of title 5, United States Code, is amended to read as follows:

"Chapter II.—OFFICE OF PERSONNEL MANAGEMENT

"Sec.
"1101. Office Personnel Management.
"1102. Director; Deputy Director; Associate Directors
"1103. Function of the Director.
"1104. Delegation of authority for personnel management.
"1105. Reports to the Congress.
"1106. Administrative procedure.

"§ 1101. Office of Personnel Management

"The Office of Personnel Management is an independent establishment in the executive branch. The Office shall have an official seal which shall be judicially noticed and shall have its principal office in the District of Columbia, and may have field offices in other appropriate locations.

"§ 1102. Director; Deputy Director; Associate Directors

"(a) There is at the head of the Office of Personnel Management a Director of the Office of Personnel Management appointed by the President, by and with the advice and consent of the Senate.

"(b) There is in the Office a Deputy Director of the Office of Personnel Management appointed by the President, by and with the advice and consent of the Senate. The Deputy Director shall perform such functions as the Director may from time to time prescribe and shall act as Director during the absence or disability of the Director or when the office of the Director is vacant.

"(c) No person shall, while serving as Director or Deputy Director, serve in any other office or position in the Government of the United States except as otherwise provided by law or by the President.

"(d) There may be within the Office of Personnel Management not more than five Associate Directors, as determined from time to time by the Director. Each Associate Director shall be appointed by the Director.

"§ 1103. Functions of the Director

"The following functions are vested in the Director of the Office of Personnel Management, and shall be performed by the Director, or by such employees of the Office as the Director designates:

"(1) securing accuracy, uniformity, and justice in the functions of the Office;

"(2) appointing individuals to be employed by the Office;

"(3) directing and supervising employees of the Office, distributing business among employees and organizational units of the Office, and directing the internal management of the Office;

"(4) directing the preparation or requests for appropriations for the Office and the use and expenditure of funds by the Office;

"(5) executing, administering, and enforcing—

"(A) the civil service rules and regulations of the President and the Office and the statutes governing the civil service; and

"(B) the other activities of the Office including retirement and classification activities;

"(6) reviewing the operations under chapter 87 of this title; and

"(7) the functions prescribed in part I of Reorganization Plan Numbered 2 of 1978.

"§ 1104. Delegation of authority for personnel management

"(a) Notwithstanding any other provision of this title—

"(1) the President may delegate, in whole or in part, authority for personnel management functions, including authority for competitive examinations, to the Director of the Office of Personnel Management; and

"(2) the Director may delegate, in whole, or in part, any function vested in or delegated to the Director including authority for competitive examinations (except competitive examinations for administrative law judges appointed under section 3105 of this title), to the heads of agencies in the executive branch and other agencies employing persons in the competitive service.

"(b)(1) The Office of Personnel Management shall establish standards which shall apply to the activities of the Office or any other agency under authority delegated under subsection (a) of this section.

"(2) The Office shall establish and maintain oversight program to ensure that activities under any authority delegated under subsection (a) of this section are in accordance with the merit system principles and the standards established under paragraph (1) of this subsection.

"(c) If the Office makes a written finding, on the basis of information obtained under the program established under subsection (b)(2) of this section or otherwise, that any action taken by an agency pursuant to authority delegated under subsection (a)(2) of this section is contrary to any law, rule, or regulation, or is contrary to any standard established under subsection (b)(1) of this section, the agency involved shall take any corrective action the Office may require.".

"§ Reports to the Congress

"Notwithstanding any other provision of law or any rule, regulation, or directive, the Director, or any employee of the Office of Personnel Management designated by the Director, may transmit to the Congress on the request of any committee or subcommittee thereof, by report, testimony, or otherwise, information and views on functions, responsibilities, or other matters relating to the Office, without review, clearance, or approval by any other administrative authority.

"§ 1106. Administrative procedure

"In the exercise of the functions assigned under this chapter, the Director shall be subject to subsections (b), (c), and (d) of section 553 of this title, notwithstanding subsection (a) of such section 553.".

(b)(1) Section 5313 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(24) Director of the Office of Personnel Management.".

(2) Section 5314 of such title is amended by inserting at the end thereof the following new paragraph:

"(68) Deputy Director of the Office of Personnel Management.".

(3) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Associate Directors of the Office of Personnel Management (5).".

(c)(1) The heading of part II of title 5, United States Code, is amended by striking out "THE UNITED STATES CIVIL SERVICE COMMISSION" and inserting in lieu thereof "CIVIL SERVICE FUNCTIONS AND RESPONSIBILITIES".

(2) The item relating to chapter 11 in the table of chapters for part II of such title is amended by striking out "Organization" and inserting in lieu thereof "Office of Personnel Management".

MERIT SYSTEMS PROTECTION BOARD AND SPECIAL COUNSEL

SEC. 202. (a) Title 5, United States Code, is amended by inserting after chapter 11 the following new chapter:

"Chapter 12—MERIT SYSTEMS PROTECTION BOARD AND SPECIAL COUNSEL

"Sec.
"1201. Appointment of members of the Merit Systems Protection Board.
"1202. Term of office; filling vacancies; removal; quorum.
"1203. Chairman; Vice Chairman.
"1204. Special Counsel; appointment and removal.
"1205. Powers and functions of the Merit Systems Protection Board and Special Counsel.
"1206. Authority and responsibilities of the Special Counsel.
"1207. Hearings and decisions on complaints filed by the Special Counsel.
"1208. Reports to Congress.

"§ 1201. Appointment of members of the Merit Systems Protection Board

"The Merit Systems Protection Board is composed of 3 members appointed by the President, by and with the advice and consent of the Senate, not more than 2 of whom may be adherents of the same political party. No member of the Board may hold another office or position in the Government of the United States. The Board shall have an official seal which shall be judicially noticed. The Board shall have its principal office in the District of Columbia and may have field offices in other appropriate locations.

"§ 1202. Term of office; filling vacancies; removal; quorum

"(a) The term of office of each member of the Merit Systems Protection Board is 7 years.

"(b) A member appointed to fill a vacancy occurring before the end of a term of office of his predecessor serves for the remainder of that term. Any appointment to fill a vacancy is subject to the requirements of section 1201 of this title.

"(c) Any member appointed for a 7-year term may not be reappointed to any following term.

"(d) Members may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty or malfeasance in office.

"(e) Except as otherwise provided in this title, the Board shall act upon majority vote of those members present, and any 2 members present shall constitute a quorum for the transaction of business of the Board.

"§ 1203. Chairman; Vice Chairman

"(a) The President shall from time to time designate one of the members of the Merit Systems Protection Board as the Chairman of the Board. The Chairman is the chief executive and administrative officer of the Board.

"(b) The President shall from time to time designate one of the members of the Merit Systems Protection Board as Vice Chairman of the Board. During the absence or disability of the Chairman, or when the office of Chairman is vacant, the Vice Chairman shall perform the functions vested in the Chairman.

"§ 1204. Special Counsel; appointment and removal

"The Special Counsel of the Merit Systems Protection Board shall be appointed by the President, by and with the advice and consent of the Senate, for a term of 7 years. The Special Counsel may be removed by the President only upon notice and hearing and only for misconduct, inefficiency-neglect of duty, or malfeasance in office.

"§ 1205. Powers and functions of the Merit Systems Protection Board and Special Counsel

"(a) Any member of the Merit Systems Protection Board, the Special Counsel, any administrative law judge appointed by the Board under section 3105 of this title, and any employee of the Board designated by the Board may—

"(1) issue subpenas requiring the attendance and testimony of witnesses and the production of documentary or other evidence from any place in the United States or any territory or possession thereof, the Commonwealth of Puerto Rico, or the District of Columbia, and

"(2) administer oaths, take or order the taking of depositions, order responses to writ-

ten interrogatories, examine witnesses, and receive evidence.

"(b) In the case of contumacy or failure to obey a subpena issued under subsection (a)(1) of this section, the United States district court for the judicial district in which the person to whom the subpena is addressed resides or is served may issue an order requiring such person to appear at any designated place to testify or to produce documentary or other evidence. Any failure to obey the order of the court may be punished by the court as a contempt thereof.

"(c) Witnesses (whether appearing voluntarily or under subpena) shall be paid the same fee and mileage allowances which are paid subpenaed witnesses in the courts of the United States.

"(d) In addition to functions otherwise provided in this title, the Board shall have the functions prescribed in part II of Reorganization Plan Numbered 2 of 1978.

"§ 1206. Authority and responsibilities of the Special Counsel

"(a)(1) The Special Counsel shall receive any allegation of a prohibited personnel practice and shall investigate the allegation to the extent necessary to determine whether there are reasonable grounds to believe that a prohibited personnel practice exists or has occurred.

"(2) If the Special Counsel terminates any investigation under paragraph (1) of this subsection, the Special Counsel shall prepare and transmit to any person on whose allegation the investigation was initiated a written statement notifying the person of the termination of the investigation and the reasons therefor.

"(3) In addition to authority granted under paragraph (1) of this subsection, the Special Counsel may, in the absence of an allegation, conduct an investigation for the purpose of determining whether there are reasonable grounds to believe that a prohibited personnel practice exists or has occurred.

"(b)(1) If the Special Counsel determines that there are reasonable grounds to believe—

"(A) that a personnel action was taken, or is to be taken, as a result of a prohibited personnel practice; and

"(B) except with regard to a prohibited personnel practice described in section 2302(b)(8) of this title, that the personnel action would have a substantial and adverse impact on the employee involved;

the Special Counsel may order a stay of the personnel action for 30 calendar days or any longer period the Board may prescribe under paragraph (2) of this subsection.

"(2) If the Board—

"(A) has received a petition of the Special Counsel for an extension of a stay ordered under paragraph (1) of this subsection, and

"(B) concurs in the determination of the Special Counsel under paragraph (1), after an opportunity is provided for oral or written comment by the Special Counsel and the agency involved,

the Board may extend the period of such stay for any period it considers appropriate. If the aggregate period of the stay, as proposed to be extended, will not exceed 60 days, the function of the Board under this paragraph may be performed by any one member of the Board.

"(c)(1) In any case involving—

"(A) any disclosure of information by an employee or applicant for employment which the employee or applicant reasonably believes evidences—

"(i) a violation of any law, rule, or regulation; or

"(ii) mismanagement, a waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety;

if the disclosure is not specifically prohibited by law and if the information is not specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs; or

"(B) a disclosure by an employee or applicant for employment to the Special Counsel of the Merit Systems Protection Board, or to the Inspector General of an agency or another employee designated by the head of the agency to receive such disclosures, of information which the employee or applicant reasonably believes evidences—

"(i) a violation of any law, rule, or regulation; or

"(ii) mismanagement, a waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety;

the identity of the employee or applicant may not be disclosed without the consent of the employee or applicant during any investigation under subsection (a) of this section or under paragraph (2) of this subsection, unless the Special Counsel determines that the disclosure of the identity of the employee or applicant is necessary in order to effectively carry out the investigation.

"(2) Within 15 days after receiving any information under paragraph (1)(B) of this subsection, the Special Counsel shall determine whether the information warrants an investigation. If an investigation is determined to be warranted, the Special Counsel shall—

"(A) transmit the information to the head of the agency involved;

"(B) require the head of the agency to—

"(i) conduct an investigation of the information and any related matters transmitted by the Special Counsel to the head of the agency; and

"(ii) submit a written report to the Special Counsel and to the General Accounting Office setting forth the findings of the head of the agency within 60 days after the date on which the information is transmitted to the head of the agency or within any longer period of time agreed to in writing by the Special Counsel; and

"(C) transmit a copy of the report to the employee or applicant for employment who disclosed the information.

"(3) Any report required under paragraph (2) of this subsection shall be reviewed and signed by the head of the agency and shall include—

"(A) a summary of the information with respect to which the investigation was initiated;

"(B) a detailed description of the conduct of the investigation;

"(C) a summary of any evidence obtained from the investigation;

"(D) a listing of any violation or apparent violation of any law, rule, or regulation; and

"(E) a description of any corrective action taken or planned as a result of the investigation, such as—

"(i) changes in agency rules, regulations, or practices;

"(ii) the restoration of any aggrieved employee;

"(iii) disciplinary action against any employee; and

"(iv) referral to the Attorney General of any evidence of a criminal violation.

"(4) In any case in which evidence of a criminal violation obtained by an agency in an investigation under paragraph (2) of this subsection is referred to the Attorney General, the agency shall notify the Office of Personnel Management and the Office of Management and Budget of the referral.

"(5) Upon receipt of any report of the head of any agency required under paragraph (2)(B)(ii) of this subsection, the Special Counsel shall review the report and determine whether—

"(A) the findings of the head of the agency are reasonable;

"(B) the agency's investigation was complete and unbiased; and

"(C) the corrective action taken or planned is sufficient in light of any violations found to have occurred.

"(6) Upon receipt of any report of the head of any agency required under paragraph (2)(B)(ii) of this subsection, the General Accounting Office shall review the report and determine whether the agency investigation involved was adequate and whether the corrective action, if any, taken or planned by the agency is adequate. The General Accounting Office shall report the results of its review to the Congress if it determines that the agency's investigation or any corrective action taken or planned by the agency is inadequate.

"(7) Except as specifically authorized under this subsection, the provisions of this subsection shall not be considered to authorize disclosure of any information by the Congress, any agency, or any person which is—

"(A) specifically prohibited from disclosure by any other provision of law; or

"(B) specifically required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs.

"(8) The Special Counsel may, with the consent of the employee or applicant for employment involved, participate in any proceeding before the Merit Systems Protection Board under section 7701 of this title, to the extent the Special Counsel determines appropriate, if the Special Counsel believes the personnel action which is the subject of the proceeding involves a reprisal for a disclosure of information described in paragraph (1)(A) or (B) of this section."

"(d)(1) If, in connection with any investigation under this section, the Special Counsel determines that there are reasonable grounds to believe that a prohibited personnel practice exists or has occurred which requires corrective action action, the Special Counsel shall report the determination together with any findings or recommendations to the Merit systems Protection Board, the agency involved, and to the Office of Personnel Management, and may report the determination, findings, and recommendations to the President. The Special Counsel may include in the report recommendations as to what corrective action should be taken, but the final decision on the corrective action to be taken shall be made by the Merit Systems Protection Board after opportunity for comment by the agency concerned and the Office of Personnel Management.

"(2) If, in connection with any investigation under this section, the Special Counsel determines that there is reasonable cause to believe that a criminal violation by an employee has occurred, the Special Counsel shall report the determination to the Attorney General and to the head of the agency involved, and shall submit a copy of the report to the Director of the Office of Personnel Management and the Director of the Office of Management and Budget.

"(3) If, in connection with any investigation under this section, the Special Counsel determines that there is reasonable cause to believe that any violation of any law, rule, or regulation has occurred which is not referred to in paragraph (1) or (2) of this subsection, the violation shall be reported to the head of the agency involved. The Special Counsel shall require, within 30 days of the receipt of the report by the agency, a certification by the head of the agency which states—

"(A) that the head of the agency has personally reviewed the report; and

"(B) what action has been, or is to be, taken, and when the action will be completed.

The Special Counsel shall maintain and make available to the public a list of noncriminal matters referred to heals of agencies and their certifications under this paragraph.

"(e)(1) In addition to the authority other-

wise provided in this section, the Special Counsel shall, except as provided in paragraph (2) of this subsection, conduct an investigation of any allegation concerning—

"(A) political activity prohibited under subchapter III of chapter 73 of this title, relating to political activities by Federal employees;

"(B) political activity prohibited under chapter 15 of this title, relating to political activities by certain State and local officers and employees;

"(C) arbitrary or capricious withholding of information prohibited under section 552 of this title;

"(D) activities prohibited by any civil service law, rule, or regulation, including any activity relating to political intrusion in personnel decisionmaking; and

"(E) involvement by any employee in any prohibited discrimination found by any court or appropriate administrative authority to have occurred in the course of any personnel action.

"(2) The Special Counsel shall make no investigation of any allegation of any prohibited activity referred to in paragraph (1)(D) or (1)(E) of this subsection if the Special Counsel determines that the allegation may be resolved more appropriately under an administrative appeals procedure.

"(f) During any investigation initiated under subsection (a), (c), or (e) of this section, no disciplinary action shall be taken against any employee for any alleged prohibited activity under investigation or for any related activity without the approval of the Special Counsel.

"(g)(1) Except as provided in paragraph (2) of this subsection, if the Special Counsel determines that disicplinary action should be taken against any employee—

"(A) after any investigation under this section, or

"(B) on the basis of any knowing and willful refusal or failure by an employee to comply with an order or requirement of the Special Counsel under subsection (b), (c), or (d)(3) of this section or an order of the Merit Systems Protection Board,

the Special Counsel shall prepare a written complaint against the employee containing his determination, together with a statement of supporting facts, and present the complaint and statement to the employee and the Merit Systems Protection Board in accordance with section 1207 of this title.

"(2) In the case of an individual appointed by the President, by and with the advice and consent of the Senate (other than an individual in the Foreign Service of the United States), the complaint and statement referred to in paragraph (1) of this subsection shall be presented to the President for appropriate action in lieu of being presented under section 1207 of this title.

"(h) The Special Counsel may appoint the legal, administrative, and support personnel necessary to perform the functions of the Special Counsel.

"(i) The Special Counsel may prescribe regulations relating to the receipt and investigation of matters under the jurisdiction of the Special Counsel. Such regulations shall be published in the Federal Register.

"(j) The Special Council shall not issue any advisory opinion concerning any law, rule, or regulation (other than an advisory opinion concerning chapter 15 or subchapter III of chapter 73 of this title).

"(k) The Special Counsel shall prepare and submit an annual report to the President and to the Congress on—

"(1) the investigation and disposition of each case considered by the Special Counsel during the annual period covered by the report; and

"(2) actions by the Special Counsel on each case referred by the Special Counsel to the President during the annual period covered by the report.

"§ 1207. Hearings and decisions on complaints filed by the Special Counsel

"(a) Any employee against whom a complaint has been presented to the Merit Systems Protection Board under section 1206(g) of this title shall be entitled to—

"(1) a reasonable time to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer;

"(2) be represented by an attorney or other representative;

"(3) a hearing before the Board, an administrative law judge appointed under section 3105 of this title and designated by the Board, or any other employee of the Board designated by the Board to conduct the hearing;

"(4) have a transcript kept of any hearing under paragraph (3); and

"(5) a written decision and reasons therefor at the earliest practicable date including a copy of any final order imposing disciplinary action.

"(b) A final order of the Board may impose disciplinary action—

"(1) in the case of political activity prohibited under subchapter III of chapter 73 of this title, as provided in section 7327 of this title; or

"(2) in any other case, consisting of removal, reduction in grade, debarment from Federal employment for a period not to exceed 5 years, suspension, reprimand, or an assessment of a civil penalty not to exceed $1,000.

"(c) There may be no administrative appeal from an order of the Board. An employer subject to a final order imposing disciplinary action under this section may obtain judicial review of the order in the United States district court for the judicial district in which the employee resides.

"(d) In the case of any State or local officer or employee under chapter 15 of this title, the Board shall consider the case in accordance with the provisions of such chapter.

"§ 1208. Reports to the Congress

"Notwithstanding any other provision of law or any rule, regulation or directive, any member of the Board, or any employee of the Board designated by the Board, may transmit to the Congress on the request of any committee or subcommittee thereof, by report, testimony, or otherwise, information and views on functions, responsibilities, or other matters relating to the Board, without review, clearance, or approval by any other administrative authority.".

(b) Any term of office of any member of the Merit Systems Protection Board serving on the effective date of this Act shall continue in effect until the term would expire under section 1102 of title 5, United States Code, as in effect immediately before the effective date of this Act, and upon expiration of the term, appointments to such office shall be made under section 1201 and 1202 of title 5, United States Code (as added by this section).

(c)(1) Section 5314(17) of title 5, United States Code, is amended by striking out "Chairman of the United States Civil Service Commission" and inserting in lieu thereof "Chairman of the Merit Systems Protection Board".

(2) Section 5315(66) of such title is amended by striking out "Members, United States Civil Service Commission" and inserting in lieu thereof "Members, Merit Systems Protection Board".

(3) Section 5315 of such title is further amended by adding at the end thereof the following new paragraph:

"(123) Special Counsel of the Merit Systems Protection Board.".

(4) Paragraph (99) of section 5316 of such title is hereby repealed.

(d) The table of chapters for part II of title 5, United States Code, is amended by inserting after the item relating to chapter 11 the following new item:

"12 Merit Systems Protection Board and Special Counsel.....1201."

PERFORMANCE APPRAISAL

SEC. 203. (a) Chapter 43 of title 5, United States Code, is amended to read as follows:

"Chapter 43.—PERFORMANCE APPRAISAL

"SUBCHAPTER I—GENERAL PROVISIONS

"Sec.
"4301. Definitions.
"4302. Establishment of performance appraisal systems.
"403. Actions based on unacceptable performance.
"4304. Responsibilities of Office of Personnel Management.
"4305. Regulations.

"§ 4301. Definitions

"For the purpose of this subchapter—

"(1) 'agency' means—

"(A) an Executive agency;

"(B) the Administrative Office of the United States Courts; and

"(C) the Government Printing Office;

but does not include—

"(i) a Government corporation;

"(ii) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, or any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; or

"(iii) the General Accounting Office;

"(2) 'employee' means an individual employed in or under an agency, but does not include—

"(A) an employee outside the United States who is paid in accordance with local native prevailing wage rates for the area in which employed;

"(B) an individual in the Foreign Service of the United States;

"(C) a physician, dentist, nurse, or other employee in the Department of Medicine and Surgery, Veterans' Administration, whose pay is fixed under chapter 73 of title 38;

"(D) an administrative law judge appointed under section 3105 of this title;

'(E) an individual in the Senior Executive Service; or

"(F) an individual appointed by the President; and

"(3) 'unacceptable performance' means performance of an employee which fails to meet established performance standards in one or more critical elements of such employee's position.

"§ 4302. Establishment of performance appraisal systems

"(a) Each agency shall develop one or more performance appraisal systems which—

"(1) provide for periodic appraisals of job performance of employees;

"(2) encourage employee participation in establishing performance standards;

"(3) use the results of performance appraisals as a basis for training, rewarding, reassigning, promoting, reducing in grade, retaining, and removing employees; and

(4) shall be the basis, notwithstanding any other provision of law, for promotions of one or more grades during any 12-month period in individual cases of exceptionally meritorious performance.

"(b) Under regulations which the Office of Personnel Management shall prescribe, each performance appraisal system shall provide for—

"(1) establishing performance standards which will permit the accurate evaluation of job performance on the basis of objective criteria related to the job in question for each employee under such system;

"(2) as soon as practicable, but not later than October 1, 1981, with respect to initial

appraisal periods, and thereafter at the beginning of each following appraisal period, communicating to each employee the performance standards and the critical elements of the employee's position;

"(3) evaluating each employee during the appraisal period on such standards;

"(4) recognizing and rewarding employees whose performance so warrants;

"(5) assisting employees in improving unacceptable performance;

"(6) reassigning, reducing in grade, or removing employees who continue to have unacceptable performane; and

"(7) promoting employees one or more grades during any 12-month period, notwithstanding any other provision of law, in individual cases of exceptionally meritorious performance, subject to limitations prescribed by the Office of Personnel Management on the number or proportions of such promotions.

§ 4304. Actions based on unacceptable performance

"(a) Subject to the provisions of this section, an agency may reduce in grade or remove an employee for unacceptable performance.

"(b)(1) An employee whose reduction in grade or removal is proposed under this section is entitled to—

"(A) 30 days' advance written notice of the proposed action which identifies—

"(i) each instance of unacceptable performance by the employee on which the proposed action is based; and

"(ii) the critical elements of the employee's position involved in each instance of unacceptable performance;

"(B) be represented by an attorney or other representative;

"(C) a reasonable time to answer orally and in writing;

"(D) an opportunity during the notice period to demonstrate acceptable performance; and

"(E) a written decision which—

"(i) in the case of a reduction in grade or removal under this section, specifies the instances of unacceptable performance by the employee on which the reduction in grade or removal is based, and

"(ii) unless proposed by the head of the agency, has been concurred in by an employee who is in a higher position than the employee who proposed the action.

"(2) An agency may, under regulations prescribed by the head of such agency, extend the notice period under subsection (b)(1)(A) of this section for not more than 30 days. An agency may extend the notice period for more than 30 days only in accordance with regulations issued by the Office of Personnel Management.

"(c) The decision to retain, reduce in grade, or remove an employee—

"(1) shall be made within 30 days after the date of the expiration of the notice period, and

"(2) in the case of a reduction in grade or removal, may be based only upon those instances of unacceptable performance by the employee—

"(A) which occurred during the 1-year period ending on the date of the notice under subsection (b)(1)(A) of this section in connection with the decision; and

"(B) for which the notice and other requirements of this section are complied with.

"(d) If, because of performance improvement by the employee during the notice period, the employee is not reduced in grade or removed, and the employee's performance continues to be acceptable for 1 year from the date of the advance written notice provided under subsection (b)(1)(A) of this section, any entry or other notation of the unacceptable performance for which the action was proposed under this section shall be removed from any agency record relating to the employee.

"(e) Any employee who is a preference eligible or is in the competitive service and who has been reduced in grade or removed under this section is entitled to appeal the action to the Merit System Protection Board under section 7701 of this title.

"(f) This section does not apply to—

"(1) the reduction to the grade previously held of a supervisor who has not completed the probationary period under section 3321(a)(2) of this title,

"(2) the reduction in grade or removal of an employee in the competitive service who is serving a probationary or trial period under an initial appointment or who has not completed 1 year of current continuous employment under other than a temporary appointment limited to 1 year or less, or

"(3) the reduction in grade or removal of an employee in the excepted service who has not completed 1 year of current continuous employment in the same or similar positions.

"§ 4304. Responsibilities of the Office of Personnel Management

"(a) The Office of Personnel Management shall make technical assistance available to agencies in the development of performance appraisal systems.

"(b) If the Office of Personnel Management determines that a performance appraisal system does not meet the requirements of this subchapter (including regulations prescribed under section 4305 of this title), the Office of Personnel Management shall direct the agency to implement an appropriate system or to correct operations under the system, and the agency shall take any action so directed.

"§ 4305. Regulations

"The Office of Personnel Management may prescribe regulations to carry out the purpose of this subchapter.".

(b) The item relating to chapter 43 in the table of chapters for part III of title 5, United States Code, is amended by striking out "Performance Rating" and inserting in lieu thereof "Performance Appraisal".

ADVERSE ACTIONS

SEC. 204. (a) Chapter 75 of title 5, United States Code, is amended by striking out subchapters I, II, and III and inserting in lieu thereof the following:

"SUBCHAPTER I—SUSPENSION FOR 14 DAYS OR LESS

"§ 7501. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means an individual in the competitive service who is not serving a probationary or trial period under an initial appointment or who has completed 1 year of current continuous employment in the same or similar positions under other than a temporary appointment limited to 1 year or less; and

"(2) 'suspension' means the placing of an employee, for disciplinary reasons, in a temporary status without duties and pay.

"§ 7502. Action covered

"This subchapter applies to a suspension for 14 days or less, but does not apply to a suspension under section 7521 or 7532 of this title or any action initiated under section 1206 of this title.

"§ 7503. Cause and procedure

"(a) Under regulations prescribed by the Office of Personnel Management, an employee may be suspended for 14 days or less only for such cause as will promote the efficiency of the service.

"(b) An employee against whom a suspension for 14 days or less is proposed is entitled to—

"(1) an advance written notice stating the specific reasons for the proposed action;

"(2) a reasonable time to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer;

"(3) be represented by an attorney or other representative; and

"(4) a written decision and the specific reasons therefor at the earliest practicable date.

"(c) An agency may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (b)(2) of this section.

"(d) Copies of the notice of proposed action, the answer of the employee if written, a summary thereof if made orally, the notice of decision and reasons therefor, and any order effecting the suspension, together with any supporting material, shall be maintained by the agency and shall be furnished to the Merit Systems Protection Board upon its request and to the employee affected upon the employee's request.

"§ 7504. Regulations

"The Office of Personnel Management may prescribe regulations to carry out the purpose of this subchapter.

"SUBCHAPTER II—REMOVAL, SUSPENSION FOR MORE THAN 14 DAYS, REDUCTION IN GRADE OR PAY, OR FURLOUGH FOR 30 DAYS OR LESS

"7511. Definitions; application

"(a) For the purpose of this subchapter—

"(1) 'employee' means—

"(A) an individual in the competitive service who is not serving a probationary or trial period under an initial appointment or who has completed 1 year of current continuous employment under other than a temporary appointment limited to 1 year or less; and

"(B) a preference eligible in an Executive agency in the excepted service, and a preference eligible in the United States Postal Service or the Postal Rate Commission, who has completed 1 year of current continuous service in the same or similar positions;

"(2) 'suspension' has the meaning as set forth in section 7501(2) of this title;

"(3) 'grade' means a level of classification under a position classification system;

"(4) 'pay' means the rate of basic pay fixed by law or administrative action for the position held by an employee; and

"(5) 'furlough' means the placing of an employee in a temporary status without duties and pay because of lack of work or funds or other nondisciplinary reasons.

"(b) This subchapter does not apply to an employee—

"(1) whose appointment is made by and with the advice and consent of the Senate;

"(2) whose position has been determined to be of a confidential, policy-determining, or policy-advocating character by—

"(A) the Office of Personnel Management for a position that it has excepted from the competitive service; or

"(B) the head of an agency for a position which is excepted from the competitive service by statute.

"(c) The Office of Personnel Management may provide for the application of this subchapter to any position or group of positions excepted from the competitive service by regulation of the Office of Personnel Management.

"§ 7512. Actions covered

"This subchapter applies to—

"(1) a removal;

"(2) a suspension for more than 14 days;

"(3) a reduction in grade;

"(4) a reduction in pay; and

"(5) a furlough of 30 days or less;

but does not apply to—

"(A) a suspension or removal under section 7532 of this title,

"(B) a reduction in force action under section 3502 of this title,

"(C) the reduction in grade of a supervisor who has not completed the probationary period under section 3321(a)(2) of this title if such reduction is to the grade held

immediately before becoming such a supervisor,

"(D) a reduction in grade or removal under section 4303 of this title, or

"(E) an action initiated under section 1206 or 7521 of this title.

"§ 7513. Cause and procedure

"(a) Under regulations prescribed by the Office of Personnel Management, an agency may take an action covered by this subchapter against an employee only for such cause as will promote the efficiency of the service.

"(b) An employee against whom an action is proposed is entitled to—

"(1) at least 30 days' advance written notice, unless there is reasonable cause to believe the employee has committed a crime for which a sentence of imprisonment may be imposed, stating the specific reasons for the proposed action;

"(2) a reasonble time, but not less than 7 days, to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answers;

"(3) be represented by an attorney or other representatives; and

"(4) a written decision and the specific reasons therefor at the earliest practicable date.

"(c) An agency may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (b)(2) of this section.

"(d) An employee against whom an action is taken under this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title.

"(e) Copies of the notice of proposed action, the answer of the employee when written, a summary thereof when made orally, the notice of decision and reasons therefor, and any order effecting an action covered by this subchapter, together with any supporting material, shall be maintained by the agency and shall be furnished to the Merit Systems Protection Board upon its request and to the employee affected upon the employee's request.

"§ 7514. Regulations

"The Office of Personnel Management may prescribe regulations to carry out the purpose of this subchapter.

"SUBCHAPTER III—ADMINISTRATIVE LAW JUDGES

"§ 7521. Actions against administrative law judges

"(a) An action may be taken against an administrative law judge appointed under section 3105 of this title by the agency in which the administrative law judge is employed only for good cause established and determined by the Merit Systems Protection Board on the record after opportunity for hearing before the Board.

"(b) The actions covered by this section are—

"(1) a removal;

"(2) a suspension;

"(3) a reduction in grade;

"(4) a reduction in pay;

"(5) a furlough of 30 days or less; and

"(6) a written reprimand or admonition based on the performance or nonperformance of adjudicatory duties;

but do not include—

"(A) a suspension or removal under section 7532 of this title;

"(B) a reduction in force action under section 3502 of this title; or

"(C) any action initiated under section 1206 of this title.".

(b) So much of the analysis for chapter 75 of title 5, United States Code, precedes the items relating to subchapter IV is amended to read as follows:

"Chapter 75.—ADVERSE ACTIONS

"SUBCHAPTER I—SUSPENSION OF 14 DAYS OR LESS

"Sec.
"7501. Definitions.
"7502. Actions covered.
"7503. Cause and procedure.
"7504. Regulations.

"SUBCHAPTER II—REMOVAL, SUSPENSION FOR MORE THAN 14 DAYS, REDUCTION IN GRADE OR PAY, OR FURLOUGH FOR 30 DAYS OR LESS

"7511. Definitions; application.
"7512. Actions covered.
"7513. Cause and procedure.
"7514. Regulations.

"SUBCHAPTER III—ADMINISTRATIVE LAW JUDGES

"7521. Actions against administrative law judges.".

APPEALS

SEC. 205. Chapter 77 of title 5, United States Code, is amended to read as follows:

"Chapter 77.—APPEALS

"Sec.
"7701. Appellate procedures.
"7702. Judicial review of decisions of the Merit Systems Protection Board.

"§ 7701. Appellate procedures

"(a) An employee, or applicant for employment, may submit an appeal to the Merit Systems Protection Board from any action which is appealable to the Board under any law, rule, or regulation. An appellant shall have the right—

"(1) to a hearing for which a transcript will be kept; and

"(2) to be represented by an attorney or other representative.

Appeals shall be processed in accordance with regulations prescribed by the Board.

"(b) The Board may hear any case appealed to it or may refer the case to an administrative law judge appointed under section 3105 of this title or other employee of the Board designated by the Board to hear such cases. The Board, administrative law judge, or other employee (as the case may be) shall make a decision after receipt of the written representations of the parties to the appeal and after opportunity for a hearing under subsection (a)(1) of this section. A copy of the decision shall be furnished to each party to the appeal and to the Office of Personnel Management.

"(c)(1) Subject to paragraph (2) of this subsection, the decision of the agency shall be sustained under subsection (b) only if the agency's decision is supported by a preponderance of evidence.

"(2) Notwithstanding paragraph (1), the agency's decision may not be sustained under subsection (b) of this section if the employee or applicant for employment—

"(A) shows harmful error in the application of the agency's procedures in arriving at such decision;

"(B) shows that the decision was based on any prohibited personnel practice described in section 2302(b) of this title; or

"(C) shows that the decision was not in accordance with law.

"(d)(1) Except as provided in subsection (e) of this section, any decision under subsection (b) of this section shall be final unless—

"(A) a party to the appeal or the Director of the Office of Personnel Management petitions the Board for a review within 30 days after the receipt of the decision; or

"(B) the Board reopens and reconsiders a case on its own motion.

The Board, for good cause shown, may extend the 30-day period referred to in subparagraph (A) of this paragraph. One member of the Board may grant a petition or otherwise direct that a decision be reviewed by the full Board. The preceding sentence shall not apply if, by law, a decision of an administrative law judge is required to be acted upon by the Board.

"(2) The Director of the Office of Personnel Management may petition the Board for a review under paragraph (1) of this subsection only if the Director is of the opinion that the decision is erroneous and will have a substantial impact on civil service laws, rules, or regulations under the jurisdiction of the Office of Personnel Management.

"(e) The Equal Employment Opportunity Commission may delegate to the Merit Systems Protection Board the authority to provide an employee or applicant with a preliminary determination on the issue of discrimination whenever, as part of a complaint or appeal before the Merit Systems Protection Board on other grounds, the employee or applicant involved alleges a violation of section 717 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–16), the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631, 633a), or section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791). Nothing in the subsection shall be construed to authorize the Equal Employment Opportunity Commission to delegate the function of making a final determination concerning the issue of discrimination.

"(f) The Board, or an administrative law judge or other employee of the Board designated to hear a case, may—

"(1) consolidate appeals filed by two or more appellants, or

"(2) join two or more appeals filed by the same appellant and hear and decide them concurrently,

if the deciding official or officials hearing the cases are of the opinion that the action could result in the appeals' being processed more expeditiously and would not adversely affect any party.

"(g)(1) Except as provided in paragraph (2) of this subsection, the Board, or an administrative law judge or other employee of the Board designated to hear a case, may require payment by the agency involved of reasonable attorney fees incurred by an employee or applicant for employment if the employee or applicant is the prevailing party and the Board, administrative law judge, or other employee, as the case may be, determines that payment by the agency is warranted.

"(2) If an employee or applicant for employment is the prevailing party and the decision is based on a finding of discrimination prohibited under section 2302(b)(1) of this title, the payment of attorney fees shall be in accordance with the standards prescribed under section 706 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–5(k)).

"(h) The Board may, by regulation, provide for one or more alternative methods for settling matters subject to the appellate jurisdiction of the Board which shall be applicable at the election of an applicant for employment or of an employee who is not in a unit for which a labor organization is accorded exclusive recognition, and shall be in lieu of other procedures provided for under this section. A decision under such a method shall be final, unless the Board reopens and reconsiders a case at the request of the Office of Personnel Management under subsection (d) of this section.

"(i) The Merit Systems Protection Board may prescribe regulations to carry out the purpose of this section.

"§ 7702. Judicial review of decisions of the Merit Systems Protection Board

"(a) Any employee or applicant for employment adversely affected or aggrieved by a final order or decision of the Merit Sys-

tems Protection Board may obtain judicial review of the order or decision.

"(b) A petition to review a final order or decision of the Board shall be filed in the Court of Claims or a United States district court as provided in chapters 91 and 85, respectively, of title 28. Notwithstanding any other provision of law, any petition for review must be filed within 30 days after the date the petitioner received notice of the final order or decision of the Board.

"(c) The court shall review the record for the purpose of determining whether the findings are in accordance with law, and whether the procedures required by statute and regulations were followed. The findings of the Board are conclusive if supported by the evidence in the record. If the court determines that further evidence is necessary, it shall remand the case to the Board. The Board, after such further proceedings as may be required, may modify its findings, and shall file with the court the record of such proceedings. The findings of the Board are conclusive if supported by the evidence in the record as supplemented.

"(d) If the Director of the Office of Personnel Management determines, in his sole discretion, that the Board erred in interpreting a civil service law, rule, regulation, or policy directive affecting personnel management and that the Board's final decision or order will have a substantial impact on any civil service, law, rule, or regulation, the Director may file a petition for judicial review of the order or decision in the United States District Court for the District of Columbia. In addition to the named respondent, the Board and all other parties to the proceedings before the Board shall have the right to appear in the proceeding before the court. The granting of the petition for judicial review shall be at the discretion of the court.".

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of title II, and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AMENDMENTS OFFERED BY MR. HANLEY

Mr. HANLEY. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HANLEY: Page 186, after line 25, insert the following:

"§ 7702. Pretermination hearings

"(a) If an agency gives notice under—

"(1) section 4303(b)(1) of this title of its intention to separate an employee; or

"(2) section 7513(b)(1) of this title of its intention to remove an employee, or to suspend an employee for more than 14 days;

such employee may, on or before the 10th day after such employee receives such notice, elect a pretermination hearing under this section in lieu of further proceedings under section 4303 or section 7513 of this title. An election of a pretermination hearing under this section must be made in a writing submitted to the Merit Systems Protection Board in accordance with regulations prescribed by the Board.

"(b) Any pretermination hearing elected under subsection (a) of this section shall be treated as an appeal to the Merit Systems Protection Board under section 7701 of this title, except that—

"(A) such hearing shall be conducted by an administrative law judge appointed under section 3105 of this title and employed by the Board, whose decision shall be final, subject to judicial review under section 7703 of this title as a decision by the Board;

"(B) subsection (d) of such section 7701 shall not apply; and

"(C) no hearing pursuant to such election shall be scheduled before the 14th day after the date of the submission of such election to the Board.

"(2)(A) Subject to subparagraph (B) of this paragraph, an employee who has elected a pretermination hearing under this section shall not be removed or suspended under section 4303 or section 7513 of this title before the issuance of a decision under this section.

"(B) If, on the 90th day after the submission of an election of a pretermination hearing under this section, a decision under this section has not been made in connection with such hearing and the administrative law judge involved determines that such delay was caused primarily by the employee involved, such employee may, after such day, be removed or suspended in accordance with the proposed action on which the election under this section was based, pending a final decision by the administrative law judge under this section.

"(c) This section shall not apply in any case in which—

"(1) there is reasonable cause to believe the employee involved has, in connection with the matter on which the proposed action involved is based, committed a crime for which a sentence of imprisonment may be imposed; or

"(2) a matter affecting the national security is involved.

"(d) The parties to a negotiated collective bargaining agreement may agree to implement or substitute in whole or in part the procedure of this section as part of a collective bargaining agreement, or may agree upon alternative methods of settling matters subject to this section.

"(e) The Merit Systems Protection Board shall prescribe such regulations as are necessary to carry out the purpose of this section.

Page 170, line 8, insert "and, in the case of removal of an employee, subject to section 7702 of this title," after "section,".

Page 179, line 9, insert "and subject to section 7702 of this title," after "Management,".

Page 182, in the matter following line 17, strike out "7702" and insert in lieu thereof "7703", and insert after the item relating to section 7701 the following: "7702. Pretermination hearings.

Page 187, line 1, strike out "§ 7702" and insert in lieu thereof "§ 7703".

Mr. HANLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HANLEY. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HANLEY. Mr. Chairman, I rise to submit amendments to title II that would streamline the appeal procedure for Federal workers who are discharged or suspended for more than 14 days.

Under the present system, there is a two-step appellate procedure which takes up to 2 or more years to process from the time action is initiated until the final administrative appeal is concluded.

In my judgment it is unconscionable to keep an employee in limbo and most likely out of work for this period of time. Moreover, it is unfair to an agency because if that employee is ordered reinstated after 2 or more years the agency must return the employee to his or her position even though it may have been filled in the interim. This could result in an agency paying two employees to do one job.

Neither the President's proposal nor the committee's bill prevents these inordinate delays. They both perpetuate the two-step appeal procedure without providing for necessary time limits on the appeal process. My amendments, on the other hand, would prevent these foreseeable consequences. For the first time strict time limits would be incorporated into the procedure. They provide that an employee who is the subject of a discharge action or suspension for more than 14 days will receive a notice of charges, be afforded a hearing before the MSPB and be provided a final decision in a maximum of 90 days. This would end the administrative appeal process.

If it is determined that discharge or suspension is warranted the action will be immediately imposed, and the only appeal from the administrative determination is to the Federal courts after the employee is discharged or suspended. This procedure parallels the private sector where collective bargaining agreements provide for one hearing before an arbitrator. The only appeal from binding arbitration is to the courts.

Additionally, unlike the present system and the one proposed in this bill, my amendments attempt to build into the system a motivation to expedite appeals. The employee is motivated to act expeditiously because if he or she requests a delay or otherwise makes it impossible for the process to be completed within the 90 days, then he or she is removed at the end of the 90-day period. Any further right of the employee to a hearing will be after the discharge or suspension action is imposed. Moreover, the agency is motivated to act promptly because if delay results from a request by the agency or the failure of the MSPB to schedule a timely hearing, the employee remains on the payroll until a decision is rendered.

Based upon private sector experience, I strongly believe that it would be beneficial to all sides to eliminate the present cumbersome layers of appeals. Employees will not have to suffer long periods of uncertainty and unemployment before knowing the disposition of their cases. And agencies will not be faced with staffing problems that result from appealed adverse actions remaining open for so long.

I urge my colleagues to join me in support of these amendments.

During the markup of H.R. 11280 Con-

gressman DERWINSKI alleged that the streamlined appeal procedure would result in increased Government cost. In support of this claim he relied upon the estimates of the Congressional Budget Office which estimated an increased cost of $2.6 million in fiscal year 1978, $11.0 million in fiscal year 1979; $11.6 million in fiscal year 1980, $12.5 million in fiscal year 1981, and $13.4 million in fiscal year 1982.

These claims of increased costs based upon the Budget Office estimates are erroneous. Their estimates were based upon H.R. 6225, the pretermination hearing bill ordered reported by the Post Office and Civil Service Committee on January 25, 1978. The streamlined appeal procedure amendment to H.R. 11280 is vastly different than H.R. 6225 thus rendering the Budget Office's analysis inapplicable. It differs on the following basis:

First. These amendments do not expand coverage of the appeal procedure to employees in the excepted service as provided for in H.R. 6225. Thus, the Budget Office estimate of increased costs resulting from additional cases is not applicable.

Second. H.R. 6225 extended coverage to include the appeal of all suspension actions. These amendments limit coverage to suspensions of more than 14 days.

Third. H.R. 6225 required that appeal cases be heard by Administrative Law Judges instead of hearing examiners. The Budget Office determined this would result in increased salary costs. These amendments eliminate the requirement of Administrative Law Judges, thereby negating the increased salary cost estimates. Under the amendments cases would be heard by hearing examiners of the Merit System Protection Board.

Fourth. Unlike H.R. 6225 these amendments also place a 90-day time limit on the processing of appeals. The Budget Office's estimates were based on employees remaining on the payroll 120 days longer than under the present system. According to Chairman Campbell during the markup session on June 22, 1978, under the present system it takes between 30 to 60 days to remove someone from the payroll. Thus their figures were based on employees remaining on the payroll for between 150 and 180 days. However, under these amendments it would only be 90 days, therefore, the estimates do not apply.

Fifth. The Budget Office does not take into account the fact that these amendments would provide for binding arbitration as a substitute to the Statutory appeal procedure. This could result in a net cost savings to the Government because under such an alternative procedure the unions generally assume one-half the cost. Under the statutory procedure the Government pays the entire cost.

Mr. CLAY. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I am delighted to yield to my friend, the gentleman from Missouri.

Mr. CLAY. Mr. Chairman, is this not virtually what passed the subcommittee that I chair in the Committee on Post Office and Civil Service?

Mr. HANLEY. Essentially, there was similar dialogue on the committee passed measure and I know that during the course of Committee consideration of this amendment there were some figures provided by OMB which suggested the cost of this concept would be rather heavy; however, in analysis, the cost provided by the OMB applied to the bill you refer to.

Mr. CLAY. Mr. Chairman, if the gentleman will yield further, so virtually it is the same proposal that passed the subcommittee and the full committee and is now awaiting a rule from the Committee on Rules,

Mr. HANLEY. Well, no; there are substantive differences in the committee-passed bill and this amendment. The cost associated with this amendment is substantively less than the cost associated with that bill.

The CHAIRMAN. The time of the gentleman from New York (Mr. HANLEY) has expired.

(By unanimous consent, Mr. HANLEY was allowed to proceed for 2 additional minutes.)

Mr. CLAY. Mr. Chairman, will the gentleman yield further?

Mr. HANLEY. I yield to the gentleman from Missouri.

Mr. CLAY. Mr. Chairman, I thank the gentleman and I intend to support the amendment.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this is a major amendment and was debated at some length in the committee and was then rejected by a vote of 10 to 15. There is something very fundamental and very basic at stake here. This amendment goes exactly opposite to the main thrust of what we are trying to do in this bill. Presently, it is pretty hard, one of the premises on which this legislation is founded is that it is too difficult to discharge or discipline inefficient Federal employees.

Now, if one is a Federal employee, the current law is that he can be given 30 days notice and then be terminated. After that, there is an opportunity to come in and have a hearing. The employee is entitled to have a written decision and an appeal may be taken by the employee to an outside appeals authority. This turns it around and says that employee cannot be fired unless you have a hearing before they are fired. It moves in the opposite direction and instead of doing what this bill is trying to do to make it easier to fire incompetent Federal employees, it makes it much more difficult; so it is contrary to the basic purpose of the bill. It will make it even more difficult than it is today to remove an incompetent employee.

There was an estimate by the Congressional Budget Office that it would cost $63 million. That was an earlier pretermination bill and I do not know the differences in cost between that one and this one.

Clearly, if we are going to set up a whole new structure and a whole new web of protection for Federal employees against being fired, we are going to have some costs involved.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from New York.

Mr. HANLEY. Mr. Chairman, just to clarify the point with respect to the cost of this measure, the dollar figure associated previously was in error. That was the figure of OMB in association with a similar but much heavier measure that had been passed by the committee and is now pending in the Committee on Rules.

So that figure should not at all be associated with this amendment.

The dollar factor is very minimal, and I would repeat what I have already said: That in essence what we would be doing here is we should be applying the concept that is utilized in the private sector where, if that employer for some reason decides he is going to dismiss an employee, in fairness there is a bit of consultation with the employee prior to definitive action. So he calls the gentleman or the gentlelady in and says, "For these reasons it appears that termination of your tenure is in order."

In that way we give the individual the benefit of the rationale of the employer. So actually what we are doing here, if we adopt the amendment, is simply concurring with the traditional concept in the private sector in fairness to that employee.

Mr. UDALL. Mr. Chairman, if the gentleman agrees, as I do, that one of the fundamental purposes of this bill is to make it easier and not harder to discharge incompetent employees, then the gentleman's amendment goes directly in the wrong direction.

We have testimony that it takes 152 days now—and that is the average time—to complete this appeals process. The real vice of this amendment is that it would keep this person on the payroll sitting around for that length of time. We would encourage employees who otherwise would go away and accept their discharge to appeal because they are going to get paid, and there they are inflicting their presence on the whole system while this appeal process is going on.

Mr. Chairman, I think it would be a major mistake to accept this amendment. I strongly urge that it be defeated.

Mr. DERWINSKI. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendments.

Mr. Chairman, I am going to be very brief. The gentleman from Arizona (Mr. UDALL) made the proper arguments against the amendment.

Actually here again we are in what may be a pattern in working on this bill. This is a classic case of an immediate retreat from a new goal. Basically, this amendment would add an extra step which would impede termination of the services of an incompetent employee.

As I understand this amendment, it would encourage everyone to appeal. If I may have the attention of the gentle-

man from New York (Mr. HANLEY), the figure he earlier quoted of $63 million as the possible cost of the application of this amendment was the result of research for the Civil Service Commission, but the gentleman, with a brush of his hand ruled that out.

Can the gentleman tell us specifically what figures he has to substantiate the cost of his amendment?

I am speaking of something other than an opinion now. I would like to have something specific.

Mr. HANLEY. Mr. Chairman, if the gentleman will yield, I believe in fairness, the figure used by OMB and provided the committee at that time was a figure used in association with an entirely different bill, and the committee labored under the impression that that was the cost of this amendment in committee. That is not true.

What the actual cost is I do not know. However, I do know that this cost is substantively less than the cost in the singular bill that was approved by the committee and is now pending in the Committee on Rules.

Mr. DERWINSKI. But the point is—and I am sure the gentleman will not dispute the other statistics we have—that the Civil Service Commission appealing now is 152 days. We would in fact, through the gentleman's amendment, add more days over and above whatever we provide for in this bill.

Mr. HANLEY. Mr. Chairman, will the gentleman yield on that point?

Mr. DERWINSKI. Let me finish my thought first.

Mr. Chairman, the gentleman starts taking us down the road of adding to the appeal time, adding to the delay, and, therefore, denying the very goal of the bill, which is a streamlining of personnel procedures.

Mr. HANLEY. Mr. Chairman, will the gentleman yield now?

Mr. DERWINSKI. Yes, I yield to the gentleman from New York.

Mr. HANLEY. Mr. Chairman, obviously, on the basis of what the gentleman has just said, a misunderstanding prevails, because what I would suggest through this amendment is that we are expediting that process, because within a timeframe of not more than 90 days that matter would have to be disposed of one way or the other, as opposed to present law or the language of this bill, which still makes it possible that the process could continue up to 2, 3, or maybe 4 years.

Think of the cost involved in that procedure, where again you are dealing with administrative law, just in an effort to resolve that one employee problem.

My guess is that this would be far less expensive than the present methodology; and, beyond that, certainly fair to that individual.

It certainly is not my intent to encourage continued employment of incompetent people, but I do not feel that that individual should certainly be entitled to his or her day in court.

Mr. DERWINSKI. They are entitled to their day in court under the bill. The effect of the gentleman's amendment would be to add an additional layer, an additional step, and this would have the effect of encouraging people to utilize it. And that is where the cost factor comes in. I think it is the height of optimism for the gentleman to imply that there would be minimal cost because, in effect, through the gentleman's amendment, he would be encouraging almost automatic use of this provision, and the costs are almost impossible to calculate.

Mr. HANLEY. If the gentleman will yield further, is it not rather logical that the cost factor associated with an endeavor that can be washed out within a 90-day period would be far preferable to a procedure which currently provides maybe up to 2 or 3 or 4 years before that decision is made? That is a rather costly process.

Mr. DERWINSKI. The gentleman is talking about the present system which takes 2 or 3 or 4 years. That has been streamlined. The gentleman's amendment would add an additional 20 or 30 days.

Mr. HANLEY. No.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, in the interest of due process, I rise in support of the gentleman's amendment.

The courts have generally found that a job is a property right and, therefore, that due process should apply in any decision with regard to that right.

Due process, in our system of justice, means an individual is innocent until proven guilty.

What the gentleman from New York is seeking to do is to provide the Federal employee with an opportunity to prove his or her innocence before they would lose their jobs. Removing employees from their jobs prior to any hearing would reverse our standards of justice.

In our committee hearings, I might add, there was testimony that, while in some instances it did take an inordinate length of time to remove an employee, there are statutory and regulatory provisions and procedures available that, if properly utilized, would enable the discharge of an employee within a very reasonable period, and not the 152 days as suggested by our acting chairman.

Accordingly, Mr. Chairman, I urge the adoption of this amendment.

Mrs. SPELLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Speaker, I would like to call to the attention of all of those Members present—and, I would hope, of anyone who is at all interested in the bill—the words of our distinguished Chairman. He made it very clear, and he was absolutely right, that under today's system an employee can be out of the system in 30 days.

We have heard a great deal of talk about how it takes 18 months, to fire an employee. We were at times told it took 27 months. and 3 years, and all that sort of thing. That was nonsense. An employee can be out of the system today in 30 days, and then the appeals process starts. And, indeed, there have been situations where it has taken a couple of years, and even 3 years, but when we looked into those situations we found that that was because the Government itself had dragged its feet, that the Government had caused the delay, not the employee. The idea was to drag the case out, to the point where no employee could afford to continue to fight his dismissal.

So what we are having proposed here at this time really is not going to extend the time. It will give a date finite to the Government, and the Government will be advised that at the end of 90 days it must have reached some conclusion. Therefore, it makes very good sense, No. 1, to give an employee a fair opportunity and, No. 2, to allow that employee to know that in 90 days his or her case will be disposed of. The citizens of the United States would also be spared the expense incurred by delays.

It has been really cruel and unusual punishment to have dragged cases out, as they have been in the past. The amendment makes very good sense, and I would certainly support this proposal by the gentleman from New York.

Mr. STEERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I support this amendment, and I only want to make one additional point in connection with it. The acting chairman has pointed out that the purpose of the bill is to enable the boss to get rid of incompetent employees. Of course, that sounds good until we stop to remember that competence is a matter of opinion. So, when this bill gives the power to fire incompetent employees, it also gives the power to fire competent employees.

Now, let us assume the most favorable supposition, and that is that the great majority of the firings are of incompetent people. There is no question that out of a large number that may get fired over a number of years, there are going to be some mistakes made for one reason or another, so somebody gets fired who is not incompetent, and so his salary ceases.

It is all very well to talk about reinstatement and payment of back salary and so forth. The family, however, of this employee has got to eat, and they cannot eat on future pay. I think that to deny the employee a hearing before firing him for "incompetence" is quite unfair. I support the amendment proposed by the gentleman from New York.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. HANLEY).

The question was taken; and the Chairman being in doubt, the committee divided, and there were—ayes 15; noes 23.

So the amendments were rejected.

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 150, line 2, after "United States." insert the following "One member of the Board shall

be selected from among individuals who have served in the competitive service.".

Mr. HARRIS. Mr. Chairman, this bill and the reorganization plan that Congress approved this past month separates the Civil Service Commission into two parts. It has a Merit System Protection Board, which has the job of protecting the rights of the employees. It has taken the personnel function out of the Civil Service Commission and set it up in another office.

All right, so in this amendment we are just talking about the Merit System Protection Board. The Board purports to have a three-person board that has one single job, and that is to protect the civil service employees with respect to the merit principles espoused in the bill. What this amendment does is say that one person appointed to that Board will have had experience in the merit system. It requires only that one person on that Board, at least, will have served in the merit system to the extent of knowing what the problems of the employees are, what the employees' side of the contest is, what the needs are to protect the particular rights of an employee.

I think it is a matter of simple justice and a matter of simple appearance here if we are truly trying to restore confidence in the employees with respect to whether there is an arm of the Government that protects that employee's rights. That is what the Board is created for; that is what the Board is supposed to do; that is what the Civil Service Commission was created for. But, most of us know that the Federal employee lost confidence in the Civil Service Commission some time ago with regard to that agency's protecting employee rights.

All right, if we are going to have a separate Board to protect employees' rights, if that Board is to be a three-person Board, I think it makes eminently good sense to have at least one person on that Board with experience in the merit system competitive service.

I would urge my colleagues to adopt this amendment and to make this little recognition that in establishing something to protect employees' rights we will have somebody on there that has had the employee perspective and not management perspective.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this was considered in the committee. The amendment offered by the gentleman from Virginia was defeated in that forum and should be defeated today.

This is not a major matter but there is a principle at stake. We are going to set up a merit system protection. The President is going to appoint the board members and they will be confirmed subject to the will of the Senate. We will start in by saying one of the three must be a person who served in the career service. That seems to make a good deal of sense. But if we adopt that, let us start putting other restrictions on the President: that one of them ought to be a lawyer; one of them ought to be a woman; one of them ought to be a non-Caucasian; and one of them ought to be of some other qualifications.

I would hope and believe the President would appoint from time to time people on this board who have had actual civil service employee experience, but to suggest on all occasions and at all times there must be someone to meet that particular qualification ties the hands of the President and suggests the Senate is not going to exercise any oversight jurisdiction on this matter.

I do not think this is a necessary amendment. I think it is a mischievous amendment and ought to be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The amendment was rejected.

AMENDMENTS OFFERED BY MR. STEERS

Mr. STEERS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. STEERS. Page 144, strike out line 16 and all that follows down through line 19 on page 145 and insert in lieu thereof the following:

"§ 1102. Appointment of members of the Office of Personnel Management

"The Office of Personnel Management is composed of three Commissioners appointed by the President, by and with the advice and consent of the Senate, not more than two of whom may be adherents of the same political party. No Commissioner of the Officer of Personnel Management may hold another office or position in the Government of the United States.

"§ 1103. Terms of office; filling vacancies; removal; quorum

"(a) The term of office of each Commissioner of the Office of Personnel Management is four years.

"(b) Any Commissioner appointed to fill a vacancy occurring before the end of a term of office of his predecessor serves for the remainder of that term.

"(c) Any Commissioner appointed for a four-year term may be reappointed to any following term.

"(d) Any Commissioner may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office.

"(e) Except as otherwise provided in this title, the Office of Personnel Management shall act upon majority vote of those members present, and any two members present shall constitute a quorum for the transaction of business of the Board.

"§ 1104. Chairman; Vice Chairman

"(a) The President shall from time to time designate one of the Commissioners of the Office of Personnel Management as the Chairman of the Office of Personnel Management. The Chairman is the chief executive and administrative officer of the Office of Personnel Management.

"(b) The President shall from time to time designate one of the members of the Office of Personnel Management as Vice Chairman of the Office of Personnel Management. During the absence or disability of the Chairman, or when the office of Chairman is vacant, the Vice Chairman shall perform the functions vested in the Chairman.

"§ 1105. Functions of the Office

"The following functions are vested in the Commissioners of the Office of Personnel Management, and shall be performed by the Commissioners, or by such employees of the Office as the Commissioners designate."

Page 146, lines 23, 24, and 25; page 147, line 25; and page 148, line 1, strike out "Director" and insert in lieu thereof "Commissioner".

Redesignate the following provisions (and references thereto) accordingly.

Mr. STEERS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland (Mr. STEERS)?

There was no objection.

Mr. STEERS. Mr. Chairman, this amendment is simple enough, which is why I thought it need not be read. It certainly would change the character of this bill and I think in a very salutary manner.

Of course, I believe the Civil Service ought to be reformed, but I believe the measure before us is not the appropriate vehicle.

I am most concerned about the concentration of personnel authority in the hands of one individual, one man, the Director of the Office of Personnel Management. In my opinion this would politicize the Federal service and destroy the merit system which has served the American people well for nearly 100 years.

Placing Government-wide personnel responsibility in the hands of one Director would take the decisionmaking process out of the public's eye. The Director would have merely to make a proposal affecting Government-wide personnel decisions to himself, debate it by himself, and make a unilateral decision whether to implement the proposal. Thus there is no check on arbitrary and capricious actions by a Director.

My amendment would preserve the impartial administration of the civil service system. While it would continue the proposed split of the Civil Service Commission's responsibilities between the Office of Personnel Management and Merit System Protection Board, it would vest the powers of the Office of Personnel Management in three Commissioners. By so doing, it will provide for checks and balances against misuse of authority.

By creating a commission, the decisionmaking process would be opened to the public and all decisions would require a majority vote. Moreover, it would be a bipartisan commission. Therefore it will act as a check against an incumbent President using the authority of the Office of Personnel Management for personal political reasons.

While no system is "fail safe," as the Watergate era demonstrated, I believe the public would be better served by an open system which would decentralize authority instead of the system proposed in this bill.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. STEERS. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I rise in support of the gentleman from Maryland's amendment.

The most serious weakness in the administration's proposals to reform the civil service is that it increases the possibilities for manipulating the civil service for personal or political favoritism. Instead of having personnel policy made by

a bipartisan body, it would be made by an administrator serving at the pleasure of the President. Although this change has been accomplished by Reorganization Plan No. 2 of 1978, it was done under a procedure that excluded amendments.

On July 7, 1947, the 80th Congress approved Public Law 162, thereby establishing the Commission on Organization of the Executive Branch of the Government. The Commission became known as the First Hoover Commission. It was directed to investigate the structure of the executive branch and recommend ways of improving its efficiency, effectiveness, and accountability.

Between July of 1947 and May of 1949, 300 men and women worked for the Hoover Commission. Twenty-four task forces scrutinized each of the major functional areas of the Government and reported their findings and recommendations. The Commission then studied and evaluated the task force reports and issued a series of 19 reports to the Congress.

In a statement of purpose and principle, the Hoover Commission declared:

> There is perhaps no time in history when it has been more important to evaluate the effectiveness of the Executive Branch of the Government in carrying out the will of the Congress and the people. While we recognize that efficiency in itself is no guarantee of Democratic Government, the sobering fact remains that the highest ideals and aims of democracy can be thwarted through excessive administrative costs and through waste, disunity, apathy, irresponsibility, and other by-products of inefficient government.
>
> The Commission's recommendations in total, therefore, are directed to the achievement of reforms which it hopes will bring about a more responsible and a more responsive government, a government that will act with dispatch, with greater internal coordination and harmony, with consistency of administrative policy, and economy of operation.

On considering restructuring the Civil Service Commission, the Hoover Commission warned that—

> The Government must impose upon itself many regulations and controls to fend off myriad pressures and influences which seek special privilege or gain, particularly for political reasons.

It therefore rejected all single-administrator forms of organization and concentrated on organizational structures which would protect the merit system and at the same time provide the desirable benefits of single administration. It refused to propose any reorganization which would weaken the protective functions of or sacrifice the public confidence in a full-time, bipartisan commission of three members.

Accordingly, the Hoover Commission recommended that the bipartisan, three member Commission form be retained but that the President designate one of the Commissioners as Chairman and vest in him full responsibility for administering the operating organization and program of the Commission. The Chairman's role, apart from that of the other Commissioners, was to be the principal point of contact between the President and the heads of operating agencies in all matters of civilian personnel management, both domestic and foreign, acting within the rules and regulations established by the full Commission.

Thus, while the Chairman would exercise authority to implement the rules and regulations of the civil service, the full Commission would retain its power and responsibility for establishing those rules and regulations. In addition, the Commissioners not designated as Chairman the duty of continuing the study of the nature, frequency, and source of abuses of the merit system in order to initiate steps to prevent their recurrence.

I agree that daily operations of the central personnel agency do need to be the responsibility of a single individual. This is, in fact, what happens now with the Chairman of the Civil Service Commission. He is designated by law as the Chief Operating Officer of the Agency. Everything the administration wants a new Office of Personnel Management to do, can be done under a single administrator serving under a bipartisan body with the Chairman acting as the Chief Operating Officer.

However, under this bill, the merit system would be seriously endangered, for a single individual would be making personnel policy for the entire Federal Civil Service work force of more than 2 million employees.

Administration spokesmen point to some States and cities where responsibility for making personnel policy was recently shifted from a multiheaded agency to a single administrator. The analogy, however, is inapt for none is comparable to the size, complexity, diversity, and power of the Federal Government. In addition, no one has studied whether the policies made by these local administrators are better or worse, or whether they have resulted in more or less political and personnel favoritism in the civil service, than before.

For the above reasons, Mr. Chairman, I urge my colleagues to adopt the gentleman's amendment.

Mr. UDALL. Mr. Chairman. I rise in opposition to the amendments offered by the gentleman from Maryland (Mr. STEERS).

Mr. Chairman, you cannot run an army by a committee of generals, you cannot run a business by a committee of businessmen, and you cannot run a personnel system by a committee. The vice of this amendment is that is exactly what the gentleman from Maryland is asking us to do. But the administration's overhaul of the civil service system is to break up the system in which the Civil Service Commission used to be both the adjudicator, the judge, and the protector of the integrity of the system and also the personnel manager for the Government.

Now in the reorganization proposal which the committee headed by the gentleman from Texas (Mr. BROOKS) handled, we have broken these down into separate functions, so that the adjudicators can adjudicate and the managers can manage.

The amendment offered by the gentleman from Maryland, (Mr. STEERS) seeks to create a three-headed agency which would manage the Federal Government's personnel system. It would be unworkable, it is unwise, and it would be a serious mistake.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to my colleague, the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I am opposed to the amendments offered by the gentleman from Maryland. Just a few weeks ago, the House overwhelmingly approved Reorganization Plan No. 2, which established the Office of Personnel Management and the Merit Systems Appeal Board. This plan very properly provided for a multimember board to protect the rights of civil service employees. But, it also very properly assigned to a single-headed office the personnel management role for the Federal Government. This role was previously carried out by the multimember Civil Service Commission and it proved to be a very unwieldly and inefficient management process. That is one of the major problems the reorganization plan and this legislation are trying to correct.

The Federal Government, like any large employer, needs a well run, responsive personnel operation. This can certainly be achieved more efficiently with a single-headed office. That is the way it is done in private industry and that is the way more than 30 States carry out their personnel practices.

We should not confuse the role of personnel management with that of handling employee grievances and civil service compliance. I believe that the Congress and this administration have made a significant step forward in setting up the Office of Personnel Management, and I oppose this effort to revert to the previous inefficient and unmanageable structure.

Mr. UDALL. Mr. Chairman, I thank the gentleman from Texas (Mr. BROOKS), and I associate myself with his remarks.

What we would be saying by passage of this amendment, if I may say in conclusion, is, "Your personnel management, Mr. President, is a three-headed independent board, the members of which are removable for cause only and are in effect free from Presidential direction."

Mr. Chairman, I think it would be a serious mistake to adopt this amendment.

Mr. FORD of Michigan. Mr. Chairman, I think the gentleman's amendment misses the target he described for us because I am afraid he has not read this bill very carefully.

In the next section of the bill he will find that there is a merit system protection board of three members which performs the merit system protection functions that the present three Civil Service

Commissioners have traditionally performed.

What is being created in the section which the gentleman would amend is a single personnel administrator, a new concept for the administration of Federal employment, not a new concept at the State and local level. At that level that is an accepted practice which has gone on for many years in the more enlightened structures of State and local government.

For the first time we would have the ability to have an executive head of the management function in administering a large Federal civilian work force. To create a second three-member board or a troika to go with the one included in the committee bill would just be foolish because we would then have two committees meeting, and we would still have no one initiating any executive-type action on behalf of the Government in administering its affairs with its vast work force.

I think the gentleman's amendment is defective because it is obsolete. It is an alternative which might have been considered to what we have done in the committee had we done nothing; but as an alternative to what we have done in the committee bill at the suggestion of the administration, it is a bad amendment. Had we done nothing in this area, the gentleman's amendment would be better than the status quo, but it is not better than what we have proposed as a change.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. STEERS. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Maryland, the author of the amendment.

Mr. STEERS. Mr. Chairman, very briefly, just to correct the record, the Member who spoke just previously said something about my not having read the bill. As proof thereof, he mentioned the Merit System Protection Board.

Mr. Chairman, I am afraid he was not listening to me because in my argument in behalf of my amendment, I mentioned the Merit System Protection Board.

He is quite right in saying that this would create another committee. I point out that the presidents of practically every major corporation in the United States are chosen by committees known as boards of directors. I do not think it follows at all that we have to have a one-headed member who will be judge, jury, and decider of all of these major personnel management problems.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. Yes; I yield to the gentleman from Michigan.

Mr. FORD of Michigan. I would simply like to indicate that with respect to the operation of the Federal Government and the Federal work force, we and the body on the other side of the Capitol are the board of directors. We do not need a substitute board of directors which is not elected by the people.

Mr. DERWINSKI. Mr. Chairman, to emphasize that brevity is sometimes a virtue, I would like to limit myself by saying I believe that this amendment is unnecessary. I think it borders on infringement of the constitutional rights of the President. I think the arguments made against it have been sound, responsible, and, of course, objective. Therefore, I join in opposing the amendment.

Mr. STEERS. Would the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Maryland.

Mr. STEERS. I thank the gentleman for yielding.

In other words, since the Civil Service Commission is clearly now doing what I have proposed be done by a new board, the gentleman believes that the Civil Service Commission for the last 80 years has been unconstitutional?

Mr. DERWINSKI. No, no. What I am saying is that the Merit System Protection Board will continue to function, which is the principle involved. And I am saying that the President will now have control over this Agency through appointment. What the gentleman, I think, approaches is diluting Presidential control.

Mr. STEERS. If the gentleman will yield further, the gentleman said it was unconstitutional, and it is now being done by the Civil Service Commission.

Mr. DERWINSKI. It borders on being unconstitutional.

Mr. STEERS. All right, then, you acknowledge it is not actually unconstitutional.

Mr. DERWINSKI. In light of the reorganization plan that we accepted a few weeks ago.

Mr. STEERS. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Maryland (Mr. STEERS).

The amendments were rejected.

The CHAIRMAN. Are there other amendments to title II?

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 150, line 17, strike out "inefficiency,".

Mr. HARRIS. Mr. Chairman, the bill places a great deal of reliance on a Merit System Protection Board that is supposed to be independent of the President, appointed for a term certain, and, therefore, able on a nonpartisan basis—which is one of the requirements of the bill—to act with regard to a contest between employee and management in an impartial manner. The question is how independent or how truly for a term certain are these members of the Merit System Protection Board appointed? The bill makes it clear that they can be removed for misconduct. It also makes it clear they can be removed for neglect of duty or malfeasance in office. These grounds for dismissal of these independent members of the board, who are appointed and confirmed are left in the bill by my amendment. The one term that this amendment would strike is the term "inefficiency," which I think negates the whole principle that is currently in the bill. The term "inefficiency" is clearly and completely a subjective term, which would mean that any President could fire any member of the Merit System Protection Board that he wanted to at any particular time. I think it is wrong to present to the people, to the Federal employee, and to our colleagues a proposition that the bill tries to do. It says that this is an independent board appointed for a term certain, 7 years, and then does not reach the fact that any member of that board could be dismissed summarily on the grounds of the subjective term "inefficiency." This amendment simply tries to perfect the bill to the point of saying, Yes, these are in effect independent appointments. They could be fired for misconduct, even if they have been appointed for a term certain, or for neglect of duty, or malfeasance, but not just on the basis of inefficiency.

I would urge my colleagues to support this amendment, and I would suggest to my colleague, the gentleman from Arizona (Mr. UDALL) that we have a point in the bill that should be corrected if, in fact, we are going to have an independent Merit System Protection Board.

Mr. SOLARZ. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I understand what my good friend, the gentleman from Virginia (Mr. HARRIS) is trying to do, but I really think that the adoption of this amendment could create some unfortunate consequences for the operation of the Merit System Protection Board. Nobody is perfect. We all make mistakes. The man in the White House we hope will do the right thing for America, but the fact of the matter is that some Presidential appointees have turned out bad in the past, and there is no doubt that some Presidential appointees will turn out to be inadequate in the future.

One of the primary responsibilities of the Merit System Protection Board is the expeditious consideration of the appeals that are sent to it, and it is not inconceivable that with the best of intentions, in spite of the fact that the Senate has to ratify these appointments, that in the future someone could be appointed to the MSPB who will simply not be able to cut the mustard, who will lack the ability to do the job.

I think that under those circumstances it really would be most unfortunate to deny the President the right to remove such an individual, because if this amendment is adopted, a simple inability to do the job will no longer constitute adequate justification for the removal of such an individual.

The point that I want to make here is that the 2 million Federal employees who work for the Federal Government, other than for the Postal Service, really are going to require the effective concern of the Merit System Protection Board, its fervent efforts on their behalf, and if it should turn out that someone is appointed to the Board who is not doing the job, I think the President ought to remove that individual in their interest.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I cer-

tainly agree with my colleague. I do not mean to sound crass, but I wish the gentleman would not strain at a gnat. The term "neglect of duty" is clearly left in the statute. Any member of the Merit Board that is guilty, as my colleague describes, is subject to neglect of duty even though he or she has been appointed and confirmed by the Senate.

What this bill does is not allow such a subjective term of "inefficiency" to be added to it. Let us not kid ourselves. If we leave the term "inefficiency" in there, we leave it up to the President to fire any member of the Merit System Protection Board that is supposed to be a member of that Board without any other justification than that member has been "inefficient."

Mr. SOLARZ. Mr. Chairman, I thank my friend, but I would insist there is an important and critical distinction between neglect of duty on the one hand and inefficiency on the other. There may be people who serve on the Merit System Protection Board who do attend to their responsibilities, and who do not neglect their duties, but who nonetheless are completely and totally inefficient, and in the interests of the Federal employees whom this Board is supposed to protect, I think it would be a mistake to deny the President the right to remove someone who is clearly and completely inefficient, because if it turns out they are trying to attend to their responsibilities, if this amendment is adopted, there would be no other way to get rid of them.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

In keeping with the pattern here, Mr. Chairman, I will be very brief. I would like to point out to the gentleman from New York that the gentleman very effectively addressed the amendment; but I would like to comment quite simply that I cannot conceive of the Congress of the United States telling the President he cannot remove someone from office that he deems inefficient. If you want to be on record as saying the President should not be able to remove someone on the grounds of inefficiency, I do not think in the light of today's demands of the public for better service that one wishes to take that position; so I suggest the rejection of the amendment.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to my friend and great statesman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I thank the gentleman for yielding to me.

What would be the benchmark or definition of being inefficient? To what level of performance do we hold these people, to the highest performance level in the land or what?

Mr. DERWINSKI. I would say an acceptable, practical level. For example the kind of efficiency that the gentleman expects in his office and the kind of great efficiency the gentleman brings to the Congress. That is the kind of standard we would expect.

Mr. JOHN L. BURTON. Mr. Chairman, if the gentleman will yield further, so it would be my level of performance that would set the level of efficiency throughout the civil service system?

Mr. DERWINSKI. Even the most able civil servant would be hard put to meet the level of efficiency the gentleman from California represents.

For example, the gentleman's brother does not quit achieve his efficiency.

Mr. JOHN L. BURTON. Well, would it be safe to say it would be the level of performance that my brother shows in the Congress?

Mr. DERWINSKI. Yes, or that of a mere mortal.

Mr. JOHN L. BURTON. I think I will accept that.

Mr. STEERS. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman, I am going to use my time only to ask the gentleman from Illinois (Mr. DERWINSKI) a question, and that is this:

Is it possible to remove members of the FTC, the SEC, and other administrative agencies for inefficiency? Does the gentleman know?

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. STEERS. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Does the gentleman mean under present law?

Mr. STEERS. Yes, under present law, is it possible to fire a Commissioner from the Federal Trade Commission?

Mr. DERWINSKI. I am sure some of our experts on Government operations would know the answer to that question.

Mr. STEERS. Mr. Chairman, I will ask if any Member who is opposed to this amendment knows whether members of other agencies can be fired for inefficiency. And if they do not know, why on Earth, then, are they voting against this amendment, without even knowing what the practices of other agencies are?

I believe the administrative agencies cannot be massacred one by one by firing for inefficiency, and I think this is a very reasonable amendment for that reason, if for no other.

Mr. DERWINSKI. Mr. Chairman, if the gentleman will yield further, may I point out to the gentleman that we are not speaking of massacres; we are speaking of a Presidential appointee, and if the President in his judgment feels this particular appointee is not operating in an efficient manner and is in fact inefficient, I think, given the sensitivity of his position and the effectiveness we want from this new civil service system, the President should have this prerogative.

Mr. STEERS. Does the gentleman mean the Merit System Protection Board should be sensitive to the desires of the President? I though it was instituted to protect employees.

Mr. DERWINSKI. No, I am not saying that at all. I am saying the Presidential appointee should perform at a high standard of efficiency.

I should say that where the gentleman from Maryland (Mr. STEERS) and I have our fundamental disagreement is not on an amendment like this or on any other amendments that may have preceded this or that may come later. I think the difference is that the gentleman has strong positions as to the motive of the bill as it relates to what he may call the "spoils system" or "politics."

I take the position that this bill is motivated by the highest of political principles. There is no spoils system or political motivation present. I think in that very fundamental way we differ.

The point here is that what is required from this revised Civil Service structure is a degree of efficiency that the public has judged the present Federal structure to be lacking. As I look at this, this means a return to efficiency and a desire to improve the performances. That is our goal.

Mr. STEERS. Mr. Chairman, is this not my time?

Mr. DERWINSKI. No, this is my time.

Mr. STEERS. Mr. Chairman, I thought it was my time.

The CHAIRMAN. The time is that of the gentleman from Maryland (Mr. STEERS).

Mr. DERWINSKI. Excuse me, Mr. Chairman, I did not mean to usurp the gentleman's time.

Mr. STEERS. Mr. Chairman, I am happy to get the gentleman's interesting observations, but I would reclaim my time merely to say that I do not raise any question as to the motivation of the President or of the administration. I simply think the result of this bill would be very detrimental, and I do not want to let the record go uncorrected.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. STEERS. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I appreciate my colleague's comments on this amendment.

I think our colleagues who have been engaged in colloquy on the floor make it crystal clear that even though we present it to the public and to our colleagues that we have an independent merit system protection board whose members are appointed for a term certain, they cannot be removed at the will of the President, but this provision is in fact put in here so that these members can be removed at the whim of the President if in fact these members do not perform in accordance with what the President wants them to do.

How in the world are we going to have an independent board whose job it is to protect employees' rights, not to put forward the administration's position but to protect employees' rights, if in fact we allow them to be dismissed at the whim of the President?

I think this is what my colleague sees in the bill, because that is what is in the bill. I think we have to in all fairness show to the public and to the Members of the House that by this language we do not have in this bill an independent merit system protection board but we have members who can be fired by the President anytime the President wants to fire them. I wonder if my colleague agrees with that statement.

Mr. STEERS. Mr. Chairman, I certainly do agree.

The CHAIRMAN. The question is on

the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The question was taken, and on a division (demanded by Mr. HARRIS) there were—ayes 5, noes 20.

So the amendment was rejected.

AMENDMENTS OFFERED BY MR. STEERS

Mr. STEERS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. STEERS. Page 148, strike out lines 12 through 24 and insert in lieu thereof the following:

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(67) Director of the Office of Personnel Management".

(2) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Deputy Director of the Office of Personnel Management."

(3) Section 5316 of such title is amended by inserting at the end thereof the following new paragraph:

"(144) Associate Directors of the Office of Personnel Management (5).".

Page 165, strike out line 24 and all that follows down through line 12 on page 166 and insert the following:

(c)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(123) Chairman of the Merit Systems Protection Board".

(2) Section 5316 of such title is amended by adding at the end thereof the following new paragraphs:

"(145) Members, Merit Systems Protection Board.

"(146) Special Counsel of the Merit Systems Protection Board."

(3)(A) Paragraph (17) of section 5314 of such title is hereby repealed.

(B) Paragraph (66) of section 5315 of such title is hereby repealed.

(C) Paragraph (99) of section 5316 of such title is hereby repealed.

Page 300, line 6, strike out "Senate" and insert in lieu thereof the following: "Senate, and shall be paid at an annual rate of basic pay equal to the maximum annual rate of basic pay currently paid, from time to time, under the General Schedule,".

Page 347, strike out lines 5 through 8 and insert in lieu thereof the following:

(e) Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(47) Members, Federal Labor Relations Authority (2).".

Mr. STEERS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. STEERS. Mr. Chairman, what this amendment would do is quite simple. It would save money. The problem of the size and cost of the bureaucracy is not adequately addressed in H.R. 11280. Streamlining the existing bureaucracy should make it smaller and more cost effective; it should not increase its size and cost. The amendment which I am offering here, which was offered by the junior Member of the Senate from Pennsylvania. This amendment was adopted by the Senate and will partially address this inconsistency.

Inherent in H.R. 11280, and in the reorganization plan which will go into effect between now and January 1, is an increase in the number of top-level appointed positions in the civil service system and an increase in the cost of these top-level positions. In sum, Mr. Chairman, we are seeing a so-called reform measure transform 3 full-time positions, and 3 very much part-time positions, into a total of 13 top-level, full-time positions, all at a higher pay level than currently. While it is tempting to try to restructure and prune back this proliferation of top-level political appointees, this amendment only seeks to reduce the pay of these positions by one level, thus preventing the pay inflation in the bill.

Mr. Chairman, I am including at this point the following table of the proposed positions and the pay levels for them under the administration's proposal and also under the Senate bill:

COMPARISON OF COSTS FOR APPOINTED POSITIONS BETWEEN THE ADMINISTRATION PROPOSAL AND HEINZ AMENDMENT

| Administration proposal | Annual salary | Level | Senate amendment | Annual salary | Level |
|---|---|---|---|---|---|
| OPM: | | | OPM: | | |
| Director | $57,500 | 2 | Director | 52,500 | 3 |
| Deputy Director | 52,500 | 3 | Deputy Director | 50,000 | 4 |
| Five Associate Directors | 250,000 | 4 | Five Associate Directors | 142,500 | 5 |
| Total | 360,000 | | Total | 245,000 | |
| MSPB: | | | MSPB: | | |
| Chairman | 52,500 | 3 | Chairman | 50,000 | 4 |
| Vive Chairman | 50,000 | 4 | Vice Chairman | 47,500 | 5 |
| Member | 50,000 | 4 | Member | 47,500 | 5 |
| Total | 152,500 | | Total | 145,000 | |
| Special Counsel | 50,000 | 4 | Special Counsel | 47,500 | 5 |
| FLRA: | | | FLRA: | | |
| Chairman | 52,500 | 3 | Chairman | 50,000 | 4 |
| Two members | 100,000 | 4 | Two members | 95,000 | 5 |
| Total | 152,500 | | Total | 145,000 | |
| Total for appointees | 715,000 | | Total for appointees | 582,500 | |

Amendment total for appointed positions (including Associate Directors) is 18.5 percent ($132,500) less than Administration proposal.

Mr. Chairman, I will yield to the acting chairman if the gentleman would like to speak at this point.

Mr. UDALL. Mr. Chairman, I was going to rise in opposition to the amendment. If the gentleman will yield for that purpose, maybe we can save some time.

Mr. STEERS. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I want to make a couple of points. The first point is that all of these positions are under compression now. These executive-level positions involved in this amendment are not going to get the October pay raise, in any event, so it has no practical application. The main opposition to the amendment, however, is that the scheduling of these positions in the different executive levels was done by the administration when they drafted the bill, so that positions of equal responsibility here in the new agencies we are creating would be equivalent to those of other agenices. For example, the head of the Office of Personnel Management should be the same level, unless you are going to get out of the synchronized salary system, as the Director of the Office of Management and Budget. And so it goes with the new adjudicatory positions. They should be the same as the positions of the Federal Labor Relations Board, the National Labor Relations Board, and similar positions. This would knock them all out of comparability status with other similar positions in the Federal Government.

For that reason, the amendment is unwise, and I would oppose it.

Mr. STEERS. Mr. Chairman, if the gentleman will yield back my time, what is the OPM Director under the bill supposed to be paid?

Mr. UDALL. Level 2, which would be $$57,500.

Mr. STEERS. It is the gentleman's position that this job is so important that it is comparable to the Director of the Office of Management and Budget?

Mr. UDALL. That is the position the administration took in drafting the bill. Frankly, I think we have grade creep in the whole Federal Government. I think all executive positions and generals and admirals maybe ought to go down one

notch, but I am not sure the place to start is in this bill.

Mr. STEERS. Mr. Chairman, reclaiming my time, I would just say that the time to start will never arrive if it is continually postponed. I think we do have grade creep, and I commend the gentleman from Arizona for acknowledging the grade creep. I regret that he has accepted it by failing to support this amendment.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Maryland (Mr. STEERS).

The amendments were rejected.

AMENDMENTS OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HARRIS: Page 150, line 24, strike out "President shall from time to time designate" and insert in lieu thereof "Board shall, every 2 years, elect".

Page 151, line 3, strike out "President shall from time to time designate" and insert in lieu thereof "Board shall, every 2 years, elect".

Page 151, after line 8, insert the following new subsection:

"(c) Any vacancy in the Office of Chairman or Vice Chairman shall be filled, for the balance of the term in which the vacancy occurred, by a special election which shall be held at the first meeting attended by 3 members.

Mr. HARRIS. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, this is another effort to try to make sure that we have a Merit System Protection Board that is independent of any President's manipulation. I think my colleagues realize how important it is—or perhaps they do not—to make sure that we have a Merit System Protection Board, no matter which way a President wants to go, no matter how bad the effect might be, that that Merit System Protection Board is standing there as a buttress against any intrusion on these merit principles we adopted in title I.

The way the bill is drafted, the chairman and vice chairman of the Merit System Protection Board can be designated by the President "from time to time." I think it makes eminently good sense, if we are going to have an independent board, to have them elect their own chairman and vice chairman. This is what this amendment does.

The amendment sets up a procedure, where there are vacancies, for those to be filled, and makes clear that the vice chairman fills those duties of the chairman when that office is vacant. I think it is important, Mr. Chairman, that we have in the bill a clear distinction here between an agency such as the Office of Personnel Management directly under the hand of the President, and an independent board such as the Merit System Protection Board. I think this amendment would make it clear that the board is, in fact, independent; that a chairman who may not be operating in accordance with the will of the President still will remain the chairman, and the President cannot change him or her simply because the President disagrees.

I hope my colleagues can distinguish in their minds the difference between the Personnel Board and the Merit System Protection Board. This Merit System Protection Board is supposedly independent; it is supposedly a bulwark against a President who may want to somehow intrude upon the merit system. That is the purpose of the board.

I hope my colleagues can adopt this amendment so that a chairman or vice chairman cannot, in fact, be disciplined by a President if he does not perform the way the President wants him or her to perform.

Mr. DERWINSKI. Mr. Chairman, I rise in opposition to the amendments.

I will be as brief as possible, Mr. Chairman. I do wish, however, to commend my good friend from Virginia on his consistency—consistency in trying to undo what we are trying to do with this bill. This amendment takes the bill away from its main thrust. It ties the President's hands in an appointment area.

The President deserves this flexibility, and I would think that if Members wanted an orderly program for the Federal personnel system, if we want the proper concept of top level management responsibility, that would include appointment of this chairman by the President. I suggest, in keeping with the constructive goals of this measure, that this restrictive amendment be rejected.

Mr. SOLARZ. Mr. Chairman, I rise in opposition to the amendment.

I will be very brief. The gentleman from Virginia is a good man but I am afraid that this is not a good amendment. In addition to the fact that the Merit System Protection Board is already effectively insulated from Presidential pressure by virtue of the fact that the members of the board are ineligible for reappointment and can only be removed for cause, this amendment constitutes a gratuitous slap at the President. I say this because the President is now permitted to appoint the chairman of almost every other regulatory body in the Federal Government, and it would be both unfair and unnecessary to deny him the right to appoint the chairman of the Merit System Protection Board as well.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Virginia (Mr. HARRIS).

The amendments were rejected.

AMENDMENTS OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer five amendments which I would like to have considered en bloc.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. GILMAN: Page 145, line 18, insert ", subject to section 1104 (a) of this title," after "or".

Page 147, line 5, strike out "service." and insert in lieu thereof "service;".

Page 147, after line 5, insert the following: "except that the Director may not delegate open competitive examination authority with respect to positions whose requirements are common to agencies in the Federal Government, other than in exceptional cases in which the interests of economy and efficiency require such delegation and in which such delegation will not weaken the application of the merit system principles.".

Page 146, line 18, strike out "(a) Notwithstanding" and insert in lieu thereof "(a)(1) Subject to subsection (b)(3) of this section and notwithstanding".

Page 147, insert after line 14 the following:

"(3) Nothing in subsection (a) of this section shall be construed as affecting the responsibility of the Director to ensure compliance with the civil service laws and regulations."

Page 152, after line 20, insert the following:

"(e) The Merit Systems Protection Board shall submit its request for annual appropriations to the Office of Management and Budget and to the Congress."

Page 152, insert after line 17 the following:

"(d) The Board shall conduct, from time to time, special studies relating to the civil service and to other merit systems in the executive branch, and report to the President and to the Congress as to whether the public interest in a civil service free of prohibited personnel practices is being adequately protected.

Page 152, line 18, strike out "(d)" and insert in lieu thereof "(e)".

Page 145, line 16, insert "(a)" before "The following".

Page 146, insert after line 16 the following:

"(b)(1) The Director shall publish in the Federal Register general notice of any proposed rule or regulation which affects any agency or its employees Any such notice shall be in accordance with the notice requirements of section 553(b) of this title. Upon receipt of such notice of any proposed rule or regulation, the agency shall, under regulations which shall be prescribed by the Office of Personnel Management, post such proposed rule or regulation in such locations of such offices of the agency as the agency finds reasonably necessary to ensure notice to the maximum number of employees affected. The issuance of any such rule or regulation shall be in accordance with the rule making requirements of section 553(c) of this title. Any such rule or regulation shall be published in the Federal Register at least 60 days before its effective date.

"(2) Paragraph (1) of this subsection shall not apply to any proposed rule or regulation which is temporary in nature and which is necessary to be implemented expeditiously as a result of an emergency need.

Mr. GILMAN. Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, my first amendment prohibits the delegation of competitive examination authority for the positions common to agencies, except that there may be delegation when the positions are unique to agencies or in extraordinary circumstances in the interests of economy and efficiency.

In view of the sweeping authority entrusted to the Director of OPM and his ability to delegate such authority under

title II, section 1104(2), and to insure that any such delegation by the Director does not relieve him of his responsibility to assure compliance with civil service laws and regulations, my second amendment specifically prohibits delegating to the agencies the ultimate responsibility of the Director of OPM for the execution, administration and enforcement of the Civil Service Act, other statutes, rules, and regulations of the President and the Office of Personnel Management.

My third amendment requires the Merit Systems Protection Board to submit its budget requests simultaneously to the Congress and the President, as is the case with the Consumer Product Safety Commission and the Federal Energy Regulatory Commission. Without this change, the Merit Systems Protection Board would be little more than a one-eyed watchdog tied by a very short leash to the White House.

The number and rapidity of changes contemplated by H.R. 11280 and Reorganization Plan No. 2 will make it virtually impossible for Congress to effectively oversee the Office of Personnel Management unless provision is made for an annual systematic review of the policies and program decisions and the compliance and enforcement actions of the Office of Personnel Management by the Merit Systems Protection Board. My fourth amendment would require such a review and would further require the Board to prepare annually a comprehensive report to the Congress as well as to the President on whether these policies, decisions, and actions of the Office of Personnel Management are in accord with and contributing adequately to a civil service based on merit principles and free of prohibitive practices.

The last amendment requires the Director of the Office of Personnel Management to notify each agency consistent with the APA of any proposed rulemaking which affects such agency or its employees at least 60 days before the proposed rule or regulation's effective date. Upon receipt of the proposed rulemaking from the Office of Personnel Management, the agency must post the proposed rule or regulation in such locations within the agency to insure notice to the maximum number of employees affected.

Mr. Chairman, I urge my colleagues to adopt these five amendments.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the acting Chairman.

Mr. UDALL. Mr. Chairman, I have had an opportunity to review with the staff the amendments and, in the interest of saving time and finishing at a reasonable hour today, I would be pleased to accept the amendments.

Mr. GILMAN. I thank the gentleman from Arizona.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I studied the gentleman's amendments very carefully. I want to be sure of one thing on which the gentleman could reassure me. None of his amendments in any way weaken the amendments adopted in the committee in the area of administrative law judges; do they?

Mr. GILMAN. No. In fact, if anything they may enhance the authority.

Mr. DERWINSKI. Fine.

Mr. GILMAN. I thank the gentleman for accepting these amendments, which I assume the gentleman is willing to do.

Mr. DERWINSKI. Yes.

Mr. GILMAN. I thank the gentleman from Illinois.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. GILMAN).

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. FISHER

Mr. FISHER. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. FISHER: Page 152, insert after line 17 the following:

"(d)(1) At any time after the effective date of any rule or regulation issued by the Office of Personnel Management in carrying out its functions under section 1103 of this title, the Board shall review any provision of such rule or regulation—

"(A) on its own motion;

"(B) on the granting by the Board, in its sole discretion, of any petition for such review filed with the Board by any interested person, after consideration of the petition by the Board; or

"(C) on the filing of a written complaint by the Special Counsel requesting such review.

"(2) In reviewing any provision of any rule or regulation pursuant to this subsection the Board shall declare such provision—

"(A) invalid on its face, if the Board determines that such provision would, if implemented by any agency, on its face—

"(i) require any employee to violate section 2302(b) of this title; or

"(ii) is contrary to any merit system principle; or

"(B) invalidly implemented by any agency, if the Board determines that such provision, as it has been implemented by the agency through any personnel action taken by the agency or through any policy adopted by the agency in conformity with such provision—

"(i) has required any employee to violate section 2302(b) of this title; or

"(ii) has been contrary to any merit system principle.

"(3)(A) The Director of the Office of Personnel Management, and any agency implementing any provision of any rule or regulation under review pursuant to this subsection, shall have the right to participate in such review.

"(B) Any review conducted by the Board pursuant to this paragraph shall be limited to determining—

"(i) the validity on its face of the provision under review; and

"(ii) the validity on its face of the provision under review has been validly implemented.

"(C) The Board shall require any agency—

"(i) to cease compliance with any provision of any rule or regulation which the Board declares under this subsection to be invalid on its face; and

"(ii) to correct any invalid implementation by the agency of any provision of any rule or regulation which the Board declares under this subsection to have been so invalidly implemented by the agency.

Page 152, line 18, strike out "(d)" and insert in lieu thereof "(e)".

Mr. FISHER (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendments be dispensed with, that they be printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Mr. Chairman, the purpose of this amendment is to add a small bit to the protection of Government employees throughout the Merit System Board.

According to the bill, the Office of Personnel Management can issue rules and regulations on personnel matters, even those pertaining to the Merit System Protection Board. This amendment simply says that the Merit System Protection Board can review any OPM regulation and if it violates a prohibited personnel practice, then it can overrule that regulation and prevent its going into operation.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, I am advised that the administration is willing to accept this amendment. I find it agreeable and I will support it.

Mr. FISHER. I thank my colleague.

I might add that this provision was also included in the Senate bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. FISHER).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GILMAN: Page 144, strike out line 6 and all that follows down through line 8 on page 149 and insert in lieu thereof the following:

SEC. 201. (a) Title 5, United States Code, is amended by adding after chapter 9 the following new chapter:

"CHAPTER 10—OFFICE OF PERSONNEL MANAGEMENT

"Sec.
"1001. Office of Personnel Management.
"1002. Director; Associate Directors.
"1003. Functions of the Director.

"§ 1001. Office of Personnel Management

"The Office of Personnel Management is an independent establishment in the executive branch. The Office shall have an official seal which shall be judicially noticed and shall have its principal office in the District of Columbia, but it may have field offices in other appropriate locations.

"§ 1002. Director; Associate Directors

"(a) There is at the head of the Office of Personnel Management a Director of the Office of Personnel Management appointed by the President, by and with the advice and consent of the Senate. No person shall, while serving as Director, serve in any other office or position in the Government of the United States except as otherwise provided by law or by the President.

"(b) There may be within the Office of Personnel Management not more than four Associate Directors, as determined from time to time by the Director. Each Associate Director shall be appointed by the Director. Such appointments may be made without regard to the provisions of this title governing appointments in the competitive service.

"§ 1003. Functions of the Director.

"(a) The following functions are vested in the Director of the Office of Personnel Man-

agement, and shall be performed by the Director, or by such employees of the Office as the Director designates—

"(1) recommending to the President for transmittal to Congress or the Commission such legislation or other measures as will promote an efficient civil service and systematic application of merit system principles, including measures relating to the selection, promotion, transfer, performance, pay, conditions of service, tenure, and separation of employees;

"(2) appointing individuals to be employed by the Office;

"(3) directing and supervising employees of the Office, distributing business among employees and organizational units of the Office, and directing the internal management of the Office;

"(4) directing the preparation of requests for appropriations and the use and expenditure of funds;

"(5) executing, administering, and enforcing—

"(A) the civil service rules and regulations of the President and the Commission, the statutes governing the civil service; and

"(B) such other activities of the Office as usual in civil service administration;

"(6) investigating matters pertaining to the administration of functions of the Office or the Director; and

"(7) reviewing the operations under chapter 87 of this title.

"(b) The functions enumerated under subsection (a) of this section shall not include any function which is either reserved to the Commission or the Merit System Protection Board including, but not limited to—

"(1) the preparation of rules under section 1301 of this title;

"(2) the prescription of rules, regulations, or similar policy directives;

"(3) the hearing or providing for the hearing of appeals, including appeals with respect to examination ratings, veterans' preference, racial and religious discrimination, disciplinary action, performance ratings, and dismissals, and the taking of final action on these appeals.".

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(67) Director of the Office of Personnel Management.".

(2) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Associate Directors of the Office of Personnel Management (4).".

(c)(1) Section 1104(a) of title 5, United States Code, is amended by striking out paragraph (5) and redesignating paragraph (6) as paragraph (5).

(2) Section 1302 of such title is amended—

(A) by striking out ", control, supervise, and preserve the records of," in subsection (a);

(B) by striking out "and enforce" in subsection (b); and

(C) by adding at the end thereof the following new subsection:

"(e) The Commission, subject to the rules prescribed by the President under this title, shall have authority to issue such regulations as necessary to prescribe general policy relating to the civil service laws. The Office of Personnel Management shall be guided by such policy in carrying out its functions under this title.".

(d)(1) The United States Civil Service Commission, as constituted under chapter 11 of title 5, United States Code, prior to the transfer of its functions under section 101 of Reorganization Plan Numbered 2 of 1978, is continued as an agency of the United States, except that of the first members appointed after the date of the enactment of this Act, one shall be appointed for a term of 2 years, one for a term of 4 years, and one for a term of 6 years, each such term expiring on March 1 of an odd-numbered year. Thereafter, members shall be appointed as provided under such chapter 11.

(2) If transfer of any function under such section 101 of such reorganization plan is inconsistent with the provisions of this section, such transfer is superseded by this section.

Mr. GILMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York (Mr. GILMAN)?

There was no objection.

Mr. GILMAN. Mr. Chairman, conforming to the wishes of the House which obviously desires the retention of the Office of Personnel Management, I am offering this amendment which establishes an Office of Personnel Management as an independent establishment in the executive branch structured basically as it is in this legislation before us and in the Reorganization Plan No. 2. However, the amendment further provides for the continuation of the U.S. Civil Service Commission, as formerly constituted, except for certain specified changes in the terms of the Commissioners.

The Commission, subject to the rules prescribed by the President, shall continue to enjoy the authority to issue such regulations as necessary to prescribe general policy relating to the Civil Service laws.

The power to make personnel policy includes the power to interpret the laws; to decide the policies for authorizing exceptions to certain laws; to make the policies which determine how job applicants shall be ranked for employment consideration; to take positions out of the competitive service so they can be filled by political cronies; and to set aside almost all civil service laws in demonstration projects that would affect many thousands of individuals. The citizens of the United States would have far greater confidence in the wisdom and impartiality of such policies if they were made by a bipartisan body. This is, of course, the primary reason for having established the bipartisan Civil Service Commission in the first place.

The Office of Personnel Management shall be guided by the policy prescribed by the Commission in carrying out its functions specified in section 1003 of my amendment. The Director of OPM will be vested with the authority to recommend to the President legislation under title 5; directing the preparation of requests for appropriations and the use and expenditure of funds; the execution, administration, and enforcement of the civil service rules and regulations of the President and the Commission and the statutes governing the civil service; and the investigation of matters pertaining to his functions.

The functions enumerated under section 1003, however, shall not include any function which is either reserved to the Civil Service Commission or the Merit System Protection Boards.

The 95-year-old civil service system is not without faults; it has gone through many changes to overcome weaknesses as they have been identified. But abolishing bipartisan personnel policymaking will not correct any of these flaws. Nor will it improve the quality and performance of the civil service system or increase the public's confidence in it. None of the civil service problems identified by the administration as reasons needed for reform would be solved by having personnel policies made by one person. No rational case has been made for abolishing policymaking by a bipartisan body, while the advantages of having a bipartisan policymaking body are obvious.

This division of personnel policymaking from its execution will serve to deter the creation of a civil service czar, and at the same time, insure the continuation of bipartisan policymaking.

Mr. Chairman, I move my amendment.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

This amendment, Mr. Chairman, would drastically distort one of the purposes of the bill.

We have already agreed in connection with the reorganization proposal that we are going to break up the dual functions now handled by the Civil Service Commission. The adjudicatory judicial function of protecting the merit system which we have will be lodged in the Merit System Protection Board. The personnel management function will be headed up by the director of the OPM.

Now comes this amendment by the gentleman from New York (Mr. GILMAN), which transfers the authority to make personnel policy and to manage that policy from the President's personnel manager, the Director of OPM, to this three-headed judicial body.

It simply guts the authority of the President's personnel policy adviser and places it in the hands of an unresponsive personnel board.

That is exactly what we have been trying to get away from in this bill.

Mr. Chairman, adoption of this amendment would be a major mistake, and I urge the rejection of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. GILMAN).

The amendment was rejected.

The CHAIRMAN. Are there further amendments to title II?

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. HARRIS: Page 151, strike out line 18 and all that follows down through line 5 on page 152, and insert in lieu thereof the following:

"(a)(1) Any member of the Merit Systems Protection Board, the Special Counsel, any administrative law judge appointed by the Board under section 3105 of this title, and any employee of the Board designated by the Board may administer oaths, examine witnesses, and receive evidence.

"(2) Any member of the Merit Systems Protection Board, the Special Counsel, and

any administrative law judge appointed by the Board under section 3105 of this title may—

"(A) issue subpenas requiring the attendance and testimony of witnesses and the production of documentary or other evidence from any place in the United States or any territory or possession thereof, the Commonwealth of Puerto Rico, or the District of Columbia, and

"(B) take or order the taking of depositions and order responses to written interrogatories.

Mr. HARRIS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, I think this is also an important change to be made with regard to the subpena power that we give a Government agency, and I think it touches upon many other actions which we have taken in the past with regard to subpena powers given to various Government employees.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I am happy to yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, if the gentleman will save us 5 minutes by not explaining the amendment, I am prepared to accept it.

Mr. HARRIS. Mr. Chairman, since I tried to explain the amendment to members of the committee and since my chairman apparently now understands the amendment, I will give it no further explanation and ask for a vote.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I am happy to yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, the gentleman from Virginia (Mr. HARRIS) is now exploring his great success with respect to this amendment.

Perhaps we could have an understanding whereby he would just henceforth offer amendments that are acceptable and would drop all of those which are not acceptable. In that case we could really move this afternoon.

Mr. HARRIS. Mr. Chairman, I say to my colleague that apparently that is basically the system we are operating under right now except for the gentleman from Virginia, who has always been known as a man who fights for principles, whether they are acceptable or not at the time.

Mr. DERWINSKI. I am thinking more of this great civil service reform and of the fact that down in the gentleman's noble heart, he knows we are pursuing the proper course for our country.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The amendment was agreed to.

The CHAIRMAN. Are there other amendments?

AMENDMENTS OFFERED BY MR. CLAY

Mr. CLAY. Mr. Chairman, I offer two amendments.

The Clerk read as follows:

Amendments offered by Mr. CLAY:

On page 185, line 7, insert the following after "(42 U.S.C. 2000e–16),": "the Equal Pay Act of 1963 (29 U.S.C. 206(d)),".

On page 187, line 17, insert after the word "followed" the following: ", except that in a case of discrimination brought under 42 U.S.C. 2000e–16(c), 29 U.S.C. 633a(c), or 29 U.S.C. 216 and 217, the proceeding shall be de novo.".

Mr. CLAY. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York (Mr. GILMAN)?

There was no objection.

Mr. CLAY. Mr. Chairman, these amendments are precisely the same as the two I offered this morning which were accepted.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. CLAY. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

We have studied these amendments, and they are acceptable. I urge that they be adopted.

Mr. CLAY. I thank the gentleman.

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Missouri (Mr. CLAY).

The amendments were agreed to.

The CHAIRMAN. Are there other amendments to title II?

AMENDMENT OFFERED BY MR. CLAY

Mr. CLAY. Mr. Chairman, I offer a fifth amendment. I thought it was coming up under title III.

The Clerk read as follows:

Amendment offered by Mr. CLAY: On page 187, strike lines 7 through 13, and insert the following in lieu thereof:

"(b) A petition to review a final order or decision of the Board shall be filed in the Court of Claims or a United States district court as provided in chapters 91 and 85, respectively, of title 28 except that cases of discrimination shall be filed under section 717(c) of the Civil Rights Act of 1964 (42 U.S.C. 2000e–16(c) under section 15 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 633a(c)), section 16(b) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 216 and 217), as applicable. Notwithstanding any other provision of law, any petition for review must be filed within 30 days after the date the petitioner received notice of the final order or decision of the Board.".

Mr. CLAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. CLAY. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Chairman, this is a technical amendment which improves the bill and is acceptable.

Mr. CLAY. Mr. Chairman, I thank the gentleman. I yield back the remainder of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. CLAY).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. BOLAND: On page 155, line 9, strike "information which" and insert in lieu thereof: "information, other than foreign intelligence or counterintelligence information the disclosure of which is specifically prohibited by law or by executive order, which".

On page 159, after line 5, insert the following new paragraph:

"(9) In any case under paragraph (c)(1)(B) of this section involving foreign intelligence or counterintelligence information the disclosure of which is specifically prohibited by law or by executive order, or in any case in which the Special Counsel, in consultation with the head of an agency under paragraph (d)(3) of this section, determines that information involved is prohibited from disclosure by law or by executive order requiring that information be kept secret in the interest of national defense or the conduct of foreign affairs, the Special Counsel shall transmit such information to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate.

On page 160, line 19, strike "paragraph." and insert in lieu thereof: "paragraph, except that prior to including any information in a public list, the Special Counsel shall consult with the head of the agency involved to determine if any of the information to be contained therein is prohibited from disclosure by law or by executive order requiring that information be kept secret in the interest of national defense or the conduct of foreign affairs, in which case the information shall not be included in such a public list."

On page 161, line 7, strike "title;" and insert in lieu thereof: "title, except that the Special Counsel shall make no investigation under this subsection of any withholding of foreign intelligence or counterintelligence information the disclosure of which is specifically prohibited by law or by executive order."

Mr. BOLAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOLAND. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOLAND. Mr. Chairman, as we all know, this bill creates a Special Counsel. The Special Counsel has the responsibility and the authority to receive allegations, to investigate allegations and to assess any corrective action taken with regard to allegations which are made to him. These allegations may be about prohibited personnel practices as defined by the bill, but they may also include any possible violation of law,

rule, regulation or any mismanagement or abuse by an officer or employee of the Government. The jurisdiction is very wide and the purpose of this amendment is to quarrel with only one part of it.

It seems to me that when matters involving classified intelligence information are involved, then the Special Counsel ought not to be involved. The various intelligence agencies presently have Inspectors General. There is a Presidentially created Intelligence Oversight Board and in addition, there are the oversight committees of Congress, including the Permanent Select Committee on Intelligence, which have, and ought to exercise, jurisdiction in matters that involve improprieties but which also concern intelligence information.

Mr. Chairman, section 1206 of the bill does exempt classified information from consideration by the Special Counsel in some circumstances. However, it does not in others. To be specific, if there has been a disclosure of classified information in the newspapers or in some other public form, then the Special Counsel is not involved. If, however, disclosure by an employee or applicant has been to a specific Inspector General or, indeed, to the Special Counsel himself, then the Special Counsel may investigate.

Mr. Chairman, the Special Counsel may investigate the most sensitive kinds of intelligence information. Further, the bill requires that when the Special Counsel determines that there ought to be an investigation, he should transmit that recommendation to the head of the agency involved and require the head of that agency to conduct an investigation about the allegation and submit a written report to him, the Special Counsel, and to the General Accounting Office. Further, the Special Counsel is required to publish a public list of matters which have been referred to the heads of agencies.

These provisions give me pause. I can understand very well the reasons which have convinced the committee that there ought to be a Special Counsel to investigate the allegations of whistle blowers. Indeed, that may be a very healthy thing to have within a civil service system like our own. I think allegations of impropriety, no matter by whom they are alleged to have been committed, ought to be investigated. The question, of course, is who is the proper authority to investigate them? When national security information is involved, it is my strong feeling, and that of the President and the intelligence agencies, as well, that the proper authorities to investigate these allegations are the Inspectors General which have been created in the intelligence agencies.

These Inspectors General have the ability and the authority to investigate any impropriety brought to their attention and they are required by Executive order to bring any activities which they deem indeed to be improper to the attention of the Intelligence Oversight Board. This Board, which has been in operation for some years, has the duty of investigating such matters and making its recommendations to the President. In addition, any actual or probable violations of law must be brought to the attention of the Attorney General.

Beyond this, the Permanent Select Committee on Intelligence of the House and the Select Committee on Intelligence of the Senate are, and have been, exercising continuing oversight over all intelligence agencies—with a particular emphasis on any improprieties or illegalities. These committees require and will receive under these amendments reports detailing any possible improprieties or illegalities from the Special Counsel in those cases which he is precluded from investigating. The committees will then conduct investigations of their own.

Mr. Chairman, the intelligence agencies are already explicitly exempted from the mandatory applicability of merit system principles established in title I of this bill. As originally introduced, this legislation limited the scope of the Special Counsel's authority to investigation of allegations of prohibited personnel practices. In expanding the authority of the Special Counsel, the committee has exempted intelligence agencies in some respects, but not in others from investigations conducted by the Special Counsel. This seems to me to be inconsistent with the exemptions found in title I and those partial exemptions contained in section 1206. It seems to me that this confusion of purpose is ill considered. I believe the House should focus on the inconsistencies in the bill and I believe it should agree to delete intelligence agencies from the coverage of the bill completely.

Mr. Chairman, the question of whether or not intelligence information would be subject to review by the Special Counsel was a topic not covered in hearings before the Committee on Post Office and Civil Service. Admiral Turner, the Director of Central Intelligence, and other intelligence officials did not have an opportunity to testify on this matter. They, understandably, are very concerned about its application. They are concerned not because they wish to avoid investigations of improprieties or illegalities but simply because they wish to assure the absolute confidentiality and inviolability of the kinds of information that may be involved in such investigations. They feel, as do I, that current investigatory machinery, such as the Inspector General, the Intelligence Oversight Board and most particularly the congressional oversight committees, are more than adequate to perform the task.

The classic rule of intelligence is that the fewer people know a secret, the safer that secret remains. That is why intelligence information is so closely guarded. That is why the two intelligence committees are as careful as they are in the selection and screening of their staff and in the procedures under which they handle classified material.

Mr. Chairman, the job of legitimate, responsible congressional oversight can be done under these circumstances. Within the intelligence agencies, watchdog institutions like Inspectors General who have independent authority to perform their investigations and make their recommendations without fear of reprisal can be very effective if they work within the agencies and they themselves hold very closely the information which they gather in the pursuit of their investigations.

Mr. Chairman, I do not wish to impugne the patriotism or the professional integrity of those who will occupy positions in the Office of the Special Counsel. I feel very simply, however, that there is danger in expanding access to classified intelligence information which can be of the most sensitive nature through the Office of the Special Counsel. I do not feel that it was carefully considered. I do not feel, nor do the responsible intelligence officials, that it provides for the safeguarding of the kind of information that may be involved and finally, I am concerned about further discussion in the public forum about classified intelligence information.

I suggest that the best course at this point is to exempt from the provisions of this bill all intelligence information or any allegations which might involve such information. This is the action which the Senate has taken, it is to me the most prudent course and at the same time, it does no violence to the jurisdiction to the Special Counsel as recommended by the committee. He is still empowered to look into any and all allegations of improprieties or illegality except those which may involve intelligence information.

I should note to the members that I have drafted these amendments in such a way as to exclude only intelligence information. I should also note that the amendments would have the effect of preventing classified information from being disclosed in the public list which is also referred to within this section. Finally, the amendments make a qualifying change to that part of section 1206 which refers to other authorities of the Special Counsel.

Specifically, the amendments make clear that where the Special Counsel has authority under the Freedom of Information Act, it preserves the authority currently exercised by the Civil Service Commission. This last change, Mr. Chairman, in my understanding, merely clarifies the intent of this legislation and is not inconsistent with the intent of the committee in offering this bill.

Mr. Chairman, let me just close with this assurance to the Members. The intent of these amendments is not to preclude the raising of complaints or allegations about improprieties or illegalities within our intelligence community. It is not to prevent such allegations reaching the surface. Rather, it is intended to insure that they are considered under procedures which have been adopted to handle such allegations. These procedures can also safeguard any sensitive, classified intelligence information which may be the subject or somehow involved with such allegations.

It seems to me the best course to exempt the intelligence agencies from the authorities of the Special Counsel. It seems to me that no case has been made that the Inspectors General and the Intelligence Oversight Board are not doing

their jobs. I am certain that the Members of this House will recognize that the Senate Select Committee on Intelligence, which has now been in operation for some 2½ years, has done a fine job in considering many aspects of the intelligence business. The Permanent Select Committee on Intelligence, which I chair, has been in this business for only a year. I can report to the Members of the House that we are doing as careful and as considered a job of oversight as we can. We will continue to do so. That, it seems to me is the way to go. The procedures of this bill are neither crafted for, nor were they carefully considered in light of, the kind of sensitive intelligence information that might be the subject of allegations brought before the Special Counsel. I therefore urge that such information not come within the jurisdiction of this Special Counsel.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Chairman, I have studied the amendments. We modified them a little bit following our discussion, so they are acceptable to us, and I am told the administration finds that they are acceptable as well.

Mr. BOLAND. I thank the gentleman from Arizona.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I am very pleased to yield to my friend, the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

Anything that is acceptable to the administration is acceptable to us.

● Mr. MAZZOLI. I rise in support of the Boland amendments.

As initially proposed, I had reservations about the amendment. However, the gentleman from Massachusetts graciously agreed to the two modifications which I requested be made to the amendments.

First, I asked that the proposed exemption of intelligence matters from the jurisdiction of the Special Counsel be limited to "foreign intelligence and counter intelligence." Thus, domestic matters, such as criminal intelligence, would not qualify for an exemption. This modification was agreed to.

Second, I requested that a provision be added to give the House and Senate Intelligence Committees oversight jurisdiction over the Special Counsel's decision not to take—or to publicly list—"whistleblowers" involving foreign intelligence or counter intelligence.

This modification will assure—with the anticipated cooperation of the Special Counsel and the agencies—that the exemption will not be misused to cover waste, mismanagement, or illegal operations by the agencies.

I urge the House to adopt the gentleman's amendments.●

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts (Mr. BOLAND).

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. LEVITAS: On page 168, strike line 13 and insert: "such employee's position, which shall include, but not be limited to conduct that demonstrates a pattern of recurring discourtesy to the public, including discourteous conduct confirmed by an immediate supervisor's report of four such instances within any one year period and any other pattern of discourteous conduct.".

On page 175, strike lines 9 and 10 and insert: "Fourteen days or less for such cause as will promote the efficiency of the service, including conduct that demonstrates a pattern of recurring discourtesy to the public, including discourteous conduct confirmed by an immediate supervisor's report of four such instances within any one year period and any other pattern of discourteous conduct.".

On page 179, strike lines 10 and 11 and insert: "by this subchapter against an employee for such cause as will promote the efficiency of the service, including for conduct that demonstrates a pattern of recurring discourtesy to the public, including discourteous conduct confirmed by an immediate supervisor's report of four such instances within any one year period and any other pattern of discourteous conduct.".

Mr. LEVITAS (during the reading). Mr. Chairman, first, I ask unanimous consent that the two other substantially identical amendments to title II be considered as read, printed in the RECORD, and that all the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, first of all, I would like to take this opportunity to state that I consider this legislation not only to be the centerpiece of the President's reorganization program, but I consider it to be an extremely important and long overdue reform in government and improvement in the civil service. It is this bureaucracy that deals directly with the people, that implements the policies of the administration and of this Congress, and unless the civil service is the proper tool which it should be to effectively carry out these purposes, then we not only frustrate the policies of our Government, but we generate the type of public cynicism and disrepute of Government that frequently has been true in the past. That attitude undermines the effectiveness of the decisions made by the administration and by this Congress. That attitude is cause of lack of confidence in our Government and is the cause of lack of respect for our Government by the people of the United States.

Mr. Chairman, I want to commend the chairman of the subcommittee, as well as the ranking minority Member, for the truly outstanding way in which they have handled a most difficult bill.

The overwhelming number of employees of the Federal Government are loyal, hard-working, dedicated people, who seek to serve the public and, indeed, they are public servants in the best sense of the term. There are some few, however, and they are very few, indeed, who do not realize they are servants of the public. As a result, they do not act toward the public in encounters with them as public servants should. Too often they treat citizens with unconcern, arrogance, slowness, callousness, and plain rudeness. In short, they treat the public with discourtesy.

The amendments which I offer would make it very clear that under the new procedures relating to the civil service and accountability, where there are provisions made for performance appraisal, where there are provisions made for disciplining employees who fail to meet those standards, that one of the specific matters which shall be taken into account is the question of discourtesy to the public, discourtesy by public servants to the public they should be serving.

Some may say, "Well, this is so trivial, this is such an unimportant item when we are dealing with all these great decisions, why should we be troubled by something like rudeness or discourtesy?"

Well, I suggest that most Americans, the millions and millions of Americans who have to deal with public servants, deal with them on a one to one basis. The frustration and the anger and the embarrassment that result from rudeness and discourtesy creates more problems for our Government and for the civil service, perhaps, than some of the large decisions we so frequently hear about.

What this amendment does is this: it defines as "unacceptable performance" in the appropriate section of title II so that the definition of "unacceptable performance" includes a pattern of recurring discourtesy to the public. This definition would give a very clear mandate to the rulemakers and administrators that this is important to the American people and to this Congress to eliminate unprovoked discourtesy by federal employees. I think it will do a great deal to remove some of the problems which the few bad apples in the barrel create for others and will do more to make those good, dedicated public servants recognize that there are people in Government who stand behind them.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I have not seen the amendments until a moment ago. If the gentleman is going to make a record that the Congress is going to say that discourteous treatment to the public involving a pattern of repeated instances could be a ground for discipline, I do not see how anyone could quarrel with that.

I can see how it can be used mischivously by supervisors if we are not careful with the way it is administered. There is nothing in the Senate bill on this, but we can take a look at it in the conference.

Mr. Chairman, I personally think it is a good idea for the Congress to go on record in support of this basic principle.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman, and I want to say I think it would do a great deal to strengthen the civil service reform and the public's regard for public employees.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I wish to go beyond the immediate language of the gentleman's amendments and point out that those of us on the committee who worked hard to produce this bill appreciate the kind of interest and support and understanding we are getting on the floor.

This is a complex measure, and I believe all the Members appreciate the fact it is the public who will be better served if we write a good bill on the floor this afternoon.

Mr. Chairman, I thank the gentleman from Georgia (Mr. LEVITAS) for offering his amendment.

The CHAIRMAN pro tempore (Mr. BOLLING). The question is on the amendments offered by the gentleman from Georgia (Mr. LEVITAS).

The amendments were agreed to.

The CHAIRMAN pro tempore. Are there other amendments to title II?

If not, the Clerk will read.

The Clerk read as follows:

TITLE III—STAFFING

VOLUNTEER SERVICES

SEC. 301. (a) Chapter 31 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 3111. Acceptance of volunteer service

"(a) For the purpose of this section, 'student' means an individual who is enrolled, not less than half-time, in a high school, trade school, technical or vocational institute, junior college, college, university, or comparable recognized educational institution. An individual who is a student is deemed not to have ceased to be a student during an interim between school years if the interim is not more than 5 months and if the individual shows to the satisfaction of the Office of Personnel Management that the individual has a bona fide intention of continuing to pursue a course of study or training in the same or different educational institution during the school semester (or other period into which the school year is divided) immediately after the interim.

"(b) Notwithstanding section 3679(b) of the Revised Statutes (31 U.S.C. 665(b)), the head of an agency may accept, subject to regulations issued by the Office of Personnel Management, voluntary service for the United States if the service—

"(1) is performed by a student, with the permission of the institution at which the student is enrolled, as part of an agency program established for the purpose of providing educational experiences for students;

"(2) is to be uncompensated; and

"(3) would not, under the facts and circumstances involved, be performed by an employee in the absence of voluntary service under this section.

"(c) Any student who provides voluntary service under subsection (b) of this section shall not be considered a Federal employee for any purpose other than for purposes of chapter 81 of this title (relating to compensation for injury) and sections 2671 through 2680 of title 28 (relating to tort claims).".

(b) The analysis for chapter 31 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"3111. Acceptance of volunteer service.".

DEFINITIONS RELATING TO PREFERENCE ELIGIBLES

SEC. 302. Section 2108 of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by inserting in paragraph (3) after "means" the following: ", except as provided in paragraph (4) of this section";

(3) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon; and

(4) by adding at the end thereof the following new paragraphs:

"(4) except for the purposes of chapters 43 and 75 of this title, 'preference eligible' does not include a retired member of the armed forces unless—

"(A) the individual is a disabled veteran; or

"(B) the individual retired below the rank of major or its equivalent; and

"(5) 'retired member of the armed forces' means a member or former member of the armed forces who is entitled, under statute, to retired, retirement, or retainer pay on account of service as a member.".

NONCOMPETITIVE APPOINTMENT OF CERTAIN DISABLED VETERANS

SEC. 303. (a) Chapter 31 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 3112. Preference eligibles; disabled; noncompetitive appointment

"Under regulations prescribed by the Office of Personnel Management, an agency may make a noncompetitive appointment leading to conversion to career or career-conditional employment of a disabled veteran who—

"(1) has a compensable service-connected disability of 30 percent or more, or

"(2) is enrolled in or has successfully completed a course of job related training prescribed by the Administrator of Veterans' Affairs under chapter 31 of title 38.".

(b) The analysis for chapter 31 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"3112. Preference eligibles; disabled; noncompetitive appointment.".

EXAMINATION, CERTIFICATION, AND APPOINTMENT OF PREFERENCE ELIGIBLES

SEC. 304. (a) Chapter 33 of title 5, United States Code, is amended by adding after section 3303 the following new section:

"§ 3303a. Preference eligibles; appointment; time limit

"(a) For the purpose of this subchapter—

"(1) the status of an individual, who is not a retired member of the armed forces, as a preference eligible under section 2108(3)(A) or (B) of this title for purposes of perference in consideration for appointment shall terminate—

"(A) at the end of the 15-year period beginning on the date of the individual's separation from active duty in the armed forces, or

"(B) upon appointment to a position that is not time limited,

whichever occurs first; and

"(2) the status of an individual, who is a retired member of the armed forces and who retired below the rank of major or its equivalent, as a preference eligible under section 2108(3)(A) or (B) of this title for purposes of preference in consideration for appointment shall terminate at the end of the 3-year period beginning on the date of the individual's separation from active duty in the armed forces.".

(b) Section 3305 of title 5, United States Code, is amended to read as follows:

"§ 3305. Competitive service; preference eligibles; applications

"On the application of a preference eligible, a competitive examination shall be held for any position for which there is an appropriate list of eligibles.".

(c) Section 3309 of title 5, United States Code, is amended to read as follows:

"§ 3309. Preference eligibles; examinations; additional credit for

"(a) Preference eligibles shall be referred for appointment in accordance with regulations issued under section 3317(a) of this title. A preference eligible who qualifies in an examination for entrance into the competitive service is entitled to additional points above the individual's earned rating, as follows:

"(1) subject to section 3303a of this title, a preference eligible under section 2108(3)(A) or (B) of this title—5 points; and

"(2) a preference eligible under section 2108(3)(C)–(G) of this title—10 points.

"(b) A preference eligible under section 2108(3)(C) of this title who qualifies in an examination for entrance into the competitive service and who has a compensable service-connected disability of 10 percent or more, shall be placed at the head of the list of eligibles, except that in the case of scientific and professional positions in GS–9 or higher, the preference eligible shall be placed on the list of eligibles in the order of the eligible's rating, including points added under subsection (a)(2) of this section.

"(c) If other rating systems are used, preference eligibles are entitled to comparable preference.".

(d) Section 3314 of title 5, United States Code, is amended by striking out "Civil Service Commission" and inserting in lieu thereof "Office of Personnel Management" and by striking out ", in the order named by section 3313 of this title".

(e) Section 3315 of title 5, United States Code, is amended—

(1) in the first sentence of subsection (a), by striking out ", in the order named by section 3313 of this title";

(2) in the second sentence of subsection (a), by striking out "Civil Service Commission" and inserting in lieu thereof "Office of Personnel Management"; and

(3) in the first sentence of subsection (b), by striking out "Commission" and inserting in lieu thereof "Office of Personnel Management".

(f) Section 3317(a) of title 5, United States Code, is amended to read as follows:

"(a) The Office of Personnel Management shall prescribe regulations for the referral of eligibles to a nominating or appointing authority for consideration for appointment to each vacancy in the competitive services.".

(g) Section 3321 of title 5, United States Code, is amended to read as follows:

"§ 3321. Competitive service; probations; periods of

"(a) The President may take such action, including the issuance of rules, regulations, and directives, as shall provide as nearly as conditions of good administration warrant, for a period of probation—

"(1) before an appointment in the competitive service becomes final; and

"(2) before an initial appointment as a supervisor or manager becomes final.

"(b) An individual—

"(1) who has been transferred, assigned, or promoted from a position to a supervisory or managerial position, and

"(2) who does not satisfactorily complete the probationary period under subsection (a)(2) of this section,

shall be returned to a position of no lower grade and pay than the position occupied by the individual immediately before the transfer, assignment, or promotion of the individual to the supervisory or managerial position. Nothing in this section prohibits the taking of an action against an individual serving a probationary period under section (a)(2) of this section for cause unrelated to supervisory or managerial performance.".

(j) Section 3326 of title 5, United States Code, is amended—

(1) in subsection (b)(1), by striking out

", and, if the position is in the competitive service, after approval by the Civil Service Commission"; and

(2) in subsection (c), by striking out ", or the authorization and approval, as the case may be,".

(k) The following sections of chapter 33 of title 5, United States Code are repealed:

(1) section 3313 (relating to registers of eligibles); and

(2) section 3319 (relating to members of family restriction).

(l) The analysis for chapter 33 of title 5, United States Code, is amended—

(1) by inserting after the item relating to section 3303 the following new item:

"3303a. Preference eligibles, appointment; time limit.";

(2) by amending the item relating to section 3305 to read as follows:

"3305. Competitive service; preference eligibles; applications.";

(3) by amending the item relating to section 3309 to read as follows:

"3309. Preference eligibles; examinations; additional credit for.";

and

(4) by striking out the items relating to sections 3313 and 3319.

RETENTION PREFERENCE

SEC. 305. (a) Section 3501(a) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) 'employee with limited preference' means any preference eligible (other than a preference eligible under section 2108(3)(C)–(G) of this title or subsection (a)(3)(A) of this section).".

(b) Section 3502(b) of title 5, United States Code, is amended to read as follows:

"(b) An employee with limited preference is entitled to military preference in retention under this section only during the 8-year period following the date of the employee's initial appointment in or under an Executive agency, or if later, during the 8-year period following the date of such employee's initial return following a leave of absence during which the employee was performing active service in the armed forces.".

(c) Section 3502(a)(2) of title 5, United States Code, is amended to read as follows:

"(2) military preference, subject to subsection (b) of this section and section 3501(a)(3) of this title;".

(d) Section 3502 of title 5, United States Code, is further amended by adding at the end thereof the following new subsection:

"(c) An employee who is entitled to retention preference and whose performance meets a standard of adequacy under a performance appraisal system implemented under chapter 43 of this title is entitled to be retained in preference to other competing employees."

(e) Section 3503 of title 5, United States Code, is amended—

(1) in subsection (a), by striking out "each preference eligible employed" and inserting in lieu thereof "each competing employee"; and

(2) in subsection (b) by striking out "each preference eligible employed" and inserting in lieu thereof "each competing employee.".

TRAINING

SEC. 306. Section 4103 of title 5, United States Code, is amended by inserting "(a)" before "In order to increase" and by adding at the end thereof the following new subsection:

"(b)(1) Notwithstanding any other provision of this chapter, an agency may train any employee of the agency to prepare the employee for placement in another agency if the head of the agency determines that the employee will otherwise be separated under conditions which would entitle the employee to severance pay under section 5595 of this title.

"(2) Before undertaking any training under this subsection, the head of the agency shall obtain verification from the Office of Personnel Management that there exists a reasonable expectation of placement in another agency.

"(3) In selecting an employee for training under this subsection, the head of the agency shall consider—

"(A) the extent to which the current skills, knowledge, and abilities of the employee may be utilized in the new position;

"(B) the employee's capability to learn new skills and acquire knowledge and abilities needed in the new position; and

"(C) the benefits to the Government which would result from retaining the employee in the Federal service.".

TRAVEL, TRANSPORTATION, AND SUBSISTENCE

SEC. 307. Section 5723(d) of title 5, United States Code, is amended by striking out "not".

RETIREMENT

SEC. 308. Section 8336(d)(2) of title 5, United States Code, is amended to read as follows:

"(2) voluntarily, during a period when the agency in which the employee is serving is undergoing a major reorganization, a major reduction in force, or a major transfer of function, as determined by the Office of Personnel Management, and the employee is serving in a geographic area designated by the Office;".

EXTENSION OF VETERANS READJUSTMENT APPOINTMENT AUTHORITY

SEC. 309. Section 2014(b) of title 38, United States Code, is amended to read as follows:

"(b) To further this policy, veterans of the Vietnam era shall be eligible, in accordance with regulations which the Office of Personnel Management shall prescribe for veterans readjustment appointments and subsequent career-conditional appointments, under the terms and conditions of Executive Order Numbered 11521 (March 26, 1970), except that these appointments may be made up to and including GS–7 of the General Schedule described in section 5104 of title 5, or its equivalent, and, for disabled veterans, the fourteen years of education limit shall not apply. Notwithstanding any limitations with respect to the period of eligibility as prescribed in Executive Order Numbered 11521, a veteran of the Vietnam era who was eligible for appointment under such Executive order on April 9, 1970, or a veteran of the Vietnam era who was separated on or after such date, may be appointed at any time. No veterans readjustment appointment may be made under the authority of this subsection after September 30, 1980.".

NOTIFICATION OF VACANCIES IN THE CIVIL SERVICE

SEC. 310. Chapter 33 of title 5, United States Code, is amended by inserting at the end thereof the following new section:

"§ 3327. Notification of vacancies in the civil service

"(a) For the purpose of this section—

"(1) 'agency' has the meaning set forth in section 5102 of this title; and

"(2) 'vacant position' means a position in an agency which is considered by the agency to be available for employment.

"(b) Each agency shall promptly notify the Office of Personnel Management of—

"(1) each vacant position in the agency together with the address to which requests for information concerning the position may be sent; and

"(2) each position of which the Office was notified under paragraph (1) of this subsection and which has since been filled or is otherwise no longer considered by the agency to be available for employment.

"(c) The Office shall transmit to the United States Employment Service, and make available to each employment office established by the Service, a comprehensive listing of all vacant positions and addresses of which the Office has been notified under subsection (b)(1) of this section. The Office shall revise the listing each month in accordance with the notifications of filled or otherwise unavailable positions received by the Office under subsection (b)(2) of this section and shall promptly transmit to the Service each revision.".

(b) The analysis for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3326 the following new item:

"3327. Notification of vacancies in the civil service.".

DUAL PAY FOR RETIRED MEMBERS OF THE UNIFORMED SERVICES

SEC. 311. Section 5532 of title, 5, United States Code, relating to retired officers of the uniformed services, is amended by striking out so much of such section as precedes subsection (c) and by inserting in lieu thereof the following:

"§ 5532. Employment of retired members of the uniformed services; reduction in pay

"(a) If any member or former member of a uniformed service is receiving retired pay and is employed in a position the annual rate of basic pay for which, when combined with the member's annual rate of retired pay, exceeds the rate of basic pay then currently said for level V of the Executive Schedule, such member's pay for such employment shall be reduced by an amount computed under subsection (b) of this section. The amounts of the reductions shall be deposited to the general fund of the Treasury of the United States.

"(b) The amount of each reduction under subsection (a) of this section for any pay period in connection with employment in a position shall be equal to the retired pay allocable to the pay period, except that the amount of the reduction may not result in the amount payable for the pay period, when combined with the retired pay allocable to the pay period, being at a rate less than the rate of basic pay then currently paid for level V of the Executive Schedule.".

(b) Section 5531 of title 5, United States Code, relating to definitions, is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) 'member' has the meaning given such term by section 101(23) of title 37;";

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(3) 'retired pay' means—

"(A) retired pay, as defined in section 8311(3) of this title, determined without regard to subparagraphs (A) through (D) of such section 8311(3); and

"(B) a pension or compensation paid under laws administered by the Veterans' Administration after a waiver of retired pay pursuant to section 3105 of title 38.".

(c) Section 5532(c) of title 5, United States Code, is amended—

(1) by striking out "subsection (b) of";

(2) by striking out "or retirement" each place it appears;

(3) by striking out "a retired officer of a regular component of a uniformed service" and inserting in lieu thereof "a member or former member of a uniformed service who is receiving retired pay"; and

(4) in paragraph (1), by striking out

"whose retirement was" and inserting in lieu thereof "whose retired pay is computed, in whole or in part,".

(d) Section 5532(d) of title 5, United States Code, is hereby repealed.

(e) The item relating to section 5532 in the analysis for chapter 55 of title 5, United States Code, is amended to read as follows:

"5532. Employment of retired members of the uniformed services; reduction in pay."

(f)(1) The amendments made by this section shall apply only with respect to pay periods beginning after the effective date of this Act and only with respect to members of the uniformed services who first become eligible for retired pay (as defined in section 5531(3) of title 5, United States Code (as amended by this section)), after the effective date of this Act.

(2) The provisions of section 5532 of title 5, United States Code, is in effect immediately before the effective date of this Act, shall apply with respect to any retired officer of a regular component of the uniformed service who is eligible for retired pay on or before such date in the same manner and to the same extent as if the preceding subsections of this section had not been enacted.

MINORITY RECRUITMENT PROGRAM

SEC. 312. Section 7151 of title 5, United States Code, is amended—

(1) by striking out the section heading and inserting in lieu thereof the following:

"§ 7151. Antidiscrimination policy; minority recruitment program";

(2) by inserting after such section heading the following new subsection:

"(a) For the purpose of this section—

"(1) 'underrepresentation' means a situation in which the number of members of a minority group designation (determined by the Equal Employment Opportunity Commission in consultation with the Office of Personnel Management, on the basis of the policy set forth in subsection (b) of this section) within a category of civil service employment constitutes a lower percentage of the total number of employees within the employment category than the percentage that the minority constituted within the labor force of the United States, as determined under the most recent decennial or mid-decade census, or current population survey, under title 13, and

"(2) 'category of civil service employments' means—

"(A) each grade of the General Schedule described in section 5104 of this title;

"(B) each position subject to subchapter IV of chapter 53 of this title;

"(C) such occupational, professional, or other groupings (including occupational series) within the categories established under subparagraphs (A) and (B) of this paragraph as the Office determines appropriate.";

(3) by inserting "(b)" before "It is the policy"; and

(4) by adding at the end thereof the following new subsection:

"(c) Not later than 180 days after the date of the enactment of the Civil Service Reform Act of 1978, the Office of Personnel Management shall, by regulation, implement a minority recruitment program which shall provide, to the maximum extent practicable—

"(1) that each Executive agency conduct a continuing program for the recruitment of members of minorities for positions in the agency to carry out the policy set forth in subsection (b) in a manner designed to eliminate underrepresentation of minorities in the various categories of civil service employment within the Federal service, with special efforts directed at recruiting in minority communities, in educational institutions, and from other sources from which minorities can be recruited; and

"(2) that the Office conduct a continuing program of—

"(A) assistance to agencies in carrying out programs under paragraph (1) of this subsection, and

"(B) evaluation and oversight of such recruitment programs to determine their effectiveness in eliminating such minority underrepresentation.

"(d) Not later than 60 days after the date of the enactment of the Civil Service Reform Act of 1978, the Equal Employment Opportunity Commission shall—

"(1) establish the guidelines proposed to be used in carrying out the program required under subsection (c) of this section; and

"(2) make determinations of underrepresentation which are proposed to be used initially under such program; and

"(3) transmit to the Executive agencies involved, to the Office of Personnel Management, and to the Congress the determinations made under paragraph (2) of this subsection.

"(e) Not later than January 31 of each year, the Office shall prepare and transmit to each House of the Congress a report on the activities of the Office and of Executive agencies under subsection (c) of this section, including the affirmative action plans submitted under section 717 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–16), the personnel data file maintained by the Office of Personnel Management, and any other data necessary to evaluate the effectiveness of the program for each category of civil service employment and for each minority group designation, for the preceding fiscal year, together with recommendations for administrative or legislative action the Office considers appropriate.".

EFFECTIVE DATE

SEC. 313. The amendments relating to the following sections of title 5, United States Code, shall take effect on October 1, 1980:

(1) section 2108(4) and (5),
(2) section 3303a,
(3) section 3305, and
(4) section 3309.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AMENDMENTS OFFERED BY MR. SOLARZ

Mr. SOLARZ. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. SOLARZ: Page 209, insert after line 12 the following new section:

COMPENSATORY TIME OFF FOR RELIGIOUS OBSERVANCES

SEC. 313. (a) Subchapter V of chapter 55 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"5550a. Compensatory time off for religious observances

"(a) Not later than 30 days after the date of the enactment of this section, the Office of Personnel Management shall prescribe regulations providing for work schedules under which an employee whose personal religious beliefs require the abstention from work during certain periods of time, may elect to engage in overtime work for time lost for meeting those religious requirements. Any employee who so elects such overtime work shall be granted equal compensatory time off from his scheduled tour of duty (in lieu of overtime pay) for such religious reasons, notwithstanding any other provision of law.

"(b) In the case of any agency described in subparagraphs (C) through (G) of section 5541(1) of this title, the head of such agency (in lieu of the Office) shall prescribe the regulations referred to in subsection (a) of this section.

"(c) Regulations under this section may provide for such exceptions as may be necessary to efficiently carry out the mission of the agency or agencies involved.".

(b) The analysis for chapter 55 of title 5, United States Code, is amended by adding after the item relating to section 5550 the following:

"5550a. Compensatory time off for religious observances.".

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Page 129, in the table of contents, strike out the item relating to section 313 and insert in lieu thereof the following:

Sec. 313. Compensatory time off for religious observances.

Sec. 314. Effective date.

Mr. SOLARZ (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SOLARZ. Mr. Chairman, these amendments have the support, I believe, of the majority and the minority managers of the bill. I know they have the support of the administration and of all the relevant Federal employee unions.

These are in fact amendments which were adopted by voice vote a few months ago on the floor of the House when I offered them as amendments to the flextime bill. The only reason I am offering them now is that, in spite of the fact the flextime bill to which these amendments were attached was reported out of both the Committee on Government Operations and the Human Resources Committee in the Senate, it now appears that legislation is caught up in a parliamentary and political tangle, and even though there is no objection to it in the Senate, the bill may not actually come up for a vote on the floor of the other body.

These amendments, in brief, would provide that any Federal employee who is obligated to take time off from work for religious reasons will be permitted to make up for it by working overtime on a voluntary basis without having to be paid at the overtime rate in the process. Under existing law, Federal employees who are obligated to take time off for religious reasons must either make up for that time through a reduction in leave time, thereby significantly reducing the amount of time they have to spend with their families, or through a reduction in pay.

Mr. Chairman, I would submit that current law in effect penalizes Federal employees who choose to adhere to the dictates of their religion. This amendment, on the other hand, would make it possible for all Federal employees to observe the tenants of their religion without being penalized for it in the process.

And that, I would submit, is what America is all about.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to my friend, the gentleman from New York.

Mr. GILMAN. Mr. Chiarman, I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman from New York (Mr. SOLARZ) for having focused attention on this problem at recent hearings in New York City which were conducted by the gentlewoman from Maryland (Mrs. SPELLMAN) and her Subcommittee on Compensation and Employee Benefits, during which hearings we found an obvious need for legislation of this nature to assist those who wish to pursue their religious observance.

This amendment provides Federal employees the opportunity to take time off for religious observance while at the same time enabling those Federal employees who make such an election an opportunity to opt to work additional hours as compensation for the time taken to practice religious beliefs.

Mr. Chairman, I urge my colleagues to support these worthy amendments.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I thank the gentleman for his leadership on this matter, and I support the amendments.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I am pleased to support the gentleman's amendments.

Mr. Chairman, I would like to commend the gentleman from New York (Mr. SOLARZ) on his amendment and, I reemphasize that it has been carefully drafted to avoid any constitutional problems. This was the principal concern of the Civil Service Commission. Therefore, this is a practical amendment which meets the interest of those individuals who do have such religious beliefs and who otherwise have been faced with complications.

This amendment was unanimously approved earlier by the House in passing H.R. 7814, the flexitime bill.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from New York (Mr. SOLARZ).

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. HANLEY

Mr. HANLEY. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. HANLEY:

Page 190, line 8, strike out "Section 2108" and insert in lieu thereof "Effective beginning October 1, 1980, section 2108".

Page 192, strike out line 3 and all that follows down through page 195, line 9.

Page 195, after line 9, insert the following section heading:

"APPOINTMENTS".

Page 195, line 10, strike out "(g)" and insert "Sec. 304." in lieu thereof.

Page 196, strike out line 11 and all that follows down through line 5 on page 199.

Page 199, line 7, strike out "306" and insert in lieu thereof "305".

Page 200, line 10, strike out "307" and insert in lieu thereof "306".

Page 200, line 13, strike out "308" and insert in lieu thereof "307".

Page 200, line 23, strike out "309" and insert in lieu thereof "308".

Page 201, line 19, strike out "310" and insert "309" in lieu thereof.

Page 203, line 3, strike out "311" and insert "310" in lieu thereof.

Page 206, line 5, strike out "312" and insert "311" in lieu thereof.

Page 209, strike out line 13 and all that follows down through line 20.

Conform the table of contents accordingly.

Mr. HANLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendments offered by the gentleman from New York (Mr. HANLEY) and to commend him for his leadership on this issue.

Mr. GILMAN. Mr. Chairman, I do not intend to repeat today the same arguments that I put forward earlier on behalf of my colleague's amendment when it was first considered by the Post Office and Civil Service Committee. Nor do I intend to restate my views on veterans preference which were expressed in the committee report accompanying H.R. 11280.

Under existing law, a veteran (which generally means an honorably discharged individual who has served in the Armed Forces on active duty during a period of war or armed conflict, or in an area for which a campaign badge is authorized, or for a period exceeding 180 days any part of which occurred between January 31, 1955, and October 31, 1976, and in certain cases the spouse or mother of such a person) is entitled to appointment and retention preference in the competitive service. Preference is given by adding 5 points to the passing score of an applicant entitled to preference, but an applicant who is disabled on account of his military service received 10 points, and an applicant who is disabled and is receiving compensation from the Veterans' Administration because of such a disability is entitled to 10 points and automatically rises to the top of the civil service register of eligibles. A preference eligible may not be passed over to select a nonpreference eligible unless the Civil Service Commission approves the appointment. For retention purposes, all preference eligibles are retained within their competitive group during a reduction in force until all nonpreference eligibles have been displaced.

The committee has amended the bill to modify veterans' preference in the following manner:

In the case of any individual who is retired from the Armed Forces on account of physical disability, no change in existing law is proposed. These individuals will continue to enjoy lifetime veterans' preference for both appointment and retention.

In the case of an individual retired at the rank of major or its equivalent except a disabled veteran, appointment preference for a period of 3 years following his separation from the military service.

In all other cases, individuals who under current law have preference on account of military service, will have appointment preference for a period of 15 years following separation from the military service or until appointed to a permanent position in the civil service, whichever occurs first.

For retention purposes in reductions in force, individuals retired for physical disability incurred as a direct result of armed combat will continue to have full preference. Others retired will have no preference, as is the case under existing law, 5 U.S.C. 3501(a)(3)(A). All other individuals entitled to retention preference will have retention preference for a period of 8 years following their separation from the military service.

Permit me, however, to summarize the arguments set forth in behalf of this amendment that were circulated to you in my "Dear Colleague" letter of August 11, 1978.

First. The Schroeder amendment does not aid Vietnam-era veterans seeking Federal employment.

The administration would have you believe that their amendment to title III would mean a substantial gain in Federal employment for the Vietnam-era veterans. Regrettably, that will not be the consequence of the committee's action.

It is contended that Vietnam-era veterans would benefit from the Schroeder compromise amendment because it would limit the use of veterans' preference for nondisabled veterans to 15 years following discharge or upon appointment to a permanent civil service position, whichever occurs first. This would, of course, lead you to believe that the number of older veterans competing for jobs against younger veterans would be diminished, thereby affording the more youthful veterans less competition, and correspondingly, more employment. Again, this is not correct.

First, veterans of prior conflicts, the youngest now being in his early forties, would have already exercised their preference eligibility rights, at least those intending to do so, and having successfully sought Federal employment, may not utilize preference eligibility rights to advance their civil service status except for transfers into a different job series. Second, nondisabled veterans whose service commenced on or after October 15, 1976, are not entitled to five-point civil service preference, in accordance with the provisions of Public Law 94-502, the Veterans Education and Employment Act of 1976. Thus, Vietnam-era veterans will still be competing for entry level positions in the Federal Government against other Vietnam-era veterans and nothing done by this committee will change that. There will still be too few jobs available for the number of veterans applying for them.

Second. Veterans preference has far less impact on the employment of nonveteran minorities and women in the Federal Government than the Carter administration would have the public—and Members of Congress—believe.

With few exceptions, the witnesses appearing before our committee have argued for the retention of veterans' preference, and those who did not, failed to produce any statistical material or to demonstrate convincingly that preference eligibility discriminates against women or minorities. In fact, the minority groups that have testified before our committee pleaded for the retention of veterans' preference.

What we have learned, however, is that veterans' preference has hurt neither the promotion system nor the quality of the civil service. What faults that do exist in the civil service are inherently the problem of the system itself and the way it is being administered and cannot be laid at the doorstep of preference eligibility rights.

Third. Veterans' preference does not apply to promotions.

Under existing civil service law, disabled and nondisabled veterans receive preference in examination, appointment, and retention. In examination, nondisabled veterans have 5 credit points and disabled veterans have 10 credit points added to their passing scores. It should be noted that veterans must have recorded a passing grade before any credit points are added. Veterans, as with other nonveterans taking civil service examinations, must qualify first. After appointment, veterans may not utilize preferance eligibility rights to advance their grades except in limited circumstances where there is a transfer to another job series.

Fourth. Retention preference for veterans is not absolute.

Mr. Arch S. Ramsay, Director of the Civil Service Commission's Bureau of Recruiting and Examining testified before the Committee on Post Office and Civil Service, earlier in 1977 and said:

In retention, veterans have the right to be retained over competing nonveterans in a reduction in force. Retention standing under the law is based on four factors: type of appointment, veterans preference, performance rating, and length of service. Although, this gives veterans a significant advantage, it is not absolute. For example, in fiscal year, 1976, 1800 veterans were separated in Reduction in Force actions versus 3,000 nonveterans. An equal number of veterans and nonveterans (approximately 4,500) were also reduced in grade.

Fifth. Another matter that should be put into perspective is how veterans are distributed within the Federal Government, for to say that "veterans comprise 50 percent of the Federal Service" may give the impression that that ratio holds true "across the board." In fact, more than 75 percent of the veterans in Federal service are employed by three agencies: The Department of Defense, the U.S. Postal Service, and the Veterans' Administration. Veterans thus account for only 37 percent of the Federal jobs outside those three agencies. That is a significant figure, but it is considerably lower than the ratio of veterans in the full-time national work force.

Sixth. The danger to veterans' preference eligibility rights posed by the administration's amendment is further compounded when we consider that veterans' preference and the system under which those scoring highest on examinations are to be appointed is today widely evaded. The agencies disregard the registers, job descriptions are rewritten, veterans are passed over, and those jobs supposed to be reserved for veterans under section 3310 of title V as guards, elevator operators, messengers, and custodians have upon the whole been contracted out.

Seventh. It has been the traditional philosophy in this country, that those who were ordered to serve their Nation in the Armed Forces in time of war should be preferred to serve their Nation in a civilian capacity when qualified. Removal of this preference is a matter that goes beyond any question of "flexibility," greater employment of other groups, or like concerns. It is really a question of whether this is a country that feels free, in time of national emergency, to call upon its very best to serve in its Armed Forces and face death, injury, disruption of normal life, and all the other conditions of that service, and after service to their country, to then discard them as veterans, to announce they must compete "as equals" against all nonveterans, except for such nonveterans as may be given preference in recruiting, examination, and selection.

Accordingly, I urge your support for the Hanley amendment.

PERFECTING AMENDMENT OFFERED BY MR. BONIOR

Mr. BONIOR. Mr. Chairman, I offer a perfecting amendment.

The Clerk read as follows:

Perfecting amendment offered by Mr. BONIOR: Page 192, after "(A)" insert "(i)".

Page 192, line 17, after "armed forces, or" insert "(ii) if later, December 31, 1985, but only if the individual's service in the armed forces on or after August 5, 1964, is the basis for awarding the Vietnam Service Medal or the Armed Forces Expeditionary Medal for Vietnam; or".

Mr. BONIOR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

(By unanimous consent, Mr. BONIOR was allowed to proceed for an additional 3 minutes.)

The CHAIRMAN. The gentleman from Michigan (Mr. BONIOR) is recognized for 3 minutes.

Mr. BONIOR. Mr. Chairman, my amendment would provide more than 1.5 million Vietnam veterans with an extension of their preference. Simply put, veterans who served in the Vietnam theater between August 1964 and May 1975 would have 15 years from date of separation or until December 31, 1985, whichever occurs later, to use their preference. Vietnam theater veterans would thus have a minimum of 7 years to exercise their preference.

The question is asked: How would this help the Vietnam veteran? First of all, in sheer numbers and when taken in conjunction with the committee bill, the pool of veterans eligible for preference is diminished by 20 million people which, in and of itself, elevates the Vietnam veteran. When the pie remains the same size but those who partake diminish in number, the size of the shares are bound to increase. One needs only to look at Oregon which instituted this system in 1977. The data indicates the average age of veterans on the preference eligible lists dropped from 43 to 34. Further, competition from other veterans reusing their preference for other State jobs dropped significantly.

Second, many early Vietnam veterans may have put off a decision on whether or not to enter the civil service. Under the bill's current provisions, some would have as few as 2 years to use their preference.

With my amendment, all Vietnam theater veterans have a minimum of 7 years preference.

Further, the VVIC, of which I am a member, is attempting to obtain an extension of the delimiting date for the GI bill education benefits of those whose benefits may have expired before the large increases of late 1973 made them viable. This amendment would assure those veterans their 4 years of college, or other training, with time remaining to use their preference.

Mr. Chairman, I commend the chairman of the Veterans Affairs Committee, Mr. ROBERTS, and his predecessor, Mr. TEAGUE, and members of the Veterans Affairs Committee for the fine work they have done in providing for our older veterans. This country does owe a special debt to its veterans and theirs is a system without equal in the Western world. But it is also a system that has not met the needs of the Vietnam veteran.

Time and again, Vietnam veterans have told us "all we want is what our father had." Specifically, what was it that their fathers had.

They were given a veterans' preference in which they alone participated.

They were given Veterans Home Administration loans much more consistent with the market, areas like Levittown were practically built with VA loans.

They were provided broad, small business loans.

They had hospital care second to none within the VA system.

They had psychological programs geared to their needs.

They were given full tuition benefits under the GI bill.

They were provided a sizable monthly stipend in addition to their tuition.

They have recently been voted a substantial pension which automatically declares them at 65 to be disabled and eligible for pension.

They had the full and enthusiastic gratitude and support of the Congress and the country.

Is not it about time that we turned our attention to those with the greatest readjustment needs?

Mr. HANLEY has stated his belief that veterans preference is a lifetime privi-

lege. I understand his concerns and am convinced of his sincerity. However, it seems obvious to me from the language of President Roosevelt at the signing of the Veterans Preference Act that veterans' preference was meant as a readjustment tool:

I believe that the Federal Government functioning in its capacity as an employer, should take the lead in assuring those who are in the armed forces, that when they return, special consideration will be given to them in their efforts to obtain employment.

It is absolutely impossible to take millions of young men out of their normal pursuits for the purpose of fighting to preserve the nation, and then expect them to resume their normal activities without having any special consideration shown to them.

Yet, some of our older vets have had the use of their preference for over 30 years. Today 1 out of 2 Federal employees is a veteran, but only 1 out of 10 is a Vietnam-era veteran.

Although the 8½ million Vietnam-era veterans are nearly one-third of the 30 million total veterans Vietnam era veterans hold only 18 percent of the Federal jobs held by veterans in the civilian work force. This is not because Vietnam era veterans do not want Federal jobs, but because even with preference they cannot compete with the more experienced, older veteran who also enjoys lifetime preference.

A look at the Federal new hires illustrates the difficulties younger veterans have in competing for jobs. In 1977, there were 448,000 new hires in the Federal Government, of which 151,000 were veteran new hires. Of these, 47 percent were pre-Vietnam era career military, 11 percent veterans. Thus, out of 151,000 veterans hired, only 57,000 of these veterans were Vietnam-era veterans.

Further, a significant number of older veterans exercise their preference more than once further limiting the opportunities for younger veterans, existing provisions permit unlimited use of veterans preference. A broad Civil Service Commission survey found that 23.2 percent of 3,500 veterans on registers were current or former Federal employees. This survey drew upon three Federal regions and the Washington area.

We are told that older veterans are not block younger veterans, that they have already settled into careers, that the average age of the World War II vet is 58 and that of the Korean vet is 48 and they are, therefore, not interested in a civil service career. Then why are they so vehemently opposed to yielding their preference?

Opponents of our approach have mentioned Peace Corps and VISTA volunteers, people who also performed honest service to their country, will maintain their preference after vets lose theirs. What they do not mention is that these people are eligible for appointment for only 1 year after leaving ACTION service.

They have asserted that my amendment would adversely affect the families of MIA's and widows and orphans, that is simply not true. It does not affect their status.

They have also stated that 95 percent of Vietnam veterans support the Hanley amendment, a figure that certainly bears no relationship to reality. They have stated that all veterans' organizations oppose the Bonior and Schroeder amendments despite the fact that we have the support of groups like the National Black Veterans Organization, the American Veterans Committee, the Council of Vietnam Veterans, and a majority of the Vietnam veterans in Congress, not to mention the Nation's No. 1 veteran, VA Administrator Max Cleland, who has given his endorsement to the committee approach and my amendment.

The Vietnam veteran is at a critical juncture in his life. He is 32 years old, married and has two children. In many cases, if they are not unemployed they are underemployed. VA statistics show that over 855,000 Vietnam veterans earn less than $4,000 per year, and over 2 million earn less than $7,000. For many of them, if they do not get adequate education benefits, if they do not get psychological help soon, if they do not get employment help, their life patterns will be established and we will bear the awful responsibility for perhaps thousands of desolate and wasted lives—lives that were once offered to us in honest service. I look upon these reforms as a beginning to the fulfillment of that trust.

The argument is made that Vietnam vets will lose their preference in 15 years. We are not concerned about preference in 15 years. In 15 years, the Vietnam vet will be 47 and it will be too late to have a beneficial effect on their lives.

I have talked to many of the older veterans in my district and once they understand what it is we are really trying to do, the great majority of them are supportive.

The point to be made is that I am not anti-World War II veteran, I am not anti-Korea. I am for justice and compassion and I cannot believe that the veterans of those conflicts, who have known the stresses of war and its aftermath, and who have received much for their distinguished service, would deny this one small advantage for Vietnam veterans. If I am wrong, then I have made a grievous misjudgment of the American character.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. BONIOR. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I thank the gentleman for yielding.

I want to commend him. In the past he has earned great respect in the House for what he has done for the Vietnam veteran.

I just am concerned that the gentleman might be taking the wrong approach in wanting to help the Vietnam veteran.

I know he now has a bill in our committee which would extend the G.I. bill from 10 to 12 years, and it will be considered. Yet, the gentleman has an amendment which would cut off the veterans' preference at 15 years. I do not believe the gentleman is quite consistent in that position; and also, as I understand it, the gentleman will limit it to those Vietnam veterans.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BONIOR) has expired.

(On request of Mr. MONTGOMERY and by unanimous consent, Mr. BONIOR was allowed to proceed for 1 additional minute.)

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield further?

Mr. BONIOR. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, as I understand the gentleman's amendment, it would be restricted to the Vietnam veteran who served in combat in Southeast Asia; is that correct?

Mr. BONIOR. That is correct.

Mr. MONTGOMERY. The only problem I have with it is this one—and I like the idea of taking care of those persons who really went over there and fought—however, serving on the Committee on Veterans' Affairs as I do, I want to say that we have never discriminated against certain veterans on the basis of where they happened to serve

During the Vietnam war, for example, I know a number of people wanted to go to the Vietnam war, believe it or not; but they were sent to Europe because we had to build up our forces there.

Under the amendment, that would discriminate against those persons who did not have the choice of assignment and had to go somewhere else.

Mr. BONIOR. The gentleman's remarks are well taken, but, as I indicated at the beginning of my remarks, I think what we have not done with the Vietnam veteran is deal with the readjustment problems.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. BONIOR was allowed to proceed for 1 additional minute.)

Mr. BONIOR. If we take them as a group, as an aggregate, I agree with the gentleman that those who need it the most are those who fought.

Dr. Charles Vigley, one of the most noted psychologists on Vietnam veteran problems, has indicated in a recent article in The American Legion magazine that that is exactly the case. The problems of those who serve in combat are much, much broader and different and deeper, and their wounds and scars are much deeper than those who did not serve.

I guess also another point is we are trying to strike some balance in this bill between veterans and younger veterans and women and the minorities. This is the whole civil service package. My objective was to include all Vietnam veterans but to strike a balance. We thought this was the best way to make that approach for those who need it the most, those who fought in combat.

Mr. HANLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, in anticipation of the Bonior amendment I did a bit of analysis, and here is what I came up with—and when I say "I," this is a collective judgment of people very close to the subject matter. The problem with the gentleman's amendment is this: It would eliminate almost 4 million Vietnam-era veterans, of whom more than

1,360,000 had served in a combat theater. Now we have a new preference. The administration through this amendment applies only to Vietnam theater veterans, so if one served in the armed services during the Vietnam War but was not assigned to the combat theater, forget it. He loses his preference. This could set a new and disturbing precedent that veterans' benefits would be geared to a combat theater prerequisite.

Another negative aspect of the amendment is this: It would limit veterans reduction-in-force benefits to 8 years following initial appointment to the Federal Service. That means that all veterans who had been employed by the Government for 8 years or more, including the Vietnam-era veterans who entered Federal service between August 5 of 1964—which incidentally was officially the beginning of the Vietnam era—and October 1972, would immediately lose their RIF protection when the law becomes effective in October of 1980. I do not believe we want to do that; do we? Of course not.

The 84,000 Vietnam-era veterans who entered Federal service in 1973 would have 1 year left in RIF protection. The 113,000 Vietnam-era veterans who began Government jobs in 1974 would have but 2 years of RIF protection remaining, and so forth. So again the effect of the amendment takes heavily away from traditional preference.

The gentleman again alluded to support for his amendment on the part of Vietnam veterans. We do not see it that way. If The American Legion, as representative of its 675,000 Vietnam veterans, and the Veterans of Foreign Wars, as representative of over a half million Vietnam veterans, and the Disabled American War Veterans, with almost 150,000 Vietnam veterans, say that that amendment is wrong and my effort is correct, to whom, then, are we supposed to listen?

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, I want to associate myself with the remarks of the gentleman in the well. As the gentleman has said so eloquently, the Vietnam veteran, as we all know, has had numerous employment difficulties. He is almost exclusively the one who will be helped in the future by veterans' preference and now the gentleman from Michigan, I am sure with all good intentions, proposes a plan which will completely eliminate veterans' preference within the next 7 years. The Vietnam veteran deserves the same benefits as his World War II counterpart.

A recent "factsheet" sent to Members of Congress by proponents of this amendment claimed that "of about 150,000 veterans being hired annually * * * over half are pre-Vietnam veterans." That is untrue. During the past several years Vietnam-era veterans have consistently accounted for at least 56 percent of the veteran new hires, while 5-point preference, pre-Vietnam veterans have accounted for less than 40 percent. In per capita terms there are only 8.5 million as opposed to 21 million World War II and Korean war veterans, Vietnam veterans have been utilizing veterans' preference at a rate more than three times greater than veterans of other wars. By 1980, when the proposed legislation would take effect, the average age of World War II veterans will be 60—at or near retirement age. Thus it is clear that the ratio of Vietnam veterans entering Federal service will increase rapidly.

I submit it is the duty of Congress to preserve veterans' preference in the form it is now embraced.

I compliment the gentleman on his earlier amendment, and at a later time I want to support it; but at the present time I want to join the gentleman in opposition to the Bonior amendment.

Mr. HANLEY. Mr. Chairman, I appreciate the gentleman's comments.

If I may allude to a letter from the leadership of the National Association of Concerned Veterans, and mind you, their membership is totally Vietnam veterans, other veterans do not qualify for membership, I read the concluding paragraph of the rather lengthy letter:

> Moreover, we point out that much of the information that the administration is using to support its case was provided in our previously alluded to testimony. What the NACV does object to is legislation which harms Vietnam veterans, as is the case with the amendment adopted in committee and the original Civil Service Reform Legislation proposed by the administration. Perhaps even more importantly, as citizens, we object to any legislation which undermines its alleged purpose and which is supported by only the most piecemeal and conclusory evidence.

Mr BONIOR. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from Michigan.

Mr. BONIOR. Mr. Chairman, the gentleman alluded to the NACV group of Vietnam veterans that support the amendment.

I would just like to say to the gentleman that a recent article in the Stars and Stripes by Mr. Otto Lukert speaking for the NACV said that he wanted some provision geared more to the Vietnam veteran. He was not pleased with the situation.

Just one other point. Is the gentleman saying the amendment I am offering would eliminate 1.3 million combat veterans from veterans' preference? It is geared not to eliminate, but to protect them for 7 years.

Mr. HANLEY. That could be the gentleman's intent; but. unfortunately, the language of the gentleman's amendment would have this effect.

Mr. BONIOR. In what way?

Mr. HANLEY. It would eliminate almost 4 million Vietnam era veterans. of whom more than 1,360,000 had served in the combat theater, by virtue of restricting the tenure of their preference.

Mr. BONIOR. Mr. Chairman, if the gentleman will yield further. I would tend to disagree with the gentleman The amendment specifically is intended to protect those veterans.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mrs. SCHROEDER, and by unanimous consent, Mr. HANLEY was allowed to proceed for 1 additional minute.)

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I just wanted to ask the gentleman from New York about the comments the gentleman made about the RIF protection, because a lot of people do not quite understand what is in the bill.

Right now, under the preference as it stands without the bill, you have a lifelong RIF protection once you are in the Federal service, which means everybody else goes first and veterans will never, never be touched.

Under the bill we give them a RIF protection for 8 years after they are hired, and, of course, we always add on the years in service. So the minimum amount of time would be 10 years of seniority, and, of course, we do have seniority considered very heavily in the whole process of civil service.

Mr. Chairman, I just want to make it clear that we would not leave veterans totally unprotected or that they will lose their RIF protection. They will not have seniority protected forever but they will, as long as they have their 8 years of service, have that edge.

Mr. WHITE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Hanley amendment.

Mr. Chairman, I think if a reporter were to ask what ingredient of the Congress is one of the most important to the individual Member, most Members would probably respond, "To be fair," because after all, we sit in judgment of many events of this Nation and we are trying to be fair and balance things out for all peoples.

Recently, in 1976 we passed a bill that became law, a bill that cut off veterans' preference for the future, so, in other words, the percentage of veterans in the Government will decrease in the coming years without any modification of veterans' preference.

I want to point out a few statistics that I think will help the Members in making their decision.

The new hires in the Federal Government, according to the Bureau of Labor Statistics, have been going down for veterans. For instance, in 1975 the figures for females were 42.2 percent, and the figures for veterans were 32.2 percent. In 1977, just 2 years later, the veterans were 27 percent—in other words, more than 5 percent less than they were previously.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield on that point?

Mr. WHITE. Mr. Chairman. I will vield at the end of my remarks, if the gentlewoman will wait, please.

Approximately 7 out of every 10 annual new hires in the Federal civil service are nonpreference eligibles. The bulk of the veterans currently employed in the Government are World War II veterans who will soon be retiring in large numbers.

I would like to point out that the veterans' preference represents a promise made to those who entered the armed

services. Any modification of the veterans' preference system would be a breach of that particular promise.

On June 15 the Senate Government Affairs Committee voted 9 to 7 to delete the veterans' preference provision entirely from the bill, and the reason cited was it would threaten the passage. But the Members of the Senate realize there was indeed a promise, and they did not wish to breach that.

In September 1977, the General Accounting Office issued a report which supports the claim that veterans' preference is not a significant obstacle to minorities, and it in fact shows that veterans' preference helps minorities twice as often as it harms them, based on an examination of the Federal Register. The minority veterans make up only 8.5 percent of the U.S. veteran population but comprise 19 percent of the veterans employed by the Federal Government.

The chart shows that by 1987, 6,290,000 veterans of the Vietnam era, veterans under the bill as it is now proposed, will lose all veterans' preference opportunities currently provided in Federal employment. That is 70 percent of all such veterans and approximately 82 percent of those who served in the Vietnam combat theater.

What is so very wrong with having a strong infusion of people who served their country and came to its defense, many indeed in battle? I think it is a good fiber-building factor in our Government to have patriotism and to have people who are willing in peace as well as war to come to the front and serve their country.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I just want to emphasize a few things the gentleman pointed out, and I thank the gentleman for yielding.

I know there have been many statements made that veterans' preference does not hurt women, and so forth. The GAO has concluded otherwise in many studies, and I think one of the things we lose when we look at general figures is the fact that most of the women hold very low grade jobs. They are being hired as stenographers and secretaries, and is a very large portion of their Federal service.

If we look at who passes the tests, we find that 20 percent of the veterans passed the examinations and 34 percent of the people hired were veterans. So they do much better from passage to hiring.

We also find, when we look at super grades, that 65 percent of them are veterans, and that women are less than 3 percent. So the women and minorities tend to be compacted down in the lower grades, and we are counting them in the statistics equally.

Mr. Chairman, I think a part of what we are talking about here is having a fair shake across the board. I think the gentleman from Texas (Mr. WHITE) understands that, and we could play with figures all day and lose sight of that.

Mr. WHITE. Mr. Chairman, many of these veterans are also women, so when we are talking about veterans, we are talking about women as well as men. We are also talking about the minorities, as I said. The fact is that 42 percent, as I cited earlier, of those hired are women at the present time.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, in contradiction to what the gentlelady from Colorado (Mrs. SCHROEDER) is saying, in 1977, 203,000 females were hired and only 163,000 veterans were hired to Federal jobs, so the women are being protected.

Mrs. SCHROEDER. Mr. Chairman, if the gentleman from Texas (Mr. WHITE) will yield further, that is exactly what I am saying. The majority of women and minorities who are being hired are lower grades, secretaries and stenographers, and they really were not bidding against veterans in getting those jobs.

We are counting them in the total statistics, and I think that that changes the figures.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WHITE) has expired.

(By unanimous consent, Mr. WHITE was allowed to proceed for 2 additional minutes.)

Mr. WHITE. Mr. Chairman, I am not contesting what the gentlewoman is saying. What I am saying is that in innumerable bills, time after time, this Congress has grandfathered groups or individuals, has not tried to change the rules in the middle of the game, and has said to those who are eligible that we are going to allow them to continue in their participation in the existing law. That is all we are saying here. This is going to be phased out. The bulk of World War II veterans are being phased out shortly. The Vietnam veterans are the ones who need it most, and those are the ones we want to get the same opportunities as the World War II veterans, and eventually they will be phased out as well. The percentage of those veterans will continue to go down as the percentage for women will go up. Pretty soon there will be far less veterans. I am saying that we should phase them out fairly.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. WHITE. I yield to the gentleman from Kansas.

Mr. SKUBITZ. I thank the gentleman for yielding.

Mr. Chairman, I am a little disturbed because of the fact that we never seem to focus on the Korean veteran. We speak of the way the World War I veteran and the World War II veterans are being phased out. No one says anything about the Korean veteran. I intend to offer an amendment to the Bonior amendment which will include the Korean veteran. It seems to me that any veteran who served in the Korean War in Korea is entitled to veterans' preference just as his Vietnam comrade.

Mr. WHITE. Mr. Chairman, I totally agree with the gentleman. And if we vote for the Hanley amendment, they will be included. The only ones that will not be included in the Hanley amendment will be those who are double dipping, majors and over. We should allow these veterans to participate in the law, and I believe we would have a moral question if we did indeed change the law suddenly so that those veterans would not have that opportunity.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WHITE) has again expired.

(On request of Mr. SKUBITZ and by unanimous consent, Mr. WHITE was allowed to proceed for 1 additional minute.)

Mr. SKUBITZ. Mr. Chairman, if the gentleman will yield further, our colleague, the gentleman from Mississippi (Mr. MONTGOMERY), emphasized the point that old soldiers never die, they just fade away. When Mr. MONTGOMERY spoke of the veterans of World War I and World War II fading away, he also included the Korean veterans. It is my feeling the Korean veteran should be protected.

Mr. WHITE. The Hanley amendment does that. The Hanley amendment also includes the Korean veteran.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment offered by the gentleman from Michigan (Mr. BONIOR).

Mr. Chairman, I rise in opposition to the Bonior amendment, and I urge that my colleagues be not so hasty as they embark on civil service reform that they forget the sacrifice of our veterans who, in responding to their Nation's call to duty, gave of themselves and of their careers.

Mr. Chairman, permit me to remind my colleagues that veterans' preference does not apply to promotions. Veterans' preference generally is utilized for entry-level positions, in other words, from GS–5 to GS–9, but not for promotions.

I further point out to my colleagues that most of our older veterans, the veterans from World War II and the veterans from the Korean War, are in the upper echelon positions and do not utilize veterans' preference to advance their careers. Our younger veterans, in other words, the Vietnam-era veterans, are competing not against other veterans and not against old-guard people. If we reduce the use of veterans' preference, as the Bonior amendment implies, we will only be harming opportunities for Vietnam-era veterans and not older veterans. I think there must be a better way to aid Vietnam-era veterans without diluting the veterans' preference which the Bonior amendment will do.

Modifying veterans' preference would only render it meaningless. Accordingly, I urge my colleagues to oppose the Bonior amendment.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I

think the gentleman from New York is correct in pointing out that veterans' preference does not aid one in a promotion on the career ladder he or she is on, but it will allow one to bid into a career ladder so that he could use it several different times. As to the use of statistics on how many people, 23 percent have used it numerous times to go on other career ladders once one is on the ladder, and he can use it to get on the ladder once, use it for promotion within. But he can use it for horizontal transfer and utilize it because that is considered bidding on a whole new job.

Mr. GILMAN. I think the gentlewoman is correct. However, statistics point out that it is not used frequently for that purpose. I would like to address a remark by the gentlelady from Colorado with regard to retention preference. In my earlier remarks I noted retention preference for veterans is not absolute. Mr. Arch S. Ramsay, Director of the Civil Service Commission's Bureau of Recruiting and Examining, testified before our committee—and the gentlewoman may recall when he said:

> In retention, veterans have the right to be retained over competing non-veterans in a reduction in force. Retention standing under the law is based on four factors: type of appointment, veterans' preference, performance rating, and length of service. Although, this gives veterans a significant advantage, it is not absolute. For example, in fiscal year, 1976, 1800 veterans were separated in Reduction in Force actions versus 3,000 nonveterans. An equal number of veterans and nonveterans (approximately 4,500) were also reduced in grade.

Mrs. SCHROEDER. First of all, on bidding, my understanding is that the Civil Service Commission says that over 23 percent of the people in the civil service have used their veterans' preference more than once on the horizontal job ladder. Whether the gentleman thinks that is a large number or not depends on his viewpoint.

Secondly, I think on the other issue, on RIF's, that is exactly correct, nothing is really absolute except death and taxes, but it certainly does give one an advantage to hold veterans preference in the Federal service. I think on that we have no disagreement.

Mr. GILMAN. Of course, the basis of our argument is that they are entitled to that advantage, and we hope to preserve that advantage under the Hanley amendment.

Mr. ROBERTS. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the Hanley amendment and in opposition to the Bonior amendment.

Mr. Chairman, I want to thank the very able gentleman from New York for his firm commitment to our veterans and their families. The gentleman served on the Committee in Veterans' Affairs for several years and he is well aware of the many problems that confront wartime veterans.

Administration officials, and those who advocate that we curtail the preference under the guise of helping women and Vietnam veterans either don't understand the issue or simply haven't gotten their facts straight.

First, the 5-point veterans' preference is a benefit that goes only to veterans who served during a period of war. Peacetime veterans are not entitled to the benefit and veterans who entered service on October 15, 1976 and thereafter are not entitled to the benefit. So the benefit has been terminated for all individuals who volunteered for service after that date. The pool of eligibles is continuing to increase.

The administration would have us believe that the so-called Schroeder amendment, by limiting the use of preference for able-bodied veterans to the first 15 years after discharge, would actually enhance employment opportunities for Vietnam-era veterans. How? By reducing the pool of eligible veterans competing for jobs with the termination of eligibility for World War II and Korean veterans. Surely the House is not going to buy that line. Does any Member of this body believe a 60-year-old World War II veteran is competing with a Vietnam veteran for a Federal job?

Everyone knows World War II veterans employed by the Federal Government are retiring in great numbers annually. After all, the average age of the World War II veteran is 59 years. What about the competition from Korean veterans? The average age is 49 years, and they are well established in their careers. There is no competition with these veterans in the Federal marketplace.

The administration also attempts to sell its proposed program on the fact that the bill gives agencies the authority to give special appointments without competitive examination to Vietnam era veterans. Of course this authority was established by Executive order several years ago, and is already in force. Our committee has expanded the authority already. This is nothing new.

We are involved in the old "shell game" of now you see it and now you do not. As first presented, the 5-point veterans' preference would be limited to 10 years. Proponents quickly determined such short-time use of the preference was unthinkable and the administration began seeking some alternative. Proponents then suggested a 15-year, one-time use of the preference.

JIM HANLEY quickly reminded every Member of the House that even with the additional 5 years, more than 6 million Vietnam-era veterans would lose their preference by 1987. Proponents of the administration proposal then called a press conference to announce that an amendment would be offered on the floor to provide some additional time for veterans who served in the Vietnam theater. I will admit such an extension would give a few Vietnam veterans from 2 to 5 years of additional time in which to use the 5-point preference.

But why make a distinction based on the location of the individual during war. We have never made any distinction between a combat veteran and a noncombat veteran in providing educational benefits. No matter where they served during their tour of service, they get equal benefits. I would not want to see us change that principle because a man or woman in service during war has no control over their destiny. All of them support the war effort and we should not treat them differently.

Mr. Chairman, it does not take a genius to understand the impact of the proposed change in the law. I do not care how many "5-year extensions" are added to the administration's proposal, the fact remains that Vietnam veterans come out on the short end. There is no mistake about it.

If the administration thinks the 60-year-old World War II veteran and the 49-year-old Korean conflict veteran is competing with the Vietnam veteran for Federal jobs, reducing the pool can be accomplished without limiting the benefit for Vietnam veterans. You can never convince me that a one-time use of the preference during 15 years after discharge is a better benefit than the Vietnam veteran now has.

The administration's proposal is full of flaws. One of the most serious inequities appears in the proposed plan to limit the reduction-in-force protection to only 8 years. We have not heard from the proponents on this provision of the bill because it will have such an adverse impact on Vietnam veterans in the future. Consider this typical case. Two young men complete high school in 1968. One is drafted into service and is sent to Vietnam. The other individual is not drafted. In fact, he may have purposely evaded the draft. He takes a job with the Federal Government. After serving in Vietnam the first person completes his 2-year tour and is honorably discharged. Within 30 days from discharge, he obtains a job at the same agency as the nonveteran. In 1982 there is a reduction-in-force at the agency.

Under the bill, all else being equal, the veteran will not be retained because the nonveteran has seniority. The nonveteran did not have to serve his country during a period of war. Unless the Hanley amendment is adopted, the veteran would be laid off from work and nonveteran would continue on the job. Is this the position in which we want to place our veterans for having defended their country in time of war? I certainly hope not.

Mr. Chairman, I do not care how many briefings are held and no matter how many press conferences are held to try to peddle this package as one that will benefit Vietnam veterans, it simply will not work. This administration proposal will not give the Vietnam veteran any advantage in Federal employment. It should be noted on this point that we cannot get the Civil Service Commission to enforce the laws already on the books to place Vietnam veterans on jobs.

Look at the poor records of most of the departments and agencies who have failed to hire Vietnam veterans through noncompetitive appointments under the veterans' readjustment authority we granted several years ago.

Quite frankly, Mr. Chairman, there is no valid data to show that the 5-point veterans' preference is keeping well quali-

fied women and minorities from being hired by the Federal Government. During 1977, newly hired employees included 213,000 females and 163,000 veterans. Veterans preference is helping minorities. Minority veterans make up only 8.5 percent of the U.S. veteran population but comprise 19 percent of the veterans employed by the Federal Government.

Most importantly, if one bothers to check with the personnel managers of the various Federal departments and agencies, they will find that veterans are outstanding employees. They are all well-qualified, notwithstanding the opinion of some high administration spokesmen that they are experiencing difficulty in hiring qualified women because unqualified veterans appear above them on the civil service register.

Anyone knowledgeable in veterans' affairs knows that a veteran never receives a 5-point preference on his or her examination unless the score is 70 or better.

In closing, I urge my colleagues to support the Hanley amendment. Otherwise, the House will, for the first time, violate the principle of equal benefits for equal service. Veterans who fought in Vietnam deserve benefits equal to those who fought during World War II and the Korean conflict. Now is not the time to give them less.

On May 7, 1975, just a little over 3 years ago, President Gerald Ford terminated the Vietnam era by Presidential proclamation. Already we see evidence, by this provision of the bill, that this terrible war is fading from the memory of some people. But I say to you, let us not forget those who served during such difficult times. They were drafted to serve. Let us not abandon them now. That is exactly what we will be doing if the Hanley amendment is not adopted.

Mr. Chairman, I also rise in opposition to the amendment offered by the gentleman from Michigan.

As I understand the gentleman's amendment, it would provide for veterans who served in the Vietnam theater, a one-time use of the 5-point preference 15 years from date of discharge, or December 31, 1985, whichever occurs later. I would assume that this is being done because of the flaw in the committee bill called to our attention by JIM HANLEY, which indicated that by the year 1985, more than 4,400,000 Vietnam veterans would lose their entitlement.

Mr. Chairman, this is a perfect example why we should oppose the veterans preference part of this reform bill and support the Hanley amendment. The proposal is full of flaws. First, the administration recommended a 10-year limit on the use of the preference. Finding that would be quickly rejected, the administration agreed to extend the time to 15 years.

Mr. HANLEY alerted all of us to the tremendous adverse impact even this period of time would have on some 6 million Vietnam veterans by the year 1987, and the administration scrambled to plug the dike. It was agreed that an amendment would be supported by the administration to provide some additional time for those who served in combat.

The proposed amendment would give a reprieve for some veterans who served in combat. I have real problems with the principle involved here. Why make a distinction between those who served in combat and those who supported the war effort located throughout the world? Should we now decide how close the individual was to the field of fire in determining the level of benefits to be paid? I think not. Equal benefits should be provided for equal service.

Further, Mr. Chairman, the gentleman's amendment does nothing to protect this same Vietnam-era veteran in his employment beyond the 8 years provided in the bill. Therefore, after years of employment, this same veteran who served in the Vietnam theater could be terminated from his job in a reduction-in-force action while the nonveteran continues on his job since he has seniority in that he did not have to answer the call to duty in Vietnam. It simply is not fair and equitable.

I urge my colleagues to vote no on the amendment offered by the gentleman from Michigan and to support the Hanley amendment.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the distinguished gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I think it should be pointed out that under the bill as reported a veteran is protected in a reduction in force for only 8 years. Under the Bonior amendment, the protection is still only 8 years. Under current law the veteran is protected for life in a RIF action. So under the bill as reported or with the Bonior amendment we are cutting back the veterans' preference, any way we slice it.

Mr. ROBERTS. Of course it is subject to his performance, and I am perfectly willing that he should have to perform properly.

I thank the gentleman for his contribution.

Mr. BONIOR. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Michigan.

Mr. BONIOR. Mr. Chairman, does the gentleman have any figures on how many women are veterans? The figures we have are about 2 percent.

Mr. ROBERTS. I would not contest the gentleman's statement, but according to data before the committee, there are well over 600,000 of them.

Mr. BONIOR. Mr. Chairman, if the gentleman will yield further, I would ask just for one other point. The gentleman from Mississippi indicated the question of the 8-year guarantee. That is 8 years, but we also give them the years in military service, which comes out to a minimum of 10 years and maybe 11 or 12 years, and that is sufficient protection it seems to me. It is 11 or 12 years seniority and it also includes the inservice time.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, in response to the gentleman's inquiry with regard to the number of women who hold veterans' preference, there are presently enough women entitled to veterans' preference, 831,800 women who are now entitled to hold Federal jobs, to more than fill those jobs. There are some 893,500 jobs in that category.

I thank the gentleman for yielding.

Mr. ROBERTS. I thank the gentleman from New York for his contribution.

If we have the amendment of the gentleman from Michigan it would give a reprieve to some people who have served in combat. I have some problems with doing that. Why make a distinction between those who served in combat or those who supported the war effort throughout the world? I am a combat veteran and I support veterans' preference, but when a man is out in the open sea and his ship goes down, is he in combat or not? It is not that simple. Combat is more than just being in a hostile area and pulling a rifle trigger.

I hope the amendment offered by the gentleman is not adopted. I urge my colleagues to vote "no" on the amendment offered by the gentleman from Michigan and support the Hanley amendment.

The Hanley amendment is supported by the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans and, as far as I know, all of the other major veterans organizations.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, I thank the gentleman for yielding.

Will the gentleman tell me how he distinguishes between a Vietnam veteran who was actually in combat and one who served in a combat zone but was never fired on?

Mr. ROBERTS. The gentleman makes an excellent point and it was the point I was trying to make. How is combat defined?

Mr. BONIOR. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I will be happy to yield to the gentleman from Michigan.

Mr. BONIOR. Mr. Chairman, I would like to answer both the gentlemen from Texas. The specific language in this amendment relates to people who were awarded the Vietnam Service Medal, the Armed Forces Expeditionary Medal for Vietnam. So the guidelines of combat are specifically drawn up by the military by itself by the awarding of those medals.

Mr. TAYLOR. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from Missouri.

Mr. TAYLOR. Mr. Chairman, my colleague from New York seeks to delete one of the most objectionable provisions of the committee bill, and by doing so he would preserve our existing veterans' preference in Federal employment.

I support his amendment because I simply do not believe the arguments of those who would have us turn our backs on this Nation's veterans.

The committee bill calls for substantial dilution of this Nation's longstanding policy of according military veterans' preference in examination, appointment, and job retention in Federal employment. In doing this, the committee would deny veterans' preference to millions of Vietnam era veterans and would severely limit retention preference for those who are now employed or become employed in Government service.

The committee accepted the argument of the Carter administration that the intent of veterans' preference is to provide for some sort of readjustment to civilian life, and that modifications are now in order because the employment of veterans has caused discrimination against women.

I reject the Carter administration arguments out-of-hand, because I do not believe that veterans' preference laws have hurt the quality of the Federal civil service, nor do I believe that the application of our current law has harmed the employment opportunities of any qualified persons.

Our current laws give honorably discharged veterans an advantage in appointment and job retention, although it is not as overwhelming one.

The concept of veterans' preference is based on the belief that those men and women who served their country honorably in time of war should have some first consideration in serving their country as civilians from among those with the same relative qualifications.

The committee bill is being sold under the guise of helping Vietnam-era vetnam-era veterans will lose all veterans' colleague from New York has pointed out that, by 1987, nearly 7 million Vietnam era veterans will lose all veterans' preference opportunities if the committee's provisions are left intact.

I urge my colleagues to support the Hanley amendment, for by doing so we will be keeping the faith with those who have served this country with honor.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. ROBERTS was allowed to proceed for 2 additional minutes.)

Mr. ROBERTS. Mr. Chairman, I would like to say to my colleagues that we have a system that works. It may not be perfect, but it has worked for a long period of time. We have men and women who have a vested interest in that system. Let us not change the rules in midstream.

Mr. UDALL. Mr. Chairman, I wonder if we could get some agreement as to a limitation of time?

Mr. Chairman, I ask unanimous consent that all debate on the amendment offered by the gentleman from New York (Mr. HANLEY) the perfecting amendment offered by the gentleman from Michigan (Mr. BONIOR) and all amendments thereto, close at 5 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Members who were standing at the time the limitation of debate was agreed to will be recognized for approximately 1½ minutes each.

The Chair recognizes the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in support of the gentleman from New York's amendment.

I find it highly ironic that those who have been the strongest advocates of affirmative action for women and minorities now oppose veterans' preference. Affirmative action, for which the administration recently reaffirmed its support, is designed to compensate a class of people for opportunities lost by their ancestors. It is speculative at best, when applied to an individual applicant. There is absolutely no guarantee that an individual applicant suffered the lost opportunity that is presumed to have been suffered by the class accorded affirmative action. Veterans' preference, on the other hand, is designed to compensate individuals for the actual loss of opportunities, due to military service during time of war. I can understand how a person can support veterans' preference and not affirmative action, but it is beyond me how a person can be in favor of affirmative action and not veterans' preference.

As stated earlier by the distinguished gentleman from New York (Mr. HANLEY), there is no evidence whatsoever that veterans' preference is harmful to the hiring opportunities of women and minorities. The administration and its allies have been playing a very simplistic game. They look at the proportion of women and minorities in the higher levels of the civil service, and at the proportion of veterans in those levels, and then conclude that veterans preference is responsible for the low percentages of women and minorities.

First, it is rational that veterans be represented in those categories. A majority of our male population in the 50 and above category is veteran. Second, the lack of women and minorities parallels a similar lack of women and minorities in higher positions in the private sector. Did veterans' preference cause that imbalance too? It is clear that, in both cases, those disparities have little to do with veterans' status, and much to do with societal structures which are being overcome. Furthermore, the disparities are certain to change rapidly even without a change in veterans' preference. World War II veterans make up the bulk of our veteran civil servants. These veterans are now almost 60 years old, on the average, and will be retiring in droves.

Without regard to representation in the upper echelons of civil service, it is interesting to note that women now constitute almost as large a percentage of professional new hires as veterans. Last year, 11,929 women were hired at GS–7 positions and above, while 13,621 veterans were. When we couple this with the fact that, overall, women constitute 42 percent of the Federal hires, and veterans 27.8 percent, it seems clear to me that women are faring very well: Those who want careers are getting them. Those who want clerical jobs to supplement their family's income are getting them.

Considering that the Vietnam veteran, even with the veterans' preference notion, holds a median grade of only a GS–6, at the average age of 31 years, I wonder how well veterans preference really works.

We know one thing: It does work for minority veterans, despite arguments that veterans' preference works to the disadvantage of minorities. Minority veterans make up 2 percent of the national work force, and fully 9 percent of the Federal work force. In fact, Mr. Speaker, minority applicants on the whole have been unaffected by veterans' preference. Some 12 percent of the country's population is minority, but 23 percent of the Federal work force is minority.

I have heard it said that veterans' preference affects equal employment opportunity, and that its elimination would restore that notion. It is clear, however, that the administration is not interested in establishing a completely unbiased employment system. Affirmative action discriminates in favor of women and minorities. Even more disconcerting have been the administration attempts to create special noncompetitive appointment positions for many of its friends. For instance, the so-called Sugarman plan would allow noncompetitive appointments for women and minorities all the way up to GS–18.

Even worse, in recent months the administration announced a special, noncompetitive hiring program for individuals who served for 1 year in ACTION programs such as VISTA and the Peace Corps. How can this administration embrace on a noncompetitive basis those who served voluntarily in capacities that were often exotic vacations, and then seek to cut off from a mere 5-point boost the veterans who suffered in the foxholes and the trenches of our Nation's wars?

Mr. Chairman. it has become a standard criticism of the traditional veterans' organizations that they are comprised of older veterans who care only for benefits that accrue to those who fought in World War II. I would submit to you that this issue, which is fully supported by all of our veterans' organizations, impacts almost exclusively on the well-being of our Vietnam veterans. The World War II veteran will use veterans' preference sparingly in the future, if at all. The Korean war veteran is for the most part ensconced in his profession. It is the Vietnam veteran who has encountered employment difficulty, and it is the Vietnam veteran who will be helped—or hurt—by the way the House votes on this amendment today. Again, Mr. Chairman, I find an irony in the makeup of those who oppose veterans' preference. How many of those who are trying to end perhaps the most meaningful benefit for the men who went off and fought our most unpopular war cried crocodile tears over his status last year when they supported the de-

serters and malcontents who were helped by the Carter discharge review program? Veterans' preference rewards honorable service. There has been few enough rewards for those who did their duty in Vietnam.

Mr. Chairman, I submit that now is the time to demonstrate a concern and appreciation for what the Vietnam veteran went through in the mud and jungles of Southeast Asia. If the Members of this body truly appreciate his sacrifices, they will support this amendment and now.

I rise in opposition to the gentleman from Michigan's amendment.

I find it highly ironic that the gentleman and some of his colleagues have been especially critical of the Committee on Veterans' Affairs for not having done enough for veterans of the Vietnam era, and now offer as their first congressional initiative a plan which would eliminate the future by veterans' preference. And nam veteran has available to him. The Vietnam veteran has had numerous employment difficulties. He is almost exclusively the one who will be helped in the future by veteran's preference. And now the gentleman proposes a plan which will completely eliminate veterans' preference within the next 7 years. The Vietnam veteran deserves the same basic benefits as his World War II counterparts, and I submit it is the duty of the Congress to preserve veterans preference in the form it now enjoys. Does the gentleman submit that the service of the Vietnam veteran was less deserving than his World War II counterpart's? If not, I should think he would vote against his own amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, I rise in wholehearted support of the amendment to H.R. 11280 being offered by our distinguished colleague, Mr. HANLEY and in opposition to the Bonior amendment. For years, this Nation has recognized its commitment, a lifelong commitment, to our veterans.

Due to the nature of military service, careers and educational plans are disturbed. These disruptions put veterans at a disadvantage when they return to civilian life and begin to look for meaningful employment. To compensate, the VA has solicited American businessmen to "hire the vet." Employment counseling services are provided to veterans before and after their separation from active duty.

For its part, the Federal Government has given preference to veterans in securing employment. However, no preference has ever been given to veterans of a particular war over other veterans. The committee's bill is designed to "provide greater employment opportunities to Vietnam-era veterans and to encourage the recruitment and retention of qualified applicants, particularly women and minority applicants." This is to be accomplished by eliminating veterans' preference after 15 years for nondisabled veterans. Further bonus points could only be used once within that 15-year period.

The Vietnam veteran is a different type of veteran.

First, they served in a very unpopular war, and moreover, it should be remembered that a great percentage of Vietnam veterans are minorities. One of the arguments against the draft was that it unfairly selected minorities to serve. I believe that veterans' preference, in fact, will do more in the future to assist minorities in obtaining meaningful jobs in the Federal Government than any other group. We have numerous programs already designed to insure equal employment opportunities for minorities and women in the Federal Government. This is not to say that we do not need to do more to assist these groups; however, eliminating the veterans' preference is not the answer.

Our Nation's veterans need our support now more than ever, particularly the Vietnam veteran who served his country well only to return in many instances to an ungrateful Nation. Because of the difficulty many veterans experienced upon their return home, it seems to me to be unconscionable that we now arbitrarily cut them off 15 years after their separation from service. By 1980 alone, nearly 500,000 Vietnam-era veterans will lose their eligibility rights; and in the next 7 years, over 6 million veterans will lose these rights.

If we are to alter these regulations, we must do so prospectively, not retroactively. It is totally unfair to tell those who served "Sorry, but we are changing the rules on you in the middle of the game." It is totally unfair for our Nation—this Congress—to act in such a capricious, arbitrary manner, and I cannot emphasize to my colleagues too strongly that we must not permit this erosion to begin.

A vote for the Hanley amendment is a simple way for the Congress to say thank you to our Nation's veterans, and to retain veterans' preference as we have known it—and as those who served their country in its time of need thought was the case. This is not a pro-Vietnam veterans' bill as has been suggested. This is a well-disguised, antiveterans program. I urge adoption of this amendment.

AMENDMENT OFFERED BY MR. SKUBITZ AS A SUBSTITUTE FOR THE PERFECTING AMENDMENT OFFERED BY MR. BONIOR

Mr. SKUBITZ. Mr. Chairman, I offer an amendment as a substitute for the perfecting amendment.

The Clerk read as follows:

Amendment offered by Mr. SKUBITZ as a substitute for the perfecting amendment offered by Mr. BONIOR: In lieu of the language of the Bonior amendment insert the following: Page 192, after "(A)" insert "(1)".

Page 192, line 17, after "armed forces, or" insert "(ii) if later, December 31, 1985, but only if the individual's service in the armed forces on or after June 25, 1950, is the basis for awarding the Vietnam Service Medal, the Armed Forces Expeditionary Medal for Vietnam or the Korean Theater Service Ribbon."

Mr. SKUBITZ. Mr. Chairman, the amendment I offer does no violence to the Bonior amendment.

What I am proposing to do is to expand the Bonior amendment so that Korean war veterans who served in that theater of war will be given the same protective rights which we give to Vietnam soldiers who served in a theater of war.

All my amendment does is to give to the Korean war veterans the same rights and privileges so far as eligibility is concerned as we give to the Vietnam war veterans.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. SKUBITZ. I yield to the gentleman from New York.

Mr. HANLEY. Mr. Chairman, may I say to the gentleman from Kansas that the effect of his amendment actually is already in place in my amendment. My amendment would include, as present law does, those who served in Korea.

Mr. SKUBITZ. Mr. Chairman, I would like to reclaim my time.

Let me say to my colleague the gentleman from New York is only partly correct. The gentleman's amendment goes further and maintains everything in its present place. My amendment only applies to Korean veterans and Vietnam veterans who served in theaters of war. His amendment maintains the status quo.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana (Mr. CORNWELL).

Mr. CORNWELL. Mr. Chairman, being one of three Vietnam combat veterans in the House of Representatives and in the Senate, in Congress as a whole, I have to take issue with the statement which was just made regarding the Vietnam veteran, saying that the Vietnam veteran is different. I do not think that we are any different than any other veteran who ever fought a war for this country for the purposes of liberty and freedom. We have probably had as many legs blown off, as many wounds, as many traumas as were suffered by any other veteran in any other war. I do not think we are different because it was an unpopular war. I think we are different because we are younger and we do demand and do deserve a preference here as regards jobs in the public sector. Facts and statistics aforementioned prove this overwhelmingly.

I think we need to focus attention on those veterans who need it the most and who deserve it the most at this time.

(By unanimous consent, Mr. CORNWELL yielded the balance of his time to Mr. BONIOR.)

The CHAIRMAN. The Chair recognizes the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Chairman, the Schroeder amendment which was adopted by the House Committee on Post Office and Civil Service was a compromise to the administration's original proposal on veterans' preference.

Outwardly, veterans' preference seems absolute. It gives an impression that nonveterans stand little if any chance in gaining Federal employment when competing with veterans. No doubt this is why the supporters of modifications suggested veterans' preference be diluted. The administration has charged that its

application adversely affects the employment opportunities of women and minorities.

The so-called Schroeder amendment would limit veterans' preference to a "one-shot" use within 15 years after discharge from military service. If we allow this legislation to become law, 21 million World War II and Korean war veterans would immediately lose all employment preference rights when the law went into effect in October 1980. What really concerns me, however, is 5 million of the 8.5 million Vietnam-era veterans would have zero to 5 years of employment preference remaining—not 15 years. Only those who entered military service before the termination of veterans' preference on October 15, 1976, and left the service after October 1980, would receive the full 15 years of employment preference.

The legislation would also limit veterans' "reductions-in-force" benefits to 8 years following initial appointment to Federal service. That means that all veterans who had been employed by the Government for 8 years or more—including the Vietnam-era veterans who entered Federal service between August 5, 1964, to October 1972—would immediately lose their "RIF" protection when the law became effective in October 1980.

Veterans' preference, currently in effect, was based upon recognition of the fact that millions of young men and women had been called upon to give up their usual occupations, often at great economic sacrifices and many had been exposed to personal danger and hardships. It was felt that readjustment to civilian life would be difficult for many, that those who remained at home would acquire a tremendous headstart financially over the serviceman and that, therefore, some assistance should be given to the veterans in readjusting and retaining lost ground.

Unemployment, as well as competing for and holding jobs, is still uppermost in the minds of many. According to a recent Harris study, unemployment and the lack of jobs is listed as the greatest problem facing returning Vietnam veterans. It is, therefore, inconceivable that this body would even contemplate reducing any aspect of veterans' preference.

I recognize the unemployment needs, including promotion and upward mobility of women and minorities but veterans are finding themselves a minority.

I cannot help but believe that my colleagues continue to feel as I do, that our veterans are in fact special and deserve more than a little consideration. Veterans' preference is a longstanding legitimate expression of public policy that has been folded into the overall merit system framework. I feel the present laws are achieving their intended effect of giving an advantage to veterans while preserving the essential elements of competition. Because of their service and the sacrifices so many of our veterans were called upon to make, I urge my colleagues to support the Hanley amendment.

The CHAIRMAN. The Chair recognizes the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise in opposition to the Hanley amendment regrettably and enthusiastically rise in support of the Bonior amendment. The United States must continue to be a grateful nation to those of who fought and defended us in World War II, that created the Korean and the Vietnam conflicts.

However, we must meet the needs of those veterans according to the point of life in which they now find themselves.

I feel the Bonior amendment perfects the administration bill by extending both time and opportunities for the Vietnam veteran where time is running out. But for the World War II veteran, who is 58 years old, giving him 5 points in his old age is not the way to help him. That veteran is concerned about other needs, it is the need for retirement security, and he is particularly afraid that a catastrophic illness will wipe him out. I propose that instead of keeping the 5-point preference when he does not need it, that, to show our gratitude, on developing a comprehensive health care program for veterans that, No. 1, would care for them in terms of catastrophic illness and, No. 2, would provide for long-term care, where perhaps we could take unused nursing home beds in veterans' hospitals, where they could be cared for with respect and dignity along with their comrades.

Mr. Chairman, as we consider the Hanley amendment to the civil service reform legislation, my colleagues and I are faced with a very difficult decision. I, for several reasons which I will enumerate, cannot support this amendment.

The United States is a grateful nation for the gallant efforts made by the veterans who defended our cause abroad during World War I, World War II, the Korean war, and the Vietnam conflict. But the United States had made commitments to two constituencies and neither one can be overlooked.

When the veterans returned from war, we made a commitment then to help them readjust to the new lives to which they were returning by offering them the GI bill and veterans' preference, besides other benefits. Now we have reached a new phase, and these veterans are concerned with different priorities. Yet at the same time, we made a promise to nonveterans, many of whom supported the war effort, that they would have equal access to jobs within the Government, and that through the merit of their work, they would be upwardly mobile within the ranks of the civil service. Now these groups are converging and we must resolve their problems.

We need to look more closely at the real problems facing the veteran today. After meeting with several veterans' groups, I have found, as I suspected, that the real concerns of the veteran is planning for the future to make sure that he will be able to continue to take care of his family if he becomes ill. He no longer needs to worry about financing his own education or finding a job after finishing school or just finding a first job after being released from the service. The World War II veteran, whose average age is 58, must make provisions for his future well-being, as well as that of his family. For that reason, I have introduced House Joint Resolution 1113 which requires the Veterans' Administration to develop a comprehensive plan to provide health and social services to the ever-increasing number of senior veterans. Such a plan would include providing retirement counseling and planning services for senior veterans; converting unused acute-care hospital facilities under the jurisdiction of the Administrator to long-term care facilities; expanding the number of hospital-based home care units; expanding and improving long-term care and catastrophic health care programs; establishing new facilities to provide daytime care (in lieu of nursing home care) for senior veterans who are able to live with their families; establishing hospice programs for terminally ill senior veterans; and extending health care services to surviving spouses of veterans.

My colleague, Representative HECKLER, has also introduced legislation, the Veterans' Geriatric and Gerontological Health Services Expansion Act, which is also aimed at the real problem that face the veteran.

Today, when we vote on the Hanley amendment, we have to keep in mind the new needs and the new phase of care required by the veteran. We have a new commitment to the veterans which we must meet and extending veterans' preference as it now exists is not the way.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. Mr. Chairman and members of the committee, we were asked during this debate, and in Dear Colleague letters previous to this debate, to consider what veterans' preference needed to be changed in order to be fair to minorities and women. I and many other Members have taken that challenge into consideration. I have come down on the side of voting in favor of the Hanley amendment and leaving veterans' preference basically as it is for the simple reason that without the sacrifice of a veteran, most of us in this country would not have the freedoms that we have now. The great advancement in the opportunities for women and minorities in the last 50 years in this country has come about only because of the environment of freedom that has been preserved in this country by the sacrifice of our veterans in combat, and this is no time to take away the rewards that we have given and that we owe for that service to our country that has made possible the preservation of freedom for all. Because of this sacrifice I stand in support of the Hanley amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, I rise in support of the Hanley

amendment and in opposition to the amendment of our colleague, the gentleman from Michigan (Mr. BONIOR).

Mr. Chairman, there is just something wrong, in my opinion, with the idea of placing restrictions on the number of times that a veteran might use his preference, or place a limitation on the time that that preference is available. There have been many other arguments made on many other good points, but let me speak on just these two.

All of us, of course, know that in any of our wars there has been no practical restriction on the number of times that many veterans were called on to go into battle day after day after day, and I just do not think there should be any restriction placed on the amount of times that that eligibility should be available to him once he gets back into the civilian job market.

On the limitation of time, every one of us knows personally and knows of many more veterans who have come home from the wars missing an arm or missing a leg.

Mr. Chairman, I submit that that arm or that leg is gone forever, not 8 or 15 years, but it is gone forever. We know of those who came home physically but left their mental abilities and sanity in a foxhole someplace forever.

Mr. Chairman, to provide for those who did fight and for those who were standing by ready to fight is in keeping with the commitment of our country as expressed by President Lincoln, "To care for him who shall have bourne the battle—"

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. ROBERTS yielded his time to Mr. HANLEY.)

The CHAIRMAN. The Chair recognizes the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I rise in support of the Bonior amendment and in referfence to women, I would like to say a word about this subject to the Members of the House. We have in Washington, D.C., in the Civil Service Office, 34 veterans at the top of the register. The only nonveteran woman, an applicant with a score of 100, is 35th on that list. Now, that really ought to tell us something about what is happening to women. I do not think women are necessarily the most important part of the whole population, but we certainly should do a little better than that.

Of all the positions at the 16 to 18 levels of civil service, women hold less than 3 percent. Below that, in grades 13 to 15, the proportion is only 6 percent. They are the clerks. Thev are the typists. They are down at the lower levels where men do not want to be. This is what is happening to women in the United States of America.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Chairman, I rise in support of the Bonior amendment and in opposition to the Hanley amendment.

Mr. Chairman, I speak as a veteran of the Korean war. I want the RECORD to note that I was among those who was in Korea with a regimental combat team. When I was discharged from the service I was able to take advantage of the opportunities afforded me by the GI bill. I think many veterans similarly took advantage of these many benefits offered them simply because they were veterans.

I do not believe I have a lifetime franchise on all of these special provisions. Especially as regards a preference for employment in the Federal Government, I believe the time under which a veteran can exercise that option should be limited. There is a very good and sensible reason for limiting this preference. And that is so that the younger veterans can now reap the benefits we all have been able to take advantage of.

The veterans of the Vietnam war are the ones who suffered most from fighting a war that was unpopular. And I think that most of those who fought there came out of urban America. Those are the ones who need our help and those are the ones I want to help. That is why I support the Bonior amendment and oppose the Hanley amendment.

As a leader in the Hispanic community, I can truly say that I am not expressing an isolated point of view. I want you all to know, as you consider this progressive section of the bill, that it is supported by the American GI Forum—one of the country's largest veterans' organizations; by the Mexican-American Legal Defense Fund, the Puerto Rican Legal Defense Fund, the National Conference of Puerto Rican Women, the National Conference of Cuban-American Women, the League of United Latin American Citizens, the National Council of LaRaza and by Image—which is the Hispanic Federal employees' national organization.

I urge you to share their view that altering veterans' preference via this Civil Service Reform Act will benefit future generations of veterans and civil servants.

The CHAIRMAN. The Chair recognizes the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I rise in support of the Bonior amendment and against the Hanley amendment.

I just want to point out that I honestly think if we could do this vote by secret ballot, it would pass by a very heavy margin. Why? Because everybody talks about wanting to have the veterans all get a crack at the jobs, but nobody is for increasing the Federal service so they will all have that crack. Probably there will not be more than 150,000 new jobs in the Federal service next year for veterans, 150,000.

If we go with the Hanley amendment, it will leave 28 million potential people bidding for those jobs. If we go with the Bonior amendment, it gets us closer to 8 million people competing for those jobs. They all happen to be Vietnam-era people and they will have a much greater chance.

If we look at the Federal service, 48 percent of the people in the Federal service are veterans and only 9 percent of those are from the Vietnam era. That is basically because other veterans can come in with a higher standing, a higher educational background and more experience, and when they are bidding veteran versus veteran the other veterans tend to come out on top.

(By unanimous consent, Mr. WHITE yielded his time to Mr. HANLEY).

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Chairman, I rise in support of the Hanley amendment and in opposition to the Bonior amendment.

One last point that I wish to make concerns a statement made earlier by the gentlewoman from Colorado on veterans' preference. Conceding the gentlewoman's assertion that 23 percent of the veterans utilize veterans' preference to transfer into other job series, it is unlikely that veterans would exercise veterans' preference to transfer into another job series for the purpose of taking a downgrade.

It would be more likely that a switch into another job series would be for an advancement in grade or responsibility. Further, if most of our veterans are in upper echelons of management, then a switch into another job series would be for a job in the upper echelon of management, and not entry-level positions that veterans and nonveterans are competing for, which is the troubled area we are trying to correct by this legislation.

Accordingly, Mr. Chairman, I urge support for the amendment.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I think the gentleman has just proven my point. By just bidding into a higher level job, they have preempted other people from being qualified for that job. That is basically my point, and I think about those 23 percent.

Mr. GILMAN. The gentlelady misunderstands the point I am trying to make. Vietnam-era veterans, for the most part, are just beginning to apply for entry-level positions or are in the lower grades, years away from eligibility for upper echelon positions.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR. Mr. Chairman, in the short time I have been in Congress I have seen much legislation dealing with veterans coming before Congress, most of it on suspension. In fact, practically all of it has been under suspension. Most of it is geared toward those people who fought in earlier wars.

The pension bill that we pass is going to cost close to $700 million in the first year. Yet we have out in America, as I indicated earlier, 855,000 Vietnam-era veterans suffering from underemployment, earning $4,000 a year, or making less than $7,000. I think there are 3 million people making less than $9,000. All we are asking for is a bill for these people.

It has been argued time and again on the floor that these people are going to phase themselves out, those who are veterans of World War II and Korea. Why not, then, give the preference to those people who need it the most now, the Vietnam veterans? No one is going to need it to that extent when they are 39, 40, or 42. The readjustment problems of these people are occurring now. Their career problems are occurring now.

Mr. Chairman, I hope the Members of the Congress and of this committee will look with some compassion on this issue. These people fought bravely in that war, as they did in other wars, and the traditional benefits for veterans should be extended to Vietnam-era veterans in this country. They should be considered in this bill.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Chairman, I rise in support of the Bonior amendment, and I am opposed to the Hanley amendment.

We ought to recognize that no one is arguing today against the concept of veterans' preference. It is a good concept, it is a sound concept. The gentleman from Michigan (DAVE BONIOR) supports it, I support it, and the gentleman from New York (JIM HANLEY) supports it. The question is: What kind of veterans' preference are we going to have?

We say it ought to be focused on those areas involving the disabled veterans, and the Bonior amendment enlarges the protection for the disabled veterans. Indeed it doubles the number of disabled veterans who receive benefits.

We also say that it ought to be focused on the Vietnam-era veterans.

Let me tell the Members a few war stories. Let me give an example of why the present system is not working. More than 30 years ago I served in World War II for 4 years. I was on the U.S. side, in case there is any doubt among my detractors. I never heard a shot fired. Most of my time was spent pounding typewriters and performing other vital services in time of war.

I arrived on Iwo Jima on D-Day plus 100 with some baseball equipment and a piano to entertain troops who had been involved in the invasion.

Under the persent law, a young person, a widow 29 years old who lost her husband and has children may be applying for a Federal job, and let us say I apply for that Federal job. I get absolute preference.

The Government gave me an education. I got my law degree under the GI bill, and the Government helped me buy my first house. My first house was bought under Government insurance, and the Government helped me with my first law office. I do not need the help now, it is the young people who need this help.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, historically there has been veterans' preference of some sort since the founding of our Nation but in a more structured form since 1865 and finally, as we know it today, resulting from the enactment of the Veterans' Preference Act of 1944.

Veterans' preference has come under increasing attack from various quarters. It has been stated that veterans' preference is discriminatory. Veterans' preference, if one must call it discriminatory, does discriminate against those who remained civilian and got their preference by attaining an early education and establishing themselves in the job market while their contemporaries answered their country's call and shouldered arms.

It has been traditional philosophy in this country that, "those who were preferred to serve their Nation in the Armed Forces in time of war should be preferred to serve their Nation in a civilian capacity when qualified."

Removal of this veterans' preference is a matter that goes beyond any question of "flexibility," greater employment of other groups, or like concerns. It is really a question of whether this is a country that feels free, in time of national emergency, to call upon its very best to serve in its Armed Forces and face death, injury, disruption of normal life, and all the other conditions of that service. Then for the country to discard them as veterans, to announce they must compete "as equals against all nonveterans, except for such nonveterans as may be given preference in recruiting, examination and selection.

Right now we have no need for an emergency armed service, but if the need arises, the response will be forthcoming. However, the law should be there, needing only a slight amendment on qualifying dates of service, to acknowledge that the Nation that calls for sacrifice will also hire its veterans when qualified.

Supporters have waged an extensive campaign for the modification of veterans preference.

I have every reason to believe that with the enactment of this title, veterans will not only lose their preference benefits but will be subjected to discrimination in hiring, reduction in force, promotions, and assignment to and retention in the Senior Executive Service which will encompass upper level officials. I urge my colleagues to support the amendment to restore veterans' preference which this body has historically extended to those men and women who have served our Nation in the Armed Forces.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. HANLEY).

Mr. HANLEY. Mr. Chairman, the issue at stake here this afternoon is the integrity of the U.S. Government. Traditionally, we have heard the phrase "the full faith and credit of the U.S. Government." And during our periods of hostility, we said to a certain category of American citizens, the person who served in the military establishment, "My friend, once you go back to civilian life, here are the benefits that have accrued to you."

Mr. Chairman, for the life of me I cannot conceive of the attitude of this administration in wanting to renege on that commitment we made traditionally. It is wrong. It is improper. It is unjust.

When we talk about the Vietnam veterans, that is what it is all about. And as I have said time after time during the course of this debate this afternoon, the good majority of the Vietnam veterans, as represented by virtually all of the organizations, sustain this position, and that is to preserve this law.

Mr. Chairman, there is another ramification associated, too, with this. We know that all of the State governments have a tendency to follow suit, once the Federal Government acts. So what you would be doing is that you would be putting the veterans' community on the threshold of total erosion of benefits throughout the 50 States of this Union.

I do not believe that the majority in the House of Representatives wants to do that.

So, despite all that has been said about the effect of this amendment on the Vietnam veteran, there is only one good effect, and that is the provisions of my amendment which preserves veterans' preference, as our Nation committed itself to do to all of the men and women who served.

Reference was made to the person who was 58 years old. Generally speaking, my contemporaries are not in the job market. It has little effect on us. For that matter, it does not have that much effect on the Korean veteran. But it does have a major effect on the Vietnam veteran. And if ever there was a less than glorious war in the history of this Nation, it was Vietnam, and if ever a set of veterans got shortchanged, it was the Vietnam veterans. Some in this Chamber would move in the direction of further shortchanging them.

Someone has said that minorities and women suffer by virtue of the veterans' preference. Let me allude, if I might, for a minute, to the matter of women. I quote Chairman Campbell, commenting on the GAO study of selecting and hiring registers. He said:

> The most surprising thing is that the pattern of effects is not consistent across all examinations. In some cases, women obtain little or no advantages by eliminating veterans' preference. Eliminating some or all veterans' preference or advantages will not have a systematic favorable impact on women.

That is the Chairman of the Civil Service Commission. They are not my words. They are his words. So, hopefully, those words can put to rest the apprehension or the concern of those who feel that, by taking this right away from the veteran, you are going to expand upon employment for women and minorities.

That is not at all the case. I implore you, my friends, to vote down the Bonior amendment, to vote down the Skubitz amendment, and vote for the Hanley amendment.

I think that President Franklin Delano Roosevelt best explained the rationale for veterans preference when he stated:

I believe that the Federal Government, functioning in its capacity as an employer, should take the lead in assuring those who are in the armed forces that when they return special consideration will be given them in their efforts to obtain employment. It is absolutely impossible to take millions of young men out of their normal pursuits for the purpose of fighting to preserve the Nation, and then expect them to resume their normal activities without having any special consideration shown them.

● Mr. MONTGOMERY. Mr. Chairman, I rise in support of the Hanley amendment which would have the effect of retaining veteran's preference as it is in current law. I feel very strongly that we should not change the present rules of giving a five point preference to those men and women who have served our Nation so nobly as members of the Armed Forces.

If we accept this section of the bill as reported, we would be breaking an implied contract with our former servicemen and servicewomen and changing the rules for no reasonable purpose. Veterans preference was intended as a lifetime reward for those who served in the defense of their country.

It should be noted that the current veterans preference law does not apply to able-bodied veterans who entered the peacetime service after October 14, 1976. We are mainly talking about veterans of World War II and Korea, who are fast approaching retirement age anyway. What I fear is that the changes in the veterans preference as reported by committee will be harmful to our Vietnam-era veterans.

Mr. Chairman, according to recent studies I have seen, the facts do not show that veterans are disproportionately represented in the civil service.

I hope my colleagues will give their strong support to the Hanley amendment and vote against the Bonior and Skubitz amendments.●

● Mr. WOLFF. Mr. Chairman, I rise in support of the amendment offered by the distinguished gentleman from New York, which would amend the veterans' provisions of H.R. 11280, the civil service reform bill.

I would like to take this opportunity to congratulate my distinguished colleague (Mr. HANLEY) for the leadership he has shown in preserving the preference eligibility rights of all of America's veterans in Federal employment.

It is quite obvious that the veterans' preference modification proposals contained in H.R. 11280, as amended by the Schroeder amendment in Committee, will deny veterans' preference to millions of deserving Vietnam-era veterans. Why, in 1985 alone over 1 million Vietnam-era veterans will lose their preference eligibility. Mr. Chairman, these veterans were asked for an unlimited commitment by this Nation in its time of need. Simple justice requires in return that in their time of need these veterans be given a special degree of consideration which reflects the unlimited gratitude of an appreciative nation.

I, therefore, believe that the Vietnam-era veteran deserves far better than the proposed veterans' provisions of H.R. 11280, which would stigmatize Vietnam-era veterans as a disfavored class among the past defenders of this Nation. Equal benefits for equal service, in my mind, applies to the veterans of any war. This is not the time to change a principle when it would adversely affect so many young Vietnam-era veterans. Congress is not the place for this trampling of rights and expectations to occur.

Mr. Chairman, I strongly urge my colleagues to reject the undermining of the preference eligibility rights of America's veterans in Federal employment. I strongly urge rejection of the Schroeder amendment provisions of H.R. 11280, and support the Hanley amendment.●

● Mr. CORCORAN of Illinois. Mr. Chairman, I would like to urge my colleagues to support the compromise provision that was reported out of the Committee on Post Office and Civil Service. I refer to the compromise provision because this is emphatically not the original Carter proposal, which, rather than restructuring and reshaping benefits, blindly eliminated them. Moreover, this compromise does not irresponsibly abolish veterans' benefits. It is not an anti-veterans' compromise. Rather, it addresses a matter of philosophy. Is veterans' preference a matter of a lifelong right to preferential treatment as part of the veterans' payment for a job well done, or is it a more limited mechanism for easing the transition from military to civilian life?

I believe that veterans' preference should provide a source of support in the process of exchanging a uniform worn with pride for a shirt and tie. It should compensate our honored veterans for time spent in the service of our great country, but it should not act as a barrier to equal protection for our younger veterans, who not only served our country, but suffered because their war was unpopular at home. They did not return to our shores to cheers and ticker-tape parades. They returned to silent eyes and turned backs.

Contrary to the rampant spread of misinformation, this bill most assuredly does not make life more difficult for Vietnam-era veterans. After the first 2 years following enactment of H.R. 11280, during which all veterans would have an opportunity to apply for a civil service position, only veterans who have been discharged within 15 years would be eligible for veterans' preference. When combined with an amendment that my colleague from Michigan (Mr. BONIOR) will be introducing, this 15 years is sufficient to give all Vietnam veterans an opportunity to apply for and obtain a position with the benefit of preference points and without competition from older, more experienced veterans who also have preference points and are, therefore, so often more qualified. This can only limit the competition which would otherwise be experienced * * * that is, a preference would be provided for all Vietnam-era veterans.

The compromise would also limit absolute preference during reductions in force to 8 years, but surely 8 years is sufficient time to learn a job and, therefore, to equip a veteran to compete without the advantage of preference points. This is particularly true when coupled with the fact that in addition to all the time actually spent in the civil service, all the time spent in the military is included in seniority calculations for veterans in the Federal civil service.

This compromise definitely improves the situation for disabled veterans. It more than doubles the number of disabled veterans eligible for noncompetitive appointment by lowering the requirement from a 50-percent disability to a 30-percent disability. This is an increase in eligibility from 494,000 to 996,000 disabled veterans who are not required to compete for job appointments.

This is not an antiveterans bill. I would not support an antiveterans proposal. I am, myself, a veteran, having served in Germany with the U.S. Army in the midsixties. In fact, I am a member of my local American Legion post back home. And I have always strongly supported veterans' rights and benefits. I supported the veterans on all the issues brought before the House of Representatives in 1977. Mr. Chairman, you will recall that the measures which I was pleased to support included:

Legislation to provide veterans with automobile assistance allowance and adaptive equipment;

Legislation to increase service-connected compensation for veteran's loss of use of paired extremities;

GI Bill Improvement Act of 1977;

State grants for home facilities for veterans;

Retired serviceman's family protection plan and the survivor benefit plan;

Veterans' Administration Medical Facilities Acquisition Act of 1977;

Veterans' Administration Physicians and Dentists Comparability Act extension;

Veterans and Survivors Pension Adjustment Act of 1977;

Veterans' Disability Compensation and Survivors Benefits Act of 1977; and

The Beard amendment to the HUD appropriations bill eliminating benefits for veterans whose discharges were upgraded under the Carter amnesty plan.

And, Mr. Chairman, during 1978, I was with the veterans again in supporting the following measures:

Legislation providing burial expenses (in allowances to States) for veterans;

Legislation increasing the pension for veterans who are recipients of the Congressional Medal of Honor;

Veterans' Disability Compensation and Survivors Benefits Act of 1978;

Legislation extending hospital care in States, territories, and possessions outside the continental United States for veterans;

Veterans' Housing Improvement Act of 1978;

Legislation increasing benefits for permanently disabled veterans' survivors and increasing compensation for veterans rated at 40-percent disabled;

Roberts amendment to the first budget resolution increasing veterans' programs by nearly $1 billion;

Veterans' and Suvivors' Pension Im-

provement Act of 1978; and I cosponsored the Anderson of California bill to increase benefits for World War I veterans.

I support this legislation before us now because it restructures benefits to reach those who need them most, and, surely, the people who need our help most are the Vietnam-era veterans and the disabled veterans. I believe that it is to them that we should offer this preference. In addition, I think it is time to recognize that our aim is to help veterans through the transition to civilian employment, not to offer them a lifetime guarantee of job security far above and beyond that offered to other civil servants in this day and age.

You are all being asked to make a difficult choice today, but I would ask you to consider the question that I asked myself during our committee deliberations: "Who needs our help most now, in 1978?" It should be apparent that the older, more experienced nondisabled veteran is not as desperately in need of help in making up for losses suffered, as is a Vietnam veteran or a disabled veteran.

Therefore, I urge my colleagues to defeat the Hanley amendment and support the committee provision in the bill on veterans preference.●

● Mr. TEAGUE. Mr. Chairman, I rise in support of the Hanley amendment. To limit veterans preference will be a gross violation of the long-held principle that veterans of all wars should have equal benefits for equal service. The amended provision on veterans preference will do a great disservice to the Vietnam veterans. The argument that by taking away veterans preference we will help Vietnam-era veterans, is a lot of hogwash. There is no supporting data, that I can find, which shows that Vietnam veterans whose average age is 30, are competing for jobs with World War II veterans, whose average is 60, and Korean veterans, whose average age is 50. There is no evidence that veterans use their preference over and over again. On the other hand, there is evidence that veterans preference is doing well for the minority veteran, who comprise 19 percent of the veteran work force, as opposed to only 8 percent of the general veteran population.

The facts do not bear out that women are being hurt by the Veterans Preference Act. Last year new hires show that 213,000 females were hired in civil service jobs as opposed to 163,000 veterans.

All veterans must obtain a passing grade before the five-point add on. There is nothing mandatory about hiring a veteran. The law provides an appointing officer may pass over a veteran to hire a nonveteran. This was done many times during the past year. There is simply no truth to the allegation being peddled by the administration and others, that the Veterans Preference Act is serving to load up our civil service jobs with less than qualified applicants.

All veterans organizations favor the Hanley amendment. Including the National Association of Concerned Veterans, which speaks exclusively for Vietnam-era veterans.

There is no bona fide national veterans organization, that I know of, that favors the Schroeder amendment in the bill.

Why does the Federal Government want to eliminate five-point preference for persons who served in the Armed Forces in the Vietnam war, and at the same time make eligible for a noncompetitive appointment in the Federal civil service, by Presidential Executive Order, persons who served as volunteers in the Peace Corps, Vista, and ACTION programs.

I see nothing wrong with giving a veteran who served in Vietnam an extra five-point preference when such veteran is seeking employment in the Federal Government. Our veterans gave everything they had for their country, and deserve in return everything a grateful Nation can possibly afford. We gave veterans of previous wars five-point and lifetime retention preference, and I see nothing wrong with keeping it for Vietnam veterans.

I strongly urge that the Hanley amendment will be approved.●

The CHAIRMAN. The hour of 5 o'clock has arrived.

The question is on the amendment offered by the gentleman from Kansas (Mr. SKUBITZ) as a substitute for the perfecting amendment offered by the gentleman from Michigan (Mr. BONIOR).

The amendment offered as a substitute for the perfecting amendment was rejected.

The CHAIRMAN. The question is on the perfecting amendment offered by the gentleman from Michigan (Mr. BONIOR).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BONIOR. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 149, noes 222, not voting 61, as follows:

| | | Zeferetti |

The Clerk announced the following pairs:

On this vote:

Mr. Fary for, with Mr. Richmond against.

Mr. Breaux for, with Mrs. Chisholm against.

Mr. Zeferetti for, with Mrs. Burke of California against.

Mr. Ammerman for, with Mr. Eckhardt against.

Mr. Chappell for, with Mr. Corcoran of Illinois against.

Mr. Stratton for, with Mr. Diggs against.

Mr. St Germain for, with Mr. Miller of California against.

Mr. Krueger for, with Mr. Flood against.

Mrs. BOGGS changed her vote from "no" to "aye."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

AMENDMENTS OFFERED BY MRS. SPELLMAN

Mrs. SPELLMAN. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mrs. SPELLMAN: Page 208, line 4, after "recruited" insert "(including from within the civil service)".

Page 208, after line 12, insert the following new subsection:

"(d)(1) The regulation under subsection (c) of this section shall provide that in filling any position in an Executive agency for which a recruitment program under subsection (c) is being conducted by that agency for women, to the maximum extent practicable, an individual not entitled to status as a preference eligible under section 2108 (3)(A) or (C) for purposes of preference in consideration for appointment shall be entitled, with respect to consideration for appointment to that position, to the preference available to an individual having the status of a preference eligible under section 2108 (3)(A) if the individual—

"(A) is a woman; and

"(B) has completed, in the aggregate, at least 5 years of civilian service.

"(2) Such regulation shall provide, to the maximum extent practicable, that no individual shall be excluded from consideration for appointment by reason of the application of this subsection."

Page 208, line 13, strike out "(d)" and insert in lieu thereof "(e)".

Page 208, line 26, strike out "(e)" and insert in lieu thereof "(f)".

Mrs. SPELLMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

Mrs. SPELLMAN. Mr. Chairman, I rise to offer an amendment to section 212 of title III of the bill. Section 212 is entitled, "Minority Recruitment." I am very much in favor of that section, but I would like to broaden it.

What I am seeking here today is not to add a new class of people who are going to be given special treatment. I seek nothing special for women in general.

But we have a very unique situation in the Federal Government today which is triggered by affirmative action programs. We are happy to have affirmative action programs; had there not been affirmative action programs I know that a great many Members who voted for the Hanley amendment would have voted against it. Had they felt that they were hurting women, they would not have voted in favor of the Hanley amendment. So we do acknowledge the fact that even right within this bill there are affirmative action provisions to enable the hiring of women.

But, we have a very unique and a very unfair situation which is developing. As we reach out to bring women into the Federal Government where the agencies specifically seek women, we are finding that women are being brought in from the outside over the women who for years have served in the Civil Service.

And the women in the system are helpless. Here we have women who are capable, who only because they were women were held back. We recognize today how wrong that is, but we did not recognize it years ago. I was part of that kind of system and I thought it was all right. I did not know better. Now we know better. Yet we have no way of helping these women, who have trained the men who are today their bosses, to move up to the positions that they are capable of holding.

Instead, every time there is an affirmative action program we are reaching from outside the system and bringing women in over the women who have for years been doing the work. Women outside the system supersede those within the system for placement in upper grade jobs.

There is something very, very wrong with that. I am asking that we give recognition to that unusual situation.

According to the White House over 82 percent of all the women are concentrated in the GS grades 1 through 11 and earn less than $11,000 per year. We know that so many of them are capable of filling top grade positions. We know that many grade 9's, had they been male, would have been 11's or 12's or 15's today.

The Schroeder amendment did not address this problem. The Garcia amendment does not address it either.

So I am offering this today.

How do the veterans' groups feel on this? I would like to call to the attention of the Members the fact that veterans are generous people. They are not opposed. We posed this question to a group of people about to go to a meeting. After they studied the matter, and because of their own knowledge of the situation, this is the telegram I got from the Maryland American Legion. It says:

> On behalf of the 60,000 Legionnaires of Maryland we wish to express our appreciation for the Hanley amendment. We also pledge our support for the Spellman upward mobility amendment designed to help women in government gain better positions.
>
> JAMES R. THOMAS,
> *State Commander.*

This discussion was led by men who themselves had been in the Federal system and who knew that throughout the years there were women who were training men who went on ahead of them.

Let me repeat—we are asking nothing special for women. We are just saying: Let us not pit women against women—let us not forget those who for years have served. We are not creating a new affirmative action program. We are merely providing that when there is an affirmative action program in which women are being sought, that we help those women who are within the system apply and qualify for the jobs that they are capable of handling, instead of bringing new people in above them.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, if I listened correctly to the gentlewoman from Maryland, she in fact by her amendment would pit women against women, because what she provides is for a preference to women who have already had 5 years of civil service. New women applicants or those with less than 5 years would be by this amendment facing greater odds in seeking employment than those who have already the 5-year edge.

I am a firm defender of women's rights. But this amendment would be administratively impossible to handle.

You could not possibly conduct your Federal personnel system when you start to, by the back door, insert provisions presumably to correct, for example, the law that Congress just restated of veterans' preference. So what we would be doing, if we accepted this amendment, would be to completely contradict the two votes we just had.

Further, this amendment was not considered in the committee. We have no idea how in the world it could be administered. So in the usual parlance of committee terminology, we will be pleased to give it priority at the start of the next session. But I do not see how we could possible accept this amendment in this bill not knowing what its effect would be.

Mrs. SPELLMAN. Mr. Chairman, if the gentleman will yield, the amendment calls for regulations to be prepared to carry out the concept being proposed.

There will be regulations and we will have an opportunity to see them. We will have an opportunity to provide oversight over both the regulations and the administration.

Mr. DERWINSKI. But as the gentlewoman from Maryland (Mrs. SPELLMAN) well knows, oversight is a difficult field. Oversight over something we have had no background on or contract with or study about puts us in an impossible situation. I am not speaking just for the committee, but I do not believe that the Civil Service Commission could effectively administer this amendment.

Mrs. SPELLMAN. Will the gentleman yield further?

Mr. DERWINSKI. Yes, of course I yield further.

Mrs. SPELLMAN. Had the gentleman had the opportunity to be with us as we held hearings in five different departments throughout the city and throughout the Government, he would have found that over and over and over again this was one of the complaints that we had on the part of women.

I might say that we have also participated in meetings to discuss the subject and have invited the chairman of the Civil Service Commission to join in meeting with the women affected and to attempt to address the problem. The solution that was offered to the women at the time was, "Well, we will have to start somewhere so we will hire women for the top grades—they will then reach down to help you.

"You will never get anywhere until we put these women up here at the top."

We think that that is blatantly unfair on the face of it and I am sure the gentleman will agree.

Mr. DERWINSKI. But, if you take a good look at the amendment, I emphasize what I told you, this would develop women's preference and would automatically discriminate against all other category areas. As I said, each time you provide a preference for someone obviously this has some negative effect on some other category.

Since we do not have a real record in committee, and I do not believe the committee in the other body touched this subject, either, I think the best course of action would be to keep this bill as uncluttered as possible and give this matter priority when we go back to our work within the committee.

Mrs. SPELLMAN. If the gentleman will yield still further, I wish to remind my colleagues that this amendment addresses itself to only those situations in which affirmative action calls for women. It does not create a new situation, it does not spell out something else that must be done, but it does say when women are being sought for jobs, then it shall apply.

Mrs. SCHROEDER. I move to strike the requisite number of words.

Mr. Chairman, I think one of the things that we women have talked about more or less, and have snickered about has been the "old boys club."

I really object to this amendment because I see it starting an old-girls club.

As I recall the testimony of the women's groups—and I went out to check it with them—the women's groups in essence have been supportive of removing all preference points rather than cluttering the whole thing up with finding all sorts of new systems.

I think that any woman who wishes to compete within the affirmative action program for a higher job is certainly not prohibited from going ahead and filing for that job. She can file for that job at any time or on any day. The fact that she already has a job in the Federal civil service does not preclude her from taking that step. In fact, it probably helps her because she has some kind of background and she has certain experience. She already has several different ways in which she can move forward in that endeavor.

Therefore, Mr. Chairman, I really urge the Members to turn this amendment down. I think this is a dangerous prece-

dent. I can understand the politics of it in that what we could do is to give everyone points. We could give veterans points; we could give points to people who were in the war on poverty; we could give blacks preference; we could give Chicanos preference; we could give young people and old people preference. We could just nullify everything.

We could all run home and tell everybody, "Do you see what we did? We gave you all the goodies." We would not be telling them that we gave them to everyone else, too.

Really, this amendment would be counter productive. I think it goes against the thrust of what women's groups have been trying to do in the Federal service. They want merit promotions based on merit, on background, and on educational ability. They want, based on their own ability, to move forward. They do not want to be given five points just because they are women and they have been around a long time.

Mrs. FENWICK. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I would like to associate myself with the remarks of my colleague, the gentlewoman from Colorado (Mrs. SCHROEDER).

I would only like to point out that we have forgotten the Aleuts who are also a group which may be applying for a special preference if we continue with amendments like this one.

Mrs. SPELLMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentlewoman from Maryland.

Mrs. SPELLMAN. Mr. Chairman, would the gentlewoman from Colorado tell us how we can move? Will she tell us how women who are in grade 9 and have been kept in grade 9 because only men were allowed to move into grade 10, 11, and 12, can move forward when they are applying for jobs and are being told, "We cannot move you a couple of grades"?

I might point out that the Civil Service Commission has had a little difficulty in answering that question. Has the gentlewoman given that any thought?

Mrs. SCHROEDER. I think we can allow them to bid on that job and prove they have background and the qualifications, and that we can do testing as we have always done. We do it on the basis of merit. However, to give them points because they have been in the Federal service and someone else has not is something which I do not think we want to do. I think we want to do it on the basis of whether they can or cannot do that GS–11, GS–12, or GS–13 job.

I think women want that, too, not just because we were here and staked it out. The points do not measure whether or not that woman in a GS–9 or a GS–10 job truly is qualified for the higher job. As a matter of fact, if we argue that they were flatly discriminated against with respect to getting the higher jobs, I think there have been blacks also who have been discriminated against, and Chicanos. Many of them in my area have not been able to move up at all; but to just flatly assign all of them points, too, say, double-bid so that they can go up several steps on the ladder without doing the testing violates the whole notion of merit, and what we are trying to do in the area of Civil Service reform.

Mrs. SPELLMAN. If the gentlewoman will yield further, of course, the point is that they would be taking a test, they would be qualified. They would have to be qualified. However, because they have been held down, they are in a position where they cannot jump these additional grades; and that is what we have to address ourselves to.

Mrs. SCHROEDER. However, they could go out and rebid on the register, and someone would look at the points on the test and the experience in the job. I think that is what should be measured. We do not give them extra points for that.

I think all of us have felt discriminated against at times, whether we are male, female, or what have you; but at some point we are going to end up with white males staging a revolt if we go too far on this sort of amendment.

I think we are really missing the whole point of what this bill is all about.

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I strongly support the statement just made by the gentlewoman from Colorado (Mrs. SCHROEDER).

We are plunging into a very, very difficult area if we say to a woman, "Because you are a woman in the Federal service and have been such for 5 years, we are giving you the same preference as we give to a veteran."

The next thing we know, other groups will say, "We want five points," and then more people will want five points.

Mr. Chairman, it is a bad amendment, untried, untested, and will lead us into a great deal of difficulty.

I ask that the amendment be defeated.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Chairman, does the gentleman agree with the gentlewoman from Colorado (Mrs. SCHROEDER) that the author of the amendment is a member of the old-girls club?

Mr. UDALL. I am with the gentlewoman from Colorado (Mrs. SCHROEDER), on this one and against my good friend, the gentlewoman from Maryland (Mrs. SPELLMAN).

Mr. GARCIA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this particular section of the bill is one that my staff and I have devoted many, many hours to. The reason for this section is because I felt very strongly that one of the factors which most hampers minorities in terms of Federal civilian employment is that their names are not on those civil service registers. The purpose of this section, then, is to insure that minorities will get on those registers, by placing heavy emphasis on their recruitment.

The amendment that has been put forth by the gentlewoman from Maryland (Mrs. SPELLMAN) came to my attention less than 1 hour ago. It may have a great deal of merit, Mr. Chairman, but because of the complexities involving this amendment, I do not believe this is the proper time to consider this measure. I therefore urge that the Spellman amendment be defeated.

Mr. HAMMERSCHMIDT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the gentlewoman's amendment.

If we were to pass this amendment, Mr. Chairman, it would be the height of discrimination based on a person's status as a member of a class. I am not a lawyer, but it does not take legal training to question the constitutionality of such a provision. And even more, Mr. Chairman, it would be an abominable injustice.

Veterans' preference points are awarded for affirmative service during a period of war. They are awarded without regard to race, sex, or creed. The qualifying criteria is military service. There is simply no correlation between this concept, and the concept of awarding points to people merely because they are women, or black, or from Arkansas, or any other reason not connected with an affirmative act as opposed to an inherent status.

If this amendment passes we will indeed have begun to discriminate in reverse, and for this reason, Mr. Chairman, I strongly oppose the amendment.

The CHAIRMAN. The question is on the amendments offered by the gentlewoman from Maryland (Mrs. SPELLMAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mrs. SPELLMAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Seventy-five Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

Mrs. SPELLMAN. Mr. Chairman, I withdraw my demand for a recorded vote.

So the amendments were rejected.

AMENDMENTS OFFERED BY MR. LEACH

Mr. LEACH. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. LEACH: Page 209, after line 12, insert the following new section:

TEMPORARY EMPLOYMENT LIMITATION

SEC. 313. (a) Effective one year after the date of the enactment of this Act the number of individuals enployed in or under an Executive agency shall not exceed the number of individuals so employed on January 1, 1977.

(b) The President shall prescribe regulations to carry out the purpose of this section, including regulations to ensure that no increase in the procurement of personal services by contract occurs by reason of the enactment of this section.

(c) In administering this section, an individual employed on a part-time career employment basis shall be counted as a fraction which is determined by dividing 40 hours into the average number of hours of such individual's regularly scheduled workweek.

(d) For the purpose of this section, "Executive agency" has the meaning set forth in section 105 of title 5, United States Code.

(e) The provisions of this section shall not apply during a time of war or during a period of national emergency declared by the Congress or the President.

(f) The provisions of this section shall terminate at noon on January 20, 1981.

Page 209, line 14, strike out "313." and insert in lieu thereof "314."

Page 129, in the table of contents, strike out the item relating to section 313 and insert in lieu thereof the following:

Sec. 313. Temporary employment limitation.

Sec. 314. Effective date.

Mr. LEACH (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Chairman, the amendments I am offering will simply establish a statutory ceiling on the total number of Federal employees in the executive branch.

There has been a great deal of discussion on the Federal bureaucracy, its ineffectiveness, its inefficiencies, the morass of redtape, and the need to reform our civil service laws. Clearly the existing system should be improved and management afforded greater flexibility in mobilizing the bureaucracy to accomplish its objectives. At the same time, the bill before us, in present form, is silent on the issue of the appropriate size of that bureaucracy.

According to Civil Service Commission statistics, executive branch employment, excluding those working for the U.S. Postal Service, has increased over the past year and a half by 112,000. While that figure includes all employees, whether employed full time, part time, or on an intermittent basis, it is significant to note that the increase in full-time jobs alone is 103,000.

I stress this growth figure because it is sudden. During the previous 8 years of Republican administrations, total executive branch employment decreased by 115,000. Yet in the past 18 months of the Carter administration Federal employment has increased by an almost identical 112,000.

It is easy to say this represents only a 5 percent increase compared to total executive branch employment of over 2 million, but in actuality it is rather extraordinary. When I first started looking into the matter 8 months ago, executive branch employment had increased by 15,000 and I reported to my constituents that this figure was larger than Fort Madison, Iowa—the seventh largest city in my district. Then the growth figure increased to 40,000 and I reported that the increase in Government employment was larger than Burlington, Iowa—the third largest city in my district. The latest available statistics now reveal that Government employment has jumped by more than 100,000, which is larger than Davenport, Iowa—the largest city in my district.

This trend must be reversed. In an effort to work constructively with the administration in accomplishing the major goal of civil service reform, I am offering this amendment to limit the number of executive branch employees to the number so employed in January 1977, which was 2,119,000. The ceiling would become effective 1 year after the date of enactment of the Civil Service reform bill, which permits the administration to reach the target level of reduced employment through attrition. According to the Civil Service Commission, the attrition/separation rate for 1977 was approximately 22 percent. Clearly the administration could refrain from filling one in four vacancies during the coming year and thus easily reach the statutory ceiling. I might also point out that the amendment further requires the President to issue regulations to insure that no increase in the procurement of outside services results from the limit on Federal employment. In addition, the amendment assures that part-time employment will be calculated as a fraction of full-time equivalent hours in order to avoid any inadvertent bias against part-time employment for which this body has expressed clear support.

The amendment also provides waiver authority in the event of a national emergency so as to permit the hiring of employees in excess of the statutory ceiling if necessary.

In sunset fashion, the amendment will expire with the termination of the President's current term of office, providing the Congress and the administration the opportunity, at that time, to review and evaluate the effectiveness of a ceiling on Federal employment.

Mr. Chairman, the current trend in Federal employment runs directly counter to the prevailing mood in this country. American taxpayers are weary, not only of high taxes, but of excessive and costly Government bureaucracy. Nowhere in the reform bill before us today is any meaningful effort made to meet that particular outspoken concern. Without explicit direction in this legislation, we may see, with all of the ensuing activity to reorganize and reform all aspects of the civil service system, an even greater growth in the number of employees on the Federal payroll.

During committee consideration, this employment ceiling amendment was rejected by a 13-to-8 vote. Frankly, I was disappointed that the Civil Service Commission and administration spokesmen argued strongly that a ceiling would be inappropriate because of the need to establish new Federal programs in the next several years. From the point of view of the minority, this reasoning underscores our philosophical commitment to put a halt to the growth of bureaucracy. Clearly, if one supports the initiation of massive new programs, this amendment should be opposed. But, just as clearly, those of us that are skeptical of the need for more programs should reflect that skepticism in a vote for this amendment.

In a 1976 interview with Business Week—well before the recent development popularly characterized as the proposition 13 tax revolt—the President responded to a question put to him regarding the substantial increase in State employment that occurred during his term of office as Governor of Georgia, that he had promised State employees that no one would be discharged as a result of his reorganization but that he did reserve the right not to fill vacancies as they occurred and would do the same thing upon being elected to office. I believe this approach the President outlined in the Business Week interview is on the right track and desire in no way to jeopardize the jobs of Federal employees now on the payroll. At the same time, I do believe this Congress ought to work cooperatively with the administration to allow for a reduced level of employment through the simple process of attrition.

Finally, let me stress again that not only should direct Federal employment be capped, but indirect employment should also be more carefully constrained. Frightening statistics recently presented by HEW Secretary Califano to the Senate Appropriations Committee, indicate that at the same time the U.S. Government is paying salaries to 144,000 regular HEW employees. HEW is indirectly paying the salaries of another 980,000 who work for private think tanks, universities, State and local government, and related programs. Thus the equivalent payroll for this one Federal Department alone exceeds 1 million jobs.

While my amendments do not address all of these hidden and indirect personnel costs, I believe the Civil Service reform bill offers us a timely opportunity to move beyond rhetoric on the issue of big, costly Government, and take a meaningful step to limit the bureaucracy.

I urge adoption of the amendments.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Iowa has a good idea, and everybody has got a lot of good ideas about civil service. I expect that before midnight we are going to hear most of them at the rate we

are going. I had a Member back here with the bright idea that every Member of Congress should have the right annually to fire one bureaucrat without any cause or argument.

The gentleman from Iowa is a very valuable member of our committee, and I do not want to put down the amendment he has offered, but this is a drastic action to take this afternoon in the middle of a very complicated bill. Maybe we ought to have a limitation on the number of employees in Federal Government, but we do not do it without hearings, not without bringing the departments and the administration in and finding out what is ar. appropriate limit. We do not legislate in this fashon, in this broadcast manner, in this particular bill.

This was considered by the committee and defeated by a vote of 13 to 8. I would hope we would not get into this business this afternoon of trying to adopt this amendment. Sure, we ought to look into this overall problem of excessive Federal employment, but I do not think there are many of us here tonight who have the information we need to say that we are going to put a rigid ceiling on Federal employment.

What we will end up doing is coming in with exemptions and additional legislation to let people out of it, so I would hope that we would have a vote and reject this amendment.

Mr. COLLINS of Texas. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, if I could I would like to call on the gentleman from Iowa who is sponsoring this amendment, because I think the key to the amendment is the fact that the gentleman says it will place a ceiling on civil service. Did the gentleman state that during the past two administrations we had actually had a decrease?

Mr. LEACH. Yes, we had a decrease of approximately 115,000 Federal employees.

Mr. COLLINS of Texas. During the two Presidential terms of Ford and Nixon they have been able to decrease 115,000 in civil service. Under this administration, which has only been here for a year and a half, how many people actually have been added?

Mr. LEACH. As of June, approximately 112,000.

Mr. COLLINS of Texas. In other words, the Carter administration has offset all of the gains that were made in reducing and getting civil service in line. Has the gentleman had anyone who objects basically to this concept the gentleman has of putting a ceiling on the size of the Government?

Mr. LEACH. Well, I have, of course, talked a good deal to my constituents about it, and I get very little resistance in the State of Iowa to that sort of restraint.

Mr. COLLINS of Texas. Of course, down in Texas everyone likes your recommendation. I have been interested in talking about it to many people in civil service who also liked the idea of applicants qualifying although doing temporary duty or wating for these attrition openings. They want civil service to be a merit proposition instead of being on a political basis.

In the past, to get recognition in civil service there was supposed to be a statute whereby one would make a career out of civil service instead of trying to turn it into a political pork barrel through building new agencies which, as I said, would be the only reason people would oppose this amendment.

Has this been publicized enough to allow people to understand the full ramifications of it?

Mr. LEACH. I think the gentleman from Arizona has a good point. The committee has not held adequate hearings. However, people throughout the country understand this issue. It is a very clear issue. I might also say to the civil servants I talk to are very concerned. Not only is good government more limited government but an immediate and pressing problem for civil servants is the unfounded liabilities of the civil service retirement fund. If we continue to expand our Federal employees system willy-nilly, we will be risking the retirement of a very large number of civil servants.

Mr. COLLINS of Texas. Without a ceiling it would mean personnel headquarters could just go out and pick anybody here and there without giving present civil service people a chance for advancement.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Iowa to limit the number of Federal employees. It is abundantly clear to me, American taxpayers are at the absolute limit of their tolerance on Federal spending and bureaucracy.

As the gentleman carefully explained, this amendment will not work an unreasonable hardship on the administration since the President is required to comply with the employment limit within 1 year of enactment and the number, by which Federal employment will be reduced, may easily be reached through attrition.

By requiring the President to insure, by regulation, that no increase in the contracting out of services will result from the limit on Federal employment, will effectively prevent the administration from attempting to "end-run" the Congress.

As my colleagues may have noted, recent testimony by HEW Secretary Califano, before the Senate Appropriations Committee, painted a pretty bleak picture for the American taxpayer. According to Secretary Califano, the Department is paying the salaries of 144,256 regular HEW employees plus the salaries of another 980,217 people who work for private think tanks, universities, State and local government agencies, and the like. The total exceeds 1 million, direct and indirect jobs, dependent on HEW funds. This figure, mind you, refers only to one of our major departments.

Mr. Chairman, Federal spending and "jobs creation" by Uncle Sam has grown to staggering proportions. I believe this amendment will enable us to help stem this growth, and I encourage my colleagues to join me in supporting it.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, one of the questions I would have about this is when we start throwing figures out about how many people there are or there are not in civil service employment, one question is how many of those jobs then get contracted out? One of the difficulties we have on this, and I would appreciate the help of the gentleman from Iowa on this, is what we see happening is a shell game. Very often when one tries to get the number of people on the Federal employee rolls down, then they contract out jobs. We still have those people to pay and sometimes it even costs more.

I would hate to see only in-house personnel figures set in an amendment. I think we are aware of the A–76 circular from OMB, which went out under the previous administration, which was to try to force as many jobs as possible out under contract. I wonder if the gentleman is aware how many we contract out and whether or not we count those in the ceiling, and how do we deal with that?

Mr. LEACH. Since 1961 Federal employment has increased 25.8 percent while the population as a whole increased about 19 percent. And, although we do not have the exact figures, clearly the number of individuals involved in contracted service has increased substantially greater than the civil service itself.

The Civil Service Commission does not know how many contracted-out jobs there are in America today. This amendment addresses this issue by saying the ceiling that will be placed cannot be subverted by creating new contracted-out jobs in place of Federal positions. This amendment then does address the issue Mrs. SCHROEDER has referred to.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I move to strike the requisite number of words.

I wonder if the gentleman from Arizona could respond to a question for me. I was a little surprised that the gentleman from Iowa mentioned that the Federal work force of employees went down during the past 2 administrations, talking about the Ford and Nixon administrations. Did not the gentleman from Arizona hold some studies that showed they went up? What levels are we talking about?

Mr. UDALL. The gentleman from Iowa is talking about overall levels and his figures are right in terms of reduction over the previous 8 years. But that makes the point I was trying to make earlier. We do not have enough facts. Does anyone feel that we have enough facts here about what is a valid personnel ceiling? Maybe we ought to have one, but we cannot solve all the problems of the world in this bill today.

Mr. CHARLES H. WILSON of California. I would hope we could.

Mr. UDALL. The point I was making is the supergrades and executives increased greatly. I have made a study of that. The White House upper levels went

completely out of hand. They more than doubled the top levels in the White House.

Mr. CHARLES H. WILSON of California. In other words, they got rid of the lower levels and put in more upper levels?

Mr. UDALL. They have had more chiefs and fewer Indians in those years.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Iowa (Mr. LEACH).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. LEACH. Mr. Chairman, I demand a recorded vote, and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURTHA), having assumed the chair, Mr. NEDZI, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill, H.R. 11280, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 294 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from Iowa (Mr. LEACH) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 251, noes 96, not voting 85, as follows:

Mr. MARKEY changed his vote from "no" to "aye."

Mr. NOLAN changed his vote from "aye" to "no."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take just a moment to answer the inquiries which a number of my colleagues have made about our plans for this evening.

This is the third full day of action on this important legislation. The leadership had committed to us this evening

so that we could go as long as necessary to finish action on the bill. We are on title III, and a lot of the controversy still remains. There are 11 titles in the bill.

It had been my hope and expectation that by 9 o'clock or so, we could finish the bill, but at the rate we are going, it does not look very good. However, we do intend to stay as long as necessary tonight to finish the legislation.

Mr. Chairman, I would urge on my colleagues the philosophy that I have always followed, which is that the function of debate in the House Chamber is to let the House act as a court of appeal on major issues, a half dozen or 8 or 10 major issues that could not be resolved in the committee, where we had a close vote, and not try to have a full-scale markup.

However, this subject of civil service arouses the passions of the Members. Most of us have one or two pet ideas about what ought to be done to improve the civil service.

I know of three noncontroversial amendments to title III. I am going to accept them. I think there is one and perhaps two amendments which may require a little bit of discussion, but I would hope that we could close out the debate on title III in the next 30 minutes or so and get on to some of the more important parts of the bill.

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 190, after the matter following line 6, insert the following new section:

EXCEPTIONS FROM THE COMPETITIVE SERVICE

SEC. 301A. (a) Section 2103 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(c)(1) The President may, by Executive order, except any position from the competitive service if the President determines that—

"(A) the duties of such position—

"(i) require significant involvement in the advocacy of Presidential administration programs and support of their controversial aspects,

"(ii) require significant participation in the determination of major policies of such administration, or

"(iii) principally involve serving as a personal assistant to or advisor of a Presidential appointee, or serving in a confidential relationship directly under such a personal assistant or advisor; or

"(B) it would be impracticable to apply competitive examination procedures in the filling of such position because of—

"(i) national security,

"(ii) statutory or other significant requirements establishing special employment conditions,

"(iii) the unusual nature of the duties of such position,

"(iv) duration and frequency of service,

"(v) work location, or

"(vi) inadequate number of applicants.

"(2) Periodically (but not less often than 2 years), the President shall review exceptions from the competitive service under Presidential authority, and shall revoke an exception if the President determines that, because of changed circumstances, the exception is no longer appropriate under the provisions of paragraph (1) of this subsection.

"(3) The President shall periodically review exceptions from the competitive service in the Executive agencies made by or under statute, and shall prepare and transmit a report on each such review to each House of the Congress containing such legislative and administrative changes as the President considers appropriate.".

(b) Section 3302(1) of title 5, United States Code, is amended by inserting ", to the extent authorized under section 2103(c) of this title," after "necessary exceptions".

Mr. HARRIS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, this amendment simply calls for placing into statute what is already in law, under the Executive order with respect to excepting positions from the civil service merit system.

It further calls for a study of those positions which have been excepted from the civil service system and calls for such report to be made to Congress.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, this is a reporting amendment, and it carries forward some of the Executive order provisions.

I am prepared to accept it.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I am happy to yield to my colleague, the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I always prided myself on recognizing a good amendment when I see one. Therefore, we will accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. HANNAFORD

Mr. HANNAFORD. Mr. Chairman, I offer the following amendments.

The Clerk read as follows:

Amendments offered by Mr. H(&&(6*84: Page 200, line 13, insert "(a)" after "Sec. 308.".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339 of title 5, United States Code, relating to computation of annuity, is amended by adding at the end thereof the following new subsection:

"(n)(1) An employee or Member who, at the time of retiring—

"(A) if married, notifies the Office of Personnel Management under subsection (j) of this section that he does not desire any spouse surviving him to receive an annuity under section 8341(b) of this title; or

"(B) if unmarried, does not elect a reduced annuity under subsection (k)(1) of this section;

may, during a period of one year beginning on the date of the retirement of such employee or Member, elect a reduced annuity with a survivor annuity under subsection (j) or (k)(1) of this section, as the case may be, if during such period such employee or Member deposits into the Fund the amount specified in paragraph (2) of this subsection.

"(2) The amount to be paid under paragraph (1) of this subsection is an amount equal to the sum of—

"(A) the full amount by which the annuity paid to such employee or Member would have been reduced for the period beginning on the date of his retirement and ending on the date on which he makes an election under paragraph (1) of this subsection if he had elected at the time of retirement to receive a reduced annuity under subsection (j) or (k)(1) of this section, as the case may be; plus

"(B) interest on such amount at the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by an employee or Member under paragraph (1) of this subsection voids prospectively any election previously made by such employee or Member under subsection (j) or (k)(1) of this section.

"(4) An annuity which is reduced by reason of an election made under paragraph (1) of this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of any reduced annuity under this subsection shall be the same as those rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.".

(2)(A) Section 8339(j) of title 5, United States Code, is amended by adding at the end thereof the following new sentence: "An employee or Member who, at the time of retirement, elects not to receive a reduced annuity under this subsection may, as provided in subsection (n) of this section, later elect to receive such an annuity.".

(B) The first sentence of section 8339(k) of title 5, United States Code, is amended—

(i) by inserting "or as provided in subsection (n) of this section" before ", an unmarried employee"; and

(ii) by inserting after "retired employee or Member" the following: ", except that an election under subsection (n) of this section may be made only with respect to an individual who had an insurable interest in such employee or Member at the time of the retirement of such employee or Member".

(3)(A) Subject to the provisions of subparagraph (B), the amendments made by this subsection shall apply with respect to employees and Members retiring before, on, or after the date of the enactment of this Act.

(B)(i) For purposes of applying the provisions of paragraph (1) of section 8339(n) of title 5, United States Code, as added by this subsection, to employees and Members retiring before the date of the enactment of this Act—

(I) the period referred to in such paragraph shall be considered to begin on the date of the enactment of this Act, and

(II) the amount referred to in such paragraph shall be computed without regard to the provisions of paragraph (2)(B) of such section 8339(n) respecting interest.

Mr. HANNAFORD (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

Mr. UDALL. Mr. Chairman, I reserve a point of order against the amendments.

The CHAIRMAN. The gentleman from Arizona (Mr. UDALL) reserves a point of order.

Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HANNAFORD. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HANNAFORD. Mr. Chairman, I rise to offer amendments.

The language of my amendment is embodied in H.R. 3800, which I introduced last year. This gives civil service retirees a second chance to elect a survivor annuity.

Since its initial introduction, the bill has received the support of 44 cosponsors including Chairman NIX of the Post Office and Civil Service Committee, GLADYS SPELLMAN, chairman of the Subcommittee on Compensation and Employee Benefits, and nine other members of the Post Office and Civil Service Committee. The National Association of Retired Federal Employees has fully endorsed the bill. Furthermore, I have recently received 103 petitions signed by concerned constituents and 569 persons have written expressing support for this measure.

Under current law, a civil service employee must announce a survivor beneficiary at the time of retirement. If a survivor is not named at that time, the individual has no recourse. My amendment would give the retiree a second chance.

My amendment provides an equitable solution to a problem faced by many elderly individuals. But the amendment does not provide a free ride. It requires that a retiree who takes advantage of this second-chance election must pay back into the fund a sum equal to the amount that would have been deducted from his or her annuity since the time of retirement. In addition, a reasonable amount of interest must be paid. This provision will deter individuals from using the additional money as an interest free loan and then declaring a survivor after retirement.

CBO estimates that an average of $2,000 will be paid by about 2,600 retirees to participate in the program. This would total $5.2 million in additional revenues to the Federal Treasury.

To ease the administrative burden, I have stipulated that retirees will have 1 year from the date of enactment or 1 year from the date of retirement, which ever is later, to make use of this second-chance election.

Your support for this equity proposal is important and I urge a "yes" vote.

I do want to commend the gentleman from Arizona (Mr. UDALL) and the Members on both sides of the aisle for their splendid work on this historic piece of legislation. The problem that many of us have found—at least which I have found—is that because of the importance of this piece of legislation it has been difficult to get action that is worthy and related, and that is the reason perhaps for the difficulty that the distinguished committee and the chairman of the subcommittee have had with the bill. I want to explain the purpose of the legislation and get the reaction, if I could, from the gentleman from Arizona.

This amendment simply allows a second chance annuity selection for Federal retirees. We have had it analyzed by the CBO, and their determination is that it has no added cost. It has widespread support. I have personally had over 500 letters in support of this legislation. My bill has 44 cosponsors, including wide support on the Committee on Post Office and Civil Service. I think the gentleman from Arizona (Mr. UDALL) has a clear understanding of the intent of my amendment, and I would like to get his response to it, if I could.

Mr. UDALL. Let me say to the gentleman from California, if he will yield, that I admire and respect the work that he has done on this place of legislation. I regret that the committee, and the committee in the other body have not had time to act on it. It is not directly related to the overall subject of civil service reform, and there are conflicting estimates as to its cost. For example, the Civil Service Commission estimates that the increase in the unfunded liabilities of the system would be something on the order of $200 million if this were passed. Nonetheless, I would be prepared in the next Congress to take a look at the legislation to see if we cannot do justice to the thousands of people the gentleman has been working very hard for. I am going to be constrained at this time to oppose the amendment or to insist on my point of order. I would hope the gentleman, with the assurances that he has here, would not insist on his amendment, and perhaps he might be willing to withdraw it.

Mr. HANNAFORD. Mr. Chairman, I appreciate the gentleman's assurances. I do think the hasty estimates of added cost are incorrect. If they are correct, then the instructions on my amendment to the staff and to the counsel were not followed, because I am assured that the beneficiaries of this amendment would be, indeed, required to fully compensate both in terms of added payment and interest on their added payment in order to bring themselves in with the survivor. But I will accept the gentleman's assurances and withdraw out of respect for the fine work that the committee has done and their difficult job that they had before them. I do hope that we can get early hearings on this in the next Congress, as I have tried to do for the last 2 years.

Mrs. SPELLMAN. Mr. Chairman, will the gentleman yield?

Mr. HANNAFORD. I yield to the gentlewoman from Maryland.

Mrs. SPELLMAN. I thank the gentleman for yielding.

I want to commend the gentleman on offering this amendment, something that certainly is much needed. As the chairman of that subcommittee, I would pledge to hold hearings on this so that we can move it forward.

I appreciate this assurance from the gentlewoman from Maryland and I yield back the balance of my time.

Mr. HANNAFORD. With these kinds of assurances, Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENTS OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mrs. SCHROEDER: Strike out section 311 (beginning on line 1 of page 203 and ending on line 3 of page 206) and insert in lieu thereof the following:

DUAL PAY FOR RETIRED MEMBERS OF THE UNIFORMED SERVICES

SEC. 311. Section 5532 of title 5, United States Code, relating to retired officers of the uniformed services, is amended by striking out so much of such section as precedes subsection (c) and by inserting in lieu thereof the following:

"§ 5532. Employment of retired members of the uniformed services; reduction in pay

"(a) If any member or former member of a uniformed service is receiving retired or retainer pay and is employed in a position the annual rate of basic pay for which, when combined with the member's annual rate of retired or retainer pay, exceeds the rate of basic pay then currently paid for level V of the Executive Schedule, such member's retired or retainer pay shall be reduced by an amount computed under subsection (b) of this section. The amounts of the reductions shall be deposited to the general fund of the Treasury of the United States.

"(b) The amount of each reduction under subsection (a) of this section allocable for any pay period in connection with employment in a position shall be equal to the retired or retainer pay allocable to the pay period, except that the amount of the reduction may not result in the amount of retired or retainer pay allocable to the pay period after being reduced, when combined with the basic pay for the employment during the pay period, being at a rate less than the rate of basic pay then currently paid for level V of the Executive Schedule.".

(b) Section 5531 of title 5, United States Code, relating to definitions, is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) 'member' has the meaning given such term by section 101(23) of title 37;";

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(3) 'retired or retainer pay' means retired pay, as defined in section 8311(3) of this title, determined without regard to subparagraphs (B) through (D) of such section 8311 (3); except that such term does not include an annuity payable to an eligible beneficiary of a member or former member of a uniformed service under chapter 73 of title 10.".

(c) Section 5532(c) of title 5, United States Code, is amended—

(1) by striking out "subsection (b) of";

(2) by striking out "or retirement" each place it appears and inserting in lieu thereof "or retainer";

(3) by striking out "a retired officer of a regular component of a uniformed service" and inserting in lieu thereof "a member or former member of a uniformed service who is receiving retired or retainer pay"; and

(4) in paragraph (1), by striking out "whose retirement was" and inserting in lieu thereof "whose retired or retainer pay is computed, in whole or in part,".

(d) Section 5532(d) of title 5, United States Code is amended by inserting in lieu thereof the following:

"(d) The Office of Personnel Management may authorize exceptions to the restrictions in subsections (a) and (b) of this section only when necessary to meet special or emergency employment needs which result from a severe shortage of well qualified candidates in positions of medical officers which otherwise cannot be readily met."

(e) The item relating to section 5532 in the analysis for chapter 55 of title 5, United States Code, is amended to read as follows:

"5532. Employment of retired members of the uniformed services; reduction in pay."

(f)(1) The amendments made by this section shall apply only with respect to pay periods beginning after the effective date of this Act and only with respect to members of the uniformed services who first receive retired or retainer pay (as defined in section 5531(3) of title 5, United States Code (as amended by this section)), after the effective date of this Act.

(2) The provisions of section 5532 of title 5, United States Code, as in effect immediately before the effective date of this Act, shall apply with respect to any retired officer of a regular component of the uniformed service who is receiving retired pay on or before such date in the same manner and to the same extent as if the preceding subsections of this section had not been enacted.

Mrs. SCHROEDER (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be consider as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Colorado?

There was no objection.

Mrs. SCHROEDER. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Colorado?

There was no objection.

Mrs. SCHROEDER. Mr. Chairman, these are amendments suggested by the administration to section 311, the Dual Compensation Act amendments, in the bill.

The amendments do not change the general thrust of the section, which is to place a "cap" of Executive Level V (now $47,500 per year) on retired military personnel holding civil service jobs and also drawing military retirement.

The changes do the following:

First. Reduce retired pay, rather than salary, to meet the cap. The Department of Defense informed me that from the bookkeeping standpoint they will have a much easier time in assuring that all affected individuals are covered.

Three examples will suffice to explain this change:

A retiree draws $30,000 in retired pay and is appointed Secretary of State, at $60,000 per year. The provision reduces his retired pay to $0. It does not provide for a reduction in his Secretary's salary so, like any other Secretary of State, he gets the $60,000 salary for the job he is now doing. The amendment never reduces salary, even if the salary itself is more than $47,500.

A retiree draws $10,000 in retired pay and holds a $37,500 per year civil service job. There is no reduction in retired pay since his retired pay does not push him over Executive Level V ($47,500 per year).

A retiree draws $12,500 in retired pay and holds a $37,500 per year civil service job. His retired pay would be reduced by $2,500 per year, since if he was paid that $2,500 in retired pay he would be over Executive Level V.

Second. Eliminate the reference to VA benefits falling under the reduction provision. The Veterans' Administration and DOD both were concerned that inclusion of such benefits would set an unwanted precedent and make it extremely difficult to administer the act in a uniform manner. Exclusion of the amount of these benefits are, in any event, not large enough to have any appreciable effect upon the intentions of the amendment.

Third. Assure, through certain language changes, that military survivor benefits are not unintentionally covered by the reduction provisions, and that retired naval enlisted personnel who technically draw "retainer" pay are covered.

Fourth. Permit, in extremely limited circumstances, an exception to the pay cap in the case of medical officers who are in severe shortage.

Mr. UDALL. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. The gentlewoman would be delighted to yield.

Mr. UDALL. Mr. Chairman, the amendment has been cleared with the Civil Service Commission. It carries out the purposes of what the committee did and it is acceptable to us.

Mr. DERWINSKI. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. The gentlewoman would be delighted to yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I would just ask if in the process of revising and extending the gentlewoman would provide the full explanation of the amendment for the RECORD and that would give us what we need for this procedure?

Mrs. SCHROEDER. Mr. Chairman, I would be more than happy to. I have written out here exactly what we are doing. I had planned to read it, but I thought at this point I would give our ears a break and just put it in the RECORD.

Mr. DERWINSKI. Mr. Chairman, we realize the amendment of the gentlewoman is consistent with what the gentlewoman put in the committee and that works out fine.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Colorado (Mrs. SCHROEDER).

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendment offered by Mr. GILMAN: Page 195, insert after line 9 the following:

(g) Section 3318(b) of title 5, United States Code, is amended by striking out ", on request, is entitled to a copy of" and inserting in lieu thereof "is entitled to receive, on or before the 15th day after the day on which he is passed over, a copy of".

Page 195, line 10, strike out "(g)" and insert in lieu thereof "(h)".

Page 196, line 11, strike out "(j)" and insert in lieu thereof "(i)".

Page 196, line 18, strike out "(k)" and insert in lieu thereof "(j)".

Page 196, line 24, strike out "(l)" and insert in lieu thereof "(k)".

Mr. GILMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, my amendment would require the Office of Personnel Management to provide a preference eligible or his designated representative, if said preference eligible is listed on a certificate of the highest three eligibles available for appointment furnished under section 3317(a) of this title, within 15 days of having been passed over by an appointing authority, a copy of:

First. The written reasons submitted by the appointing authority for having passed over a preference eligible; and

Second. The finding of the Commission as to the sufficiency or insufficiency of the reasons submitted by the appointing authority for the passover.

As matters now stand, a preference eligible or his designated representative may only receive the above mentioned information upon written request to the Commission. This procedure has proven inadequate, and more pointedly, has rendered the rule of three meaningless for those preference eligibles interested in Federal employment and certified by the Commission as eligible for appointment.

Current law requires the Commission to make up registers of those scoring highest, from which appointing officers are to select from any one of the top three available eligibles certified by the Commission (the so-called rule of three). An appointing authority may not pass over a preference eligible and appoint a nonpreference eligible lower on the list unless the Commission agrees that the reasons for passing over the preference eligible are sufficient. If a preference eligible is passed over, and is aware of it, he may appeal the passover as an adverse action. More often than not, however, a preference eligible is not advised or even aware of the fact that he has been passed over, thereby preventing him from initiating such an appeal.

This sad state of affairs is made doubly unfortunate both by the manner in which the Commission has blatently circumvented the rule of three, as I will next outline, and the increasing frequency with which the Commission rubber stamps requests from agencies for permission to passover preference eligi-

bles among the top three candidates. For instance, in fiscal year 1976–77 alone, somewhere between 73 percent and 78 percent of passover requests were granted by the Commission.

The Civil Service Commission (CSC) has encouraged agencies to make use of a variety of hiring practices when problems are encountered in obtaining individuals, other than preference eligibles, from CSC registers by turning a blind eye to questionable procedures used by agencies to circumvent veterans' preference.

CSC, in its June 8, 1976, report to the House Committee on Post Office and Civil Service, "A Self-Inquiry Into Merit Staffing," recognized the veterans' preference causes agencies to utilize questionable hiring practices.

This problem has been recently highlighted in a letter to the chairman of the Post Office and Civil Service Committee, Congressman NIX of Pennsylvania, dated June 26, 1978, from the Disabled American Veterans, wherein it was specifically alleged, and documented, that "the Civil Service Commission chairman or responsible staff members have known since March 1977 that 26 of 40 agencies studied 'Did not have proper procedures in place for the observance of veterans preference requirements in the hiring of attorneys'. Included among the 65 percent of agencies in non-compliance were the Department of Justice, Immigration and Naturalization Service, Drug Enforcement Administration, and the Law Enforcement Assistance Administration."

Another indication of the Commission's lack of concern and neglect of preference eligibility rights in this area is reflected in the Commission's failure to maintain any records advising as to the number of preference eligibles who were taken off a certified register for reason of having been passed over three times. Sec. 3317(b) of title 5 provides that if a preference eligible who was certified from a register has been passed over three times, with such passovers approved by the Commission, certification of the preference eligible may be discontinued, but the preference eligible is entitled to advance notice of such discontinuance. Yet the Commission has advised veteran groups that they do not know how many preference eligibles were taken off registers after the required three passovers.

Mr. Chairman, the decision of the House today to retain the "rule of three" underlines the Congress commitment to continue this procedure. My amendment only insures that the House's will be carried out by the Office of Personnel Management and the agencies.

Mr. Chairman, this amendment was urged by the American Legion, the VFW, and the DAV on their testimony before our committee and enjoys their wholehearted support.

Mr. Chairman. I urge my colleagues to adopt this amendment.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am happy to yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York (Mr. GILMAN).

Mr. Chairman, I rise in support of the gentleman from New York's amendment.

At present a preference eligible who is passed over is not aware of any reason why he or she should request a copy of the reasons for being passed over nor are they aware of the Civil Service Commission thereon since he is not aware he has been passed over.

Such a requirement as composed by the amendment from the gentleman from New York would both inform the preference eligible he has been passed over, aid him in evaluating and improving his job search, and put the Agency and Commission squarely on record.

About 75 percent or more of all agency requests to the Commission for approval of passovers are approved. The Commission argues that this almost blanket approval is granted because only cases which the agencies are confident will be approved are submitted to the CSC. However, there is no way to check this since only rarely do preference eligibles ever request information on being passed over.

If there is no way to determine whether the passover system is equitable under present law and regulations, how could any preference eligible determine whether he had been passed over when the personnel selection system, as contemplated under the new system would be decentralized to the agencies in most cases?

Mr. Chairman, I urge the adoption of the gentleman's amendment.

Mr. GILMAN. Mr. Chairman, I thank the gentleman from Arkansas (Mr. HAMMERSCHMIDT) for his support.

Mr. DERWINSKI. Mr. Chairman, since the debate on this amendment seems to be centered on this side, I wish to express my opposition to this amendment.

I would like to alert the Members to the fact that there are at least two, if not three, amendments of which I am aware that Members have to offer attacking what they call "paperwork." The effect of this amendment is to add to paperwork.

This amendment requires certain reporting provisions to individuals when at the present time we have a system which has worked well, and as far as I know, there have not been major complaints against the procedure.

This amendment would in effect mandate certain additional reporting requirements and would be a bonus for attorneys, but I do not believe it would help run our Government, and I do not believe it would help the Civil Service structure function more properly.

Mr. Chairman, the amendment was offered in committee, and it was rejected by a vote of 15 to 6, reflecting bipartisan opposition and support.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I associate myself with the remarks of the gentleman from Illinois (Mr. DERWINSKI).

This amendment is unnecessary. It would simply generate a great deal more paperwork.

A veteran now is entitled to this information if he asks for it. This says that if a veteran has moved away and is no longer interested, they still have to run him down and tell him he is entitled to this copy. This would simply create more paperwork. The system we have now has worked very well.

Mr. Chairman, the administration does not support this amendment, and the committee is opposed to it. The system has worked very well the way it is, and I hope we will reject the amendment.

Mr. GILMAN. Mr. Chairman, will the gentleman yield further?

Mr. DERWINSKI. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I wish to point out that if the system was working well, we certainly would not need this sort of amendment. At present a preference eligible is not aware of any reason why he should request a copy of the reasons for being passed over after they have been filed by the Commission since he is not even aware that they were filed or that he had been "passed over." Such a requirement as imposed by this amendment would both inform the preference eligible that he has been passed over and it would assist him in evaluating his job search. It would put the agency and the Commission squarely on record.

Mr. Chairman, this amendment does nothing more than give proper notice to a veteran who has been passed over.

Mr. DERWINSKI. But, Mr. Chairman, we have to face up to the facts of life, and the facts of life are that the average veteran in civil service is well aware of what his rights are, and if he has any doubt of the procedure after being passed over, he can get the information.

I may also say—and I say this with great respect for my dear friend, the gentleman from New York (Mr. GILMAN)—that at the time the gentleman offered this amendment in committee, it was when the committee had already adopted its version of the veterans' preference, and one of the gentleman's arguments for this amendment was that this was needed as sort of the last defense that a veteran should have.

Having corrected the committee's action earlier through the adoption of the Hanley amendment, this makes it a moot question in terms of veterans' protection and veterans' preference. I really look on this amendment as a "paperwork" amendment.

Mr. GILMAN. Mr. Chairman, will the gentleman yield further?

Mr. DERWINSKI. I yield to the gentleman from New York.

Mr. GILMAN. Far from obviating the need for the measure by the adoption of the veterans' preference provision, such passage makes it even more important, because this is one of the abuses that has continually occurred and which has eroded veterans' preference.

About 75 percent of the requests for passover are perfunctorily granted. Most veterans not knowing that they have been passed over on the list; have no way of objecting. This amendment merely provides reasonable opportunity to a veteran to be heard.

Mr. DERWINSKI. The gentleman from Arizona (Mr. UDALL) emphasized that when the Civil Service Commission passes over a preference eligible, it makes those reasons part of the record. The veteran, in most cases, does then review that record. And I do not think that the additional requirements that the gentleman is attempting to put in are going to do anything but create the very thing we want to avoid, which is a more complex, complicated paperwork and, therefore, an artificial delay in personnel matters.

Mr. GILMAN. If the gentleman will yield further, it is perfectly true that the information is placed in the veteran's record. The problem that necessitates this remedial legislation is that the veteran has no way of knowing that he has been passed over and has no opportunity to be heard when such information is placed in his record without adequate notice. That is precisely what this amendment seeks to correct, to give the veteran 15 days' notice of having been passed over so that if the facts warrant it, he can take the issue up on appeal to the appropriate authority.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. GILMAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GILMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendments were rejected.

AMENDMENTS OFFERED BY MRS. SPELLMAN

Mrs. SPELLMAN. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mrs. SPELLMAN: Page 209, after line 12, insert the following new subsections:

INTERPRETING ASSISTANTS FOR DEAF EMPLOYEES

SEC. 313. (a) Section 3102 of title 5, United States Code, is amended—

(1) by redesignating paragraph (4) of subsection (a) as paragraph (5), by striking out "and" at the end of paragraph (3), and inserting after paragraph (3) the following new paragraph (4):

"(4) 'deaf employee' means an individual employed by an agency who establishes, to the satisfaction of the appropriate authority of the agency concerned under regulations of the head of that agency, that the employee has a hearing impairment, either permanent or temporary, so severe or disabling that the employment of an interpreting assistant or assistants for the employee is necessary or desirable to enable such employee to perform the work of the employee; and";

(2) in subsection (b), by inserting "and interpreting assistant or assistants for a deaf employee" after "or assistants for a blind employee", and amending the last sentence to read as follows: "A reading assistant or an interpreting assistant, other than the one employed or assigned under subsection (d) of this section, may receive pay for services performed by the assistant by and from the blind or deaf employee or a nonprofit organization, without regard to section 209 of title 18."

(3) in subsection (c), by inserting "or deaf" after "blind"; and

(4) by inserting at the end thereof the following new subsection:

"(d) The head of each agency may also employ or assign, subject to section 209 of title 18 and to the provisions of this title governing appointment and chapter 51 and subchapter VIII of chapter 53 of this title governing classification and pay, such reading assistants for blind employees and such interpreting assistants for deaf employees as may be necessary to enable such employees to perform their work.".

(b)(1) The analysis of chapter 31 of title 5, United States Code, is amended by striking out the item relating to section 3102 and inserting in lieu thereof the following:

"3102. Employment of reading assistants for blind employees and interpreting assistants for deaf employees.".

(2) The caption for section 3102 of title 5, United States Code, is amended to read as follows:

"§ 3102. Employment of reading assistants for blind employees and interpreting assistants for deaf employees".

(c) Section 410(b)(1) of title 39, United States Code, is amended by inserting after "open meetings)" a comma and "3102 (employment of reading assistants for blind employees and interpreting assistants for deaf employees),".

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Conform the table of contents accordingly.

Mrs. SPELLMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Marvland?

There was no objection.

Mrs. SPELLMAN. Mr. Chairman, the amendments which I am introducing clarifies some existing doubt as to the authority of the Federal Government to hire or assign readers for blind employees. This amendment would also expand current law to provide specific authority for the employment or assignment of interpreters for the deaf and, additionally, would specifically apply such authorizations to the Postal Service.

I believe this amendment to be noncontroversal.

Section 501 of the Rehabilitation Act of 1973, requires each department, agency, and instrumentality of the Federal Government, including the Postal Service and Postal Rate Commission, to submit to the Civil Service Commission an affirmative action program for the hiring, placement, and advancement of handicapped individuals. Section 7153 of title 5, United States Code, authorizes the President to presecribe rules which shall prohibit as nearly as conditions of good administration warrant discrimination because of physical handicap in an executive agency or in the competitive service. They enunciate clearly Congress general goal that the Federal Government be a leader and set an example with respect to the employment of handicapped individuals.

Section 3102 of title 5, United States Code, initially enacted in Public Law 87-614, provides authority for the head of each agency to employ nonpaid readers for blind employees of the Federal Government without regard to provisions governing appointments in the competitive service. Contrary to the general prohibition against receiving salary from sources other than the Federal Government, subsection (b) of the section provides specifically that the reading assistant may be paid for his or her reading assistance services by the blind employee or a nonprofit organization. At the time of passage of Public Law 87-614, it was envisioned that readers would also serve on a voluntary basis. But no comparable provision was included regarding the use of nonpaid employees as interpreters for deaf employees.

Mr. Chairman, the limitation of section 3102 to nonpaid employees and the exclusion of interpreters for deaf employees from this statute's provisions, have restricted some Federal agencies from meeting their section 501 obligations. Indeed, in a letter to Senator RIFICOFF, Jule Sugarman, Vice Chairman of the Civil Service Commission, stated:

It is my understanding that an amendment to Section 3102 of title 5, United States Code, essentially authorizes the employment of reading assistants for blind employees and interpreters for deaf employees.

In our view, the authorization to provide for these services is needed very much. Federal employees are required by law to exercise affirmative action in the hiring, placement, and advancement of handicapped persons. For the successful employment of blind and deaf persons, two of the most important accommodations are readers and interpreters. We have stated for some time that such services are allowable on an "as required basis" by other Federal employees, but experience shows that these services are often inadequate.

The real need is to convince managers that these are legitimate services and refusal to employ or promote deaf or blind individuals cannot be based upon a need for "extra" services. (The) proposed amendment will be very helpful in overcoming these barriers and in assuring that the payment of these services is indeed legal. For these reasons, the Administration favors the amendment.

In summary, section 3102 currently is too vague and, at the same time, too restrictive to allow the Federal Government to effectively promote the hiring of blind and deaf individuals as required by section 501 of the Rehabilitation Act of 1973. My amendments would correct these flaws by providing, in law, specific authority for the employment and assignment of readers and interpreters for the handicapped. They have the full support of the administration, and I believe they should have the full support of my colleagues.

Mr. UDALL. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentlewoman for yielding.

Mr. Chairman, the gentlewoman submitted these amendments to us earlier. The Civil Service Commission has looked them over. They are consistent with

existing law. The Senate, in a similar bill, adopted an amendment like this.

Mr. Chairman, I personally support the amendments.

Mrs. SPELLMAN. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentlewoman from Maryland (Mrs. SPELLMAN).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. CLAY

Mr. CLAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CLAY: Page 209, after line 13, insert the following:

CATEGORY RATING SYSTEM

SEC. 313. (a) Section 3304 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(e)(1) Subject to the provisions of this title (other than section 3318(a)), in cases in which the qualifications of applicants are being determined without the use of written examinations, the Office may provide that individuals shall be evaluated in accordance with a category rating system established by the Office which divides the qualified applicants into three or more categories. The appointing or nominating authority may select any individual within the highest category, or, if at least three candidates have not received such a rating, any individual in the next highest category or categories if necessary to provide the appointing or nominating authority with at least three applicants from which to choose.

"(2) For the purpose of applying section 3318(b) of this title in cases to which paragraph (1) of this subsection applies, an individual shall not be considered to be passed over unless a selection is made from a category which is lower than the category for which that individual qualified.

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Conform the table of contents accordingly.

Mr. CLAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. Mr. Chairman, this amendment provides category ratings of job applicants in Federal employment. This amendment has the support of the administration and is offered at their request.

It authorizes the Office of Personnel Management to evaluate job applicants according to three or more quality levels. This authority could only be used where the Office of Personnel Management measures the qualifications of candidates by other than written tests.

Like most private businesses, the Commission judges the qualifications of applicants for professional, administrative, and technical jobs by evaluating their experience and education, because it generally is not feasible to use written tests for those occupations. Yet, personnel laws written many years ago require that all applicants be rated numerically and that selections only be made from the three highest rated. Thus the Commission must make overly fine distinctions among applicants with virtually the same qualifications when, in fact, no measurable differences exist.

Mr. Chairman, under these conditions, use of category ratings—grouping together of all eligibles with relatively "equal" qualifications into broad classes would be appropriate. The categories would be "outstanding," "well-qualified," and "qualified"—which would permit selection for a larger number of eligibles, rather than individual scores. Federal agencies have expressed almost unanimous concern about inflexibilities imposed on their managers by Federal personnel laws, and many have suggested using alternate ranking procedures for Federal job applicants, along the lines of those already in use in State and local public merit systems.

Mr. Chairman, my amendment seeks to provide this needed flexibility. I urge my colleagues to support this amendment.

Mr. SOLARZ. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have great respect for our dearly beloved colleague from Missouri. He has contributed creatively and constructively to the shaping of this legislation, but I must say that this amendment really goes too far. In fairness to him, however, I take note of the fact that he indicated that it was supported by the administration and was presumptively introduced at their request.

I think that our colleagues on the committee should know just a little bit about the history of this amendment. When the President's proposal was submitted to our committee, it contained a recommendation that we reject the Rule of Three, which has historically determined selections within the merit system, and substitute for it instead the so-called Rule of Seven. Our committee, after carefully considering this proposal, rejected it by a substantial majority, on the grounds that a change from the Rule of Three to the Rule of Seven would substantially increase the possibilities for selection to Federal personnel on grounds other than merit.

Having suffered such a defeat in our committee, the administration now comes before the Committee of the Whole and asks us, in effect, to accept an amendment which goes, not from the Rule of Three to the Rule of Seven, but from the Rule of Three to the rule of anyone who is in the category of qualified. That could mean a selection not from the three most qualified, not even from the seven most qualified, but potentially from the 100 or 150 or 200 who were most qualified. I would submit that not since the passage of the Pendleton Act in 1883 has there been such an opportunity to fill the Federal service with as many patronage seekers such as would be provided by the adoption of this amendment. It would open the door to cronyism, to favoritism, to patronage, to racism, and to racism in reverse.

This amendment is presumably being offered in order to make it easier to bring women or minorities or others who have suffered from discrimination in the past into the Federal Government, and it is possible that under certain administrations it might work that way. But the fact is that it is also very possible that in the hands of other administrations this amendment would work the other way by making it possible to deny the most qualified jobseekers, particularly if they were black or if they were women or if they came from other minority groups in the population, jobs which, under the current Rules of Three, they would be able to obtain.

I would submit that the Rule of Three has served us well. I think the merit system has served us well. This amendment would go a long way toward gutting the merit system entirely. It is a frontal assault on the merit system and I urge my colleagues on the committee to reject it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. CLAY).

The question was taken; and on a division (demanded by Mr. CLAY) there were—ayes 12, noes 18.

Mr. CLAY. Mr. Chairman, I object to the vote on the ground that a quorum is not present.

The CHAIRMAN. The gentleman cannot object to the vote on the ground in the Committee of the Whole.

Mr. CLAY. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order a quorum is not present.

The CHAIRMAN. The Chair will count for a quorum.

Mr. CLAY. Mr. Chairman, I ask unanimous consent to withdraw the point of order.

The CHAIRMAN. Without objection, the point of order is withdrawn.

There was no objection.

The CHAIRMAN. Does the gentleman ask for a recorded vote?

Mr. CLAY. No, Mr. Chairman, I withdraw my request.

So the amendment was rejected.

The CHAIRMAN. Are there other amendments to title III?

AMENDMENT OFFERED BY MR. JACOBS

Mr. JACOBS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JACOBS: Page 209, insert after line 12 the following new section:

LIMITATION ON THE NUMBER OF CERTAIN EXECUTIVE POSITIONS

SEC. 313. (a) Notwithstanding any other provision of law, the number of positions in the Federal civil service classified in grades higher than GS-13 shall, by September 30, 1981, not exceed—

(1) in the case of positions in GS-14, 44,658;

(2) in the case of positions in GS-15, 21,555;

(3) in the case of positions in GS-16, 2,906;

(4) in the case of positions in GS-17, 857; and

(5) in the case of positions in GS-18, 298.

(b) The Office of Personnel Management shall prescribe regulations necessary to carry out the purpose of this section.

Page 209, line 14, strike out "313." and insert in lieu thereof "314.".

Page 129, in the table of contents, strike out the item relating to section 313 and insert in lieu thereof the following:

"Sec. 313. Limitation on the number of certain executive positions.
"Sec. 314. Effective date".

Mr. JACOBS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. JACOBS. Mr. Chairman, the amendment goes this way. In what I call the GS rich, the GS–14's and above in the civil service, 10 percent of those people, roughly 10 percent leave Government every year—attrition, in other words.

Mr. DERWINSKI. Mr. Chairman, the House is not in order.

Mr. JACOBS. We are not in the House either, I might point out.

Mr. DERWINSKI. The Committee is not in order.

Mr. JACOBS. In any case, 10 percent of these people retire every year. What this amendment calls for is if we replace half the people who leave Government service in the GS–14 and above levels every year we will have this. In my hometown there is the Lilly pharmaceutical firm. Fifty years ago Mr. Lilly conducted a tour through his plant and somebody said: "Mr. Lilly, how many people work here?" And he said: "About half of them."

What we can do with this is replace about half the people in the GS–14 levels and above who leave Government service every year. That is, nobody would be fired, to quote a Presidential candidate in 1976, nobody would be fired, but they would leave only by attrition.

The best figures I can get are that 82,675 were on the payroll as GS–14's and above in 1977. That is where we just went back to, as Members will recall, by the previous amendment dealing with the subject. We would get over a 3-year period to work our way down to 70,274 employees, the reduction being half or 5 percent in each of those successive years, to a total of 15 percent reduction and a total savings to the taxpayers of something over a third of a billion dollars.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Indiana (Mr. JACOBS).

Mr. Chairman, this amendment may well have some appeal with some of the Members. I agree with my friend, the gentleman from Indiana (Mr. JACOBS) that there may be too many supergrade positions, too many highly paid persons in the different departments, but I have not the vaguest idea, at this hour of the night, what is a fair number of GS–14's or what is a fair number of GS–15's or GS–16's. I just think it is unwise to legislate in this way at this time.

Let me tell you what the bill does: We are trying to get at this in the bill and we are setting up in the bill, a pool. At long last we will have a Government-wide pool of supergrades. On page 217 of the bill there is a formula by which each agency submits its request for supergrades. They come to the Office of Personnel Management which makes the decision. The Congress every 2 years under this new system will fix these limits.

I would hope my friend the gentleman from Indiana (Mr. JACOBS) would be satisfied to let this new system try and work and see if we cannot get control of that problem in that fashion rather than legislating in the blind tonight. Maybe after it has been in effect we can exercise better judgment as to its results, but I do think it would be very unwise to adopt this amendment. That is why I am strongly opposed to it.

Mr. DERWINSKI. Mr. Chairman, if the gentleman will yield, let me say that I concur with the observations of the gentleman from Arizona (Mr. UDALL) to the gentleman from Indiana (Mr. JACOBS). The gentleman from Indiana is rightly concerned over the excessive number of supergrades, but I also concur with the gentleman from Arizona (Mr. UDALL) that this is not the way to approach the problem. Because actually, if we applied this proposal, it would bring administrative disaster to the Government. Because, in this blanket type of approach, it does not give any clues as to what agencies or departments should be involved, and in what manner. Congress is mandating, for example, under the growing Department of Energy certain supergrades, but we do not know how this would be affected under any new provisions in the energy bill that is now in the other body.

If you take a look at the practicality of it all, the attractiveness of it on the surface disappears once one takes a look at the administrative impossibility this would create.

Mr. UDALL. Mr. Chairman, what will occur if this amendment is adopted is, I think that every Member in this Chamber is going to be immediately besieged by people from the agencies over which his particular committee has jurisdiction, who will be wanting certain numbers of supergrades in that agency and they will be wanting exemptions to cover their agency and pretty soon we will be having exemptions in the authorization and the appropriation bills for different agencies and we will be right back where we are today.

This bill sets up a good framework, at least along the lines pointed out, so that I believe that the approach taken by the gentleman from Indiana, even though it may be commendable, is not the way to do it.

Mr. JACOBS. Mr. Chairman, if the gentleman will yield, first I want to say that maybe the janitor should assume that position in the Indianapolis office, as the supervisor, but I simply say that when you walk down the cavernous buildings in the city of Washington and see somebody reading a funny book, somebody who is asleep and somebody flirting at the water cooler, it would certainly seem to me that it is going to take until the turn of the century in order to catch up to the jobs through the procedure that you are suggesting.

As the gentlewoman from Colorado has said, when they come down to testify we do not understand them, they sound like they have feathers in their mouths, and all that, so that you will never do it if you wait until the end of the century this way.

I would say that this is just another way of how Parkinson's law can be repealed if you just choose to repeal it.

Mr. UDALL. I believe we have a formula in this bill to gradually cut down on these supergrades, and the way in which we can get a little better grip and control over the growing ranks of supergrades in the Government if we can get this bill passed tonight and get this section on page 217 on the statute books.

Mr. STEERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment proposed by the gentleman from Indiana (Mr. JACOBS.)

I would like to take this opportunity to ask the gentleman from Indiana a question. Is the gentleman from Indiana aware of the fact that since the time when Mr. Lilly inspected his plants, the number of supergrade employees at Lilly has increased?

Mr. JACOBS. If the gentleman will yield, Mr. Chairman, that is right, but they could not hold a candle to the Federal Government because Mr. Lilly's people have to pay the bills themselves. They cannot tax somebody to do it.

Mr. STEERS. Mr. Chairman, I agree that the problem in the Federal Government is not as easily solved as it is in a private enterprise where one can recognize that a company either makes a profit or loses money.

However, I would have to say that just as the Lilly Co. has grown and has done a better job as a result, so has the Federal Government.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. JACOBS).

The question was taken; and on a division (demanded by Mr. JACOBS) there were—ayes 14, noes 24.

So the amendment was rejected.

The CHAIRMAN. Are there further amendments to title III?

AMENDMENT OFFERED BY MR. STEERS

Mr. STEERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Steers: Page 200, line 13, after "308." insert "(a)".

Page 200, after line 20, insert the following new subsection:

(b)(1) Section 8339(d) of title 5, United States Code, is amended by inserting "(1)" after "(d)" and by adding at the end thereof the following new paragraph:

"(2) The annuity of an employee retiring under this subchapter with less than 20 years, but at least 5 years of service as a law enforcement officer or firefighter, or any combination thereof, as computed under subsection (a) of this section, except that the annuity of such employee is computed with respect to the service of such employee as a law enforcement officer or firefighter, or any combination thereof, by multiplying 2½ percent of his average pay by the years of that service.".

(2) The amendments made by this section shall apply with respect to individuals who become entitled to receive an annuity on or after the effective date of this Act.

Mr. STEERS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. STEERS. Mr. Chairman, the purpose of this amendment is to provide Federal law enforcement and firefighting personnel with less than 20 years' service, but at least 5, a special 2½ percent of salary per year of service, in recognition of the special hazardous service which they perform. Current law (Public Law 93-530) already extends this credit to those with 20 or more years of service, but failed to provide similar credit to those who serve less than 20 years.

This amendment would correct this inequity by extending the special, hazardous duty retirement rate to all Federal law enforcement and firefighting personnel who retire with between 5 and 20 years of service.A similar amendment has been accepted by the Senate.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I hope that as the evening goes on, we will keep in mind the purpose of the bill we are considering here. The bill is to reform and reorganize the overall civil service system.

There is a temptation among the Members to correct old injustices, to find pet peeves that they have about the civil service system, and generally to use this as a vehicle to accomplish a lot of long-sought gains.

This amendment would make a major change in the provisions regarding the pay of firefighters and other people in law enforcement. It is a 2½ percent addition after 20 years of service.

Mr. Chairman, this aim may be meritorious; and if it is, we ought to have hearings and an opportunity to have a bill reported out. We should not be legislating at this hour of the night.

Let me give my colleague just one statistic. The unfunded liability of the civil service system today is $110 billion. This little old amendment we are asked to adopt on a couple moments of debate will only add $5 billion to the unfunded liability.

Mr. Chairman, I do not think it is responsible to take that kind of action at this time of night on this kind of record, and I urge that the amendment be defeated.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words. I rise to associate myself with the comments of the gentleman from Arizona (Mr. UDALL) and point out that this would set a precedent. The next thing we would know is that we would have a rash of such amendments. The bill woul t be out of control, and the deficit noted in the retirement system is something that should be kept in mind.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. STEERS).

The amendment was rejected.

The CHAIRMAN. Are there other amendments to title III?

AMENDMENT OFFERED BY MR. JACOBS

Mr. JACOBS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JACOBS: Page 203, strike out line 7 and all that follows down through line 25 and insert in lieu thereof the following:

"§ 5532. Employment of retired members of the uniformed services; reduction in pay

"(a) If any member or former member of a uniformed service is receiving retired pay and is employed in a position, such member's pay for such employment shall be reduced—

"(1) by an amount computed under subsection (b)(1) of this section in the case of any member or former member who has engaged in combat with an enemy of the United States while serving as a member of a uniformed service and who is serving in a position the annual rate of basic pay for which, when combined with the member's annual rate of retired pay, exceeds the rate of basic pay then currently paid for level V of the Executive Schedule; and

"(2) by an amount computed under subsection (b)(2) of this section in the case of any member or former member who has not engaged in combat with an enemy of the United States while serving as a member of a uniformed service.

The amounts of such reductions shall be deposited to the general fund of the Treasury of the United States.

"(b)(1) The amount of each reduction under subsection (a)(1) of this section for any pay period in connection with employment in a position shall be equal to the retired pay allocable to the pay period, except that the amount of the reduction may not result in the amount payable for the pay period, when combined with the retired pay allocable to the pay period, being at a rate less than the rate of basic pay then currently paid for level V of the Executive Schedule.

"(2) The amount of each reduction under subsection (a)(2) of this section for any pay period in connection with the employment of any member or former member in a position shall be equal to the lesser of—

"(A) the member's retired pay allocable to such pay period; or

"(B) the member's pay for such employment for such pay period.".

Mr. JACOBS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. UDALL. Mr. Chairman, I reserve a point of order on the amendment.

Mr. JACOBS. Mr. Chairman, this amendment deals with the so-called double-dipping issue. The bill itself provides in essence, I guess, that a double-dipper cannot get more from the taxpayers than about $47,000. This provides that one cannot double-dip at all, but one can double-dip—a veteran—up to $47,000 if that veteran has actually been engaged in combat.

I am reminded of Bill Mauldin's cartoon—no, I am not reminded of it; I was reminded of it this afternoon, and I have it written down here—about the hairy trooper, and that is the fellow who is too far forward to shave, and too far back to get shot. This would exclude that individual from the privilege of taking two refreshing dips from the U.S. Treasury while working for the Federal Government and collecting a pension from that same Federal Government. That is about it.

Mr. Chairman, I yield back the remainder of my time.

POINT OF ORDER

The CHAIRMAN. Does the gentleman from Arizona (Mr. UDALL) wish to be heard on his point of order?

Mr. UDALL. Mr. Chairman, I insist on the point of order. The section involving the Jacobs amendment has already been acted on by the House in connection with the Schroeder amendment.

I am concerned about the double-dipping situation myself, and we took the beginning action in the committee.

The gentlewoman from Colorado (Mrs. SCHROEDER) struck out and rewrote the entire section to which the Jacobs amendment would apply and, therefore, it is subject to a point of order.

The CHAIRMAN. Does the gentleman from Indiana (Mr. JACOBS) wish to be heard on his point of order?

Mr. JACOBS. Mr. Chairman, I am not sure I understand the point of order. It is a matter of first impression with me. I simply ask the Chair to consider whether the title is open for amendment at any point and whether that relates to the gentleman's point of order.

The CHAIRMAN (Mr. DANIELSON). The Chair is prepared to rule.

It is true the title is open for amendment at any point. However, it is also true that section 311 was earlier amended and rewritten by the gentlewoman from Colorado (Mrs. SCHROEDER). The gentleman's proposed amendment would seek to amend the same section and, therefore, it is not in order.

The point of order is sustained.

Are there other amendments to title III? If not, the Clerk will read title IV.

The Clerk read as follows:

TITLE IV—SENIOR EXECUTIVE SERVICE

GENERAL PROVSIONS

SEC. 401. (a) Chapter 21 of title 5, United States Code, is amended by inserting after section 2101 the following new section:

"§ 2101a. The Senior Executive Service

"The 'Senior Executive Service' consists of Senior Executive Service positions (as defined in section 3132(a)(2) of this title).".

(b) Section 2102(a)(1) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (A);

(2) by adding "and" at the end of subparagraph (B); and

(3) by adding at the end thereof the following new subparagraph:

"(C) positions in the Senior Executive Service;".

(c) Section 2103(a) of title 5, United States Code, is amended by inserting before the period at the end thereof the following: "or Senior Executive Service".

(d) Section 2108(3) of title 5, United States Code (as amended in section 302 of this Act), is further amended—

(1) by striking out the period at the end thereof and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following:

"but does not include applicants for, or members of the Senior Executive Service.".

(e) The analysis for chapter 21 of title 5,

United States Code, is amended by inserting after the item relating to section 2101 the following new item:

"2101a. The Senior Executive Service.".

AUTHORITY FOR EMPLOYMENT

SEC. 402. (a) Chapter 31 of title 5, United States Code, is amended by inserting after section 3112 (as added by section 303(a) of this Act), the following new subchapter:

"SUBCHAPTER II—THE SENIOR EXECUTIVE SERVICE

"§ 3131. The Senior Executive Service

"(a) It is the purpose of this subchapter to establish a Senior Executive Service to ensure that the management of the Government of the United States is responsive to the needs, policies, and goals of the Nation and otherwise is of the highest quality. The Senior Executive Service shall be administered so as to—

"(1) provide for a compensation system, including salaries, benefits, and incentives and for other conditions of employment, designed to attract and retain highly competent senior executives;

"(2) ensure that compensation, retention, and tenure are contingent on managerial success which is measured of the basis of individual and organizational performance (including such factors as improvements in quality of work or service, cost efficiency, and timeliness of performance);

"(3) recognize exceptional accomplishment;

"(4) enable the head of an agency to reassign senior executives to best accomplish the agency's mission;

"(5) provide for severance pay, retirement benefits, and placement assistance for senior executives who are removed from the Senior Executive Service for nondisciplinary reasons;

"(6) protect senior executives from arbitrary or capricious actions;

"(7) provide for program continuity and policy advocacy in the management of public programs;

"(8) maintain a merit personnel system free of improper political interference;

"(9) ensure accountability for honest, economical, and efficient Government;

"(10) ensure compliance with all applicable civil service laws, rules, and regulations including those relating to equal employment opportunity, political activity, and conflicts of interest; and

"(11) provide for the initial and continuing systematic development of highly competent senior executives.

"§ 3132. Definition and exclusions

"(a) For the purpose of this subchapter—

"(1) 'agency' means an Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, but does not include—

"(A) a Government corporation;

"(B) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, or any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; or

"(C) the General Accounting Office;

"(2) 'Senior Executive Service position' means any position (other than a position in the Foreign Service of the United States or an administrative law judge position under section 3105 of this title) in an agency which is in GS–16, 17, or 18 of the General Schedule or in level IV or V of the Executive Schedule, or an equivalent position, which is not required to be filled by an appointment by the President by and with the advice and consent of the Senate, and in which an employee—

"(A) directs the work of an organizational unit;

"(B) is held accountable for the success of one or more specific programs or projects; or

"(C) supervises the work of employees other than personal assistants;

"(3) 'senior executive' means a member of the Senior Executive Service;

"(4) 'career appointee' means an individual in a Senior Executive Service position whose appointment to the position or previous appointment to another Senior Executive Service position was based on—

"(A) approval by the Office of Personnel Management of the managerial qualifications of such individual; and

"(B) selection through a merit staffing process consistent with Office of Personnel Management regulations;

"(5) 'limited term appointee' means an individual appointed under a nonrenewable appointment for a term of 3 years or less to a Senior Executive Service position the duties of which will expire at the end of such term;

"(6) 'limited energency appointee' means an individual appointed under a nonrenewable appointment, not to exceed 18 months, to a Senior Executive Service position established to meet a bona fide, unanticipated, urgent need;

"(7) 'noncareer appointee' means an individual in a Senior Executive Service position who is not a career appointee, a limited term appointee, or a limited emergency appointee;

"(8) 'career reserved position' means a position which is required to be filled by a career appointee and which is designated under subsection (b) of this section; and

"(9) 'general position' means any position, other than a career reserved position, which may be filled by either a career appointee, noncareer appointee, limited emergency appointee, or limited term appointee.

"(b)(1) For the purpose of paragraph (8) of subsection (a) of this section, the Office of Personnel Management shall prescribe the criteria and regulations governing the designation of career reserved positions. The criteria and regulations shall provide that a position shall be designated as a career reserved position only if the filling of the position by a career appointee is necessary to ensure impartiality, or the public's confidence in the impartiality, of the Government. The head of each agency shall be responsible for designating career reserved positions in such agency in accordance with such criteria and regulations.

"(2) A position for which a designation is in effect under this subsection may be held only by a career appointee.

"(3) The Office of Personnel Management shall periodically review general positions to determine whether the positions should be designated as career reserved. If the Office determines that any such position should be so designated, it shall order the agency to make the designation.

"(4) Not later than March 1 of each year, the head of each agency shall publish in the Federal Register a list of positions in the agency which were career reserved positions during the preceding calendar year.

"(c) An agency may file an application with the Office of Personnel Management, setting forth reasons why it, or a unit thereof, should be excluded from any provision or requirement of this subchapter. The Office of Personnel Management shall—

"(1) review the application and stated reasons,

"(2) undertake an investigation to determine whether the agency or unit should be excluded from any provision or requirement of this subchapter, and

"(3) upon completion of its review and investigation, recommend to the President whether the agency or unit should be excluded from any provision or requirement of this subchapter.

If the Office recommends that an agency or unit thereof be excluded from any provision or requirement of this subchapter, the President may, on written determination, make the exclusion to the extent and for the period determined by the President to be appropriate.

"(d) The Office of Personnel Management may at any time recommend to the President that any exclusion previously granted to an agency or unit under subsection (c) of this section be revoked. Upon recommendation of the Office, the President may revoke, by written determination, any exclusion made under subsection (c) of this section.

"(e) If—

"(1) any agency is excluded under subsection (c) of this section, or

"(2) any exclusion is revoked under subsection (d) of this section,

the Office of Personnel Management shall, within 30 days after the action, transmit to the Congress a report concerning the exclusion or revocation.

"§ 3133. Authorization of positions; authority for appointment

"(a) During each odd-numbered calendar year, each agency shall—

"(1) examine its needs for Senior Executive Service positions for each of the 2 fiscal years beginning after such calendar year; and

"(2) submit to the Office of Personnel Management a written request for a specific number of Senior Executive Service positions for each of such fiscal years.

"(b) Each agency request submitted under subsection (a) of this section shall be based on—

"(1) the anticipated type and extent of program activities of the agency for each of the 2 fiscal years involved; and

"(2) such other factors as may be prescribed from time to time by the Office of Personnel Management.

"(c) The Office of Personnel Management, in consultation with the Office of Management and Budget, shall review the request of each agency and shall authorize, for each of the 2 fiscal years covered by requests required under subsection (b) of this section, a specific number of Senior Executive Service positions for each agency.

"(d)(1) The Office may, on a written request of an agency or on its own initiative, make an adjustment in the number of positions authorized for any Agency. Each agency request under this paragraph shall be submitted in such form, and shall be based on such factors, as the Office of Personnel Management shall prescribe.

"(2) The total number of positions in the Senior Executive Service may not at any time during any fiscal year exceed 105 percent of the total number of positions authorized under subsection (c) of this section for such fiscal year.

"(e) Appointments to the Senior Executive Service may be made by appropriate appointing authorities of agencies subject to the requirements and limitations of this title.

"§ 3134. Limitations on noncareer appointments

"(a) During each calendar year, each agency shall—

"(1) examine its needs for employment of noncareer appointees for the fiscal year beginning in the following year; and

"(2) submit to the Office of Personnel Management, in accordance with regulations prescribed by the Office, a written request for authority to employ a specific number of noncareer appointees for such fiscal year.

"(b) The number of noncareer appointees in each agency will be determined annually by the Office of Personnel Management on the basis of demonstrated need of the agency. The total number of noncareer appointees in all agencies may not exceed 10 percent of the total number of Senior Executive Service positions in all agencies.

"(c) The number of Senior Executive Service positions in any agency which are filled by noncareer appointees may not at any time exceed the greater of—

"(1) 25 percent of the total number of Senior Executive Service positions in the agency; or

"(2) the number of positions in the agency which were filled on the date of the enactment of the Civil Service Reform Act of 1978 by—

"(A) noncareer executive assignments under subpart F of part 305 of title 5, Code of Federal Regulations, as in effect on such date, or

"(B) appointments to level IV or V of the Executive Schedule which were not required to be made by and with the advice and consent of the Senate.

This subsection shall not apply in the case of any agency having fewer than 4 Senior Executive Service positions.

"§ 3135. Biennial report

"(a) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted by the President to the Congress during each even-numbered calendar year, a report on the Senior Executive Service. The report shall include—

"(1) the number of Senior Executive Service positions authorized for the then current fiscal year, in the aggregate and by agency, and the projected number of Senior Executive Service positions to be authorized for the next two fiscal years, in the aggregate and by agency;

"(2) a description of each exclusion in effect during the preceding calendar year under section 132(c) of this title;

"(3) the authorized number of career appointees and noncareer appointees, in the aggregate and by agency, for such fiscal year;

"(4) the number of limited term appointees and limited emergency appointees, in the aggregate and by agency, employed during the preceding calendar year;

"(5) the titles of career reserved positions designated for such fiscal year;

"(6) the percentage of senior executives at each pay rate, in the aggregate and by agency, employed at the end of the preceding calendar year;

"(7) the distribution and amount of performance awards, in the aggregate and by agency, paid during the preceding calendar year; and

"(8) such other information regarding the Senior Executive Service as the Office of Personnel Management considers appropriate.

"(b) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted to the Congress during each odd-numbered calendar year, an interim report showing changes in matters required to be reported under subsection (a) of this section.

"§ 3136. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this subchapter.".

(b) Section 3109 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) Positions in the Senior Executive Service may not be filled under the authority of subsection (b) of this section.".

(c) The analysis for chapter 31 of title 5, United States Code, is amended—

(1) by striking out the heading for chapter 31 and inserting in lieu thereof the following:

"Chapter 31—AUTHORITY FOR EMPLOYMENT

"SUBCHAPTER I—EMPLOYMENT AUTHORITIES"

and

(2) by inserting at the end thereof the following:

"SUBCHAPTER II—THE SENIOR EXECUTIVE SERVICE

"Sec.
"3131. The Senior Executive Service.
"3132. Definitions and exclusions.
"3133. Authorization of positions; authority for appointment.
"3134. Limitations on noncareer appointments.
"3135. Biennial report.
"3136. Regulations.".

EXAMINATION, CERTIFICATION, AND APPOINTMENT

SEC. 403. (a) Chapter 33 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER VIII—APPOINTMENT, REASSIGNMENT, TRANSFER, AND DEVELOPMENT IN THE SENIOR EXECUTIVE SERVICE

"§ 3391. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', 'senior executive', 'career appointee', 'limited term appointee', 'limited emergency appointee', 'noncareer appointee', and 'general position' have the meanings set forth in section 3132(a) of this title.

"§ 3392. General appointment provisions

"(a) Qualification standards shall be established by the head of each agency for each Senior Executive Service position in the agency and shall be in accordance with requirements established by the Office of Personnel Management.

"(b)(1) An individual may be appointed to a Senior Executive Service position only if the appointing authority has determined in writing that the individual meets the qualification requirements of the position.

"(2) Not more than 30 percent of the individuals serving at any time in Senior Executive Service positions may have served less than an aggregate of 5 years in the civil service before appointment to such positions, unless the President certifies to the Congress that the limitation would hinder the efficiency of the Government.

"(c) If a career appointee is appointed by the President, by and with the advice and consent of the Senate, to a civilian position in the executive branch which is not in the Senior Executive Service, and the rate of basic pay payable for which is equal to or greater than the rate payable for level V of the Executive Schedule, the career appointee may elect (at such time and in such manner as the Office of Personnel Management may prescribe) to continue to have the provisions of this title relating to basic pay, performance awards, awarding of ranks, severance pay, leave, and retirement apply as if the career appointee remained in the Senior Executive Service position from which he was appointed. Such provisions shall apply in lieu of the provisions which would otherwise apply—

"(1) to the extent provided under regulations precribed by the Office, and

"(2) so long as the appointee continues to serve under such Presidential appointment.".

"§ 3393. Career appointments

"(a) Each agency shall establish a recruitment program, in accordance with guidelines which shall be issued by the Office of Personnel Management, which provides for recruitment of career appointees from—

"(1) all groups of qualified individual applicants within the civil service; or

"(2) all groups of qualified individual applicants whether or not within the civil service.

"(b) Each agency shall establish one or more executive resources boards, as appropriate, the members of which shall be appointed by the head of the agency from among employees of the agency. The boards shall, in accordance with merit staffing requirements established by the Office of Personnel Management—

"(1) review the qualifications of candidates for appointment as career appointees; and

"(2) make written recommendations concerning candidates to the appropriate appointing authorities.

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate, the members of which shall be appointed by the Director from within and outside the civil service on the basis of their knowledge of public management and other appropriate occupational fields. It is the function of the boards to certify the managerial qualifications of candidates for entry as career appointees into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management.

"(2) The Office of Personnel Management shall, in consultation with the various qualification review boards, prescribe criteria for establishing managerial qualifications for appointment to the Senior Executive Service. The criteria shall provide for—

"(A) consideration of demonstrated managerial experience;

"(B) consideration of successful participation in a career executive development program which is approved by the Office of Personnel Management; and

"(C) sufficient flexibility to allow for the appointment of individuals who have special or unique qualities which indicate a likelihood of managerial success and who would not otherwise be eligible for appointment.

"(d) An individual's initial appointment as a career appointee shall become final only after the individual has served a 1-year probationary period as a career appointee.

"§ 3394. Noncareer and limited appointments

"(a) Each noncareer appointee, limited term appointee, and limited emergency appointee shall meet the qualifications of the position to which appointed, as determined by the appointing authority.

"(b) An individual may not be appointed as a limited term appointee or as a limited emergency appointee without the prior approval of the exercise of such appointing authority by the Office of Personnel Management.

"§ 3395. Reassignment and transfer within the Senior Executive Service

"(a) A career appointee in an agency—

"(1) may be reassigned to any Senior Executive Service position in the same agency for which the appointee is qualified; and

"(2) may transfer to a Senior Executive Service position in another agency for which the appointee is qualified, with the approval of the agency to which the appointee transfers.

"(b)(1) A limited emergency appointee may be reassigned to another Senior Executive Service position in the same agency established to meet a bona fide, unanticipated, urgent need, except that the appointee may not serve in one or more positions in such agency under such appointment in excess of 18 months.

"(2) A limited term appointee may be reassigned to another Senior Executive Service position in the same agency the duties of which will expire at the end of a term of 3 years or less, except that the appointee may not serve in one or more positions in the agency under such appointment in excess of 3 years.

"(c) A limited term appointee or a limited emergency appointee may not be appointed to, or continue to hold, a position under such an appointment if, within the preceding 48 months, the individual has served more than 36 months, in the aggregate, under any combination of such types of appointment.

"(d) A noncareer appointee in an agency—

"(1) may be reassigned to any general position in the agency for which the appointee is qualified; and

"(2) may transfer to a general position

in another agency with the approval of the agency to which the appointee transfers.

"(e) A career appointee in an agency may not be involuntarily reassigned within 120 days after an appointment of the head of such agency.

"§ 3396. Development for and within the Senior Executive Service

"(a) The Office of Personnel Management shall establish programs for the systematic development of candidates for the Senior Executive Service and for the continuing development of senior executives, or require agencies to establish such programs which meet criteria prescribed by the Office of Personnel Management.

"(b) The Office of Personnel Management shall assist agencies in the establishment of programs required under subsection (a) of this section and shall monitor the implementation of the programs. If the Office of Personnel Management finds that any agency's program under subsection (a) of this section is not in compliance with the criteria prescribed under such subsection, it shall require the agency to take such corrective action as may be necessary to bring the program into compliance with the criteria.

"(c)(1) The head of an agency may grant a sabbatical leave to any career appointee for not to exceed 11 months in order to permit the appointee to engage in study or uncompensated work experience which will contribute to the appointee's development and effectiveness. A sabbatical leave shall not result in loss of, or reduction in, pay, leave to which the career appointee is otherwise entitled, credit for time or service, or performance or efficiency rating. The head of the agency may authorize in accordance with chapter 57 of this title such travel and per diem costs as the head of the agency may determine to be essential for the study or experience.

"(2) A sabbatical leave under this subsection may not be granted to any career appointee—

"(A) more than once in any 10-year period;

"(B) unless the appointee has completed 7 years of service—

"(i) in one or more positions in the Senior Executive Service;

"(ii) in one or more other positions in the civil service the level of duties and responsibilities of which are equivalent to the level of duties and responsibilities of positions in the Senior Executive Service; or

"(iii) in any combination of such positions; except that not less than 2 years of such 7 years of service must be in the Senior Executive Service: and

"(C) if the appointee is eligible for voluntary retirement with a right to an immediate annuity under section 8336 of this title.

Any period of assignment under section 3373 of this title, relating to assignments of employees to State and local governments, shall not be considered a period of service for the purpose of subparagraph (B) of this paragraph.

"(3)(A) Any career appointee in an agency may be granted a sabbatical leave under this subsection only if the appointee agrees, as a condition of accepting the sabbatical leave, to serve with the agency upon the completion of the leave, for a period of 2 consecutive years.

"(B) Each agreement required under subparagraph (A) of this paragraph shall provide that in the event the career appointee fails to carry out the agreement (except for good and sufficient reason as determined by the head of the agency involved) the appointee shall be liable to the United States for payment of all expenses (including salary) of the sabbatical leave. The amount shall be treated as a debt due the United States.

"§ 3397. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this subchapter.".

(b) The analysis for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3385 the following:

"SUBCHAPTER VIII—APPOINTMENT, REASSIGNMENT, TRANSFER, AND DEVELOPMENT IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"3391. Definitions.
"3392. General appointment provisions.
"3393. Career appointments.
"3394. Noncareer and limited appointments.
"3395. Reassignments and transfer within the Senior Executive Service.
"3396. Development for and within the Senior Executive Service.
"3397. Regulations.".

RETENTION PREFERENCE

SEC. 404. (a) Section 3501(b) of title 5, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof: "or to a member of the Senior Executive Service.".

(b) Chapter 35 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER V—REMOVAL, REINSTATEMENT, AND GUARANTEED PLACEMENT PROVISIONS IN THE SENIOR EXECUTIVE SERVICE

"§ 3591. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', 'senior executive', 'career appointee', 'limited term appointee', 'limited emergency appointee', 'noncareer appointee', and 'general position' have the meanings set forth in section 3132(a) of this title.

"§ 3592. Removal from the Senior Executive Service

"(a) A career appointee may be removed from the Senior Executive Service to a civil service position outside of the Senior Executive Service—

"(1) during the 1-year period of probation under section 3393(d) of this title; or

"(2) at any time for less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title.

"(b) A limited emergency appointee, limited term appointee, or noncareer appointee may be removed from the service at any time.

"§ 3593. Reinstatement in the Senior Executive Service

"(a) A former career appointee may be reinstated, without regard to section 3393(b) and (c) of this title, to any Senior Executive Service position for which the appointee is qualified if—

"(1) the appointee has successfully completed the probationary period established under section 3393(d) of this title; and

"(2) the appointee left the Senior Executive Service for reasons other than misconduct, neglect of duty, malfeasance, or less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title.

"(b) A career appointee who is appointed by the President to any civil service position outside the Senior Executive Service and who leaves the position for reasons other than misconduct, neglect of duty, or malfeasance shall be entitled to be placed in the Senior Executive Service if the appointee applies to the Office of Personnel Management within 90 days after separation from the Presidential appointment.

"§ 3594. Guaranteed placement in other personnel systems

"(a) A career appointee who was appointed from a civil service position held under a career or career-conditional appointment (or an appointment of equivalent tenure, as determined by the Office of Personnel Management) and who, for reasons other than misconduct, neglect of duty, or malfeasance, is removed from the Senior Executive Service during the probationary period under section 3393(d) of this title, shall be entitled to be placed in a civil service position (other than a Senior Executive Service position) in any agency.

"(b) A career appointee—

"(1) who has completed the probationary period under section 3393(d) of this title; and

"(2) who is removed from the Senior Executive Service for less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title; shall be entitled to be placed in a civil service position (other than a Senior Executive Service position) in any agency.

"(c)(1) For purposes of subsections (a) and (b) of this section—

"(A) the position in which any career appointee is placed under such subsections shall be a continuing, full-time position at GS–15 or above of the General Schedule, or an equivalent position, and, in the case of a career appointee referred to in subsection (a) of this section, the career appointee shall be entitled to an appointment of a tenure equivalent to the tenure of the appointment held in the position from which the career appointee was appointed;

"(B) any career appointee placed under subsection (a) or (b) shall be entitled to receive basic pay at the higher of—

"(i) the rate of basic pay in effect for the position in which placed;

"(ii) the rate of basic pay in effect at the time of the placement for the position the career appointee held in the civil service immediately before being appointed to the Senior Executive Service; or

"(iii) the rate of basic pay in effect for the career appointee immediately before being placed under subsection (a) or (b); and

"(C) the placement of any career appointee under subsection (a) or (b) may not be made to a position which would cause the separation or reduction in grade of any other employee.

"(2) An employee who is receiving basic pay under paragraph (1)(B)(ii) or (iii) of this subsection is entitled to have the basic pay rate increased by 50 percent of the amount of each increase in the maximum rate of basic pay for the grade of the position in which the employee is placed under subsection (a) or (b) until the rate is equal to the rate in effect under paragraph (1)(B)(i) for the position in which the employee is placed.

"§ 3595. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this subchapter.".

(b) The chapter analysis for chapter 35 of title 5, United States Code, is amended by inserting the following new item:

"SUBCHAPTER V—REMOVAL, REINSTATEMENT, AND GUARANTEED PLACEMENT PROVISIONS IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"3591. Definitions.
"3592. Removal from the Senior Executive Service.
"3593. Reinstatement in the Senior Executive Service.
"3594. Guaranteed placement in other personnel systems.
"3595. Regulations.".

PERFORMANCE RATING

SEC. 405. Chapter 43 of title 5, United States Code, is amended by adding at the end thereof the following:

"SUBCHAPTER II—PERFORMANCE APPRAISAL IN THE SENIOR EXECUTIVE SERVICE

"§ 4311. Definitions.

"For the purpose of this subchapter, 'agency', 'senior executive', and 'career appointee' have the meanings set forth in section 3132(a) of this title.

"§ 4312. Senior Executive Service performance appraisal systems.

"(a) Each agency shall, in accordance with standards established by the Office of Personnel Management, develop one or more performance appraisal systems designed to—

"(1) provide for systematic appraisals of performance of senior executives;

"(2) encourage excellence in performance by senior executives; and

"(3) provide a basis for making eligibility determinations for retention in the Senior Executive Service and for Senior Executive Service performance awards.

"(b) Each performance appraisal system established by an agency under subsection (a) of this section shall provide—

"(1) that, on or before the beginning of each rating period, performance requirements for each senior executive in the agency are established in consultation with the executive and communicated to the executive;

"(2) that written proposals of performance are based on the individual and organizational performance requirements established for the rating period involved; and

"(3) that each senior executive in the agency is provided a copy of the appraisal and rating under section 4314 of this title and is given an opportunity to respond in writing to the appraisal and rating and have the appraisal and rating reviewed by an employee in a higher managerial level in the agency before the appraisal and rating become final.

"(c) If the Office of Personnel Management determines that an agency performance appraisal system does not comply with the requirements of this subchapter or regulations under this subchapter, the Office of Personnel Management shall order the agency to take any corrective action necessary to bring such system into compliance.

"§ 4313. Criteria for performance appraisals

"Appraisals of performance in the Senior Executive Service shall be based on both individual and organizational performance, taking into account such factors as—

"(1) improvements in quality of work or service;

"(2) cost efficiency;

"(3) timeliness of performance; and

"(4) meeting affirmative action goals and achievement of equal employment opportunity requirements.

"§ 4314. Ratings for performance appraisals

"(a) Each performance appraisal system shall provide for annual summary ratings of levels of performance as follows:

"(1) one or more fully successful levels,

"(2) a minimally satisfactory level, and

"(3) an unsatisfactory level.

"(b) Each performance appraisal system shall provide that—

"(1) any appraisal and any rating under such system—

"(A) are made only after review and evaluation by a performance review board established under subsection (c) of this section;

"(B) are conducted at least annually, subject to the limitation of paragraph (3) of this subsection;

"(C) in the case of a career appointee, may not be made within 120 days after the beginning of a new Presidential administration; and

"(D) are based on performance during a performance appraisal period the duration of which shall be determined under guidelines established by the Office of Personnel Management, but which may be terminated in any case in which the agency making an appraisal determines that an adequate basis exists on which to appraise and rate the senior executive's performance;

"(2) any career appointee receiving a rating at any of the fully successful levels under subsection (a)(1) of this section may be given a performance award as prescribed in section 5384 of this title;

"(3) any senior executive receiving an unsatisfactory rating under subsection (a)(3) of this section shall be reassigned or transferred within the Senior Executive Service, or removed from the Senior Executive Service, but any senior executive who receives 2 unsatisfactory ratings in any period of 5 consecutive years shall be removed from the Senior Executive Service, and

"(4) any senior executive who twice in any period of 3 consecutive years receives less than fully successful ratings shall be removed from the Senior Executive Service.

"(c) Each agency shall establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards, as appropriate. It is the function of the boards to make recommendations to the appropriate appointing authority of the agency relating to the performance of senior executives in the agency. The members of each board shall be appointed by the head of the agency from among employees of the agency other than senior executives with respect to which recommendations are being made the board. In making the recommendation with respect to a career appointee, each board shall include at least 1 career appointee.

"§ 4315. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purposes of this subchapter.".

(b) The analysis for chapter 43 of title 5, United States Code, is amended by inserting at the end thereof the following:

"Subchapter II—Performance Appraisal in the Senior Executive Service

"Sec.
"4311. Definitions.
"4312. Senior Executive Service performance appraisal systems.
"4313. Criteria for performance appraisals.
"4314. Ratings for performance appraisals.
"4315. Regulations.".

AWARDING OF RANKS

SEC. 406. (a) Chapter 45 of title 5, United States Code is amended by adding at the end thereof the following new section:

"§ 4507. Awarding of ranks in the Senior Executive Service

"(a) For the purpose of this section, 'agency', 'senior executive', and 'career appointee' have the meanings set forth in section 3132(a) of this title.

"(b) Each agency shall forward annually to the Office of Personnel Management recommendations of career appointees in the agency to be awarded the rank of Meritorious Executive or Distinguished Executive. The recommendations may take into account the individual's performance over a period of years. The Office of Personnel Management shall review such recommendations and provide to the President recommendations as to which of the agency recommended appointees should receive such rank.

"(c) During any fiscal year, the President may, subject to subsection (d), award to any career appointee recommended by the Office of Personnel Management the rank of—

"(1) Meritorious Executive, for sustained accomplishment, or

"(2) Distinguished Executive, for sustained extraordinary accomplishment.

"(d) During any fiscal year—

"(1) the number of career appointees awarded the rank of Meritorious Executive may not exceed 5 percent of the Senior Executive Service; and

"(2) the number of career appointees awarded the rank of Distinguished Executive may not exceed 1 percent of the Senior Executive Service.

"(e)(1) Receipt by a career appointee of the rank of Meritorious Executive entitles such individual to a lump-sum payment of $2,500, which shall be in addition to the basic pay paid under section 5382 of this title or any award paid under section 5384 of this title.

"(2) Receipt by a career appointee of the rank of Distinguished Executive entitles the individual to a lump-sum payment of $5,000, which shall be in addition to the basic pay paid under section 5382 of this title or any award paid under section 5384 of this title.".

(b) The analysis for chapter 45 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"§ 4507. Awarding of ranks in the Senior Executive Service.".

PAY RATES AND SYSTEMS

SEC. 407. (a) Chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter VIII—Pay for the Senior Executive Service

"§ 5381. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', and 'senior executive' have the meanings set forth in section 3132(a) of this title.

"§ 5382. Establishment and adjustment of rates of pay for the Senior Executive Service; comparability

"(a) There shall be 5 or more rates of basic pay for the Senior Executive Service, and each senior executive shall be paid at one of the rates. The rates of basic pay shall be initially established and thereafter adjusted by the President subject to subsection (b) of this section.

"(b) In setting rates of basic pay, the lowest rate for the Senior Executive Service shall not be less than the minimum rate of basic pay payable for GS–16 of the General Schedule and the highest rate shall not exceed the rate of level IV of the Executive Schedule. The payment of the rates shall not be subject to the pay limitation of section 5308 or 5363 of this title.

"(c) Subject to subsection (b) of this section, effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title in the rates of pay under the General Schedule, each rate of basic pay for the Senior Executive Service shall be adjusted by an amount, rounded to the nearest multiple of $100 (or if midway between multiples of $100, to the next higher multiple of $100), equal to the percentage of such rate of basic pay which corresponds to the overall average percentage (as set forth in the report transmitted to the Congress under such section 5305) of the adjustment in the rates of pay under the General Schedule. The adjusted rates of basic pay for the Senior Executive Service shall be included in the report transmitted to the Congress by the President under section 5305(a)(3) or (c)(1) of this title.

"(d) The rates of basic pay that are established and adjusted under this section shall be printed in the Federal Register and shall supersede any prior rates of basic pay for the Senior Executive Service.

"§ 5383. Setting individual senior executive pay

"(a) Each appointing authority shall determine, in accordance with criteria established by the Office of Personnel Management, which of the rates established under section 5382 of this title shall be paid to each

senior executive under such appointing authority.

"(b) In no event may the aggregate amount paid to a senior executive during any fiscal year under sections 4507, 5382, and 5384 of this title exceed 95 percent of the annual rate payable for positions at level II of Executive Schedule in effect at the end of such fiscal year.

"(c) Except for any pay adjustment under section 5382 of this title, the rate of basic pay for any senior executive may not be adjusted more than once during any 12-month period.

"§ 5384. Performance awards in the Senior Executive Service

"(a)(1) To encourage excellence in performance by career appointees, performance awards shall be paid to career appointees in accordance with the provisions of this section.

"(2) Such awards shall be paid in a lump sum and shall be in addition to the basic pay under section 5382 of this title or any award paid under section 4507 of this title.

"(b)(1) No performance award under this section shall be paid to any career appointee whose performance was determined to be less than fully successful as the time of the appointee's most recent performance appraisal and rating under subchapter II of chapter 43 of this title.

"(2) The amount of a performance award under this section shall be determined by the agency head but may not exceed 20 percent of the career appointee's rate of basic pay.

"(3) The number of career appointees in any agency paid performance awards under this section during any fiscal year may not exceed 50 percent of the number of Senior Executive Service positions in such agency. This paragraph shall not apply in the case of any agency which has less than 4 Senior Executive Service positions.

"(c) Performance awards paid by any agency under this section shall be based on recommendations by performance review boards established by such agency under section 4314 of this title.

"§ 5385. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this subchapter, and may provide guidance to agencies concerning the proportion of funds available for Senior Executive Service salary expenses which may be used for performance awards.".

(c) The analysis of chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new items:

"Subchapter VIII—Pay for the Senior Executive Service

"Sec.
"5381. Definitions.
"5382. Establishment and adjustment of rates of pay for the Senior Executive Service; comparability.
"5383. Setting individual senior executive pay.
"5384. Performance awards in the Senior Executive Service.
"5385. Regulations.".

PAY ADMINISTRATION

SEC. 408. Chapter 55 of title 5, United States Code, is amended—

(1) by inserting "other than an employee or individual excluded by section 5541(2)(xvi) of this section" immediately before the period at the end of section 5504(a)(B);

(2) by amending section 5541(2) by striking out "or" after paragraph (xiv), by striking out the period after paragraph (xv) and inserting "; or" in lieu thereof, and by adding the following paragraph at the end thereof:

"(xvi) member of the Senior Executive Service.";

and

(3) by inserting "other than a member of the Senior Executive Service" after "employee" in section 5595(a)(2)(i).

TRAVEL, TRANSPORTATION, AND SUBSISTENCE

SEC. 409. (a) Section 5723(a)(1) of title 5, United States Code, is amended by striking out "; and" and inserting in lieu thereof "or of a new appointee to the Senior Executive Service; and".

(b) Subchapter IV of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5752. Travel expenses of Senior Executive Service candidates

"Employing agencies may pay candidates for Senior Executive Service positions travel expenses incurred incident to preemployment interviews requested by the employing agency.".

(c) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5751 the following new item:

"5752. Travel expenses of Senior Executive Service candidates.".

LEAVE

SEC. 410. Section 6304 of title 5, United States Code, is amended—

(1) in subsection (a), by striking out "and (e)" and inserting in lieu thereof "(e), and (f)"; and

(2) by adding at the end thereof the following new section:

"(f) Annual leave accrued by an individual while serving in a position in the Senior Executive Service shall not be subject to the limitation on accumulation otherwise imposed by this section.".

DISCIPLINARY ACTIONS

SEC. 411. Chapter 75 of title 5, United States Code, is amended—

(1) by inserting the following in the chapter analysis after subchapter IV:

"Subchapter V—Senior Executive Service

"Sec.
"7541. Definitions.
"7542. Actions covered.
"7543. Cause and procedure.";

and

(2) by adding the following after subchapter IV:

"Subchapter V—Senior Executive Service

"§ 7541. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means an individual in the Senior Executive Service who—

"(A) has completed the probationary period prescribed under section 3393(d) of this title; or

"(B) was covered by the provisions of subchapter II of this chapter immediately before appointment ot the Senior Executive Service; and

"(2) 'suspension' has the meaning set forth in section 7501(2) of this title.

"§ 7542. Actions covered

"This subchapter applies to a removal from the civil service or suspension for more than 14 days, but does not apply to an action initiated under section 1206 of this title, to a suspension or removal under section 7532 of this title, or to a removal under section 3592 of this title.

"§ 7543. Cause and procedure

"(a) Under regulations prescribed by the Office of Personnel Management, an agency may take an action covered by this subchapter against an employee only for such cause as will promote the efficiency of the service.

"(b) An employee against whom an action covered by this subchapter is proposed is entitled to—

"(1) at least 30 days advance written notice, unless there is reasonable cause to believe that the employee has committed a crime for which a sentence of imprisonment can be imposed, stating specific reasons for the proposed action;

"(2) a reasonable time, but not less than 7 days, to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer;

"(3) be represented by an attorney or other representative; and

"(4) a written decision and specific reasons therefor at the earliest practicable date.

"(c) An agency may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (b)(2) of this section.

"(d) An employee against whom an action is taken under this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title.

"(e) Copies of the notice of proposed action, the answer of the employee when written, and a summary thereof when made orally, the notice of decision and reasons therefor, and any order effecting an action covered by this subchapter, together with any supporting material, shall be maintained by the agency and shall be furnished to the Merit Systems Protection Board upon its request and to the employee affected upon the employee's request.".

RETIREMENT

SEC. 412. (a) Section 8336 of title 5, United States Code, is amended by redesignating subsection (h) as subsection (i) and inserting immediately after subsection (g) the following new subsection:

"(h) A member of the Senior Executive Service who is removed from the Senior Executive Service for less than fully successful managerial performance (as determined under subchapter II of chapter 43 of this title) after completing 25 years of service or after becoming 50 years of age and completing 20 years of service is entitled to an annuity.".

(b) Section 8339(h) of title 5, United States Code, is amended by striking out "section 8336(d)" and inserting in lieu thereof "section 8336 (d) or (h)".

CONVERSION TO THE SENIOR EXECUTIVE SERVICE

SEC. 413. (a) For the purpose of this section "agency", "Senior Executive Service position", "career appointee", "career reserved position", "limited term appointee", "noncareer appointee", and "general position" have the meanings set forth in section 3132(a) of title 5, United States Code (as added by this title), and "Senior Executive Service" has the meaning set forth in section 2101a of such title 5 (as added by this title).

(b)(1) Under the guidance of the Office of Personnel Management, each agency shall—

(A) designate those positions which it considers should be Senior Executive Service positions and designate which of those positions it considers should be career reserved positions; and

(B) submit to the Office of Personnel Management a written request for—

(i) a specific number of Senior Executive Service positions; and

(ii) authority to employ a specific number of noncareer appointees.

(2) The Office of Personnel Management shall review the designations and requests of each agency under paragraph (1) of this subsection and shall establish interim authorizations in accordance with sections 3133 and 3134 of title 5, United States Code (as added by this Act).

(c)(1) Each employee serving in a position at the time it is designated as a Senior Executive Service position under subsection (b) of this section shall elect to—

(A) decline conversion and be appointed to a position under such employee's current type of appointment and pay system, retaining the grade, seniority, and other rights and

benefits associated with such type of appointment and pay system; or

(B) accept conversion and be appointed to a Senior Executive Service position in accordance with the provisions of subsections (d), (e), (f), (g), and (h) of this section.

The appointment of an employee in an agency because of an election under subparagraph (A) of this paragraph shall not result in the separation or reduction in grade of any other employee in such agency.

(2) Any employee in a position which has been designated a Senior Executive Service position under this section shall be notified of such designation, the election required under paragraph (1) of this subsection, and the provisions of subsection (d), (e), (f), (g), and (h) of this section. The employee shall be given 90 days from the date of such notification to make the election under paragraph (1) of this subsection.

(d) Each employee who has elected to accept conversion to a Senior Executive Service position under subsection (c)(1)(B) of this section and is serving under—

(1) a career or career-conditional appointment; or

(2) a similar type of appointment in an excepted service position, as determined by the Office of Personnel Management;

shall be appointed as a career appointee to such Senior Executive Service position without regard to section 3393 (c) and (d) of title 5, United States Code (as added by this title).

(e) Each employee who has elected conversion to a Senior Executive Service position under subsection (c)(1)(B) of this section and is serving under an excepted appointment in a position which is not designated a career reserved position in the Senior Executive Service, but is—

(1) a position in Schedule C of subpart C of part 213 of title 5, Code of Federal Regulations;

(2) a position filled by noncareer executive assignment under subpart F of part 305 of title 5, Code of Federal Regulations; or

(3) a position in the Executive Schedule under subchapter II of chapter 53 of title 5 United States Code, other than a career Executive Schedule position;

shall be appointed as a noncareer appointee to a Senior Executive Service position.

(f) Each employee who has elected conversion to a Senior Executive Service position under subsection (c)(1)(B) of this section, who is serving in a position described in paragraph (1), (2), or (3) of subsection (e) of this section, and whose position is designated as a career reserved position under subsection (b) of this section shall be appointed to an appropriate general position in the Senior Executive Service or shall be separated.

(g) Each employee who has elected conversion to a Senior Executive Service position under subsection (c)(1)(B) of this section, who is serving in a position described in paragraph (1), (2), or (3) of subsection (e) of this section, and whose position is designated as a Senior Executive Service position and who has reinstatement eligibility to a position in the competitive service, may, on request to the Office of Personnel Management, be appointed as a career appointee to a Senior Executive Service position. The name of, and basis for reinstatement eligibility for, each employee appointed as a career appointee under this subsection shall be published in the Federal Register.

(h) Each employee who has elected conversion to a Senior Executive Service position under subsection (c)(1)(B) of this section and is serving under a limited executive assignment under subpart F of part 305 of title 5, Code of Federal Regulations, shall—

(1) be appointed as a limited term appointee to a Senior Executive Service position if the position then held by such employee will terminate within 3 years of the date of such appointment;

(2) be appointed as a noncareer appointee to a Senior Executive Service position if the position then held by such employee is designated as a general position; or

(3) be appointed as a noncareer appointee to a general position if the position then held by such employee is designated as a career reserved position.

(i) The rate of basic pay for any employee appointed to a Senior Executive Service position under this section shall be greater than or equal to the rate of basic pay payable for the position held by such employee at the time of such appointment.

(j) The Office of Personnel Management shall prescribe regulations to carry out the purpose of this section. Any employee who is aggrieved by any action by any agency under this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of title 5, United States Code (as added by this title). An agency shall take any corrective action which the Merit Systems Protection Board orders in its decision on an appeal under this subsection.

LIMITATIONS ON EXECUTIVE POSITIONS

SEC. 414. (a)(1)(A) Subsections (b) through (g) of section 5108 of title 5, United States Code, relating to special authority to place positions at GS–16, 17, and 18 of the General Schedules are hereby repealed.

(B) Notwithstanding any other provision of law (other than section 5108 of such title 5), the authority granted to an agency (as defined in section 5102(a)(1) of such title 5) under any such provisions to place one or more positions in GS–16, 17, or 18 of the General Schedule, is hereby terminated.

(C) Subsection (a) of section 5108 of title 5, United States Code, is amended to read as follows: "The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum numbers of positions (not to exceed an aggregate of 10,920) which may at any one time be placed in—

"(i) GS–16, 17, and 18; and

"(i) the Senior Executive Service, in accordance with section 3133 of this title.

A position may be placed in GS–16, 17, or 18, only by action of the Director of the Office of Personnel Management.".

(2)(A) Notwithstanding any other provision of law (other than section 3104 of title 5, United States Code), the authority granted to an agency (as defined in section 5102(a)(1) of such title 5) to establish scientific or professional positions outside of the General Schedule is hereby terminated.

(B) Section 3104 of title 5, United States Code, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a)(1) The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum number of scientific or professional positions (not to exceed 525) for carrying out research and development functions which require the services of specially qualified personnel which may be established outside of the General Schedule. Any such position may be established only by action of the Director of the Office of Personnel Management.

"(2) The provisions of paragraph (1) of this subsection shall not apply to any Senior Executive Service position (as defined in section 3132(a) of this title).".

(C) Subsection (c) of such section 3104 is amended—

(1) by striking out "(c)" and inserting in lieu thereof "(b)"; and

(ii) by striking out "to establish and fix the pay of positions under this section and section 5361 of this title" and inserting in lieu thereof "to fix under section 5361 of this title the pay for positions established under this section".

(3)(A) The provisions of paragraphs (1) and (2) of this subsection shall not apply with respect to any position so long as the individual occupying such position on the day before the date of the enactment of this Act continues to occupy such position.

(B) The director of the Office of Personnel Management—

(i) in establishing under section 5108 of title 5, United States Code, the maximum number of positions which may be placed in GS–16, 17, and 18 of the General Schedule, and

(ii) in establishing under section 3104 of such title 5 the maximum number of scientific or professional positions which may be established,

shall take into account positions to which subparagraph (A) of this paragraph applies.

(b)(1) Section 5311 of title 5, United States Code, is amended by inserting "(a)" before "The Executive Schedule," and by adding at the end thereof the following new subsection:

"(b)(1) Not later than 180 days after the date of the enactment of the Civil Service Reform Act of 1978, the Director of the Office of Personnel Management shall determine the number and classification of executive level positions in existence in the executive branch on that date of enactment, and shall publish the determination in the Federal Register. Effective beginning on the date of the publication, the number of executive level positions within the executive branch may not exceed the number published under this subsection.

"(2) For the purpose of this subsection, 'executive level position' means—

"(A) any office or position in the civil service the rate of pay for which is equal to or greater than the rate of basic pay payable for positions under section 5316 of this title, or

"(B) any such office or position the rate of pay for which may be fixed by administrative action at a rate equal to or greater than the rate of basic pay payable for positions under section 5316 of this title;

but does not include any Senior Executive Service position, as defined in section 3132(a) of this title.".

(2) The President shall transmit to Congress by January 1, 1980, a plan for authorizing executive level positions in the executive branch which shall include the maximum number of executive level positions necessary by level and a justification for the positions.

EFFECTIVE DATE; EXPERIMENTAL APPLICATION

SEC. 415. (a)(1) Except as provided in subsection (b) of this section, the provisions of this title, other than section 414(a), shall take effect on the date of the enactment of this Act.

(2) The provisions of section 414(a) of this title shall take effect 180 days after the date of the enactment of this Act.

(b)(1) Not later than 60 days after the date of the enactment of this title, the Director of the Office of Personnel Management shall prescribe regulations providing for an initial experimental application of the amendments made by sections 401 through 412 of this title and the provisions of section 413 of this title. Such regulations shall provide that Senior Executive Service positions will be designated, authorized, and filled only in 3 Executive departments designated by the Director.

(2) Within 30 days after the end of each of the first two fiscal years to which such amendments apply, the Director shall prepare and transmit to each House of the Congress a report on the Senior Executive Service, including an evaluation of its effectiveness and the manner in which such Service is administered. The second such report shall include proposed regulations which would provide for conversions and other adjustments

which would be appropriate in the event the Senior Executive Service does not continue by reason of paragraph (3).

(3) The provisions of the regulations under paragraph (1) providing for an initial, limited experimental application shall cease to have effect and the amendments made by sections 401 through 412 of this title and the provisions of section 413 of this title shall have full effect (without regard to the limitations under paragraph (1)) beginning on the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to Congress under paragraph (2) of this section, unless the Congress before such day adopts a concurrent resolution which states that the Congress does not favor the continuance of the Senior Executive Service. If such a resolution is adopted before such date, then the provisions of such regulations, and such amendments (and the provisions of section 413), shall cease to have effect on such 90th day (or, if later, 30 days after the date of the adoption of such resolution).

(4) For purposes of paragraph (3), the continuity of a session of Congress shall be considered to be broken only by an adjournment of the Congress sine die, and the days on which either House of the Congress is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 90-day period under such paragraph.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of title IV, and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Are there amendments to title IV?

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 209, strike out line 21 and all that follows down through line 13 on page 263, and insert in lieu thereof the following new title:

TITLE IV—SENIOR EXECUTIVE SERVICE

GENERAL PROVISIONS

SEC. 401. (a) Chapter 21 of title 5, United States Code, is amended by inserting after section 2101 the following new section:

"§ 2101a. The Senior Executice Service

"The 'Senior Executive Service' consists of Senior Executive Service positions (as defined in section 3132(a)(2) of this title).".

(b) Section 2102(a)(1) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (A);

(2) by adding "and" at the end of subparagraph (B); and

(3) by adding at the end thereof the following new subparagraph:

(C) positions in the Senior Executive Service;".

(c) Section 2103(a) of title 5, United States Code, is amended by inserting before the period at the end thereof the following: "or the Senior Executive Service".

(d) Section 2108(3) of title 5, United States Code, is amended—

(1) by striking out the period at the end thereof and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following: "but does not include applicants for, or members of the Senior Executive Service.".

(e) The analysis for chapter 21 of title 5, United States Code, is amended by inserting after the item relating to section 2101 the following new item:

"2101a. The Senior Executive Service.".

AUTHORITY FOR EMPLOYMENT

SEC. 402. (a) Chapter 31 of title 5, United States Code, is amended by inserting after section 3112, as added by this Act, the following new subchapter:

"SUBCHAPTER II—THE SENIOR EXECUTIVE SERVICE

"§ 3131. The Senior Executive Service

"(a) It is the purpose of this subchapter to establish a Senior Executive Service in order to ensure that the management of the Government of the United States is responsive to the needs, policies, and goals of the Nation and otherwise is of the highest quality. The Senior Executive Service shall be administered so as to—

"(1) provide for a compensation system, including salaries, benefits, and incentives, and for other conditions of employment, designed to attract and retain highly competent career senior executives;

"(2) ensure that compensation, retention, and tenure are contingent on managerial success which is to be measured on the basis of individual nad organizational performance (including such factors as improvements in quality of work or service, cost efficiency, and timeliness of performance);

"(3) recognize exceptional accomplishment;

"(4) enable the head of an agency to reassign senior executives to best accomplish the agency's mission;

"(5) provide for severance pay, retirement benefits, and placement assistance for career senior executives who are removed from the Senior Executive Service for nondisciplinary reasons;

"(6) protect career senior executives from arbitrary or capricious actions;

"(7) provide for both program continuity and policy advocacy in the management of public programs;

"(8) maintain a merit personnel system free of improper political interference;

"(9) ensure accountability for honest, economical, and efficient Government;

"(10) ensure compliance with all applicable civil service laws, rules, and regulations including those relating to equal employment opportunity, political activity, and conflicts of interest; and

"(11) provide for the initial and continuing systematic development of highly competent career senior executives.

"§ 3132. Definitions and exclusions

"(a) For the purpose of this subchapter—

"(1) 'agency' means an Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, except that such term does not include—

"(A) a Government corporation;

"(B) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, and any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; and

"(C) the General Accounting Office;

"(2) 'Senior Executive Service position' means any position in an agency which is in GS–16, 17, or 18 of the General Schedule or in level IV or V of the Executive Schedule, or an equivalent position, which (other than a position in the Foreign Service of the United States) is not required to be filled by an appointment by the President, by and with the advice and consent of the Senate, and in which an employee—

"(A) directs the work of an organizational unit;

"(B) is held accountable for the success of one or more specific programs or projects; or

"(C) supervises the work of employees other than personal assistants;

"(3) 'career senior executive' means an individual in a Senior Executive Service position whose appointment to such position or previous appointment to another Senior Executive Service position was based on—

"(A) approval by the Office of Personnel Management of the managerial qualifications of such individual; and

"(B) selection through a competitive staffing process consistent with Office of Personnel Management regulations;

"(b) An agency may file an application with the Office of Personnel Management, setting forth reasons why it, or a unit thereof, should be excluded from any provision or requirement of this subchapter. The Office of Personnel Management shall—

"(1) review such application and stated reasons,

"(2) undertake such other investigation as it considers appropriate to determine whether the agency or unit should be excluded from any provision or requirement of this subchapter, and

"(3) upon completion of its review, recommend to the President whether the agency or unit should be so excluded from any provision or requirement of this subchapter.

If the Office recommends that an agency or unit thereof be excluded from any provision or requirement of this subchapter, the President may, on written determination, make such exclusion to such extent and for such period as the President determines appropriate.

"(c) The Office of Personnel Management may at any time recommend to the President that any exclusion previously granted to an agency or unit under subsection (c) of this section be revoked. Upon recommendation of the Office, the President may revoke, by written determination, any exclusion made under subsection (c) of this section.

"(d) If—

"(1) any agency is excluded under subsection (c) of this section, or

"(2) any exclusion is revoked under subsection (d) of this section,

the Office of Personnel Management, shall within 30 days after such action, transmit to the Congress a report concerning the exclusion or revocation.

"§ 3133. Authorization of positions; authority for appointment

"(a) On or before December 31 of each odd-numbered calendar year, each agency shall—

"(1) examine its needs for Senior Executive Service positions for each of the two fiscal years beginning after such calendar year; and

"(2) submit to the Office of Personnel Management a written request for a specific number of Senior Executive Service positions for each of such fiscal years.

"(b) Each agency request submitted under subsection (a) of this section shall be based on—

"(1) the anticipated type and extent of program activities of the agency for each of the two fiscal years involved;

"(2) such other factors as may be prescribed from time to time by the Office of Personnel Management.

"(c) The Office of Personnel Management, upon consultation with the Office of Management and Budget shall review the request of each agency and shall authorize, for each of the two fiscal years covered by requests required under subsection (b) of this section, a specific number of Senior Executive Service positions for each agency.

"(d)(1) The Office may, on a written request of an agency or on its own initiative, make an adjustment in the number of positions authorized for any agency. Each agency request under this paragraph shall be submitted in such form, and shall be based on

such factors, as the Office of Personnel Management shall prescribe.

"(2) The total number of positions in the Senior Executive Service may not at any time during any fiscal year exceed the total number of positions authorized under subsection (c) of this section for such fiscal year plus 5 percent of such total number.

"(c) Appointments to the Senior Executive Service may be made by appropriate appointing authorities of agencies subject to the requirements and limitations of this title.

"§ 3134. Biennial report

"(a) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted by the President to the Congress during each even-numbered calendar year, a report on the Senior Executive Service. The report shall include—

"(1) the number of Senior Executive Service positions authorized for the then current fiscal year, in the aggregate and by agency, and the projected number of Senior Executive Service positions to be authorized for the next two fiscal years, in the aggregate and by agency;

"(2) a description of each exclusion in effect during the then current fiscal year under section 3132(c) of this title;

"(3) the percentage of career senior executives at each pay rate and the distribution and amount of performance awards, in the aggregate and by agency; and

"(4) such other information regarding the Senior Executive Service as the Office of Personnel Management considers appropriate.

"(b) The Office of Personnel Management shall submit to each House of the Congress, at the time the budget is submitted to the Congress each odd-numbered year, an interim report showing changes in matters required to be reported under subsection (a) of this section.

"§ 3135. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter.".

(b) Section 3109 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(c) Positions in the Senior Executive Service may not be filled under the authority of subsection (b) of this section.".

(c) The chapter analysis of chapter 31 of title 5, United States Code, is amended—

(1) by striking out the heading for chapter 31 and inserting in lieu thereof the following:

"Chapter 31—AUTHORITY FOR EMPLOYMENT

"SUBCHAPTER I—EMPLOYMENT AUTHORITIES"; and

(2) by inserting at the end thereof the following:

"SUBCHAPTER II—THE SENIOR EXECUTIVE SERVICE

"Sec.
"3131. The Senior Executive Service.
"3132. Definitions and exclusions.
"3133. Authorization of positions; authority for appointment.
"3134. Biennial report.
"3135. Regulations.".

EXAMINATION CERTIFICATION AND APPOINTMENT

SEC. 403. (a) Chapter 33 of ttile 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER VIII—APPOINTMENT, REASSIGNMENT, TRANSFER, AND DEVELOPMENT IN THE SENIOR EXECUTIVE SERVICE

"§ 3391. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 3392. General appointment provisions

"(a) Qualification standards shall be established by the head of each agency for each Senior Executive Service position in such agency and shall be in accordance with requirements established by the Office of Personnel Management.

"(b) An individual may be appointed to a Senior Executive Service position only if the appointing authority has determined in writing that the individual meets the qualification requirements of such position.

"(c) If a career senior executive is appointed by the President, by and with the advice and consent of the Senate, to a civilian position in the executive branch which is not in the Senior Executive Service, and the rate of basic pay payable for which is equal to or greater than the rate payable for level V of the Executive Schedule such executive may elect (at such time and in such manner as the Office of Personnel Management may prescribe) to continue to have the provisions of this title relating to basic pay, performance awards, awarding of ranks, severance pay, and retirement apply as if such executive remained in the Senior Executive Service position from which he was appointed. Such provisions shall apply in lieu of the provisions which would otherwise apply—

"(1) to the extent provided under regulations prescribed by the Office, and

"(2) so long as such executive continues to serve under such Presidential appointment.

"§ 3393. Career senior executive appointments

"(a) Each agency shall establish a recruitment program, in accordance with guidelines which shall be issued by the Office of Personnel Management, which provides for recruitment of career senior executives from—

"(1) all groups of qualified individual applicants within the civil service; or

"(2) all groups of qualified individual applicants whether or not within the civil service.

"(b) Each agency shall establish one or more executive resources boards, as appropriate, the members of which shall be appointed by the head of such agency from among employees of such agency. It is the function of such boards, in accordance with competitive staffing requirements established by the Office of Personnel Management, to—

"(1) review the qualifications of candidates for appointment as career senior executives; and

"(2) make written recommendations concerning such applicants to the appropriate appointing authorities.

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate, the members of which shall be appointed by the Director from within and outside the civil service on the basis of their knowledge of public management and other appropriate occupational fields. It is the function of such boards to certify the managerial qualifications of candidates for entry as career senior executives into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management.

"(2) The Office of Personnel Management shall, in consultation with the various qualification review boards, prescribe criteria for establishing managerial qualifications for appointment to the Senior Executive Service. Such criteria shall provide for—

"(A) consideration of demonstrated managerial experience;

"(B) consideration of successful participation in a career executive development program which is approved by the Office of Personnel Management; and

"(C) sufficient flexibility to allow for the appointment of individuals who have special or unique qualities which indicate a likelihood of managerial success and who would not otherwise be eligible for appointment.

"(d) An individual's initial appointment as a career senior executive shall become final only after such individual has served a 1-year probationary period as a career appointee.

"§ 3394. Reassignment and transfer within the Senior Executive Service

"(a) A career senior executive in an agency—

"(1) may be reassigned to any Senior Executive Service position in the same agency for which the executive is qualified; and

"(2) may transfer to a Senior Executive Service position in another agency for which the executive is qualified, with the approval of that agency.

"(b) A career senior executive in an agency may not be involuntarily reassigned within 120 days after an appointment of the head of such agency.

"§ 3395. Development for and within the Senior Executive Service

"(a) The Office of Personnel Management shall establish programs for the systematic development of candidates for the Senior Executive Service and for the continuing development of career senior executives or require agencies to establish such programs, which meet criteria prescribed by the Office of Personnel Management.

"(b) The Office of Personnel Management shall assist agencies in the establishment of programs required under subsection (a) of this section and shall monitor the implementation of such programs. If the Office of Personnel Management finds that any agency's program under subsection (a) is not in compliance with the criteria prescribed under such subsection, it shall require such agency to take such corrective action as may be necessary to bring such program into compliance with such criteria.

"(c)(1) An agency head may grant a sabbatical leave to a career senior executive for not to exceed 11 months in order to permit such executive to engage in study or uncompensated work experience which will contribute to the executive's development and effectiveness. Such leave shall not result in loss of, or reduction in, pay, leave to which the executive is otherwise entitled, credit for time or service, or performance or efficiency rating. The agency head may authorize in accordance with chapter 57 of this title such travel and per diem costs as such agency head may determine to be essential for such study or experience.

"(2) Sabbatical leave under this subsection may not be granted to any career senior executive—

"(A) more than once in any ten-year period;

"(B) unless such executive has completed 7 years of service—

"(i) in one or more positions in the Senior Executive Service;

"(ii) in one or more other positions in the civil service the level of duties and responsibilities of which are equivalent to the level of duties and responsibilities of positions in the Senior Executive Service; or

"(iii) in any combination of such positions; except that not less than 2 years of such 7 years of service must be in the Senior Executive Service; and

"(C) if such executive is eligible for voluntary retirement with a right to an immediate annuity under section 8336 of this title.

Any period of assignment under section 3373 of this title, relating to assignments of

employees to State and local governments, shall not be considered a period of service for this purposes of subparagraph (B) of this paragraph.

"(3)(A) Any career senior executive in an agency may be granted sabbatical leave under this—subsection only if such executive agrees, as a condition of accepting such sabbatical leave, to serve with such agency upon the completion of such leave, for a period of two consecutive years.

"(B) Each agreement required under subparagraph (A) of this paragraph shall provide that in the event the career senior executive fails to carry out such agreement (except for good and sufficient reason as determined by the head of the agency involved) such executive shall be liable to the United States for payment of all expenses (including salary) of such sabbatical leave. Such amount shall be treated as a debt due the United States.

"§ 3396. Regulations

The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter.".

(b) The chapter analysis for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3385 the following:

"SUBCHAPTER VIII—APPOINTMENT REASSIGNMENT, TRANSFER, AND DEVELOLPMENT IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"3391. Definitions.
"3392. General appointment provisions.
"3393. Career appointments.
"3394. Reasignment and transfer within the Senior Executive Service.
"3395. Development for and within the Senior Executive Service.
"3396. Regulations.".

RETENTION PREFERENCE

SEC. 404. (a) Section 3501(b) of title 5, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof: "or a member of the Senior Executive Service.".

(b) Chapter 35 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER V—REMOVAL, REINSTATEMENT, AND GUARANTEED PLACEMENT PROVISIONS IN THE SENIOR EXECUTIVE SERVICE

"§ 3591. Definitions

"For purposes of this subchapter, 'agency', 'Senior Executive Service position', 'and career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 3592. Removal from the Senior Executive Service

"(a) A career senior executive may be removed from the Senior Executive Service to a civil service position outside of the Senior Executive Service—

"(1) during the one year period of probation under section 3393(d) of this title; or

"(2) at any time for less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title.

"§ 3593. Reinstatement in the Senior Executive Service

"(a) A former career senior executive may be reinstated, without regard to section 3393 (b) and (c) of this title, to any Senior Executive Service position for which such executive is qualified if—

"(1) such executive has successfully completed the probationary period established under section 3393(d) of this title; and

"(2) such executive left the Senior Executive Service for reasons other than misconduct, neglect of duty, or malfeasance, or less than fully successful managerial performance by such executive as determined under subchapter II of chapter 43 of this title.

"(b) A career senior executive who is appointed by the President to any civil service position outside the Senior Executive Service and who leaves such position for reasons other than misconduct, neglect of duty, or malfeasance shall be entitled to be placed in the Senior Executive Service if the executive applies to the Office of Personnel Management within 90 days after separation from the Presidential appointment.

"§ 3594. Guaranteed placement in other personnel systems

"(a) A career senior executive who was appointed from a civil service position under a career or career-conditional appointment (or an appointment of equivalent tenure), as determined by the Office of Personnel Management, and who, for reasons other than misconduct, neglect of duty, or malfeasance, is removed from the Senior Executive Service during the probationary period under section 3393(d) of this title, shall be entitled to be placed in a civil service position in any agency other than a Senior Executive Service position.

"(b) A career senior executive—

"(1) who has completed the probationary period under section 3393(d) of this title;

"(2) who has not completed in the aggregate, 5 years of service in the Senior Executive Service; and

"(3) who is removed from the Senior Executive Service for less than fully successful managerial performance as determined under subchapter II of chapter 43 of this title;

shall be entitled to be placed in a civil service position in any agency other than a Senior Executive Service position.

"(c)(1) For purposes of subsections (a) and (b) of this section—

"(A) the position in which any career senior executive is placed under such subsections shall be a permanent, full-time position at GS–15 or above of the General Schedule, or an equivalent position;

"(B) any career senior executive placed under subsection (a) or (b) shall be entitled to receive basic pay at the higher of—

"(i) the maximum rate of basic pay in effect for the position in which placed;

"(ii) the rate of basic pay in effect at the time of such placement for the position such executive held in the civil service immediately before being appointed to the Senior Executive Service; or

"(iii) the rate of basic pay in effect for such executive immediately before being placed under subsection (a) or (b); and

"(C) the placement of any career senior executive under subsection (a) or (b) may not be made to a position which would cause the separation or reduction in grade of any other employee.

"(2) An employee who is receiving basic pay under paragraph (1)(B) (ii) or (iii) of this subsection is entitled to have such basic pay rate increased by 50 percent of the amount of each increase in the maximum rate of basic pay for the grade of the position to which such employee is placed under subsection (a) or (b) until such rate is equal to the rate in effect under paragraph (1)(B)(i) for the position to which such employee is placed.

"§ 3595. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purpose of this subchapter.".

(b) The chapter analysis for chapter 35 of title 5, United States Code, is amended by inserting the following new item:

"SUBCHAPTER V—REMOVAL, REINSTATEMENT, AND GUARANTEED PLACEMENT PROVISIONS IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"3591. Definitions.
"3592. Removal from the Senior Executive Service.
"3593. Reinstatement in the Senior Executive Service.
"3594. Guaranteed placement in other personnel systems.
"3595. Regulations.".

PERFORMANCE RATING

SEC. 405. Chapter 43 of title 5, United States Code, is amended by adding at the end thereof the following:

"SUBCHAPTER II—PERFORMANCE APPRAISAL IN THE SENIOR EXECUTIVE SERVICE

"§ 4311. Definitions

"For the purpose of this subchapter, 'agency' and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 4312. Senior Executive Service performance appraisal systems

"(a) Each agency shall, in accordance with standards established by the Office of Personnel Management, develop one or more performance appraisal systems designed to—

"(1) provide for systematic appraisals of performance of career senior executives;

"(2) encourage excellence in performance by career senior executives; and

"(3) provide a basis for making eligibility determinations for Senior Executive Service retention and performance awards.

"(b) Each performance appraisal system established by an agency under subsection (a) of this section shall provide—

"(1) that, on or before the beginning of each rating period, performance requirements for each career senior executive in such agency are established in consultation with such executive and communicated to such executive;

"(2) that written appraisals of performance are based on the individual and organizational performance requirements established for the rating period involved; and

"(3) that each career senior executive in such agency is provided a copy of the appraisal and rating under section 4314 of this title and is given an opportunity to respond in writing to such appraisal and rating and have such appraisal and rating reviewed by an employee in a higher managerial level in such agency before such appraisal and rating becomes final.

"(c) If the Office of Personnel Management determines that an agency performance appraisal system does not comply with the requirements of this subchapter or regulations under this subchapter, the Office of Personnel Management shall order the agency to take such corrective action as may be necessary to bring such system into compliance.

"§ 4313. Criteria for performance appraisals

"Appraisals of performance in the Senior Executive Service shall be based on both individual and organizational performers, taking into account such factors as—

"(1) improvements in quality of work or service;

"(2) cost efficiency; and

"(3) timeliness of performance.

"§ 4314. Ratings for performance appraisals

"(a) Each performance appraisal system shall provide for annual summary ratings of levels of performance as follows:

"(1) one or more fully successful levels,

"(2) a minimally satisfactory level, and

"(3) an unsatisfactory level.

"(b) Each performance appraisal system shall provide that—

"(1) any appraisal and rating under such system—

"(A) is made only after review and evaluation by a performance review board established under subsection (c) of this section;

"(B) is conducted at least annually, subject to the limitation of paragraph (3) of this subsection;

"(C) may not be made within 120 days after the beginning of a new Presidential administration; and

"(D) is based on performance during a performance appraisal period the duration of which shall be determined under guidelines established by the Office of Personnel Management, but which may be terminated in any case in which the agency conducting such appraisal determines that an adequate basis exists on which to appraise and rate the executive performance;

"(2) any career senior executive receiving a rating at any of the fully successful levels under subsection (a)(1) of this section may be given a performance award as prescribed in section 5384 of this title;

"(3) any career senior executive receiving an unsatisfactory rating under subsection (a)(3) of this section shall be reassigned or transferred within the Senior Executive Service, or separated from the Senior Executive Service, except that any executive who receives 2 such unsatisfactory ratings in any period of 5 consecutive years shall be separated from the Senior Executive Service; and

"(4) any career senior executive who twice in any period of 3 consecutive years receives less than fully successful ratings shall be separated from the Senior Executive Service.

"(c) Each agency shall establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards, as appropriate. It is the function of such boards to make recommendations to the appropriate appointing authority of such agency relating to the performance of career senior executives in such agency. The members of such a board shall be appointed by the head of such agency from among employees of such agency other than career senior executives with respect to which recommendations are being made by such board. In making any such recommendation with respect to a career senior executive, such a board shall include at least 1 career senior executive.

"§ 4315. Regulations

"The Office of Personnel Management shall prescribe such regulations as may be necessary to carry out the purposes of this subchapter.".

(b) The chapter analysis for chapter 43 of title 5, United States Code, is amended by inserting at the end of the chapter analysis the following:

"SUBCHAPTER II—PERFORMANCE APPRAISAL IN THE SENIOR EXECUTIVE SERVICE

"Sec.
"4311. Definitions.
"4312. Senior Executive Service performance appraisal systems.
"4313. Criteria for performance appraisals.
"4314. Ratings for performance appraisals.
"4315. Regulations.".

AWARDING OF RANKS

SEC. 406. (a) Chapter 45 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 4507. Awarding of ranks in the Senior Executive Service

"(a) For the purpose of this section, 'agency' and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"(b) Each agency shall forward annually to the Office of Personnel Management any recommendation of career senior executives in such agency to be awarded the rank of Meritorious Executive or Distinguished Executive. The Office of Personnel Management shall review such recommendations and provide to the President recommendations as to which of the agency recommended executives should receive such rank.

"(c) During any fiscal year, the President may, subject to subsection (d), award to any career senior executive recommended by the Office of Personnel Management the rank of—

"(1) Meritorious Executive, for sustained accomplishment, or

"(2) Distinguished Executive, for sustained extraordinary accomplishment.

"(d) During any fiscal year—

"(1) the number of career senior executives awarded the rank of Meritorious Executive may not exceed 5 percent of the Senior Executive Service; and

"(2) the number of career senior executives awarded the rank of Distinguished Executive may not exceed 1 percent of the Senior Executive Service.

"(e)(1) Receipt by a career senior executive of the rank of Meritorious Executive entitles such individual to a lump-sum payment of $2,500.

"(2) Receipt by a career senior executive of the rank of Distinguished Executive entitles such individual to a lump-sum payment of $5,000.".

(b) The analysis for chapter 45 of title 5, United Startes Code, is amended by adding at the end thereof the following new item:

"4507. Awarding of ranks in the Senior Executive Service.".

PAY RATES AND SYSTEMS

SEC. 407. (a) Chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER VII—PAY FOR THE SENIOR EXECUTIVE SERVICE

"§ 5381. Definitions

"For the purpose of this subchapter, 'agency', 'Senior Executive Service position', and 'career senior executive' have the meanings given such terms under section 3132(a) of this title.

"§ 5382. Establishment and adjustment of rates of pay for the Senior Executive Service

"(a) There shall be 5 or more rates of basic pay for the Senior Executive Service, and each career senior executive shall be paid at one of such rates. Such rates of basic pay shall be initially established and thereafter adjusted by the President subject to subsection (b) of this section.

"(b) In setting rates of basic pay, the lowest rate for the Senior Executive Service shall not be less than the minimum rate of basic pay payable for GS–16 of the General Schedule and the highest rate shall not exceed the rate for level IV of the Executive Schedule. The payment of such rates shall not be subject to the pay limitation of section 5308 of this title.

"(c) Subject to subsection (b) of this section, effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title in the rates of pay under the General Schedule, each rate of basic pay for the Senior Executive Service shall be adjusted by an amount, rounded to the nearest multiple of $100 (or if midway between multiples of $100, to the next higher multiple of $100), equal to the percentage of such rate of basic pay which corresponds to the overall average percentage (as set forth in the report transmitted to the Congress under such section 5305) of the adjustment in the rates of pay under the General Schedule. The adjusted rates of basic pay for the Senior Executive Service shall be included in the report transmitted to the Congress by the President under section 5305(a)(3) or (c)(1) of this title.

"(d) The rates of basic pay that are established and adjusted under this section shall be printed in the Federal Register and shall supersede any prior rates of basic pay for the Senior Executive Service.

"§ 5383. Setting individual executive pay

"(a) Each appointing authority shall determine, in accordance with criteria established by the Office of Personnel Management, which of the rates established under section 5382 of this title shall be paid to each career senior executive under such appointing authority.

"(b) In no event may the aggregate amount paid to a career senior executive for any fiscal year under sections 4507, 5382, and 5384 of this title exceed 95 percent of the annual rate payable for positions at level II of the Executive Schedule in effect at the end of such fiscal year.

"(c) Except for any pay adjustment under section 5382 of this title, the rate of basic pay for any career senior executive may not be adjusted more than once during any 12-month period.

"§ 5384. Performance awards for the Senior Executive Service

"(a)(1) To encourage excellence in performance by career senior executive performance awards shall be paid to career senior executive in accordance with the provisions of this section.

"(2) Such awards shall be paid in a lump sum and shall be in addition to the basic pay paid under section 5382 of this title or any award paid under section 4507 of this title.

"(b)(1) No performance award under this section shall be paid to any career senior executive whose performance was determined to be less than fully successful at the time of such executive's most recent performance appraisal and rating under subchapter II of chapter 43 of this title.

"(2) The amount of a performance award under this section shall be determined by the agency head but may not exceed 20 percent of the career senior executive's rate of basic pay.

"(3) The number of career senior executives in any agency paid performance awards under this section during any fiscal year may not exceed 50 percent of the number of Senior Executive Service positions in such agency. This subsection shall not apply in the case of any agency which has less than 4 Senior Executive Service positions.

"(c) Performance awards paid by any agency under this section shall be based on recommendations by performance review boards established by such agency under section 4314 of this title.

"§ 5385. Regulations

"The Office of Personnel Management shall prescribe such regulations as are necessary to carry out the purpose of this subchapter and may provide guidance to agencies concerning the proportion of funds available for Senior Executive Service salary expenses which may be used for performance awards.".

(c) The analysis of chapter 53 of title 5, United States Code, is amended by adding at the end thereof the following new items:

"SUBCHAPTER VII—PAY FOR THE SENIOR EXECUTIVE SERVICE

"Sec.
"5381. Purpose; definitions.
"5382. Establishment and adjustment of rates of pay for the Senior Executive Service.
"5383. Setting individual executive pay.
"5384. Performance awards for the Senior Executive Service.
"5385. Regulations.".

PAY ADMINISTRATION

SEC. 408. Chapter 55 of title 5, United States Code, is amended—

(1) by inserting "other than an employee or individual excluded by section 5541(2)(xvi) of this section" immediately before the period at the end of section 5504(a)(B);

(2) by amending section 5541(2) by striking out "or" after paragraph (xiv), by striking out the period after paragraph (xv) and inserting "; or" in lieu thereof, and by adding the following paragraph at the end thereof:

"(xvi) member of the Senior Executive Service."; and

(3) by inserting "other than a member of the Senior Executive Service" after "employee" in section 5595(a)(2)(i).

TRAVEL, TRANSPORTATION, AND SUBSISTENCE

SEC. 409. (a) Section 5723(a)(1) of title 5, United States Code, is amended by striking out "; and" and inserting in lieu thereof "or of a new appointee to the Senior Executive Service; and".

(b) Subchapter IV of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5752. Travel expenses of Senior Executive Service candidates

"Employing agencies may pay candidates for Senior Executive Service positions travel expenses incurred incident to preemployment interviews requested by the employing agency.".

(c) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5751 the following new item:

"5752. Travel expenses of Senior Executive Service candidates.".

LEAVE

SEC. 410. Chapter 63 of title 5, United States Code, is amended by inserting in subsection (a) of section 6304 "(e), and (f)" in lieu of "and (e)," and by adding at the end of such section the following new subsection:

"(f) Annual leave accrued by an individual while serving in a position in the Senior Executive Service shall not be subject to the limitation on accumulation otherwise imposed by this section.".

DISCIPLINARY ACTIONS

SEC. 411. Chapter 75 of title 5, United States Code, is amended—

(1) by inserting the following in the chapter analysis after subchapter IV:

"SUBCHAPTER V—SENIOR EXECUTIVE SERVICE

"Sec.
"7541. Definitions.
"7542. Actions covered.
"7543. Cause and procedure."; and

(2) by adding the following after subchapter IV:

"SUBCHAPTER V—SENIOR EXECUTIVE SERVICE

"§ 7541. Definitions

"For the purpose of this subchapter—

"(1) 'employee' means an individual in the Senior Executive Service who—

"(A) has completed the probationary period prescribed under section 3393(d) of this title; or

"(B) was covered by the provisions of subchapter II of this chapter immediately before appointment to the Senior Executive Service; and

"(2) 'suspension' has the meaning set forth in section 7501 of this title.

"§ 7542. Actions covered

"This subchapter applies to removal from the civil service or suspension for more than 14 days, but does not apply to a suspension or removal under section 7532 of this title or to a removal under section 3592 of this title.

"§ 7543. Cause and procedure

"(a) Under regulations prescribed by the Office of Personnel Management, an agency may take an action covered by this subchapter against an employee only for such cause as will promote the efficiency of the service.

"(b) An employee against whom an action covered by this subchapter is proposed is entitled to—

"(1) at least 30 days advance written notice unless there is reasonable cause to believe that the employee has committed a crime for which a sentence of imprisonment can be imposed, stating specific reasons for the proposed action;

"(2) a reasonable time, but not less than 7 days, to answer orally and in writing and to furnish affidavits and other documentary evidence in support of the answer;

"(3) be represented by an attorney or other representative; and

"(4) a written decision and specific reasons therefor at the earliest practicable date.

"(c) An agency may provide, by regulation, for a hearing which may be in lieu of or in addition to the opportunity to answer provided under subsection (b)(2) of this section.

"(d) An employee against whom an action is taken under this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title.

"(e) Copies of the notice of proposed action, the answer of the employee when written, and a summary thereof when made orally, the notice of decision and reasons therefor, and any order effecting an action covered by this subchapter, together with supporting material, shall be maintained by the agency and shall be furnished to the Merit Systems Protection Board upon its request and to the individual affected upon such individual's request.

RETIREMENT

SEC. 412. (a) Section 8336 of title 5, United States Code, is amended by redesignating subsection (h) as subsection (i) and inserting immediately after subsection (g) the following new subsection:

"(h) A member of the Senior Executive Service who is separated from the Senior Executive Service for less than fully successful performance (as determined under subchapter II of chapter 43 of this title) after completing 25 years of service or after becoming 50 years of age and completing 20 years of service is entitled to an annuity.".

(b) Section 8339(h) of title 5, United States Code, is amended by striking out "section 8336(d)" and inserting in lieu thereof "section 8336 (d) or (h)".

CONVERSION TO THE SENIOR EXECUTIVE SERVICE

SEC. 413. (a) During the period beginning on the date of the enactment of this title and ending on the effective date of this title, each agency under the guidance and review of the Office of Personnel Management and the definitions in chapter 31 of title 5, United States Code, as amended by this title, shall designate those positions which are to be incorporated into the Senior Executive Service.

(b) Each agency shall also submit a request for total Senior Executive Service position allocations. The Office of Personnel Management shall establish interim authorizations in accordance with section 3133 of title 5, United States Code, as amended by this Act.

(c)(1) Each employee serving in a position at the time it is designated as a position in the Senior Executive Service may elect to—

(A) decline conversion and remain in a position under such employee's current appointment and pay system, retaining the grade, seniority, and other rights and benefits associated with career and career-conditional appointment; or

(B) convert to a Senior Executive Service appointment according to the automatic appointment conversion provisions of subsection (d) of this section.

The placement of an employee because of an election under subparagraph (A) shall not cause the separation or reduction in grade of any other employee.

(2) The employee shall be notified in writing that such employee's position has been brought into the Senior Executive Service and what the employee's options are under subsection (d) of this section. The employee shall be given 90 days from the date of such notification to elect one of the options.

(d) Each employee who has elected an automatic appointment conversion, is serving immediately before the effective date in a position designated as a Senior Executive Service position, and is currently under—

(1) a career or career-conditional appointment; or

(2) a similar type of appointment in an excepted service as determined by the Office of Personnel Management;

shall receive an appointment to that position in the Senior Executive Service not subject to section 3393 (c) and (d) of title 5, United States Code.

(e) Employees whose actual base pay at the time of conversion exceeds the pay of the rate to which they are converted shall retain their pay. If there are comparability increases under section 5305 of title 5, United States Code, these employees will receive half of each comparability increase until the base pay equals the established Senior Executive Service rate.

(f) The Office of Personnel Management shall prescribe regulations to carry out the purpose of this section. The regulations shall provide a right of appeal to the Merit Systems Protection Board for an employee who believes such employee's agency has violated the employee's rights under this section. An agency shall take the corrective action that the Merit Systems Protection Board orders in its decision on an appeal under this subsection.

LIMITATION ON EXECUTIVE POSITIONS

SEC. 414. (a)(1)(A) Subsections (b) through (g) of section 5108 of title 5, United States Code, relating to special authority to place positions at GS–16, GS–17, and GS–18 of the General Schedule, are hereby repealed.

Notwithstanding the provisions of any law (other than section 5108 of such title 5), the authority granted to an agency (within the meaning of section 5102(a)(1) of such title 5) under any such provisions to place one or more positions in GS–16, GS–17, or GS–18 of the General Schedule, is hereby terminated.

(C) Subsection (a) of section 5108 of title 5, United States Code, is amended to read as follows: "The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum numbers of positions (not to exceed an aggregate of ) which may at any one time be placed in—

(i) GS–16, GS–17, and GS–18 of the General Schedule; and

(ii) the Senior Executive Service, in accordance with section 3133 of title 5, United States Code (as added by this Act).

A position may be placed in GS–16, GS–17, or GS–18 of the General Schedule, only by action of the Director of the Office of Personnel Management.

(2)(A) Notwithstanding the provisions of any other provision of law (other than section 3104 of title 5, United States Code), the authority granted to an agency (within the meaning of section 5102(a)(1) of such title 5) to establish scientific or professional positions outside of the General Schedule is hereby terminated.

(B) Section 3104 of title 5, United States Code, is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a)(1) The Director of the Office of Personnel Management may establish, and from time to time revise, the maximum number of scientific or professional positions (not to exceed ) for carrying out research and development functions which require

the services of specially qualified personnel which may be established outside of the General Schedule. Any such position may be established only by action of the Director of the Office of Personnel Management.

"(2) The provisions of paragraph (1) of this subsection shall not apply to any Senior Executive Service position (as defined in section 3132(a) of this title).".

(C) Subsection (c) of such section 3104 is amended—

(i) by striking out "(c)" and inserting in lieu thereof "(b)"; and

(ii) by striking out "to establish and fix the pay of positions under this section and" and inserting in lieu thereof "to fix under section 5361 of this title the pay for positions established under this section".

(3)(A) The provisions of paragraphs (1) and (2) of this subsection shall not apply with respect to any position so long as the individual occupying such position on the day before the date of the enactment of this Act continues to occupy such position.

(B) The Director of the Office of Personnel Management—

(i) in establishing under section 5108 of title 5, United States Code, the maximum number of provisions which may be placed in GS–16, GS–17, and GS–18, and

(ii) in establishing under section 3104 of such title 5 the maximum number of scientific or professional positions which may be established,

shall take into account positions to which subparagraph (A) of this paragraph applies.

(b)(1) Section 5311 of title 5, United States Code, is amended by inserting "(a)" before "The Executive Schedule," and by adding at the end thereof the following new subsection:

"(b)(1) Not later than 180 days after the date of the enactment of the Civil Service Reform Act of 1978, the Director of the Office of Personnel Management shall determine the number and classification of executive level positions in existence in the executive branch on such date of enactment, and shall publish such determination in the Federal Register. Effective beginning on the date of such publication, the number of executive level positions within the executive branch may not exceed the number published under this subsection.

"(2) For the purpose of this subsection, 'executive level position' means—

"(A) any office or position in the civil service the rate of pay for which is equal to or greater than the rate of basic pay payable for positions under section 5316 of this title, or

"(B) any such office or position the rate of pay for which may be fixed by administrative action at a rate equal to or greater than the rate of basic pay payable for positions under section 5316 of this title;

except that such position does not include any Senior Executive Service position, as defined in section 3132(a) of this title.".

(2) The President shall transmit to Congress by January 1, 1980, a plan for authorizing executive level positions in the executive branch which shall include the maximum number of executive level positions necessary by level and a justification for the positions.

CRITERIA FOR EXCEPTED POSITIONS

SEC. 415. (a) Section 3302 of title 5, United States Code, is amended to read as follows:

"§ 3302. Competitive service; rules

"The President may prescribe rules governing the competitive service. The rules shall provide, as nearly as conditions of good administration warrant, for necessary exceptions from the provisions of sections 2951, 3304(a), 3321, 7152, 7153, 7321, and 7322 of this title. Each officer and individual employed in an agency to which the rules apply shall aid in carrying out the rules.".

(b) Subchapter I of chapter 33 of title 5, United States Code, is amended by inserting after section 3302 the following new section:

"§ 3302a. Positions excepted from the competitive service

"(a) The President may, by regulation, except any position from the competitive service if he determines that—

"(1) the duties of such position—

"(A) require significant involvement in the advocacy of Presidential administration programs and support of their controversial aspects,

"(B) require significant participation in the determination of major policies of such administration, or

"(C) principally involve serving as a personal assistant to or advisor of a Presidential appointee, or serving in a confidential relationship directly under such a personal assistant or advisor; or

"(2) it would be impracticable to apply competitive examination procedures in the filling of such position because of—

"(A) national security,

"(B) statutory or other significant requirements establishing special employment conditions,

"(C) the unusual nature of the duties of such position,

"(D) duration and frequency of service,

"(E) work location, or

"(F) inadequate number of applicants.".

(c) The table of sections for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3302 the following new item:

"3302a. Positions excepted from the competitive service.".

EFFECTIVE DATE

SEC. 416. The provisions of this title shall take effect 9 months after the date of the enactment of this title with the exception of section 413, regarding conversion procedures, which shall take effect immediately upon enactment.

Page 2, revise the table of sections accordingly.

Mr. HARRIS (during the reading). Mr. Chairman, this is a complicated amendment, but I ask unanimous consent that we consider the amendment as read and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HARRIS. Mr. Chairman, this amendment appears to be fairly lengthy because it is a rewriting of Title IV with one purpose in mind, and that purpose is to contain in Title IV all of those items that the administration and the committee in fact say that they need for Senior Executive Service, with the exception that we make sure that the Senior Executive Service is limited to career employees and does not contain political appointees.

Mr. Chairman, I think that we should recognize that we are dealing here with a relatively small group of top management officials, about 9,200. What the bill purports to do is set up a system that would permit the appointment of, the transfer of, and the removal of such officials.

We have been told that as an important element of this in any one of these positions of the Senior Executive Service the administration should have the authority to put a political appointee in that position. This is a tremendous departure from the existing system and one that I think strikes at the very heart of the viability of this bill. If in fact the civil service system has been designed to prevent the politicization of the system, it is in this title IV that we have opened it up to said politicization.

Mr. Chairman, I am offering a substitute to title IV, the title creating the new Senior Executive Service.

First, I want to emphasize that under my substitute, the key features and purposes of the proposed Senior Executive Service would not be changed. It retains the pay and performance evaluation provisions of the committee bill. The main concepts—pay for performance, mobility among agencies, flexibility in assignments, and management accountability—would remain.

It covers the same levels as the committee bill, GS–16 through executive level IV supervisory and managerial positions.

Basically, my substitute does two things: First, it stipulates that the Senior Executive Service would consist only of career employees; and second, it puts into law the standards now used to except a position from the career competitive service—for example, advocacy of administration programs, confidential assistant, national security.

My objection to the proposal under the bill is that the type of appointment—competitive or excepted—has no bearing on the responsibilities of the job. Agency heads who are political appointees, designate which positions are career and which are political. The bill has numerical limits on the number of political hirings, but these numbers are arbitrary. They have no relationship to the duties of the position.

I believe that some positions can legitimately be filled by political appointees, particularly those high-level jobs requiring advocacy or development of administration policies. But many positions should be filled by persons competitively hired, such as the head of a division handling tax returns, grants, or contracts.

My substitute is similar to current practice which is governed by regulation. Currently, under the Civil Service Commission rules if a position meets certain standards, it can be excepted from the competitive service. Those standards provide that the President may except certain positions if he determines that—

(1) the duties of the position—

(a) require significant involvement in the advocacy of Presidential administration programs;

(b) require significant participation in the determination of major policies of such administration, or

(c) principally involve serving as a personal assistant to or advisor of a Presidential appointee, or serving in a confidential relationship directly under such personal assistant or advisor; or

(2) it would be impractical to apply a competitive staffing process in the filling of such position because of—

(a) national security,

(b) statutory or other significant requirements establishing special employment conditions,

(c) the unusual nature of the duties of such position,
(d) duration and frequency of service,
(e) work location, or
(f) inadequate number of applicants.

My substitute would place these standards in the law; the effect would be the same as the current practice. The difference is that Congress would be providing clear direction and controls over which positions are political and which are career.

I believe my amendment goes to the heart of civil service "reform," a popular slogan that could be dangerously perverted under this bill. Politicizing the bureaucracy is not reform, in my view. There is a place for political appointments in the top layers of Government. But this bill leaves too many loopholes.

It was not that long ago that we saw political manipulation ripple throughout the bureaucracy under the guise of "getting control of the government." The taxpayer wants to know that Federal laws and programs are administered impartially, that decisions are made on principle, not politics. This is my goal, and I believe this amendment would accomplish that. I hope my colleagues will support it.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. HARRIS was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Mr. Chairman, what we do if we do not adopt this substitute is open up a system where all top management jobs could by Presidential decision be filled by political appointment. It means that anyone entering into the senior executive service where pay increases are not automatic under the theories of this bill would be in competition with political appointees with respect to such merit pay. We would be setting up a system diametrically opposed to the current system.

We are throwing out with this bill one of the concepts, one of the underlying principles of the civil service plan that we have developed over the last 80 or 90 years. We should not do this casually.

I urge my colleagues to adopt this substitute so we can give the administration the new vitality, the flexibility that they want, the mobility that they want, but not allow them to mix up political appointees and civil service merit employees in the same positions. If we do, I predict we will rue the day we do this probably as much as we rue the day we accepted the Postal Reform Act a few years ago.

Mr. Chairman, I urge we adopt this amendment.

Mr. DERWINSKI. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I would like to point out that I consider the facts of life in a Government as huge as ours, that any President has to have a few people in office that are politically loyalists and share the philosophy of the administration.

We cannot have a President come into office and have a totally neuter Federal civil service. That is really the philosophy behind the argument of the gentleman from Virginia (Mr. HARRIS).

But the facts of life are these: That these new Senior Executive Service people will be the troubleshooters, the management experts, and the key people who keep Government working. It stands to reason some outside expertise and some new blood—a transfusion, if you will—will be needed.

It also stands to reason that when they draw some assignments in areas where there might be some controversial administration programs, there be a certain commonsense factor relating to political loyalties. If anyone thinks we can run a government as large as ours and not have at least a handful of people with honest-to-goodness political loyalties, then they have their heads buried in the sand.

Basically, we provide the procedure whereby only 10 percent of these people will come in without competitive examinations, and the real concept of it is that at least those civil servants who are excellent administrators and who will voluntarily accept these assignments will not as such then be subject to political label if the next administration then comes in and inherits the program.

This amendment was thoroughly debated in committee. It was subjected to real good, sharp, clean debate. The political facts of life are that the mix we envision is necessary for the proper functioning of Government and the response of the bureaucracy to the President of the United States.

Mr. Chairman, I as a Republican strongly urge we reject this amendment and give the present President an opportunity to mix with the career civil servants an occasional political loyalist to do a tough job in a tough situation.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, the gentleman from Illinois (Mr. DERWINSKI) has stated the case against the amendment very accurately, and I associate myself with his remarks.

The heart of this bill is the career senior executive civil servant. The gentleman from Virginia (Mr. HARRIS) very vigorously represents the feelings of many of his constituents on this subject.

We debated this amendment thoroughly, and it was a major amendment offered in committee. The vote for the amendment was 2, and the votes against it were 21.

The present bill for the first time would limit political appointments to not more than 10 percent of the total positions in the executive service, and this would be the first time that such a limit existed. So we are not turning it all wide open; we are saying 90 percent would be career and 10 percent would be people who could be brought in from the outside.

Mr. Chairman, it would be a very dangerous blow to this legislation and it would drastically harm it if this amendment were adopted. I, therefore, urge its defeat.

Mrs. SPELLMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I am really surprised, after all these months of discussions concerning this bill, to hear anyone still saying only 10 percent of the Senior Executive Service will be political. That is not factual. The fact is 100 percent may be political appointees. Ten percent need not be qualified.

We can take our uncles who are carrying the trash today and make them part of the Senior Executive Service in that 10 percent. The other 90 percent is required to be qualified. Nevertheless all 100 percent could conceivably be political. That is quite different, and we should understand that.

I know that there was an amendment in the committee which our good colleague, the gentleman from New York, offered, limiting political appointees to no more than 25 percent in each agency but it did not pass the Senate. Since it did not, we cannot be sure it will survive in conference. As the bill came to us from the administration, it provided for a 100-percent political possibility—9,200 employees.

But what concerns me about this section is that this could very well be the beginning of the end of the separation of powers between the various branches of Government.

Let us consider what would happen if a President were to call on each of us for 20 very well qualified people whom he would then appoint. Then each time we disagreed with him, we would get a call and be reminded that some of our appointees were in danger of being fired. "It would be well," the President would urge, "for you to reconsider your decision to oppose my program."

Just a couple of weeks ago the Secretary of Agriculture was quoted as saying that some of the Members of Congress might find that, if they do not get into line behind the President, that their political appointees will be fired. I am happy to say that the President hastened to deny that he would do that, and I am also happy to say that the Secretary of Agriculture hastened to disclaim those words. But somewhere in the future there may very well be a President who would believe in doing just that, or a Secretary of Agriculture, or whatever, who would feel that this would be the way to conduct the business of the Government.

So I warn my colleagues that we really ought to take a long, hard look at this situation.

There is no reason why we cannot have really good qualified people carrying out the business of the Government without creating a spoils system which we might someday regret.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the gentleman from Virginia's substitute to title IV.

In my opinion, the most worrisome aspect of this legislation, next to the over concentration of authority in the Direc-

tor of the Office of Personnel Management, is the danger of the politicization of the Career Executive Service posed by title IV.

The gentleman from Virginia's substitute would alleviate this concern, a concern, I might add, which is shared by a number of the Members of this body, by insuring that only career executives would be appointed to positions within the SES.

Why is this necessary?

Title IV would give to Presidential appointees absolute power to significantly reduce the responsibilities and pay of career executives, including reassignment to an unwanted location, without any stated reasons or possibility of review by an impartial body. There is no restraint against ill-considered and arbitrary action. But perhaps even more important, this power in the hands of Presidential appointees will have the effect of denying to the American people the kind of responsible sharp criticism from career executives that over the years has been essential to both determining and serving the public interest when proposed policies, programs, and priorities are being debated within the agencies.

The Presidential appointees who would exercise this new power are for the most part exceptionally able and highly dedicated to the national interest. They constitute for our democratic process the vital link between the decisions of the electorate in choosing a President and the overall direction and management of the agencies. But it is a plain fact that many such appointees lack experience in public policymaking and in managing large organizations, and their initial perceptions of problems and alternative solutions are often cloudy, if not faulty. As the pressures and problems daily test the political-career relationships, it is important for the public interest that political appointees not have suffocating power over career executives: power that could be used intemperately, or to satisfy a special interest, or to provide a scapegoat for a poor decision made at a higher level. And we should have no doubt that when Presidential appointees have this power, even the vast majority who are well intentioned and competent will be subjected to pressure from many sides, often irresistible, to use the power to serve special interests rather than the public interest.

Career executives represent an important national resource which the Federal Government develops at considerable cost; their central commitment is to nonpartisan professional advice and the impartial administration of the laws, and both would be jeopardized by such a grant of authority.

The argument is made that this unrestricted power to reassign and reduce pay and responsibilities is needed for management flexibility and is no change from the present. But no evidence has been provided as to the widespread existence of real and important problems that this extraordinary grant of power would solve. Further, it is specious reasoning to argue that the unrestricted authority to reassign exists now and that there is no change. Title IV would combine five separate grades—GS–16, 17, and 18, and executive levels V and IV—into one Senior Executive Service without grades. Under existing law the Presidential appointee's absolute power applies only to reassignments from one position to another in the same grade and rank. This is completely different from authority to reassign to any job within the proposed Senior Executive Service. For example, unrelated to performance and simply to put someone else in the job who is more to his personal liking, the proposed unlimited power would permit a Presidential appointee to reassign a career executive from a position of Bureau Director in Headquarters now at level V or GS–18 to the position of Deputy Regional Director now at GS–16 and located some hundreds or thousands of miles from Washington. At the same time, the Presidential appointee could reduce the annual pay of the career executive by up to $8,000.

Advocates for this grant of power argue that top executives in large corporations have it, and so should Presidential appointees in order to encourage responsiveness. But the analogy is meaningless because no corporation could be successful if it lost its top three levels of executives every 2 to 4 years as the Federal agencies lose their Presidential appointees. This underscores the need for professionalism, objectivity, competence, and continuity of career executives to assure reasonable stability in the operations of Federal agencies.

Presidential appointees in the agencies occupy their positions for relatively short periods, and in their eagerness to exercise leadership by making changes in policies and operations, many often are impatient with career executives who disagree with them by identifying weak or undesirable elements in their ideas. They have a tendency, particularly in the first year or two of a new administration, to characterize such disagreement, or even questions, as evidence of unresponsiveness. The proposed new power for presidential appointees would send a clear signal to many career executives that if they do not want to be shipped out. they should not question or disagree with the views of their bosses. We would substitute a new generation of "agreeable" career executives for the constructively critical and politically neutral professionals who now serve this Nation well. A new quietness at the crucial point where political and career appointees should debate proposed policies, programs, and procedures would serve the Nation badly.

For these reasons, Mr. Chairman, I urge my colleagues to adopt the gentleman's substitute.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The amendment was rejected.

AMENDMENT OFFERED BY MR. SOLARZ

Mr. SOLARZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLARZ: Page 223, line 23, strike the words "before appointment to such positions".

Mr. SOLARZ. Mr. Chairman, I will be brief. This is a technical amendment. I think it has the support of the majority and minority managers of the bill. The legislation before us provides that at any given time at least 70 percent of the people in the Senior Executive Service have to serve 5 years in the Federal Government before being appointed to that position.

This amendment would provide instead that at any given time 70 percent of the people in the Senior Executive Service had to have served for 5 years in the Federal Government, period.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, this cleans up and clarifies what we were trying to do in committee, and moves a little bit in the direction of the concerns of the gentleman from Virginia (Mr. HARRIS). I think it is a good amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SOLARZ).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. STEERS

Mr. STEERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STEERS: Page 262, strike out line 16 and all that follows down through line 6 on page 263 and insert in lieu thereof the following:

(3) The amendments made by sections 401 through 413 of this title shall cease to have effect on or after the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to the Congress under paragraph (2) unless both Houses of the Congress have adopted a concurrent resolution which states in substance that the Congress favors the continuation of the Senior Executive Service.

Mr. STEERS (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with, and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. STEERS. Mr. Chairman, what this amendment does is terminate sections relating to the Senior Executive Service at the end of 2 years. Notice that at present the bill provides that the Senior Executive Service and the rest of the bill will be extended unless terminated. What this amendment would do is terminate unless extended.

I would like to point out to those Members present that this is an example of sunset legislation which many of us have at least given lip service to. Here is a chance to vote for it. Of course, we can always reconsider the matter, but this amendment will require us to reconsider the Senior Executive Service; it will give us the opportunity to put it out of existence.

I, of course, feel it should be put out of existence as soon as possible.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

This would be a disaster to the Senior Executive Service concept. It is going

to take about a year to 15 months to set up the system. We are trying to attract into it the permanent career people, and we are telling them to cut their moorings, leave all they have and join this exciting new innovative service, and the whole thing is going to go down the drain in 2 years.

It will take at least 4 or 5 years to give this a fair trial. We went along in committee with a somewhat similar amendment offered by Mrs. SPELLMAN. This, in my judgment, destroys it. There would be no chance of getting the kind of people we want in the Senior Executive Service if it is a 2-year trial. It would hardly be on the way.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. STEERS).

The amendment was rejected.

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Texas: On page 258, line 7: strike out 10,920 and insert in lieu thereof "10,780".

On page 258, line 13: strike out "Management" and insert in lieu thereof the following: "Management, except that the Director of the Federal Bureau of Investigation, without regard to any other provision of this section, may place a total of 140 positions in the Federal Bureau of Investigation in GS–16, GS–17 and GS–18."

Mr. COLLINS of Texas. Mr. Chairman, I submit this amendment with Mr. LEVITAS of Georgia and Mr. VOLKMER of Missouri.

By reason of its unique responsibilities, the FBI has historically been afforded a measure of exemption from overview of the Civil Service Commission regarding personnel policies and authorizations. At present the FBI and all positions therein are in the excepted service (title 28 U.S.C. 536) and the Director is authorized to place up to 140 positions in the Bureau into grades GS–16, GS–17 and GS–18 (title 18 U.S.C. 5108 c2). Further, it has been the policy of the Department of Justice that the Director have complete latitude in managing the personnel policies and functions of the Bureau below the rank of Assistant Director, subject only to post-audit and correction by the Assistant Attorney General for Administration (title 28 CFR X, 0.137).

The effect of the FBI's excepted status is to remove it from the purview of the Civil Service Commission in such areas as recruitment, qualification standards, promotional requirements, internal placement, career and career-conditional employment, and temporary assignments. The authorization afforded to the Director to manage the executive manpower of the FBI, its supergrade employees, is central to this degree of independence. It insures that the FBI may respond in a prompt, flexible, and unfettered manner to the investigative priorities provided it by the Attorney General without need to obtain concurrence of other agencies or authorities.

Given the demanding, sensitive, and unique responsibilities of the FBI, particularly its role as the primary investigative arm of the Department of Justice, there is ample rationale for providing it as great a degree of insulation with regard to its personnel function as is practical. This consideration is most important when consideration is afforded the role of the FBI as the Department of Justice's primary investigative arm for 78 public integrity violations of the criminal statutes of the United States.

Since these violations, by definition, involve misconduct on the part of officials of the U.S. Government the most prudent course for the future would appear to be to insure that the FBI is not dependent upon other agencies in such important matters as executive staffing levels. To do otherwise detracts from the ability of the Attorney General to fully utilize the investigative capabilities of the FBI in a manner he believes best serves the interests of the United States.

This amendment is fair and consistent. It places the FBI on the same basis as the CIA, the National Security Agency, Defense Intelligence, and the GAO. For our national security, I ask your full support for the FBI amendment.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the FBI is a good organization, a good professional organization, and it has been beleaguered in recent years. I know many Members have been concerned about it and many people have been lobbied by the FBI and their friends on these amendments.

I was determined today in this debate that nobody was going to have any legitimate ground to complain that the FBI had not been given everything they were entitled to and had been given all the exemptions they needed to perform their mission.

This morning I accepted an amendment that gave the FBI, I thought, everything they could ask for within reason. The FBI has been totally exempted from the Senior Executive Service and they have been given a total exemption from title VI, which had concerned them about demonstration practices and experimental efforts. We gave the President authority to exempt them from the standard personnel practices and standard provisions of the Personnel Act, and the President will exercise that.

We gave them the special authority this morning, in an amendment I agreed to, to let the President set up their own whistle-blower system so that appeals would not be to the outside but to the Attorney General.

Now they want it all. I do not think they are entitled to this amendment.

What are we talking about here? We are talking about supergrades. One of the worst things that has happened in the last few years is the end runs around the supergrade pool. The idea was to have one supergrade pool for all Government, and when an agency completes its mission and may not need all the supergrades it had, then those executives would transfer to another agency. Or an agency may need an increase. They could move them around. But what has happened is this. If we were dealing, for instance, with the Park Service, we would say to them that notwithstanding the pool they get 140 supergrades in this service here.

Then the next agency would come in, NIH, the Smithsonian, or the Labor Department, and they will all want their own little pools.

Today about 80 percent of the supergrade positions are outside the pool and the pool is really a joke because under existing law we give special exemptions to the FBI, to the GAO, the Library of Congress, the Secretary of Defense, the Immigration Service, NASA, Bureau of Prisons, Railroad Retirement, OSHA, the Law Enforcement Administration, the Tax Court, IRS, EEOC, they all have their own little supergrade pool.

So the bill before us would abolish all of them and we would just have one governmentwide pool. Each one of the agencies will come in, and they will say here is what we need. Then the Office of Personnel Management will evaluate the need.

But now, in this amendment, it is proposed that we give the FBI a special pool of 140 supergrades, and as of now, they will be the only agency in the whole bill that has been separately singled out, and the Members will say why single the FBI out, why not the defense agencies, the Defense Department and everybody else? They will all be in one separate pool, but the FBI will be treated separately.

So, I repeat, if we accept this amendment, I guarantee that before the evening is out, I think that every one of you will be on your feet trying to single another agency out because there is not a Member in the whole House who does not have his own special agency and who thinks they ought to have their own pool, forever and ever, world without end, amen.

So, if we are going to do this and get this problem settled, then let us do it right, and let us not start eroding it with the FBI, let us start out with a supergrade Government-wide overall pool, and with all of the agencies and their supergrades treated alike.

We have done that in this bill. I repeat, let us start with a good supergrade proposal. But, if we start out by singling out one particular department, and get that chain in the door, then we will not be able to stop the flood.

Mr. VOLKMER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Texas (Mr. COLLINS).

Mr. Chairman and members of the committee, I do not plan to take the full 5 minutes in support of this amendment, however, as one who has tried to keep up with this legislation because of its known importance to this Nation and make it possible to restore public confidence in our National Government, and the operation of that Government by the separate individuals in it, and also to get better and still better operations through our public employees, and our Federal Government, as I say. I have tried to keep up with it, and specifically in this one area, and I have done so because I have been a member of the subcommittee that also has jurisdiction and oversight of this

agency, and also as one who has been involved in law enforcement, I have a great feeling for this agency. I realize that this agency must remain independent.

I must disagree with the gentleman from Arizona in that respect, and, in my opinion, if this amendment is not adopted, there will be a backing away from the independence of the FBI and thus cause harm to the criminal law enforcement in our Federal Government. I say that because the FBI is the one that investigates all of the other agencies of the Federal Government such as we have right now going on with the GSA.

It is the one agency that investigates the wrongdoings in the Federal Government, the white-collar crimes. If such a thing would occur, let us say, within the Civil Service Commission itself, then it would be investigated by the FBI. So, in my opinion, this could jeopardize that agency.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER Yes, I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I agree with everything that the gentleman is saying about the special role of the FBI. It is a good, honest agency, and I will praise it and I will defend it, but why, can the gentleman give me one reason why this agency out of all of the other agencies, not even the defense departments, not OSHA, not NASA, should have its own separate pool of supergrades? Why should this one agency be treated differently?

Mr. VOLKMER. That is because they are the agency that does the investigating of wrongdoings within the Federal Government.

Mr. UDALL. But what does the number of supergrades in that agency have to do with its ability to investigate wrongdoings?

Mr. VOLKMER. So that it will not depend on any other agency which it may have to investigate, including the Civil Service Commission.

I had been informed, and as a result of what happened this morning, I had discussed this matter with the man on the staff of the gentleman from Arizona, the man sitting next to him during the debate on that substitute, because I was concerned specifically about this point.

It was my understanding this morning when it was first brought up it included this provision. It was not until after that was all done that I determined that it did not, and I was greatly upset about it.

I had discussed it with our Attorney General. He is greatly upset about it, about the fact that this is not included.

I discussed it today with him. I have also been informed by another source, which I feel to be very reliable, that the Chairman of the Civil Service Commission has no objection to this amendment.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Chairman, I just came back on the floor. I am shocked.

Is the gentleman saying that Attorney General Griffin Bell discussed with him amendments to the President's civil service reform bill?

Mr. VOLKMER. I will emphatically say yes, y-e-s.

Mr. FORD of Michigan. Is the gentleman saying that the Attorney General is lobbying amendments into this bill?

Mr. VOLKMER. No, I am not saying that he is lobbying at all. I called him up. We discussed it among other things in which I am interested.

Mr. FORD of Michigan. The gentleman said that he is upset about the contents of the amendment this morning?

Mr. VOLKMER. Yes, because this was not included. I thought it was.

I talked to the staff man of the gentleman from Arizona. He is sitting right next to him. There was a misunderstanding there because when the gentleman answered me, at my request—and I am not blaming him—there was a misunderstanding. When he spoke to me he said it was the same as in the bill. It was my understanding that it was the same as in the present law.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, there was an obvious misunderstanding.

I gave them everything they want, their independence and their exemptions from the system. What I cannot understand is of all of these dozens of agencies in the Government, this one agency has to have supergrades when we are trying to set up a system under which no one has.

Mr. VOLKMER. It is so that it remains solely independent as a law enforcement agency, as it should.

Mr. GOLDWATER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I think there is ample precedent here to exclude the FBI from this provision, especially in the higher grades we are talking about.

The FBI has a very unique mission with respect to law enforcement. These individuals are not just civil servants. They are very specialized. They are very narrowly categorized. They require a very special kind of training, and their mission is of the highest order. Certainly their responsibility and authority are important activities which we are dependent upon, not only for our security, but also for internal vigilance.

Mr. Chairman, it just seems to me that it makes a lot of commonsense that if we are going to continue the type of organization which we expect the FBI to be, that agency should have full control and authority over the type of personnel whom they are going to be relying upon for life and death and the security of this country and certainly for the internal vigilance which we expect. It just seems to me that this makes a lot of commonsense. I think we ought to support the amendment.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. GOLDWATER. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, may I pose this question: What do I say and how is the gentleman going to vote when the gentleman from Oregon wants to give the Forest Service its pool of supergrades?

The gentleman from California contacted me last week. He is on the board of the Smithsonian, and they want their own pool. What am I going to say to the CIA when somebody from the Committee on Intelligence gets up tonight and says that they are a special agency and they want their own allocation?

Will the gentleman join me in voting for all those amendments, or does he think the FBI is a special agency and it alone has to have a carved-out pool of supergrades?

Mr. GOLDWATER. I would agree with the gentleman in saying that the FBI is unique in the mission which they are set up to do.

Mr. UDALL. Does the accomplishment of the mission of the FBI depend on whether the President says they can get by with 135 supergrades or whether they have to have 140?

Why should this one agency alone, in the accomplishment of its mission, be dependent on having this number carved out for it, world without end, with no limit on it?

Mr. GOLDWATER. I would suggest to my friend, the gentleman from Arizona, that this agency's mission is of the highest priority as far as national security, as far as internal vigilance, and as far as law enforcement is concerned. It is a prime and singular agency. It does nothing else but pursue that particular mission.

Mr. UDALL. How is the accomplishment of that mission dependent upon the number of supergrades it has?

Mr. GOLDWATER. It depends on the quantity and the quality of personnel. I think that is that we are talking about here, and I think only those who have that responsibility of directing the FBI and its people really know and understand what is needed in this area. I think it is going to be completely confusing if we interject another sector such as OPA into it. I urge support of the amendment.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

I have a feeling that this debate is getting totally out of control in the sense of our all appreciating precisely what the amendment does and precisely what classifications of positions are involved.

The gentleman from Arizona (Mr. UDALL) has properly ponted out that heretofore every committee, every subcommittee, has played around like little crown princes knighting people and sending then off as supergrades. As a result, all through Government in every appropriation and authorization bill we are creating supergrades. Nobody has a hold on them—not even the President or the Office of Management and Budget—nobody. So what we have got in this bill is an attempt to pull them all together.

As I understand the supporters of the amendment, they seem to feel that we are going to put 140 misfits into the FBI. That is not the case at all. All that is going to happen is that the FBI under this reformed structure will in fact request the number of supergrade slots it wishes to have designated. They will be FBI agents, the agents in charge, for example, in the major cities, and we are not going to send a diet technician from Walter Reed Hospital to be the agent in charge of Phoenix, Ariz. He will be a career FBI law enforcement officer there. So the Members are reading into this a lot of things that are not there. But the point the gentleman from Arizona (Mr. UDALL) has made is one we should all follow. For example, our friend, the gentleman from Oregon, is going to take care of the Forest Service. Then there might be those Members who are interested in protecting the chief judge of the U.S. Tax Court. He has five supergrades. Why not let the chief judge rather than his pool handle that? What about the Commodity Futures Trading Commission? That is one of our newest little bureaucracies. They have 20 supergrades. Why should they not be excluded, and just have the farm interests? We go on and on and on.

So I would suggest the point the gentleman from Arizona (Mr. UDALL) is making is a sound one. What we have here is legitimate control of total numbers. The allocation will be practical. The allocation will take into account the expertise needed in the departments, and in the case of the FBI we are going to have the FBI in effect redesignate—and it is 140 or even more, if they can justify it—and they are not going to be square pegs in round holes. They are going to be good, loyal law enforcement officers, and the fear that somehow the FBI is going to be directed or administered by a bunch of locomotive engineers, not all law enforcement officers, just is not the case.

I appreciate the superconcern about the FBI. I do not want the FBI politicized. I do not want the FBI mishandled. I do not want it criticized, but I think we have greatly exaggerated the presumed danger of the FBI in the arguments against the position the gentleman from Arizona (Mr. UDALL) enunciated.

Mr. COLLINS of Texas. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. I thank the gentleman for yielding.

On page 213, just for clarification, it has been said that only the FBI is concerned. On the top of page 213 it refers to the exclusion. It sets up the terms, definitions, and exclusions, and it says the Central Intelligence Agency, the Defense Intelligence Agency, and the National Security Agency. They talk about the security agencies.

Mr. UDALL. Mr. Chairman, will the gentleman yield to me?

Mr. DERWINSKI. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

The gentleman from Texas (Mr. COLLINS) is making my precise point. In the bill as it came out of the committee we excluded the CIA. We said they are not even in the Senior Executive Service. This morning we did that for the FBI. We gave them complete exclusion from the SES. We excluded them from titles I and II. We took them out of the whistle-blower, and the only thing left here is whether they are going to have carved out a specific number of supergrades that will go to the President, and the pool will get all they need. But they should not be singled out forever to have an allocation. The thing the gentleman is talking about was taken care of in the amendment this morning. The FBI is the same as the CIA.

Mr. COLLINS of Texas. If the gentleman from Illinois would yield further to me, is the gentleman telling me in these categories they have no supergrades at all in any of these agencies?

Mr. UDALL. Nobody would have an allocated permanent pool of supergrades under this rule, and we are trying to hold that line.

Mr. DERWINSKI. What we are speaking of here is the Senior Executive Service. The Senior Executive Service will not be running the FBI.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. COLLINS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. COLLINS of Texas. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee of the Whole appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Texas (Mr. COLLINS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 124, noes 217, answered "present" 1, not voting 90, as follows:

[Roll No. 750]

Messrs. BROOKS, STOKES, and ABDNOR changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think we can finish this bill this evening in a couple of hours. We are on title IV. The bill has eleven titles, but most of the remaining controversy is in title VII, the labor-management section.

Therefore, Mr. Chairman, I ask unanimous consent that all debate on title IV and all amendments thereto close at 9:45 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. DUNCAN of Oregon. I will be glad to reconsider after we see how many of the pending amendments are affected, but for now I object.

Reserving the right to object, Mr. Chairman, how many more amendments are pending, if the gentleman knows?

Mr. UDALL. There are a large number of amendments which have been noticed. I do not think that very many of them will be offered. I have no way of telling.

I think that the amendments which Members seriously want to offer will get an opportunity to be offered in this period of time. Most Members with major amendments have already printed them in the CONGRESSIONAL RECORD, and they would be outside the limitation, in any event.

Mr. DUNCAN of Oregon. They would be outside the limitation with respect to the 5 minutes which the sponsor is entitled to.

Mr. Chairman, until we can get some more information as to the number pending and going to be considered, if there is a large number pending, I think a half hour is unreasonable on a bill of this magnitude.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. DUNCAN of Oregon. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I especially appreciate that there has been a kind of bipartisan support and opposition to this bill. However, I have looked over all of the pending amendments; and really, as the gentleman from Arizona indicated, the gut issues are in title VII. The remaining amendments to titles IV, V, and VI may be important to some individual Member, but they are not going to alter the direction of the Republic.

Mr. Chairman, I really think we could expedite the relatively noncontroversial titles, and we could do a good job on the one tough title remaining.

Mr. DUNCAN of Oregon. Further reserving the right to object, Mr. Chairman, I am interested, as I know a number of other Members are, in a specific amendment which I think should be relatively noncontroversial. If the chair and the ranking minority member would study it and give us some assurance that it would be accepted, I should think in that instance a half hour would be plenty of time.

Mr. UDALL. If the gentleman will yield, Mr. Chairman, I will say to the gentleman that I do not think I am going to accept the amendment he refers to. However, we can process it very quickly. It is not complicated. I think that in 3 or 4 minutes the Members will be able to make a sensible decision on it.

Mr. DUNCAN of Oregon. Mr. Chairman, I will be constrained to withdraw an objection at a later time, but at this point I am constrained to object.

The CHAIRMAN. Objection is heard.

AMENDMENTS OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer five amendments.

The Clerk read as follows:

Amendments offered by Mr. GILMAN: Page 212, line 21, strike out "and".

Page 212, line 23, strike out "executives." and insert in lieu thereof "executives;".

Page 212, insert after line 23 the following:

"(12) insure career appointees and, to the greatest extent possible, noncareer appointees, protection from prohibited personnel practices;

"(13) provide for a professional management system which is guided by the public interest and free from improper political interference; and

"(14) insure that, notwithstanding the provisions of section 3134 of this title authorizing up to 10 percent of Senior Executive Service positions to be filled by noncareer appointees, political appointments to such positions are minimized to the maximum extent possible.".

Page 228, strike out lines 10 through 12 and insert in lieu thereof the following:

"(e)(1) Except as provided in paragraph (2) of this subsection, a career appointee in an agency may not be involuntarily reassigned—

"(A) within 120 days after an appointment of the head of such agency; or

"(B) within 120 days after the appointment in such agency of such career appointee's most immediate supervisor who—

"(i) is a noncareer appointee; and

"(ii) has the authority to reassign such career appointee.

"(2) Paragraph (1) of this subsection does not apply with respect to—

(A) any reassignment under section 4314 (b) (3) of this title; or

(B) in the case of any appointment referred to in paragraph (1) (A) or (B) of this subsection, any disciplinary action initiated before such appointment.

Page 232, line 12, strike out "A career appointee" and insert in lieu thereof "Except as provided in subsection (b) of this section, a career appointee".

Page 232, after line 19, insert the following:

"(b)(1) Except as provided in paragraph (2) of this subsection, a career appointee in an agency may not be involuntarily removed—

"(A) within 120 days after an appointment of the head of such agency; or

"(B) within 120 days after the appointment in such agency of such career appointee's most immediate supervisor who—

"(i) is a noncareer appointee; and

"(ii) has the authority to remove such career appointee.

"(2) Paragraph (1) of this subsection does not apply with respect to—

"(A) any removal under section 4314(b) (3) of this title or;

"(B) in the case of any appointment referred to in paragraph (1) (A) or (B) of this subsection, any disciplinary action initiated before such appointment.".

Page 232, line 20, strike out "(b)" and insert in lieu thereof "(c)".

Page 227, line 3, insert "(1)" after "(a)".

Page 227, line 4, strike out "(1)" and insert in lieu thereof "(A)" and insert ", subject to paragraph (2) of this subsection," after "may".

Page 227, line 7, strike out "(2)" and insert in lieu thereof "(B)".

Page 227, after line 10, insert the following:

"(2) A career appointee may be reassigned to any Senior Executive Service position only if the career appointee receives a written notice of such reassignment—

"(A) at least 15 days in advance of such reassignment; and

"(B) containing a statement of the critical reasons for such reassignment.

Any career appointee who is reassigned in violation of subparagraph (A) of this paragraph may appeal such violation to the Merit Systems Protection Board.".

Page 245, after line 15, insert the following:

"(d) The rate of basic pay for any career appointee may be reduced from any rate of basic pay to any lower rate of basic pay only if the career appointee receives a written notice of such reduction—

"(1) at least 15 days in advance of such reduction; and

"(2) containing a statement of the critical reasons for such reduction.

Any career appointee whose rate of basic pay is reduced in violation of paragraph (1) of this subsection may appeal such violation to the Merit System Protection Board.

Page 228, insert after the line 12 the following:

"(f) A career appointee may be transferred only if—

"(1) he consents to the transfer; and

"(2) the transfer is part of a program designed to enlarge the responsibilities of

the career appointee and to advance his career in the Senior Executive Service.

No adverse personnel action shall be taken against a career appointee who exercises his right under this subsection to not consent to such a transfer. Any career appointee against whom an adverse personnel action is taken in violation of this subsection may appeal such personnel action to the Merit Systems Protection Board.

Page 215, strike out lines 4 through 11 and insert in lieu thereof the following:

"(8) 'career reserved position' means a Senior Executive Service position which is designated under subsection (b) of this section as a position to which a career appointee may be appointed;

"(9) 'general position' means any Senior Executive Service position which is not a career reserved position.

Page 215, beginning on line 15, strike out "career reserved positions." and all that follows down through "Government." beginning on line 19, and insert in lieu thereof "Senior Executive Service positions to which career appointees may be appointed.".

Page 215, line 21, strike out "career reserved" and insert in lieu thereof "such".

Page 215, line 24, insert after "appointee." the following: "Any other Senior Executive Service position may be filled only by a noncareer appointee, limited term appointee, or limited emergency appointee.".

Page 219, line 4, strike out "noncareer appointments" and insert in lieu thereof "general positions".

Page 219, beginning on line 6, strike out "employment of noncareer appointees" and insert in lieu thereof "general positions".

Page 219, beginning on line 11, strike out "authority to employ a specific number of noncareer appointees" and insert in lieu thereof "a specific number of general positions".

Page 219, strike out lines 13 through 18 and insert in lieu thereof the following:

"(b) The number of general positions in each agency will be determined annually by the Office of Personnel Management on the basis of demonstrated need of the agency for such positions, except that the total number of general positions in all agencies may not exceed 10 percent of the total number of Senior Executive Service positions in all agencies.

Page 219, strike out "Senior Executive Service" on line 19 and all that follows down through "appointees" on line 20 and insert in lieu thereof "general positions".

Page 222, in the matter following line 15, strike out "noncareer appointments" in the item relating to section 3134 and insert in lieu thereof "general positions".

Page 223, line 9, insert "'career reserved position'," before "and 'general position'".

Page 227, beginning on line 4, strike out "Senior Executive Service position" and insert in lieu thereof "career reserved position".

Page 227, beginning on line 7, strike out "Senior Executive Service position" and insert in lieu thereof "career reserved position".

Page 227, line 12, strike out "Senior Executive Service position" and insert in lieu thereof "general position".

Page 227, line 18, strike out "Senior Executive Service position" and insert in lieu thereof "general position".

Page 254, line 25, strike out "title)." and insert in lieu thereof "title), and such position shall be considered a career reserved position.".

Page 256, line 7, strike out "position." and insert in lieu thereof "position, and such position shall be considered a career reserved position."

Page 256, line 19, strike out "appointment;" and insert in lieu thereof "appointment, and such position shall be considered a general position.".

Mr. GILMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, I am offering five amendments to title IV.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, if the gentleman will save us a little time by not making a speech on the amendments, I am prepared to accept them.

Mr. GILMAN. Mr. Chairman, I appreciate the gentleman's kind offer. I think, though, for the benefit of the House there should be just a brief explanation of the five amendments so that we will know what the amendments are.

My first amendment establishes three important principles in the administration of the Senior Executive Service.

Section 3131 of title IV sets forth 11 principles to guide the administration of the Senior Executive Service. I propose to add three new principles to his section. Principle No. 12 would insure that career appointees and, to the greatest extent possible, noncareer appointees, protection from prohibited personnel practices. The purpose of this is to bring the Senior Executive Service under the umbrella of protections accorded employees by virtue of section 2302 of title I which enumerates specific practices which may not be engaged in and for which an individual shall be disciplined if these prohibited actions occur.

Principle No. 13 represents a policy statement advocating maximum utilization of career service employees. H.R. 11280 authorizes a ceiling of 10 percent for the placement of political appointees. The 10-pecent ceiling should not become a goal of each administration. I hope the goal of placement in the Senior Executive Service will center on individual qualifications for Government service. Therefore, maximum placement of career employees will be in the best public interest.

The final principle states a goal for the Senior Executive Service. I believe that statement is self-explanatory and self-supporting. The change establishes as Senior Executive Service policies: "Goals for a professional management system and the necessity to assure career members protection from prohibited personnel practices."

Subsection 3395(e), which provides that a career appointee may not be involuntarily reassigned or transferred within 120 days following the appointment of an agency head, admits a loophole. This provision should relate to the time of appointment of a Presidential appointee to whom the career official reports and not to the agency head, because most career officials report to a Presidential appointee under an agency head.

My second amendment amends subsection 3395(e) to provide that a career appointee may not be involuntarily reassigned or removed from the Senior Executive Service within 120 days after an appointment of the head of his or her agency, or within 120 days following the appointment of a Presidential appointee to whom the career appointee reports, whichever is later in time.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield for an observation?

Mr. GILMAN. I am pleased to yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

I think the gentleman is on the verge of getting a unanimous vote for his series of amendments. I have read those statements earlier, and I can assure the Members that these are fine amendments. Let us accept his amendments.

Mr. GILMAN. I thank the gentleman for his kind remarks, but I do think that since this is such an important measure to the administration and since the acting chairman has indicated that there is a sense of urgency in adopting this measure, that it is important to the House to know exactly what the measures are that they are voting upon. Accordingly, if I may proceed:

My amendment makes clear that corrective action initiated under subsection 4323(b)(3) prior to changes in supervisory personnel may continue or any disciplinary action initiated before such appointment.

This amendment was suggested by the National Academy of Public Administration and is along the lines of an amendment suggested by the administration.

My third and fourth amendments would have the effect of precluding arbitrary action by a Presidential appointee against a career appointee in the SES involving a change in either the career appointee's reassignment or reduction in pay by insuring that any such change, first, be preceded by 15 days' notice; second, be accompanied by a statement detailing the critical reasons for the reassignment or reduction in pay; and third, if timely notice is not accorded the career executive, the career executive would be permitted to complain of such action to the Special Counsel or the MSPB.

My fifth amendment limits the right of the Director of OPM or an executive department or agency to transfer a career appointee. First, a career appointee may not be involuntarily transferred. Second, if a transfer is proposed and consented to by a career appointee, the transfer must be part of a program designed to enlarge the responsibilities of the career appointee and to advance his career in the SES.

Mr. Chairman, in the interests of further perfecting this measure, I urge my colleagues to adopt these amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. GILMAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. GILMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendments were rejected.

AMENDMENT OFFERED BY MR. FISHER

Mr. FISHER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISHER: Page 225, strike out line 15 and all that follows down through line 24 and insert in lieu thereof the following:

"(c)(1) The Office of Personnel Management shall establish one or more qualifications review boards, as appropriate. It is the function of the boards to certify the managerial qualifications of candidates for entry as career appointees into the Senior Executive Service in accordance with regulations prescribed by the Office of Personnel Management. Of the members of each board—

"(A) At least one-half shall be appointed from among career appointees; and

"(B) Up to one-half may be appointed from outside the civil service.

Appointments to such boards shall be made on a non-partisan basis, the sole selection criterion being the professional knowledge of public management and other appropriate occupational fields of the intended appointee.

Mr. FISHER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Mr. Chairman, I will be very brief. I believe there is no objection to this amendment. It would make some improvement in the way the Qualification Review Board operates.

Mr. Chairman, these qualification review boards play a key role in the SES. They certify the managerial qualifications of candidates for the SES. Knowledge of Government management is the primary qualification for appointment. Because persons who have had experience in the civil service really know the most about the requirements of SES positions, I believe it would be desirable that half the members of the qualification review boards be career employees.

This is at the critical level where SES persons are selected. Knowledge and experience in the career service are essential. I urge a vote for this amendment.

Mr. UDALL. Mr. Chairman, if the gentleman will yield, we accept the amendment.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from Virginia (Mr. FISHER) is agreed to.

Mr. BAUMAN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The question is on the amendment offered by the gentleman from Virginia (Mr. FISHER).

The question was taken; and on a division (demanded by Mr. SYMMS) there were—ayes 59, noes 11.

Mr. BAUMAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. One hundred seventeen Members are present, a quorum.

The pending business is the demand of the gentleman from Maryland (Mr. BAUMAN) for a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

The CHAIRMAN. Are there further amendments to title IV?

AMENDMENTS OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, with some trepidation, I offer a series of amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Page 238, line 8, strike out "service" and insert in lieu thereof the following: "service, including any significant reduction in paperwork".

Page 265, line 9, strike out "service" and insert in lieu thereof the following: "service, including any significant reduction in paperwork".

Page 267, line 21, insert after "operations" the following: "or achieves a significant reduction in paperwork".

Page 268, line 6, insert after "operations" the following: "or achieves a significant reduction in paperwork".

Page 270, insert after line 16 the following new section:

INCENTIVE AWARDS AMENDMENTS

SEC. 502. (a) Section 4503(1) of title 5, United States Code, is amended by inserting after "operations" the following: "or achieves a significant reduction in paperwork".

(b) Section 4504(1) of title 5, United States Code, is amended by inserting after "operations" the following: "or achieves a significant reduction in paperwork".

Page 270, line 18, strike out "Section 502." and insert in lieu thereof "Sec. 503.".

Page 272, line 19, strike out "Sec. 503." and insert in lieu thereof "Sec. 504.".

Page 130, in the table of contents, strike out the items relating to sections 502 and 503 and insert in lieu thereof the following:

Sec. 502. Incentive awards amendments.
Sec. 503. Technical and conforming amendments.
Sec. 504. Effective date.

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. Mr. Chairman, I wish to commend the committee for its hard work on this very complex bill. Clearly, this is an important issue and one that demands close and careful scrutiny. This truly is our golden opportunity to reform the civil service system and we must be sure to do all that we want to and nothing that we do not want to do.

It is in this spirit that I ask the House to consider making a reduction in the level of Federal paperwork part of the goals of the civil service reform bill. I have pending two amendments, to titles IV and V, which would make reduction in paperwork one of the criteria for eligibility in the various incentive programs for Federal employees that exist in present law and that would also be established by this bill.

There can be no doubt that we all are aware of both the facts about the extent of Federal paperwork and the public's feelings about that situation. According to OMB, Americans spend a total of 785 million hours a year filling out 4,987 different Federal forms. The Commission on Federal Paperwork estimates that Federal forms cost about $100 billion a year to file and process, or $500 for every American citizen. Broken down, this works out to annual expenditures of from $25 to $32 billion by industry, $8.7 billion by individuals, $5 to $9 billion by State and local governments, and $43 billion by the Federal Government itself. The worst-case example might well be the filing of an application to operate a nuclear powerplant, which can take more than 55,000 hours, or the work of 27 people working 40-hour weeks for a year.

Clearly, this excessive paperwork does not gain us anything. I think, then, that it makes sense to build into the civil service system an incentive to reduce paperwork. My amendments would do this by including paperwork as a criterion for eligibility for the merit pay and cash bonus awards established in the bill for the GS levels 13 through 15 and as a criterion for the achievement ratings to be conducted under the new Senior Executive Service, for GS levels 16 through 18 and for the executive levels through level V. In addition, I would amend the existing incentive awards program to make paperwork reduction an eligibility determinant.

I believe this approach, rather than a new regulatory statute, emphasizes individual initiative, the way America has traditionally solved so many of its pressing problems in the past. Although conceivably we would be expending some funds in the recognition of paperwork reduction, it is certain that the long-term benefits and savings would more than justify any small payment to a Federal employee. The savings would come first from reduced Federal printing costs, then reductions in handling and processing of the paper; in addition, of course, the person dealing with the paperwork would be saved excessive expenditures to file the materials.

Most importantly, perhaps, the resultant reduction in paperwork would help restore people's faith that the Government serves them, rather than the other way around. The most frequent point of contact between citizens and the Federal Government is the exchange of paper, whether it is in the filing of tax returns, the application for a Federal grant, or the application for some benefit, such as medicare or social security. The tremendous load of paper involved in each of these transactions plays a key part in discouraging people, in making them feel that the Government has lost touch with the needs of people and has become too involved in regulation and meaningless detail. It is precisely this feeling

that underlies the sense of apathy or alienation that we each see so frequently in our capacities as representatives. If we can do anything to alleviate or even reverse that trend, we will have made a real achievement indeed.

It is my feeling that by giving every Federal civil servant from GS-1 to Executive Schedule V a reminder that she or he has a responsibility to try to reduce paperwork and an incentive to do so that we have a real chance to do just that.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, as far as these amendments are concerned, I wish they would have been presented in committee. They would have been adopted by a wide vote margin.

The amendments will use paperwork as a criterion for the bonus, and they make available the criteria for determining performance, since we are going to take into account innovative ways to save paperwork.

Mr. Chairman, I think these amendments are a good addition, and I am strongly in favor of them.

Mr. DERWINSKI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, some years ago our committee produced a work called "The Paperwork Jungle," and it was so thick that most Members developed eyestrain trying to read it.

Mr. Chairman, these are practical amendments and I think they will be helpful to the bill and to the operation of our Federal Government. They are fine amendments and should be adopted.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California (Mr. PANETTA).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: On page 219, between lines 3 and 4, insert the following:

"(f)(1) Not later than one hundred and twenty days after the date of the enactment of the Civil Service Reform Act of 1978, and from time to time thereafter as the Director of the Office of Personnel Management finds appropriate, the Director of the Office of Personnel Management shall establish, by rule issued in accordance with section 1103 (b) of this title, the number of positions out of the total number of positions in the Senior Executive Service, as authorized by this section or section 413 of such Act, that are to be career reserved positions. Except as provided in paragraph (2), the number of positions required by this subsection to be career reserved positions shall not be less than the number of positions which, prior to such date of enactment, were authorized to be filled only through competitive civil service appointment.

"(2) The Director of the Office of Personnel Management may, by rule, designate a number of career reserved positions which is less than the number required by paragraph (1) only if he determines it necessary to designate as a general position a position which—

"(A) involves policymaking responsibilities which require the advocacy or management of programs of the President and support of controversial aspects of such programs;

"(B) involves significant participation in the major political policies of the President; or

"(C) requires the executive to serve as a personal assistant of, or adviser to, a Presidential appointee or other key political figure. The Director shall provide a full explanation for his determination in each case.

"(3) All positions in and hereafter established in the senior executive service shall be designated as career reserved positions for the Fish and Wildlife Service, the Bureau of Land Management, and the Park Service of the Department of the Interior and the Forest Service and Soil Conservation Service of the Department of Agriculture."

Mr. WEAVER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. WEAVER. Mr. Chairman, although the administration proposes that at any one time, no more than 10 percent of all executive positions could be occupied by political appointees, with the exception of a relative small group of career reserved positions, all other positions could be filled by a career or noncareer appointee. The Senate in their consideration of the legislation had a similar concern and adopted an amendment—CONGRESSIONAL RECORD August 24, 1978, p. 27560-27562—which provides that within 120 days of the effective date of the Civil Service Reform Act, the Director of the Office of Personnel Management, by rule and in accordance with the rulemaking provisions of the Administrative Procedure Act, must specify the number of positions in the Senior Executive Service that are to be career reserved positions. That number can be no less than the number of positions that can today be filled only through competitive civil service appointment. This means that the Director of the OPM will designate approximately 5,100 of the almost 9,000 positions in the Senior Executive Service that will be career reserved. The Director of the OPM is given the authority in the amendment to reduce the number of career reserved positions by designating them general positions under certain specific conditions. I endorse and offer a similar amendment.

I have however added one additional provision to the amendment, a provision to provide for career reserved status for positions in the Senior Executive Service responsible for directing public lands and resources programs in the National Park Service, Fish and Wildlife Service, Bureau of Land Management, Forest Service, and the Soil Conservation Service.

Successful natural resources management requires skilled coordination of many professional disciplines. Because of their long-term nature, natural resources programs must have continuity of support and direction. I firmly believe that this best can be accomplished by clear separation of the policy formation and policy implementation levels in Government. Policy formation should continue to be met at the Assistant Secretary and above levels.

My amendment would not preclude reassignment of high-level employees of those agencies. But their replacements, who could be appointed to meet an administration's policy objectives, would be required to be selected from those with career status. The amendment would provide the administration an opportunity to select top agency personnel having compatible philosophy while at the same time assuring that they possess strong professional background and experience in the resources disciplines. I strongly urge the adoption of my amendment.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have been preaching here all day that if we are going to have a Government-wide personnel system, we must have basic principles that are not waived for particular agencies. I said that those of us in charge of legislation might see our colleagues seeking an exemption as with the FBI a little while ago, and now the gentleman is in my ballpark again. Here we are talking about the National Park Service, the Fish and Wildlife Service, the Bureau of Land Management, and so forth.

And here again, the Department has been lobbying its friends. The gentleman from Oregon is a very valuable member of my committee and the Committee on Agriculture. These people say now, "We are special," just as the FBI said they were special. And the amendment provides that all positions—not 90 percent or 95 percent, but all positions—in this agency are reserved for career positions in these particular departments. I think we open the door here, and other Members will have special agencies who feel they are career agencies and should not have any infusion of outside people or noncareer people. I think we should draw the line and say that we are going to have a Government-wide executive service and we should not make these exemptions. I am going to take this position in speaking for my own committee's jurisdiction, the Committee on the Interior, and for that reason I regretfully oppose the amendment.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would just like to point out that the observation and the analysis of the gentleman from Arizona is practical. It explains the situation just as it realistically is. If you want an absolute attack on personnel administration you should support the amendment. But consistent with the vote on the earlier amendment, I urge the rejection of this amendment.

Mr. DUNCAN of Oregon. Mr. Chairman. I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I support this amendment and I urge the Members here tonight to support it.

I would like to say that almost all of this amendment has already been ac-

cepted and inserted in the bill in the Senate.

The chairman points out, quite correctly, that the amendment does reserve all of these senior executive positions in these five specific natural resource agencies for career people. But he says it as though there were something wrong with it, and I ask you: What is wrong with that? In these natural resource agencies which we have created to protect the land from which all wealth flows, why should not they be managed by professional career people insead of political appointments who can be put into these senior executive slots. And you might say that that cannot happen, that it will not happen. I would only have to refer the Members back two administrations, to a point where it did happen, and Mr. Erlichman, and all of the rest of his assistants, were in the process of politicizing the civil service.

Mr. Chairman, I think this is a very, very important segment of this bill. I think this amendment is one way we can strike a blow for having professional civil service people running these natural resource agencies on which we depend in so many of our districts.

The chairman suggested it is just like the amendment we just defeated. It is not. That amendment reserved for ever and ever, world without end, 140 positions for the FBI. This has no specific numbers for these natural resource agencies. The provision is made in this amendment that these people can be transferred freely, just as other career senior executive people can. The only thing is, when you move someone back into there agencies you would have to move a civil service career-oriented person. The morale in these agencies is very important. Every forester, every biologist who starts out ought to be able to look forward to being the chief of the service or head of the Bureau of Fisheries. I think this is a very, very important amendment. I can take the points the chairman has made, turn them around, and say that every argument he has made is an argument in support of this. I do not see how it affects the bill. I do not see how it affects the overall purpose of the administration. They can move them around. They can reduce the number. All it says is that about 5,000 of these 9,000 jobs are going to be pulled out for the people who have spent their lifetimes serving each one of our constituents and the American people.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. DUNCAN of Oregon. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I agree so much with what the gentleman said. I can well agree with him that we ought to have professional people running these programs with regard to our land and water and our forests and our natural resources. Some of the words seemed familiar. I was wondering if it did not make good sense also to have professional people running our health programs.

Mr. DUNCAN of Oregon. If I had drafted this amendment, I would agree with the gentleman. I think the same thing really ought to apply to the doctors in the Veterans Administration and to the scientists in the National Institutes of Health. I think this provision in the bill as it came out of committee is the Achilles heel of the bill. I think it is one of the weakest policies, and we can help the bill a little with this amendment.

Mr. HARRIS. Did my colleague support my amendment that did this about a half hour ago?

Mr. DUNCAN of Oregon. I am sorry, I was not on the floor at the time.

Mr. HARRIS. I am too. I thank the gentleman.

Mr. DUNCAN of Oregon. I just would like to reiterate that it is in the Senate bill. I do not know whether the administration accepted it over there or not. I would say that if they did, they accepted it reluctantly.

I would tell the Members that I just visited with them out there in the hall, and was told, no, they would not accept it; they wanted to strike it out. To me, that is an insult to the House of Representatives, and I felt humiliated to have to go out in the hall and ask the consent of the executive branch of Government for action to be taken by the House of Representatives.

Mr. LEACH. Mr. Chairman, I move to strike the requisite number of words.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. LEACH. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Very, very briefly, Mr. Chairman, let me just point out that the gentleman from Oregon made a wonderful, impassioned plea. Can the Members imagine, now, every other Member getting up and making the same type of impassioned plea for a unit of Government for which he has special affection?

This is the very problem we feared an hour ago. The same arguments that basically prevailed in the Collins amendment are here.

The only thing they will have to do is look for their supergrade slots from a central pool. I am sure that with this administration, there is going to be enough allocation of supergrades.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. LEACH. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. There is nothing in this amendment, if the gentleman will study it, that says that these agencies do not have to go to the same pool. The only thing it says is that pool is going to have to be made up of a certain number of career civil service people—only about 5,000 out of 9,000. It also says with respect to these agencies that out of that central pool those who are going to be assigned are going to have to be out of that pool represented by those career civil service people.

Mr. DERWINSKI. Let me reclaim my time. That is not exactly what is going to happen.

Mr. LEACH. I yield to the gentleman from Illinois.

Mr. DERWINSKI. The facts are, from the standpoint of administration personnel, they are not going to take people from the Fish and Wildlife Service, Land Management, the Department of the Interior, the Forest Service; they are not going to be moving people in there who have been street inspectors in Brooklyn. They are, in fact, going to be their people.

The only controversy here is whether there shall be proper control of Government-wide supergrades. That is the issue. May I say, with all due respect to the gentleman, because as I recall he once pursued a position in the other body, arguing that just because the other body adopted an amendment does not really make it all that much of an asset, because we know legislative-wise there are many, many more mistakes made across in the other body than there are in this body.

Mr. DUNCAN of Oregon. There are not only mistakes made in the other body, but there are a lot of mistakes made on the way to the other body, as I can testify to myself.

The point which the gentleman makes with respect to the limitation on numbers just does not exist in this amendment. If that is all, that is not what this amendment does. The other point the gentleman makes when he says that we need not fear streetcar conductors being moved in.

If we do not intend to do it, then why should the gentleman have any objection to putting it in the law—stating that it cannot be done—because I do not have the same confidence in the continued benevolence and good will of the executive branch of the Government. I share the same apprehension with respect to it as you have with respect to the Senate.

Mr. DERWINSKI. The gentleman may argue that point, but the fact is that through this amendment this is a back door approach to guarantee for these five special units of Government absolute control of their supergrades. The gentleman is going through the back door rather then by a frontal attack.

Mr. DUNCAN of Oregon. Would the gentleman please find out where, in this amendment, it says that, because it just does not. It says the same authority exists to move people around as with the other agencies.

It does not change the total number of career service employees. It does not set a ceiling for these agencies. All it says is a certain number of senior executive service will be professional civil service people and that when those movements are made from these agencies the replacements must likewise be civil service.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon (Mr. WEAVER).

The amendment was rejected.

AMENDMENTS OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. GILMAN: On page 215, strike out lines 4 through 11 and insert in lieu thereof the following:

"(8) 'career reserved position' means a Senior Executive Service position which is designated under subsection (b) of this section as a position to which a career appointee may be appointed;

"(9) 'general position' means any Senior Executive Service position which is not a career reserved position.

Page 215, beginning on line 15, strike out "career reserved positions." and all that follows down through "Government." beginning on line 19, and insert in lieu thereof "Senior Executive Service positions to which career appointees may be appointed.".

Page 215, line 21, strike out "career reserved" and insert in lieu thereof "such".

Page 215, line 24, insert after appointee." the following: "Any other Senior Executive Service position may be filled only by a noncareer appointee, limited term appointee, or limited emergency appointee.".

Page 219, line 4, strike out "noncareer appointments" and insert in lieu thereof "general positions".

Page 219, beginning on line 6, strike out "employment of noncareer appointees" and insert in lieu thereof "general positions".

Page 219, beginning on line 11, strike out "authority to employ a specific number of noncareer appointees" and insert in lieu thereof "a specific number of general positions".

Page 219, strike out lines 13 through 18 and insert in lieu thereof the following:

"(b) The number of general positions in each agency will be determined annually by the Office of Personnel Management on the basis of demonstrated need of the agency for such positions, except that the total number of general positions in all agencies may not exceed 10 percent of the total number of Senior Executive Service positions in all agencies.

Page 219, strike out "Senior Executive Service" on line 19 and all that follows down through "appointees" on line 20 and insert in lieu thereof "general positions".

Page 222, in the matter following line 15, strike out "noncareer appointments" in the item relating to section 3134 and insert in lieu thereof "general positions".

Page 223, line 9, insert " 'career reserved position'," before "and 'general position' ".

Page 227, beginning on line 4, strike out "Senior Executive Service position" and insert in lieu thereof "career reserved position".

Page 227, beginning on line 7, strike out "Senior Executive Service position" and insert in lieu thereof "career reserved position".

Page 227, line 12, strike out "Senior Executive Service position" and insert in lieu thereof "general position".

Page 227, line 18, strike out "Senior Executive Service position" and insert in lieu thereof "general position".

Page 254, line 25, strike out "title)." and insert in lieu thereof "title), and such position shall be considered a career reserved position.".

Page 256, line 7, strike out "position." and insert in lieu thereof "position, and such position shall be considered a career reserved position.".

Page 256, line 19, strike out "appointment;" and insert in lieu thereof "appointment, and such position shall be considered a general position.".

Mr. GILMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, simply stated, my amendment insures that the 90:10 ratio of career appointees to noncareer appointees within the Senior Executive Service (SES), a goal chosen by the administration itself, is preserved. This is accomplished within the amendment by causing "career reserved positions" and "general positions" to be mutually exclusive. That is, only career appointees can be designated to fill career reserved positions, and conversely, only noncareer appointees, limited term appointees, or limited emergency appointees could be employed in general positions. My amendment then restricts the total number of general positions in all agencies to 10 percent of the total number of SES positions in all agencies.

You may well inquire if this amendment is really necessary and/or if it is too restrictive. Both questions are fairly asked, and I will do my best to answer them.

Among the many controversial aspects of this legislation, the most controversial, in my opinion, has been the allegation put forth by several of the witnesses and a number of our colleagues in Congress that the administration's proposal for the SES is a back-handed attempt to politicize the merit system, or at the very least, to restore the patronage system at the upper levels of Federal management.

Let us briefly review the administration's proposal, in light of these charges, and the oft-pronounced claim of the administration that political appointees within the SES will approximate the present number of political appointees in the executive branch.

Currently there are about 9,000 executive positions in the Federal service, other than those filled by Presidential appointees. About 10 percent or 900 of these are designated as specific positions to be filled politically. The administration proposes to change this so that most of the 9,000 positions could be filled by political appointment, although at any time no more than 10 percent of all executive positions could be occupied by political appointees. How could this be accomplished?

First, while it is true that political appointees are limited to 10 percent of the total SES corps, there is no similar cap on limited term appointees or limited emergency appointees. Second, limited term appointees or limited emergency appointees can be and very probably will be pseudonyms for political appointees, thus greatly increasing the 10-percent figure. Third, since the 10-percent cap is governmentwide, a large portion of the general positions could be placed in an agency that was deemed necessary to control with "favorable" executives. And fourth, once it is established that politics, and not impartiality and nonpartisanship, is the criteria for selection for general positions within the SES, the baser elements of human nature will flourish. We can assume that significant numbers of noncareer appointees will be encouraged and some, unfortunately, will be tempted to use their official discretion in subtle ways to serve partisan and special interests, rather than the public interest, in hopes of being looked on favorably as they seek advancement in the SES.

Will this administration appoint significant numbers of noncareer executives to the SES? The answer lies in their own admission that only a small proportion of the 8,000 career executive positions need to be filled by career executives "to preserve public confidence in the impartiality of certain functions of Government." In other words, most of the positions within the SES would be filled by noncareer appointees because there is no compelling need to preserve public confidence in the impartiality of most of the functions of the executive branch.

To return to my original question, then—is my amendment necessary? My answer is, indeed it is, if we hope to avert a return to the spoils system, and if we truly believe there is a compelling need to preserve public confidence in the impartiality of our SES. And to quote from U.S. News & World Report of August 28, 1978,

> No one alleges that Jimmy Carter lusts after power. But his reforms would enable any future political dictator to reach down through the levels and take the whole organization captive. Members of the Senior Executive Service would work close to the administration. In turn 72,500 intermediate managers, the GS–13s, 14s and 15s, bereft of automatic raises, would depend largely on SES review for their rewards. And the lower grade, finding appeal more difficult than at present, would have to please the middle managers in whatever shades of political control the managers transmit.

This still leaves unanswered the other question as to whether this amendment is too restrictive, a change generally leveled by the gentleman from Arizona to other amendments I have offered. The answer is, of course, no.

Section 3132, subsection (c) on page 129 of the committee print provides that agencies may apply to the Office of Personnel Management for exclusion of the entire agency or a part of it from being required to place positions in the Senior Executive Service. The reasons justifying the exclusion must be included in the application, but the range of possible justifications is not limited in the act. After review and investigation, as appropriate, the Office of Personnel Management will recommend to the President inclusion or exclusion of the agency or component. If the President makes a written determination of exclusion, the agency or component will be excluded from being required to place positions in the Senior Executive Service.

Thus, we see that the OPM has wide flexibility to exempt agencies for any number of reasons from the 10-percent cap on general positions.

In closing, I urge my colleagues to adopt this amendment, and I assure you that without the benefit of this amendment increased politicization is inevitable.

Mr. Chairman, I move my amendment.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I want to applaud my colleague, the gentleman from New York (Mr. GILMAN), for the amendment. It is actually a good backup type of amendment.

The CHAIRMAN. The time of the gentleman from New York (Mr. GILMAN) has expired.

(On request of Mr. HARRIS and by unanimous consent, Mr. GILMAN was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Mr. Chairman, will the gentleman yield further?

Mr. GILMAN. I am pleased to yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I thank the gentleman for yielding. I would like to applaud his efforts here.

His amendment is actually a good backup amendment since we were not able to pass the basic amendment to eliminate political appointees from the Senior Executive Service. I believe my colleague's amendment at least tries to make certain that the 10 percent limitation on political appointees is a meaningful limitation which actually applies to the Senior Executive Service, and that they will not find any backdoors to get additional political appointees in.

Mr. Chairman, I think by placing this amendment in statute, at least we have made the bill more honest in that regard, in that the 10-percent limitation does, in fact, act as a meaningful limitation on the number of political appointees that may infiltrate the top ranks of Government.

Do I understand my colleague's amendment correctly?

Mr. GILMAN. Mr. Chairman, I thank the gentleman for his contribution. The gentleman is precise in his definition of the objective and goals of this amendment, and, I thank the gentleman for his support.

Mr. UDALL. Mr. Chairman, I raise in opposition to the amendment.

Mr. Chairman, at this hour of the night I am not going to try to descirbe the technical effect of this amendment.

Let me say that it guts the bill. It guts this key section of title IV of the bill. That is why it makes my friend, the gentleman from Virginia (Mr. HARRIS), happy. He has never been very pleased with title IV.

Mr. Chairman, let me tell the Members what is invloved here. We are talking about the Senior Executive Service. We are talking about 10,000 positions. There are about three million Federal employees if we count political workers and everybody else, so that we are talking about one-third of one percent of the Federal work force. There are the top executives. These are the people who would be vice preseidents in charge of major divisions of very large companies.

Mr. Chairman, one of the central purposes of this bill is to give a President of any party who is elected to carry out his own program, who has some ideas, and who has made some campaign promises the machinery so that he can have in this career executive service 10 percent of noncareer people who would be brought in, out in the open, and labeled as such. He will be able to move them around and get them to respond, and that is what it is all about.

We have had a whole series of amendments, and I guess we will have some more, which are trying to undercut this principle and violate it and get away with it. This is as bad as any amendments offered to this title; it ought to be defeated.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

Mr. Chairman, I concur with the observations made by the gentleman from Arizona (Mr. UDALL). Let me say there is no doubt as to the nonpolitical thrust of our effort and that I would support this very bill with every minute detail even if the gentleman from Arizona (Mr. UDALL) were in the White House at the present time.

Mr. Chairman, under the Gilman amendment all positions in the Senior Executive Service are divided into two categories: First, career reserved position; and second, general position.

Career reserved positions are those to which only a career executive may be appointed.

General positions are those to which noncareer, limited term, and limited emergency executives may be appointed.

The amendment then limits the total number of general positions to 10 percent Government-wide and 25 percent in any one agency.

The first effect of the amendment is to freeze 90 percent of all Senior Executive Service positions so that only a career person could be appointed. The administration bill would permit the agency to decide whether a particular position should be filled on a career or noncareer basis. Provided that the 10-percent or 25-percent limitation is not exceeded and provided it is not one of the positions designated as career reserved.

The second effect is to reduce the number of political appointees in the SES because from the general-position pool must come all noncareer (political), limited term, and limited emergency appointees. On the other hand, if an administration were to initially use the 10 percent pool for all noncareer, then there would be no flexibility for limited term or emergency appointees.

Under the administration bill, the 10-percent limitation applies only to noncareer appointees and the limited term and emergency appointees would come from the career pool.

Mr. UDALL. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New York (Mr. GILMAN).

The amendments were rejected.

The CHAIRMAN. Are there further amendments to title IV? There being none, the Clerk will read title IV.

The Clerk read as follows:

TITLE V—MERIT PAY

PAY FOR PERFORMANCE

SEC. 501. Part III of title 5, United States Code, is amended by inserting after chapter 53 the following new chapter:

"Chapter 54.—MERIT PAY AND CASH AWARDS

"Sec.
"5401. Purpose.
"5402. Merit pay system.
"5403. Cash award program.
"5404. Reports.
"5405. Regulations.

"§ 5401. Purpose

"It is the purpose of this chapter to provide for—

"(1) a merit pay system which shall—

"(A) within available funds, recognize and reward quality performance by varying merit pay adjustments;

"(B) use performance appraisals as the basis for determining merit pay adjustments; and

"(C) regulate the costs of merit pay by establishing appropriate control techniques; and

"(2) a cash award program which shall provide cash awards for superior accomplishment and special service.

"§ 5402. Merit pay system

"(a) In accordance with the purpose set forth in section 5401(1) of this title the Office of Personnel Management shall establish a merit pay system which shall apply to any supervisor or management official (as defined in paragraphs (10) and (11) of section 7103 of this title, respectively) who is in a position which is in GS–13, 14, or 15 of the General Schedule described in section 5104 of this title.

"(b) The merit pay system established under subsection (a) of this section shall provide for a range of basic pay for each grade to which it applies, which range shall be limited by the minimum and maximum rates of basic pay payable for each such grade under chapter 53 of this title.

"(c)(1) Under regulations prescribed by the Office of Personnel Management, the head of each agency may provide for increases within the range of basic pay for any employee covered by the merit pay system.

"(2) Determinations to provide pay increases under this subsection—

"(A) may take into account individual performance and organizational accomplishment, and

"(B) shall be based on factors such as—

"(i) any improvement in efficiency, productivity, and quality of work or service;

"(ii) cost efficiency; and

"(iii) timeliness of performance;

"(C) shall be subject to review only in accordance with and to the extent provided by procedures established by the head of the agency; and

"(D) shall be made in accordance with regulations issued by the Office of Personnel Management which relate to the distribution of increases authorized under this subsection.

"(3) For any fiscal year, the head of any agency may exercise authority under paragraph (1) of this subsection only to the extent of the funds available for the purpose of this subsection.

"(4) The funds available for the purpose of this subsection to the head of any agency for any fiscal year shall be determined before the beginning of each such fiscal year by the Office of Personnel Management, after consultation with the Office of Management and Budget. The funds available to any agency shall be determined by the Office of Personnel Management on the basis of the amount estimated by the Office to be necessary to reflect within-grade step increases and quality step increases, which would have been paid

under subchapter III of chapter 53 of this title during such fiscal year to the employees of the agency covered by the merit pay system if the employees were not so covered.

"(d)(1) Effective at the beginning of the first applicable pay period commencing on or after the first day of the month in which an adjustment takes effect under section 5305 of this title, the rate of basic pay for any position under this chapter shall be adjusted by an amount equal to the percentage of the annual rate of pay which corresponds to the percentage generally applicable to positions in the same grade as the position.

"(2) Any employee whose position is brought under the merit pay system shall, so long as the employee continues to occupy the position, be entitled to receive basic pay at a rate of basic pay not less than the rate the employee was receiving when the position was brought under the merit pay system, plus any subsequent adjustment under paragraph (1) of this subsection.

"(3) No employee to whom this chapter applies may be paid less than the minimum rate of basic pay of the grade of the employee's position.

"(e) Under regulations prescribed by the Office of Personnel Management, the benefit of advancement through the range of basic pay for a grade shall be preserved for any employee covered by the merit pay system whose continuous service is interrupted in the public interest by service with the armed forces, or by service in essential non-Government civilian employement during a period of war or national emergency.

"(f) For the purpose of section 5941 of this title, rates of basic pay of employees covered by the merit pay system shall be considered rates of basic pay fixed by statute.

"§5403. Cash award program

"(a) The head of any agency may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee covered by the merit pay system who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficiency, economy, or other improvement of Government operations; or

"(2) performs a special act or service in the public interest in connection with or related to the employee's Federal employment.

"(b) The President may pay a cash award to, and incur necessary expenses for the honorary recognition of, any employee covered by the merit pay system who—

"(1) by the employee's suggestion, invention, superior accomplishment, or other personal effort, contributes to the efficency, economy, or other improvement of Government operations; or

"(2) performs an exceptionally meritorious special act or service in the public interest in connection with or related to the employee's Federal employment.

A Presidential cash award may be in addition to an agency cash award under subsection (a) of this section.

"(c) A cash award to any employee under this section is in addition to the basic pay of the employee under section 5402 of this title. Acceptance of a cash award under this section constitutes an agreement that the use by the Government of any idea, method, or device for which the award is made does not form the basis of any claim of any nature against the Government by the employee accepting the award, his heirs, or assigns.

"(d) A cash award to, and expenses for the honorary recognition of, any employee covered by the merit pay system may be paid from the fund or appropriation available to the activity primarily benefiting, or the various activities benefiting, from the suggestion, invention, superior accomplishment, or other meritorious effort of the employee. The head of the agency concerned shall determine the amount to be contributed by each activity to an agency cash award under subsection (a) of this section. The President shall determine the amount to be controlled by each activity to a Presidential award under subsection (b) of this section.

"(e)(1) Except as provided in paragraph (2) of this subsection, a cash award under this section may not exceed $10,000.

"(2) If the head of an agency certifies to the Office of Personnel Management that the suggestion, invention, superior accomplishment, or other meritorious effort of an employee for which a cash award is proposed is highly exceptional and unusually outstanding, a cash award in excess of $10,000 but not in excess of $25,000 may be awarded to the employee on the approval of the Office.

"(f) The President or the head of an agency may pay a cash award under this section notwithstanding the death or separation from the service of an employee, if the suggestion, invention, superior accomplishment, or other meritorious effort of the employee for which the award is proposed was made or performed while the employee was covered by the merit pay system.

"§ 5404. Reports

"The Office of Personnel Management shall submit to the appropriate committees of each House of the Congress on or before January 1, 1982, a report on the operation of the merit pay system and the cash award program established under this chapter. The report shall include—

"(1) a statement, together with supporting facts, as to whether the purpose of this chapter has been met during the period covered by the report, including, to the extent practicable, quantitative measures of costs and accomplishments of the merit pay system and the cash award program; and

"(2) any recommendations for legislation to amend the provisions of this chapter relating to the merit pay system or the cash award program considered necessary by the Office.

"§ 5405. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this chapter.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 502. (a) Section 4501(2)(A) of title 5, United States Code, is amended by striking out "title; and" and inserting in lieu thereof "title, but does not include an employee covered by the merit pay system established under section 5402 of this title; and".

(b) Section 4502(a) of title 5, United States Code, is amended by striking out "$5,000" and inserting in lieu thereof "$10,000".

(c) Section 4502(b) of title 5, United States Code, is amended—

(1) by striking out "Civil Service Commission" and inserting in lieu thereof "Office of Personnel Management";

(2) by striking out "$5,000" and inserting in lieu thereof "$10,000"; and

(3) by striking out "the Commission" and inserting in lieu thereof "the Office".

(d) Section 4506 of title 5, United States Code, is amended by striking out "Civil Service Commission may" and inserting in lieu thereof "Office of Personnel Management shall".

(e) The second sentence of section 5332(a) of title 5, United States Code, is amended by inserting after "applies" the following: ", except an employee covered by the pay system established under section 5402 of this title,".

(f) Section 5334 of title 5, United States Code (as amended in section 801(a)(3)(G) of this Act), is amended—

(1) in paragraph (2) of subsection (c), by inserting ", or for an employee appointed to a position covered by the merit pay system established under section 5402 of this title, any dollar amount," after "step"; and

(2) by adding at the end thereof the following new subsection:

"(f) In the case of an employee covered by the merit pay system established under section 5402 of this title, all references in this section to 'two steps' or 'two step-increases' shall be deemed to mean 6 percent.".

(g) Section 5335(e) of title 5, United States Code, is amended by inserting after "individual" the following: "covered by the merit pay system established under section 5402 of this title, or,".

(h) Section 5336(c) of title 5, United States Code, is amended by inserting after "individual" the following: "covered by the merit pay system established under section 5402 of this title, or,".

(i) The table of chapters for part III of title 5, United States Code, is amended by inserting after the item relating to chapter 53 the following new chapter:

"54. Merit Pay and Cash Awards.....5401".

EFFECTIVE DATE

SEC. 503. The provisions of this title shall take effect on the first day of the first applicable pay period which begins on or after October 1, 1981, except that such provisions may take effect with respect to any category or categories of positions before such day to the extent prescribed by the Director of the Office of Personnel Management.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of title V and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Are there amendments to title V?

AMENDMENTS OFFERED BY MR. FISHER

Mr. FISHER. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. FISHER: Page 270, beginning on line 1, strike out "January 1, 1982, a report on the operation" and insert in lieu thereof the following: "January 1, 1986, and biennially thereafter, a report on the operation during the preceding 2 fiscal years".

Page 272, strike out lines 19 through 24 and insert in lieu thereof the following:

EFFECTIVE DATE; EXPERIMENTAL APPLICATION

SEC. 503. (a) Except as provided in subsection (b) of this section, the amendments made by this title shall take effect on the first day of the first applicable pay period which begins on or after October 1, 1981.

(b)(1) Not later than 60 days after the date of the enactment of this title, the Director of the Office of Personnel Management shall prescribe regulations providing for an initial, experimental application of the amendments made by this title, which shall begin on the first day of the first applicable pay period which begins on or after October 1, 1981. Such regulations shall provide that the merit pay system and the cash award program will apply with respect to positions only in 3 Executive departments designated by the Director.

(2) Within 30 days after the end of each of the first two fiscal years to which such amendments apply, the Director shall prepare and transmit to each House of the Congress a report on the merit pay system and the cash award program, including an evaluation of their effectiveness and the manner in which they are administered. The second such report shall include proposed regulations which would provide for adjustments which would be appropriate in the

event such system or such program does not continue by reason of paragraph (3).

(3) The provisions of the regulations under paragraph (1) providing for an initial, limited experimental application with respect to the merit pay system and the cash award program shall cease to have effect and the amendments made by this title relating to such system and such program shall have full effect (without regard to the limitations under paragraph (1)) beginning on the 90th day of continuous session of Congress following the date on which the second annual report is transmitted to the Congress under paragraph (2), unless the Congress before such day adopts a concurrent resolution which states that the Congress does not favor the continuance of such system and such program. If such a resolution is adopted with respect to such system and such program before such date, then the provisions of such regulations and such amendments relating to such system and such program shall cease to have effect on such 90th day (or, if later, 30 days after the date of the adoption of such resolution).

(4) For purposes of paragraph (3), the continuity of a session of Congress shall be considered to be broken only by an adjournment of the Congress sine die, and the days on which either House of the Congress is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 90-day period under such paragraph.

Mr. FISHER (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. FISHER. Briefly, Mr. Chairman, the bill establishes a merit pay system for supervisors and managers in Grades GS–13 to 15. My amendment would make the merit pay system an experiment to be carried out in three agencies for 2 years. This would parallel the 2-year experimental provision for the Senior Executive Service which we have accepted. After the 2 years are up, the merit pay system will go into effect Government-wide, unless both Houses of Congress veto it. This controversial proposal for attempting to motivate midlevel managers to perform better through monetary incentives should be tested before all managers throughout the Government are brought under the system. I think this is the way to do it.

In discussion with the Chairman of the Civil Service Commission, I find that in his opinion it would take some period of years to launch an effective incentive pay system for these GS–13 to GS–15 middle-level managers, and since it is going to take some time anyway, I think we would all be reassured if my amendment were passed and we said explicitly, as we have with the Senior Executive Service, let us try this out for 2 years on an ample scale and see how it works.

One final word: I am telling the Members from a lot of experience, both personal, in the civil service, and as a Representative of a district that has more civil servants than any other, that we are now talking about more than 9,200 people. We are reaching into tens of thousands, and it is the express intention that if this works, it would be extended all the way down to—what is it—GS–5.

Then we would be dealing with 1 million employees or more, so I think we ought to go a little slowly here to try to do it, to experiment with it, try it on an ample scale for a couple years, which is what it would take anyway to do it intelligently, and then make up our minds.

In my version of the amendment, the merit raise program would go Government-wide, so to speak, unless both Houses of Congress voted to the contrary. If that works, as I hope it does, I think thereafter we can consider extending it farther into the civil service so as to make merit pay characteristic of most of the civil service.

I urge very much that we consider this amendment, although I know it will not meet with the approval of the manager of our bill; but I urge that we consider it carefully and see if we do not want to vote for it as really the best way to go forward here.

I speak now, not as somebody with a lot of civil servants in his district and who is automatically going to vote against this bill. If it can be brought into reasonably good shape, I intend to vote for it and maybe I will vote for it even if this is not passed; but I do urge that we consider this amendment and see if we really do not want to vote for it.

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment deals with the middle managers in the Federal Government, the GS–13. 14 and 15 people. Today they get an annual comparability raise in October. Most of them get an annual or biannual step increase, so that every year or two you get a raise unless you are so bad that you are fired. More than 95 percent of the Federal employees get raises every year or 2 years, and they get comparability pay.

What we would do is leave the comparability pay in October alone. Everybody would get that. What we will do is use the step increases for merit pay, so that if somebody does a crackerjack job, that person will be recommended by the supervisor. You would be recommended by your supervisor and get a modest increase in pay. By saying we will try it in two or three departments and if it is bad we will cut it out and if it is good we will have the Executive sign it and find out whether it will work or not.

The gentleman from Virginia has been sincere and I know the gentleman is constructive, but I think it is a bad amendment. I urge its rejection.

Mr. FISHER. Mr. Chairman, will the gentleman yield for a very brief colloquy?

Mr. UDALL. I yield to the gentleman from Virginia.

Mr. FISHER. Mr. Chairman, in the first place, my amendment has nothing to do with comparability pay advances or cost-of-living.

Mr. UDALL. I tried to say that.

Mr. FISHER. Yes. Second, on the other type of increase, I too, hope we can go in the direction of this bill. I want to see merit pay pervade the government; but I really think we are stepping along too fast if we apply it everywhere in Government without the trial period. We could choose three departments that would represent a large percent of the total Government employment, even more than 50 percent if the administration wanted to.

I am thinking partly of the morale of all this. I am very close to these civil servants. I think I know them almost as well as I know my own family. Whatever we do here, we are still going to have to rely on these same people to run our Government. Anything that supports them and does not tear down their morale, and yet really gets us on rapidly toward a fair and workable merit pay system, I think really ought to be voted for.

Mr. UDALL. I understand; but the Civil Service Commission says it will take about 3 years to implement this; yet the gentleman would have a judgment made on the scheme at the end of 2 years. I think on that basis alone, it is a poor amendment.

Mrs. SPELLMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to congratulate my colleague, the gentleman from Virginia (Mr. FISHER), for making this recommendation. There was a recommendation made, and it was passed in the committee, that this Senior Executive Service be tried in three departments. That represents hundreds of agencies, not three agencies. Hundreds of agencies are involved in three departments.

I might point out that during that 2-year period there would be reports back to the Congress on the progress being made. A the end of 2 years the Senior Executive Service would spread out over the whole Government unless both Houses of the Congress determined that it should be brought to a stop. It would take legislative action to do that.

What we are attemping to do is to prevent the kind of chaos we have had with the Post Office reorganization. Surely we have learned something there, and surely we ought to recognize that if we move just a little more slowly and a little more surely, we will come up with a better product.

That recommendation did pass in committee. To incorporate this pay schedule so that it can be worked in the same way here makes very good sense. We are not limiting this to a small sample of employees. If the President were to select his three largest agencies, Defense, HEW, and Veterans, he would have over 66 percent of the Government covered. Surely 66 percent is a large enough sampling so that the Congress is able to keep an eye on what is going on.

Oversight after chaos is very difficult. It is far better that we monitor what is happening and change the rules if we

need to change the laws if we need to in order to help the administration administer the program.

Mr. Chairman, let us do it properly. I commend the gentleman from Virginia (Mr. FISHER) for his recommendation.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I will use very little time, Mr. Chairman. I would like to point out that one might be tempted to refer to this as an amendment that guts the program, but the gentleman from Virginia (Mr. FISHER) is more of an expert in finesse than he is in gutting. He is not the type that guts; he is smooth, he is effective, he is knowledgeable, and he is scholarly. He has a wonderful approach to legislation.

But the effect of this amendment would really be to limit the program to a 2-year minimum period, and it would be difficult to get an honest evaluation in that time. The best guesses are that it would take anywhere from 3 to 5 years to implement major parts of this law, and it would be unwise to have sunset after 2 years without a fair period of evaluation, given the sheer size of this Government of ours and the obvious time it will take to really understand and see the workings of this new program.

I think limiting the program to just 2 years is too arbitrary. It is just too brief a period. I suggest, using pure commonsense and taking into consideration the headaches of a massive government structure such as the one we have, the job obviously cannot be done in 2 years, and this amendment is too restrictive.

Mr. FISHER. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. Of course, I will yield to the gentleman from Virginia.

Mr. FISHER. Mr. Chairman, I really think this phrase of "gutting" the program is a bit overdone.

Mr. DERWINSKI. I did not say the gentleman was gutting the program; I said the gentleman was finessing it.

Mr. FISHER. Mr. Chairman, in the gentleman's own fairly smooth and attractive manner, however, that is what he implied.

I have no intention of gutting the program. As I said several times over, it is altogether likely that I will vote for this bill even if it does not contain this amendment along with some of the others. I may be the only Member who comes from a district dominated by Federal employment who is likely to do that.

This does not gut the bill at all. It simply says: Let us try it out on a large scale for 2 years, and then we can make changes. But if we do not do anything, then automatically it goes Government-wide unless both bodies vote to the contrary. In no way can this directly or by implication be thought of as gutting what I consider to be a bill with very, very many important, innovative, and necessary features for the improvement of our Government.

Mr. DERWINSKI. Mr. Chairman, for the record, let me state that I had no intention of stating that the gentleman from Virginia (Mr. FISHER) was gutting the bill. I want to make it clear that what he is doing is imposing artificial restraints within which the management prerogative we all envision could not logically be properly implemented.

Mrs. SPELLMAN. Mr. Chairman, will the gentleman yield so that I may ask the gentleman from Virginia a question?

Mr. DERWINSKI. I yield to the gentlewoman from Maryland.

Mrs. SPELLMAN. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman from Virginia (Mr. FISHER) if he does not have a provision there which says that at the end of the 2 years this program automatically extends over the entire Government unless it is aborted by definite action by the Congress.

Mr. FISHER. That is correct.

Mrs. SPELLMAN. Both Houses of Congress?

Mr. FISHER. That is correct.

Mrs. SPELLMAN. Then it certainly is not a limited program, it is not just a small trial; it is an attempt to move into a new program, and one that is really quite different, at a deliberate pace.

Mr. FISHER. The gentlewoman has stated the matter correctly.

Mrs. SPELLMAN. I thank the gentleman.

Mr. DERWINSKI. But you would, in fact, say it is premature judgment by the Congress because of the lack of time to fully be able to understand and appreciate what is being done?

Mrs. SPELLMAN. If by "premature" the gentleman means before chaos has completely set in, I would hope so.

Mr. DERWINSKI. No. I am saying before efficiencies will be demonstrated in the civil service, then all of us in a nonpolitical fashion could appreciate it.

Mrs. SPELLMAN. I think we would have a pretty good idea of the route it was taking, and also the administration would be forced to do a better job because the eye of the Congress was upon it.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Virginia (Mr. FISHER).

The question was taken; and on a division (demanded by Mr. FISHER) there were—ayes 9, noes 38.

So the amendments were rejected.

The CHAIRMAN. Are there other amendments to title V?

There being none, the Clerk will read title VI.

The Clerk read as follows:

TITLE VI—RESEARCH, DEMONSTRATION, AND OTHER PROGRAMS

RESEARCH PROGRAMS AND DEMONSTRATION PROJECTS

SEC. 601. (a) Part III of title 5, United States Code, is amended by adding at the end of subpart C thereof the following new chapter:

"Chapter 47.—PERSONNEL RESEARCH PROGRAMS AND DEMONSTRATION PROJECTS

"Sec.
"4701. Definitions.
"4702. Research programs.
"4703. Demonstration projects.
"4704. Allocation of funds.
"4705. Reports.
"4706. Regulations.

"§4701. Definitions

"For the purpose of this chapter—

"(1) 'agency' means an Executive agency, the Administrative Office of the United States Courts, and the Government Printing Office, but does not include—

"(A) a Government corporation;

"(B) the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, or any Executive agency or unit thereof which is designated by the President and which conducts foreign intelligence or counterintelligence activities; or

"(C) the General Accounting Office.

"(2) 'employee' means an individual employed in or under an agency;

"(3) 'eligible' means an individual who has qualified for appointment in an agency and whose name has been entered on the appropriate register or list of eligibles;

"(4) 'demonstration project' means a project conducted by the Office of Personnel Management, or under its supervision, to determine whether a specified change in personnel management policies or procedures would result in improved Federal personnel management; and

"(5) 'research program' means a planned study of the manner in which public management policies and systems are operating, the effects of those policies and systems, the possibilities for change, and comparisons among policies and systems.

"§ 4702. Research programs

"The Office of Personnel Management shall—

"(1) establish and maintain (and assist in the establishment and maintenance of) research programs to study improved methods and technologies in Federal personnel management;

"(2) evaluate the research programs established under paragraph (1) of this section;

"(3) establish and maintain a program for the collection and public dissemination of information relating to personnel management research and for encouraging and facilitating the exchange of information among interested persons and entities; and

"(4) carry out the preceding functions directly or through agreement or contract.

"§ 4703. Demonstration projects

"(a) Except as provided in this section, the Office of Personnel Management may, directly or through agreement or contract with one or more agencies and other public and private organizations, conduct and evaluate demonstration projects. Subject to the provisions of this section, the conducting of demonstration projects shall not be limited by any lack of specific authority to take the action contemplated, or by any provision of law in effect which is inconsistent with the action, including any law or regulation relating to—

"(1) the methods of establishing qualification requirements for, recruitment for, and appointment to positions;

"(2) the methods of classifying positions and compensating employees;

"(3) the methods of assigning, reassigning, or promoting employees;

"(4) the methods of disciplining employees;

"(5) the methods of providing incentives to employees, including the provision of group or individual incentive bonuses or pay;

"(6) hours of work per day or per week;

"(7) the methods of involving employees, labor organizations, and employee organizations in personnel decisions; and

"(8) the methods of reducing overall agency staff and grade levels.

"(b) Before conducting or entering into any agreement or contract to conduct a demonstration project, the Office of Personnel Management shall—

"(1) develop a plan for such project which identifies—

"(A) the purposes of the project;

"(B) the types of employees or eligibles, categorized by occupational series, grade, or organizational unit;

"(C) the number of employees or eligibles to be included, in the aggregate and by category;

"(D) the methodology;

"(E) the duration;

"(F) the training to be provided;

"(G) the anticipated costs;

"(H) the methodology and criteria for evaluation;

"(I) a specific description of any lack of specific authority for any aspect of the project; and

"(J) a specific citation to any provision of law, rule, or regulation which, if not waived under this section, would prohibit the conducting of the project as proposed;

"(2) publish the plan in the Federal Register;

"(3) submit the plan so published to public hearing; and

"(4) transmit a copy of the plan, taking into account any revision resulting from the hearing, to each House of the Congress.

"(c)(1) Any demonstration project under this section may not be undertaken, or any agreement or contract with respect to such project may not be entered into, unless—

"(A) the plan under subsection (b) of this section for the project is approved by each agency involved;

"(B) a copy of the plan, as so approved, is transmitted to each House of the Congress; and

"(C) the plan is disapproved by either House of the Congress during the first period of 60 calendar days of continuous session of the Congress after the date on which the plan is transmitted to such House.

"(2) For the purpose of paragraph (1)(C) of this subsection—

"(A) the continuity of a session is broken only by an adjournment of the Congress sine die; and

"(B) the days on which either House of the Congress is not in session because of an adjournment of more than 3 calendar days to a day certain are excluded in the computation of the 60-day period.

"(d) No demonstration project under this section may provide for a waiver of—

"(1) any provision of chapter 63 (relating to leave) or subpart G (relating to insurance and annuities) of this title;

"(2) any provision of law—

"(A) referred to in section 2302(b)(1) of this title;

"(B) providing for equal employment opportunity through affirmative action under any such provision of law;

"(C) providing any right or remedy available to any employee or applicant for employment in the civil service under any such provision of law;

"(3) any provision of chapter 15 or subchapter III of chapter 73 of this title (relating to political activity); or

"(4) any rule or regulation issued under the provisions of law referred to in paragraph (1), (2), or (3) of this subsection.

"(e)(1) Each demonstration project shall—

"(A) involve not more than 5,000 individuals other than individuals in any control groups necessary to validate the results of the project; and

"(B) terminate before the end of the 5-year period beginning on the date of the transmittal to each House of the Congress by the Office of Personnel Maagement of a copy of the plan for the project under subsection (b)(4) of this section, except that research may continue beyond the date to the extent necessary to validate the results of the project.

"(2) Not more than 10 demonstration projects may be contracted for or conducted at any time.

"(f) Subject to the terms of any written agreement or contract between the Office of Personnel Management and an agency, a demonstration project involving the agency may be terminated by the Office of Personnel Management, or the agency, if either determines that the project creates a substantial hardship on, or is not in the best interests of, the public, the Federal Government, employees, or eligibles.

"(g) Employees within a unit with respect to which a labor organization is accorded exclusive recognition under section 7111 of this title shall not be included within any project under subsection (b) of this section—

"(1) if the project would violate a collective bargaining agreement (as defined in section 7103(8) of this title) between the agency and the labor organization, unless there is another written agreement with respect to the project between the agency and the organization permitting the inclusion; or

"(2) if the project is not covered by such a collective bargaining agreement, until there has been consultation or negotiation, as appropriate, by the agency with the labor organization.

"(h) Employees within any unit with respect to which a labor organization has not been accorded exclusive recognition under section 7111 of this title shall not be included within any project under subsection (b) of this section unless there has been agency consultation regarding the project with the employees in the unit.

"(i) The Office of Personnel Management shall evaluate the results of each demonstration project and its impact on improving public management.

"(j) Upon the request of the Director of the Office of Personnel Management, agencies shall cooperate with and assist the Office, to the extent practicable, in any evaluation undertaken under subsection (i) of this section and provide the Office with requested information and reports relating to the conducting of demonstration projects in their respective agencies.

"§ 4704. Allocation of funds

"Funds appropriated to the Office of Personnel Management for the purpose of this chapter may be allocated by the Office of Personnel Management to any agency conducting demonstration projects or assisting the Office of Personnel Management in conducting such projects. Funds so allocated shall remain available for such period as may be specified in appropriation Acts. No contract shall be entered into under this chapter unless the contract has been provided for in advance in appropriation Acts.

"§ 4705. Reports

"The Office of Personnel Management shall include in the annual report required by section 1308 of this title a summary of research programs and demonstration projects conducted during the year covered by the report, the effect of the programs and projects on improving public management and increasing Government efficiency, and recommendations of policies and procedures which will improve such management and efficiency.

"§ 4706. Regulations

"The Office of Personnel Management shall prescribe regulations to carry out the purpose of this chapter.".

(b) The table of chapters for part III of title 5, United States Code, is amended by inserting after the item relating to chapter 45 the following new item:

"47. Personnel Research Programs and Demonstration Projects—4701".

INTERGOVERNMENTAL PERSONNEL ACT AMENDMENTS

SEC. 602. (a) Section 208 of the Intergovernmental Personnel Act of 1979 (42 U.S.C. 4728) is amended—

(1) by striking out the section heading and inserting in lieu thereof the following:

"TRANSFER OF FUNCTIONS AND ADMINISTRATION OF MERIT POLICIES

(2) by redesignating subsections (b), (c), (d), (e), (f), and (g) as subsections (c), (d), (e), (f), (g), and (i), respectively, and by inserting after subsection (a) the following new subsection:

"(b) In accordance with regulations of the Office of Personnel Management, Federal agencies may require as a condition of participation in assistance programs, systems of personnel administration consistent with personnel standards prescribed by the Office of Personnel Management for positions engaged in carrying out such programs. The standards shall include the merit principles in section 2 of this Act."; and

(3) by inserting after subsection (g), as redesignated by this section, the following new subsection:

"(h) Effective one year after the date of the enactment of this subsection, all statutory personnel requirements established as a condition of the receipt of Federal grants-in-aid by State and local governments are hereby abolished, except—

"(1) those requirements listed in subsection (a) of this section;

"(2) those that generally prohibit discrimination in employment or require equal employment opportunity;

"(3) the Davis-Bacon Act (40 U.S.C. 276 et seq.); and

(4) chapter 15 of title 5, United States Code, relating to political activities of certain State and local employees.".

(b) Section 401 of such Act (84 Stat. 1920) is amended by striking out "governments and institutions of higher education" and inserting in lieu thereof "governments, institutions of higher education, and other organizations".

(c) Section 403 of such Act (84 Stat. 1925) is amended by striking out "(less applicability to commissioned officers of the Public Health Service)".

(d) Section 502 of such Act (42 U.S.C. 4762) is amended in paragraph (3) by inserting "the Trust Territory of the Pacific Islands," before "and a territory or possession of the United States,".

(e) Section 506 of such Act (42 U.S.C. 4766) is amended—

(1) in subsection (b)(2), by striking out "District of Columbia" and inserting in lieu thereof "District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands"; and

(2) in subsection (b)(5), by striking out "and the District of Columbia" and inserting in lieu thereof", the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands".

AMENDMENTS TO THE MOBILITY PROGRAM

SEC. 603. (a) Section 3371 of title 5, United States Code, is amended—

(1) by inserting "the Trust Territory of the Pacific Islands," after "Puerto Rico," in paragraph (1)(A); and

(2) by striking out "and" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting a semicolon in lieu thereof, and by adding at the end thereof the following:

"(3) 'Federal agency' means an Executive agency, a court of the United States, the Administrative Office of the United States Courts, the Library of Congress, the Botanic Garden, the Government Printing Office, the Congressional Budget Office, the United States Postal Service, the Postal Rate Commission, the Office of the Architect of the Capitol, the Office of Technology Assessment, and such other appropriate agencies of the legislative and judicial branches as determined by the Office of Personnel Management; and

"(4) 'other organization' means—

"(A) a national, regional, State-wide, or metropolitan organization representing member State or local governments;

"(B) an association of State or local public officials; or

"(C) a nonprofit organization, one of whose principal functions is to offer professional advisory, research, or development services, or related services, to governments or universities concerned with public management.".

(b) Sections 3372 through 3375 of title 5, United States Code, are amended by striking out "executive agency" and "an executive agency" each place they appear and inserting in lieu thereof "Federal agency" and "a Federal agency", respectively.

(c) Section 3372 of title 5, United States Code, is further amended—

(1) in subsection (a)(1), by inserting after "agency" the following: ", other than a noncareer appointee, limited term appointee, or limited emergency appointee (as such terms are defined in section 3132(a) of this title) in the Senior Executive Service and an employee in a position which has been excepted from the competitive service by reason of its confidential, policy determining, or policy-advocating character,";

(2) in subsection (b)(1), by striking out "and";

(3) in subsection (b)(2), by striking out the period after "agency" and inserting in lieu thereof a semicolon;

(4) by adding at the end of subsection (b) the following:

"(3) an employee of a Federal agency to any other organization; and

"(4) an employee of an other organization to a Federal agency,"; and

(5) by adding at the end thereof (as amended in paragraph (4) of this subsection) the following new subsection:

"(c)(1) An employee of a Federal agency may be assigned under this subchapter only if the employee agrees, as a condition of accepting an assignment under this subchapter, to serve with the agency upon the completion of the assignment for a period equal to the length of the assignment.

"(2) Each agreement required under paragraph (1) of this subsection shall provide that in the event the employee fails to carry out the agreement (except for good and sufficient reason as determined by the head of the Federal agency involved) the employee shall be liable to the United States for payment of all expenses (excluding salary) of the assignment. The amount shall be treated as a debt due the United States.".

(d) Section 3374 of title 5, United States Code, is further amended—

(1) by adding the following new sentence at the end of subsection (b):

"The above exceptions shall not apply to non-Federal employees who are covered by chapters 83, 87, and 89 of this title by virtue of their non-Federal employment immediately before assignment and appointment under this section.";

(2) in subsection (c)(1), by striking out the semicolon at the end thereof and by inserting in lieu thereof the following: ", except to the extent that the pay received from the State or local government is less than the appropriate rate of pay which the duties would warrant under the applicable pay provisions of this title or other applicable authority;"; and

(3) by striking out the period at the end of subsection (c) and adding the following: ", or for the contribution of the State or local government, or a part thereof, to employee benefit systems.".

(e) Section 3375(a) of title 5, United States Code, is further amended by striking out "and" at the end of paragraph (4), by redesignating paragraph (5) as paragraph (6), and by inserting after paragraph (4) thereof the following:

"(5) section 5724(b) of this title, to be used by the employee for miscellaneous expenses related to change of station where movement or storage of household goods is involved; and".

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Are there any amendments to title VI?

AMENDMENT OFFERED BY MR. SOLARZ

Mr. SOLARZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SOLARZ: Page 288, insert after line 11 the following new subtitle:

Subtitle D—Federal Employees Flexible and Compressed Work Schedules

CONGRESSIONAL FINDINGS

SEC. 631. The Congress finds that new trends in the usage of 4-day workweeks, flexible work hours, and other variations in workday and workweek schedules in the private sector appear to show sufficient promise to warrant carefully designed, controlled, and evaluated experimentation by Federal agencies over a 3-year period to determine whether and in what situations such varied work schedules can be successfully used by Federal agencies on a permanent basis. The Congress also finds that there should be sufficient flexibility in the work schedules of Federal employees to allow such employees to meet the obligations of their faith.

DEFINITIONS

SEC. 632. For the purpose of this subtitle—

(1) the term "agency" means an Executive agency and a military department (as such terms are defined in section 105 and 102, respectively, of title 5, United States Code);

(2) the term "employee" has the meaning set forth in section 2105 of title 5, United States Code;

(3) the term "Office" means the Office of Personnel Management; and

(4) the term "basic work requirement" means the number of hours, excluding overtime hours, which an employee is required to work or is required to account for by leave or otherwise.

EXPERIMENTAL PROGRAM

SEC. 633. (a)(1) Within 180 days after the effective date of this section, and subject to the requirements of section 662 of this subtitle and the terms of any written agreement referred to in section 662(a) of this subtitle, the Office shall establish a program which provides for the conducting of experiments by the Office under parts 1 and 2 of this subtitle. Such experimental program shall cover a sufficient number of positions throughout the executive branch, and a sufficient range of worktime alternatives, to provide an adequate basis on which to evaluate the effectiveness and desirability of permanently maintaining flexible or compressed work schedules within the executive branch.

(2) Each agency may conduct one or more experiments under parts 1 and 2 of this subtitle. Such experiments shall be subject to such regulations as the Office may prescribe under section 665 of this subtitle.

(b) The Office shall, not later than 90 days after the effective date of this section, establish a master plan which shall contain guidelines and criteria by which the Office will study and evaluate experiments conducted under parts 1 and 2 of this subtitle. Such master plan shall provide for the study and evaluation of experiments within a sample of organizations of different size, geographic location, and functions and activities, sufficient to insure adequate evaluation of the impact of varied work schedules on—

(1) the efficiency of Government operations;

(2) mass transit facilities and traffic;

(3) levels of energy consumption;

(4) service to the public;

(5) increased opportunities for full-time and part-time employment; and

(6) individuals and families generally.

(c) The Office shall provide educational material, and technical aids and assistance, for use by an agency before and during the period such agency is conducting experiments under this subtitle.

(d) If the head of an agency determines that the implementation of an experimental program referred to in subsection (a) of this section would substantially disrupt the agency in carrying out its functions, such agency head shall request the Office to exempt such agency from the requirements of any experiment conducted by the Office under subsection (a) of this section. Such request shall be accompanied by a report detailing the reasons for such determination. The Office shall exempt an agency from such requirements only if it finds that including the agency within the experiment would not be in the best interest of the public, the Government, or the employees. The filing of such a request with the Office shall exclude the agency from the experiment until the Office has made its determination or until 180 days after the date the request is filed, whichever first occurs.

PART 1—FLEXIBLE SCHEDULING OF WORK HOURS DEFINITIONS

SEC. 641. For the purpose of this part—

(1) the term "credit hours" means any hours, within a flexible schedule established under this part, which are in excess of an employee's basic work requirement and which the employee elects to work so as to vary the length of a workweek or a workday; and

(2) the term "overtime hours" means all hours in excess of 8 hours in a day or 40 hours in a week which are officially ordered in advance, but does not include credit hours.

FLEXIBLE SCHEDULING EXPERIMENTS

SEC. 642. (a) Notwithstanding section 6101 of title 5, United States Code, experiments may be conducted in agencies to test flexible schedules which include—

(1) designated hours and days during which an employee on such a schedule must be present for work; and

(2) designated hours during which an employee on such a schedule may elect the time of such employee's arrival at and departure from work, solely for such purpose or, if and to the extent permitted, for the purpose of accumulating credit hours to reduce the length of the workweek or another workday. An election by an employee referred to in paragraph (2) of this subsection shall be subject to limitations generally prescribed to ensure that the duties and requirements of the employee's position are fulfilled.

(b) Notwithstanding any other provision of this subtitle, but subject to the terms of any written agreement under section 662(a) of this subtitle—

(1) any experiment under subsection (a) of this section may be terminated by the Office if it determines that the experiment is not in the best interest of the public, the Government, or the employees; or

(2) if the head of an agency determines that any organization within the agency which is participating in an experiment under subsection (a) of this section is being substantially disrupted in carrying out its

functions or is incurring additional costs because of such participation, such agency head may—

(A) restrict the employees' choice of arrival and departure time,

(B) restrict the use of credit hours, or

(C) exclude from such experiment any employee or group of employees.

(c) Experiments under subsection (a) of this section shall terminate not later than the end of the 3-year period which begins on the effective date of this part.

COMPUTATION OF PREMIUM PAY

SEC. 643. (a) For purposes of determining compensation for overtime hours in the case of an employee participating in an experiment under section 642 of this subtitle—

(1) the head of an agency may, on request of the employee, grant the employee compensatory time off in lieu of payment for such overtime hours, whether or not irregular or occasional in nature and notwithstanding the provisions of sections 5542(a), 5543(a)(1), 5544(a), and 5550 of title 5, United States Code, section 4107(e)(5) of title 38, United States Code, section 7 of the Fair Labor Standards Act, as amended (29 U.S.C. 207), or any other provision of law; or

(2) the employee shall be compensated for such overtime hours in accordance with such provisions, as applicable.

(b) Notwithstanding the provisions of law referred to in subsection (a)(1) of this section, an employee shall not be entitled to be compensated for credit hours worked except to the extent authorized under section 646 of this subtitle or to the extent such employee is allowed to have such hours taken into account with respect to the employee's basic work requirement.

(c)(1) Notwithstanding section 5545(a) of title 5, United States Code, premium pay for nightwork shall not be paid to an employee otherwise subject to such section solely because the employee elects to work credit hours, or elects a time of arrival or departure, at a time of day from which such premium pay is otherwise authorized, except that—

(A) if an employee is on a flexible schedule under which—

(i) the number of hours during which such employee must be present for work, plus

(ii) the number of hours during which such employee may elect to work credit hours or elect the time of arrival at and departure from work,

which occur outside of the night work hours designated in or under such section 5545(a) total less than 8 hours, such premium pay shall be paid for those hours which, when combined with such total, do not exceed 8 hours, and

(B) if an employee is on a flexible schedule under which the hours that such employee must be present for work include any hours designated in or under such section 5545(a), such premium pay shall be paid for such hours so designated.

(2) Notwithstanding section 5343(f) of title 5, United States Code, and section 4107(e)(2) of title 38, United States Code, night differential shall not be paid to any employee otherwise subject to either of such sections solely because such employee elects to work credit hours, or elects a time of arrival or departure, at a time of day for which night differential is otherwise authorized, except that such differential shall be paid to an employee on a flexible schedule under this part—

(A) in the case of an employee subject to such section 5343(f), for which all or a majority of the hours of such schedule for any day fall between the hours specified in such section, or

(B) in the case of an employee subject to such section 4107(e)(2), for which 4 hours of such schedule fall between the hours specified in such section.

HOLIDAYS

SEC. 644. Notwithstanding sections 6103 and 6104 of title 5, United States Code, if any employee on a flexible schedule under this part is relieved or prevented from working on a day designated as a holiday by Federal statute or Executive order, such employee is entitled to pay with respect to that day for 8 hours (or, in the case of a part-time employee, an appropriate portion of the employee's biweekly basic work requirement as determined under regulations prescribed by the Office).

TIME-RECORDING DEVICES

SEC. 645. Notwithstanding section 6106 of title 5, United States Code, the Office or any agency may use recording clocks as part of its experiments under this part.

CREDIT HOURS: ACCUMULATION AND COMPENSATION

SEC. 646. (a) Subject to any limitation prescribed by the Office or the agency, a full-time employee on a flexible schedule may accumulate not more than 10 credit hours, and a part-time employee may accumulate not more than one-eighth of the hours in such employee's biweekly basic work requirement, for carryover from a biweekly pay period to a succeeding biweekly pay period for credit to the basic work requirement for such period.

(b) Any employee who is on a flexible schedule experiment under this part and who is no longer subject to such an experiment shall be paid at such employee's then current rate of basic pay for—

(1) in the case of a full-time employee, not more than 10 credit hours accumulated by such employee, or

(2) in the case of a part-time employee, the number of credit hours (not in excess of one-eighth of the hours in such employee's biweekly basic work requirement) accumulated by such employee.

PART 2—4-DAY WEEK AND OTHER COMPRESSED WORK SCHEDULES DEFINITIONS

SEC. 651. For the purpose of this part—

(1) the term "compressed schedule" means—

(A) in the case of a full-time employee, an 80-hour biweekly basic work requirement which is scheduled for less than 10 workdays, and

(B) in the case of a part-time employee, a biweekly basic work requirement of less than 80 hours which is scheduled for less than 10 workdays; and

(2) the term "overtime hours" means any hours in excess of those specified hours which constitute the compressed schedule.

COMPRESSED SCHEDULE EXPERIMENTS

SEC. 652. (a) Notwithstanding section 6101 of title 5, United States Code, experiments may be conducted in agencies to test a 4-day workweek or other compressed schedule.

(b)(1) An employee in a unit with respect to which an organization of Government employees has not been accorded exclusive recognition shall not be required to participate in any experiment under subsection (a) of this section unless a majority of the employees in such unit who, but for this paragraph, would be included in such experiment have voted to be so included.

(2) Upon written request to any agency by an employee, the agency, if it determines that participation in an experiment under subsection (a) of this section would impose a personal hardship on such employee, shall—

(A) except such employee from such experiment; or

(B) reassign such employee to the first position within the agency—

(i) which becomes vacant after such determination,

(ii) which is not included within such experiment,

(iii) for which such employee is qualified, and

(iv) which is acceptable to the employee.

A determination by an agency under this paragraph shall be made not later than 10 days after the day on which a written request for such determination is received by the agency.

(c) Notwithstanding any other provision of this subtitle, but subject to the terms of any written agreement under section 662(a) of this subtitle, any experiment under subsection (a) of this section may be terminated by the Office, or the agency, if it determines that the experiment is not in the best interest of the public, the Government, or the employees.

(d) Experiments under subsection (a) of this section shall terminate not later than the end of the 3-year period which begins on the effective date of this part.

COMPUTATION OF PREMIUM PAY

SEC. 653. (a) The provisions of sections 5542(a), 5544(a), and 5550(2) of title 5, United States Code, section 4107(e)(5) of title 38, United States Code, section 7 of the Fair Labor Standards Act, as amended (29 U.S.C. 207), or any other law, which relate to premium pay for overtime work, shall not apply to the hours which constitute a compressed schedule.

(b) In the case of any full-time employee, hours worked in excess of the compressed schedule shall be overtime hours and shall be paid for as provided by whichever statutory provisions referred to in subsection (a) of this section are applicable to the employee. In the case of any part-time employee on a compressed schedule, overtime pay shall begin to be paid after the same number of hours of work after which a full-time employee on a similar schedule would begin to receive overtime pay.

(c) Notwithstanding section 5544(a), 5546(a), or 5550(1) of title 5, United States Code, or any other applicable provision of law, in the case of any full-time employee on a compressed schedule who performs work (other than overtime work) on a tour of duty for any workday a part of which is performed on a Sunday, such employee is entitled to pay for work performed during the entire tour of duty at the rate of such employee's basic pay, plus premium pay at a rate equal to 25 percent of such basic pay rate.

(d) Notwithstanding section 5546(b) of title 5, United States Code, an employee on a compressed schedule who performs work on a holiday designated by Federal statute or Executive order is entitled to pay at the rate of such employee's basic pay, plus premium pay at a rate equal to such basic pay rate, for such work which is not in excess of the basic work requirement of such employee for such day. For hours worked on such a holiday in excess of the basic work requirement for such day, the employee is entitled to premium pay in accordance with the provisions of section 5542(a) or 5544(a) of title 5, United States Code, as applicable, or the provisions of section 7 of the Fair Labor Standards Act, as amended (29 U.S.C. 207), whichever provisions are more beneficial to the employee.

PART 3—ADMINISTRATIVE PROVISIONS

ADMINISTRATION OF LEAVE AND RETIREMENT PROVISIONS

SEC. 661. For purposes of administering sections 6303(a), 6304, 6307 (a) and (c), 6323, 6326, and 8339(m) of title 5, United States Code, in the case of an employee who is in any experiment under part 1 or 2 of this subtitle, references to a day or workday (or to multiples or parts thereof) contained in such sections shall be considered to be references to 8 hours (or to the respective multiples or parts thereof).

APPLICATION OF EXPERIMENTS IN THE CASE OF NEGOTIATED CONTRACTS

SEC. 662. (a) Employees within a unit with respect to which an organization of Government employees has been accorded exclusive recognition shall not be included within any experiment under part 1 or 2 of this subtitle except to the extent expressly provided under a written agreement between the agency and such organization.

(b) The Office or an agency may not participate in a flexible or compressed schedule experiment under a negotiated contract which contains premium pay provisions which are inconsistent with the provisions of section 643 or 653 of this subtitle, as applicable.

PROHIBITION OF COERCION

SEC. 633. (a) An employee may not directly or indirectly intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce, any other employee for the purpose of interfering with—

(1) such employee's rights under part 1 of this subtitle to elect a time of arrival or departure to work or not to work credit hours, or to request or not to request compensatory time off in lieu of payment for overtime hours; or

(2) such employee's right under section 652 (b) (1) of this subtitle to vote whether or not to be included within a compressed schedule experiment or such employee's right to request an agency determination under section 652(b)(2) of this subtitle.

For the purpose of the preceding sentence the term "intimidate, threaten, or coerce" includes, but is not limited to, promising to confer or conferring any benefit (such as appointment, promotion, or compensation), or effecting or threatening to effect any reprisal (such as deprivation of appointment, promotion, or compensation).

(b) Any employee who violates the provisions of subsection (a) of this section shall, upon a final order of the Merit Systems Protection Board, be—

(1) removed from such employee's position, in which event that employee may not thereafter hold any position as an employee for such period as the Board may prescribe;

(2) suspended without pay from such employee's position for such period as the Board may prescribe; or

(3) disciplined in such other manner as the Board shall deem appropriate.

The Board shall prescribe procedures to carry out this subsection under which an employee subject to removal, suspension, or other disciplinary action shall have rights comparable to the rights afforded an employee subject to removal or suspension under subchapter III of chapter 73 of title 5, United States Code, relating to certain prohibited political activities.

REPORTS

SEC. 664. Not later than 2½ years after the effective date of parts 1 and 2 of this subtitle, the Office shall—

(1) prepare an interim report containing recommendations as to what, if any, legislative or administrative action shall be taken based upon the results of experiments conducted under this subtitle, and

(2) submit copies of such report to the President, the Speaker of the House, and the President pro tempore of the Senate.

The Office shall prepare a final report with regard to experiments conducted under this subtitle and shall submit copies of such report to the President, the Speaker of the House, and the President pro tempore of the Senate not later than 3 years after such effective date.

REGULATIONS

SEC. 665. The Office shall prescribe regulations necessary for the administration of the foregoing provisions of this subtitle.

EFFECTIVE DATE

SEC. 666. The provisions of section 633 of this subtitle and parts 1 and 2 of this subtitle shall take effect on the 180th day after the date of the enactment of this Act.

Sec. 664. Reports.
Sec. 665. Regulations.
Sec. 666. Effective date.

Mr. SOLARZ (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SOLARZ. Mr. Chairman, I will be very brief. This amendment provides for the establishment of an experimental flexitime program under the supervision of the Civil Service Commission throughout the Federal Government.

It came before the House a few months ago in bill form. At that time it was supported by the administration, by all of the relevant Federal employee unions, and by the majority and minority managers of the bill. Indeed, it passed the House by an overwhelming margin and it was sent over for the consideration of the other body. After a relatively brief period of time is was reported out by two separate committees in the other body, both of which had jurisdiction over the bill, without any dissenting votes in either of them. And, in fact, it was scheduled to be taken up on the calendar of the other body today. Unfortunately, however, one of the distinguished Members of the other body had an amendment to the bill which clearly was not germane, and the manager of the legislation said he would not call up the bill on the Senate floor if his colleague in the Senate insisted on offering this nongermane amendment.

To the extent that the author of the amendment has indicated his intention to offer this nongermane amendment, which has nothing whatever to do with flexitime itself, it means the other body will probably not take up the flexitime bill during the remainder of the session, despite the fact that it was voted out unanimously by two separate committees in the other body, and no objections to the bill itself have surfaced in the Senate.

Consequently, I am offering it today as an amendment to title VI. So if it is passed by the House today, as I hope and trust it will, it should be accepted by the Senate conferees, and thus become law.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Chairman, I support the amendment.

Mr. SOLARZ. Mr. Chairman, I appreciate the gentleman's support.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Chairman, as I recall, when we passed the flexitime measure, there was also a part-time provision. Does the gentleman's amendment include both part-time and flexitime?

Mr. SOLARZ. No; that was a separate bill. It does not include the part-time provision which passed the House as a separate piece of legislation.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman for yielding.

Mr. Chairman, does the gentleman's amendment contain the religious holiday aspects, as passed in the House?

Mr. SOLARZ. No; that was adopted in the committee a few hours ago.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SOLARZ).

The amendment was agreed to.

The CHAIRMAN. Are there other amendments to title VI?

There being none, the Clerk will read title VII.

The Clerk read as follows:

TITLE VII—FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

Sec. 701. So much of subpart F of part III of title 5, United States Code, as precedes

subchapter II of chapter 71 thereof is amended to read as follows:

"Subpart F—Labor-Management and Employee Relations

"Chapter 71—LABOR-MANAGEMENT RELATIONS

"SUBCHAPTER I—GENERAL PROVISIONS

"Sec.
"7101. Findings and purpose.
"7102. Employees' rights.
"7103. Definitions; application.
"7104. Federal Labor Relations Authority.
"7105. Powers and duties of the Authority.
"7106. Management rights.

"SUBCHAPTER II—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"Sec.
"7111. Exclusive recognition of labor organizations.
"7112. Determination of appropriate units for labor organization representation.
"7113. National consultation rights.
"7114. Representation rights and duties.
"7115. Allotments to representatives.
"7116. Unfair labor practices.
"7117. Duty to bargain in good faith; compelling need.
"7118. Prevention of unfair labor practices.
"7119. Negotiation impasses; Federal Service Impasse Panel.
"7120. Standards of conduct for labor organizations.

"SUBCHAPTER III—GRIEVANCES, APPEALS, AND REVIEW

"Sec.
"7121. Grievance procedures.
"7122. Exceptions to arbitral awards.
"7123. Judicial review; enforcement.

"SUBCHAPTER IV—ADMINISTRATIVE AND OTHER PROVISIONS

"Sec.
"7131. Reporting requirements for standards of conduct.
"7132. Official time.
"7133. Subpenas.
"7134. Compilation and publication of data.
"7135. Regulations.
"7136. Continuation of existing laws, recognitions, agreements, and procedures.

"SUBCHAPTER I—GENERAL PROVISIONS

"§ 7101. Findings and purpose

"(a) The Congress finds that experience in both private and public employment indicates that the statutory protection of the right of employees to organize, bargain collectively, and participate through labor organizations of their own choosing in decisions which affect them safeguards the public interest and contributes to the effective conduct of public business. Such protection facilitates and encourages the amicable settlement of disputes between employees and their employers involving conditions of employment. Therefore, labor organizations and collective bargaining in the civil service are in the public interest.

"(b) It is the purpose of this chapter to prescribe certain rights and obligations of the employees of the Federal Government and to establish procedures which are designed to meet the special requirements and needs of the Federal Government.

"§ 7102. Employees' rights

"Each employee shall have the right to form, join, or assist any labor organization, or to refrain from any such activity, freely and without fear of penalty or reprisal, and each employee shall be protected in the exercise of such right. Except as otherwise provided under this chapter, such right includes the right—

"(1) to act for a labor organization in the capacity of a representative and the right, in such capacity, to present the views of the labor organization to heads of agencies and other officials of the executive branch of the Government, the Congress, or other appropriate authorities,

"(2) to engage in collective bargaining with respect to conditions of employment through representatives chosen by employees under this chapter, and

"(3) to engage in other lawful activities for the purpose of establishing, maintaining, and improving conditions of employment.

"§ 7103. Definitions; application

"(a) For the purpose of this chapter—

"(1) 'person' means an individual, labor organization, or agency;

"(2) 'employee' means an individual—

"(A) employed in an agency; or

"(B) whose work as such an employee (determined under the preceding provisions of this paragraph) has ceased because of any unfair labor practice under section 7116 of this title and who has not obtained any other regular and substantially equivalent employment, as determined under regulations prescribed by the Federal Labor Relations Authority;

but does not include—

"(i) an alien or noncitizen of the United States who occupies a position outside the United States;

"(ii) a member of the uniformed services;

"(iii) a supervisor or a management official; or

"(iv) an officer or employee in the Foreign Service of the United States employed in the Department of State, the Agency for International Development, or the International Communication Agency;

"(3) 'agency' means an Executive agency (including a nonappropriated fund instrumentality described in section 2105(c) of this title and the Veterans' Canteen Service, Veterans' Administration), the Library of Congress, and the Government Printing Office, but does not include—

"(A) the General Accounting Office;

"(B) the Federal Bureau of Investigation;

"(C) the Central Intelligence Agency;

"(D) the National Security Agency;

"(E) the Tennessee Valley Authority;

"(F) the Federal Labor Relations Authority; or

"(G) the Federal Service Impasses Panel;

"(4) 'labor organization' means an organization composed in whole or in part of employees, in which employees participate and pay dues, and which has as a purpose the dealing with an agency concerning grievances and conditions of employment, but does not include—

"(A) an organization whose basic purpose is entirely social, fraternal, or limited to special interest objectives which are only incidentally related to conditions of employment;

"(B) an organization which, by its constitution, bylaws, tacit agreement among its members, or otherwise, denies membership because of race, color, creed, national origin, sex, age, preferential or nonpreferential civil service status, political affiliation, marital status, or handicapping condition; or

"(C) an organization sponsored by an agency;

"(5) 'dues' means dues, fees, and assessments;

"(6) 'Authority' means the Federal Labor Relations Authority described in section 7104(a) of this title;

"(7) 'Panel' means the Federal Service Impasses Panel described in section 7119(c) of this title;

"(8) 'collective bargaining agreement' means an agreement entered into as a result of collective bargaining pursuant to the provisions of this chapter;

"(9) 'grievance' means any complaint—

"(A) by any employee concerning any matter relating to the employment of the employee;

"(B) by any labor organization concerning any matter relating to the employment of any employee; or

"(C) by any employee, labor organization, or agency concerning—

"(i) the effect or interpretation, or a claim of breach, of a collective bargaining agreement; or

"(ii) any claimed violation, misinterpretation, or misapplication of any law, rule, or regulation affecting conditions of employment;

"(10) 'supervisor' means an individual employed by an agency having authority in the interest of the agency to hire, direct, assign, promote, reward, transfer, furlough, layoff, recall, suspend, discipline, or remove employees, to adjust their grievances, or to effectively recommend such action, if the exercise of the authority is not merely routine or clerical in nature but requires the consistent exercise of independent judgment, except that, with respect to any unit which includes firefighters or nurses, the term 'supervisor' includes only those individuals who devote a preponderance of their employment time to exercising such authority;

"(11) 'management official' means an individual employed by an agency in a position the duties and responsibilities of which require or authorize the individual to formulate, determine, or influence the policies of the agency;

"(12) 'collective baragining' means the performance of the mutual obligation of the representative of an agency and the exclusive representative of employees in an appropriate unit in the agency to meet at reasonable times and to confer, consult, and bargain in a good-faith effort to reach agreement with respect to the conditions of employment affecting such employees and to execute, if requested by either party, a written document incorporating any collective bargaining agreement reached, but the obligation referred to in this paragraph does not compel either party to agree to a proposal or to make a concession;

"(13) 'confidential employee' means an employee who acts in a confidential capacity with respect to an individual who formulates or effectuates management policies in the field of labor-management relations;

"(14) 'conditions of employment' means personnel policies, practices, and matters, whether established by rule, regulation, or otherwise, affecting working conditions, except that such term does not include policies, practices, and matters—

"(A) relating to discrimination in employment on the basis of race, color, religion, sex, age, national origin, or handicapping condition;

"(B) relating to political activities prohibited under subchapter III of chapter 73 of this title; or

"(C) to the extent such matters are specifically provided for by Federal statute;

"(15) 'professional employee' means—

"(A) an employee engaged in the performance of work—

"(i) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or a hospital (as distinguished from knowledge acquired by a general academic education, or from an apprenticeship, or from training in the performance of routine mental, manual, mechanical, or physical activities);

"(ii) requiring the consistent exercise of discretion and judgment in its performance;

"(iii) which is predominantly intellectual and varied in character (as distinguished from routine mental, manual, mechanical, or physical work); and

"(iv) which is of such character that the output produced or the result accomplished

by such work cannot be standardized in relation to a given period of time; or

"(B) an employee who has completed the courses of specialized intellectual instruction and study described in subparagraph (A)(i) of this paragraph and is performing related worked under appropriate direction or guidance to qualify the employee as a professional employee described in subparagraph (A) of this paragraph;

"(16) 'exclusive representative' means any labor organization which—

"(A) is certified as the exclusive representative of employees in an appropriate unit pursuant to section 7111 of this title; or

"(B) was recognized by an agency immediately before the effective date of this chapter as the exclusive representative of employees in an appropriate unit—

"(i) on the basis of an election, or

"(ii) on any basis other than an election, and continues to be so recognized in accordance with the provisions of this chapter.

"(17) 'firefighter' means any employee engaged in the performance of work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment; and

"(18) 'United States' means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

"(b) An agency may file an application with the Authority requesting that it, or any unit thereof, be excluded from any provision or requirement of this chapter. The Authority shall—

"(1) review the application, and

"(2) undertake any other investigation it considers appropriate.

If, upon completion of its review and investigation, the Authority determines that the agency, or any unit thereof, has a primary function intelligence, counterintelligence, investigative, or security work, and that any requirement or provision of this chapter cannot be applied to the agency, or unit thereof, with respect to which such a determination has been made in a manner consistent with national security requirements and considerations, the Authority may issue an order excluding the agency, or unit thereof, with respect to which such a determination has been made from such requirement or provision.

"§ 7104. Federal Labor Relations Authority

"(a) The Federal Labor Relations Authority is composed of three members, not more than 2 of whom may be adherents of the same political party. No member shall engage in any other business or employment or hold another office or position in the Government of the United States except as otherwise provided by law.

"(b) Members of the Authority shall be appointed by the President by and with the advice and consent of the Senate, and may be removed by the President only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office. The President shall designate one member to serve as Chairman of the Authority.

"(c)(1) One of the original members of the Authority shall be appointed for a term of 1 year, one for a term of 3 years, and the Chairman for a term of 5 years. Thereafter, each member shall be appointed for a term of 5 years.

"(2) Notwithstanding paragraph (1) of this subsection, the term of any member shall not expire before the earlier of—

"(A) the date on which the member's successor takes office,

"(B) the last day of the Congress beginning after the date on which the member's term of office would (but for this subparagraph) expire.

An individual chosen to fill a vacancy shall be appointed for the unexpired term of the member replaced.

"(d) A vacancy in the Authority shall not impair the right of the remaining members to exercise all of the powers of the Authority.

"(e) The Authority shall make an annual report to the President for transmittal to the Congress which shall include information as to the cases it has heard and the decisions it has rendered.

"(f)(1) The General Counsel of the Authority shall be appointed by the President, by and with the advice and consent of the Senate, for a term of 5 years. The General Counsel may be removed by the President.

"(2) The General Counsel may—

"(A) investigate alleged violations of this chapter,

"(B) file and prosecute complaints under this chapter,

"(C) intervene before the Authority in proceedings brought under section 7118 of this title, and

"(D) exercise such other powers of the Authority as the Authority may prescribe.

"(3) The General Counsel shall have direct authority over, and responsibility for, all employees in the office of General Counsel, including employees of the General Counsel in the regional offices of the Authority.

"(4) If a vacancy occurs in the office of General Counsel, the President shall promptly designate an Acting General Counsel and shall submit a nomination for General Counsel to the Senate within 40 days after the vacancy occurs, unless the Congress adjourns sine die before the expiration of the 40-day period, in which case the President shall submit the nomination to the Senate not later than 10 days after the Congress reconvenes.

"§ 7105. Powers and duties of the Authority

"(a) The Authority shall provide leadership in establishing policies and guidance relating to matters under this chapter, and, except as otherwise provided, shall be responsible for carrying out the purpose of this chapter.

"(b) The Authority shall adopt an official seal which shall be judicially noticed.

"(c) The principal office of the Authority shall be in or about the District of Columbia, but the Authority may meet and exercise any or all of its powers at any time or place. Except as otherwise expressly provided by law, the Authority may, by one or more of its members or by such agents as it may designate, make any appropriate inquiry necessary to carry out its duties wherever persons subject to this chapter are located. Any member who participates in the inquiry shall not be disqualified from later participating in a decision of the Authority in any case relating to the inquiry.

"(d) The Authority shall appoint an Executive Director and such regional directors, administrative law judges under section 3105 of this title, and other individuals as it may from time to time find necessary for the proper performance of its functions.

"(e)(1) The Authority may delegate to any regional director its authority under this chapter—

"(A) to determine whether a group of employees is an appropriate unit;

"(B) to conduct investigations and to provide for hearings;

"(C) to determine whether a question of representation exists and to direct an election; and

"(D) to conduct secret ballot elections and certify the results thereof.

"(2) The Authority may delegate to any administrative law judge appointed under subsection (d) of this section its authority under section 7118 of this title to determine whether any person has engaged in or is engaging in an unfair labor practice.

"(f) If the Authority delegates any authority to any regional director or administrative law judge to take any action pursuant to subsection (e) of this section, the Authority may, upon application by any interested person filed within 60 days after the date of the action, review such action, but the review shall not, unless specifically ordered by the Authority, operate as a stay of the action. The Authority may affirm, modify, or reverse any action reviewed under this subsection. If the Authority does not undertake to grant review of the action under this subsection within 60 days after the later of—

"(1) the date of the action; or

"(2) the date of the filing of any application under this subsection for review of the action;

the action shall become the action of the Authority at the end of such 60-day period.

"(g) In order to carry out its function under this chapter, the Authority may—

"(1) hold hearings; and

"(2) administer oaths, take the testimony or deposition of any person under oath, and issue subpenas as provided in section 7133 of this title.

"§ 7106. Management rights

"(a) Subject to subsection (b) of this section, nothing in this chapter shall affect the authority of any management official of any agency—

"(1) to determine the mission, budget, organization, number of employees, and internal security practices of the agency; and

"(2) in accordance with applicable laws—

"(A) to direct employees;

"(B) to assign work, to make determinations with respect to contracting out, and to determine the personnel by which agency operations shall be conducted; and

"(C) to take whatever actions may be necessary to carry out the agency mission during national emergencies.

"(b) Nothing in this section shall preclude any agency and any labor organization from negotiating—

"(1) procedures which management officials of the agency will observe in exercising their authority to determine the mission, budget, organization, number of employees, and internal security of the agency, or

"(2) appropriate arrangements for employees adversely affected by the exercise of the authority described in subsection (a) of this section by such management officials.

"SUBSECTION II—RIGHTS AND DUTIES OF AGENCIES AND LABOR ORGANIZATIONS

"§ 7111. Exclusive recognition of labor organizations

"(a) Exclusive recognition shall be accorded to a labor organization which has been selected by a majority of employees in an appropriate unit who participate in an election in conformity with the requirements of this chapter.

"(b)(1) If a petition is filed with the Authority—

"(A) by any person alleging—

"(i) in the case of an appropriate unit for which there is no exclusive representative that 30 percent of the employees in the appropriate unit wish to be represented for the purpose of collective bargaining by an exclusive representative, or

"(ii) in the case of an appropriate unit for which there is an exclusive representative that 30 percent of the employees in the unit allege that the exclusive representative is no longer the representative of the majority of the employees in the unit; or

"(B) by any person seeking clarification

of, or an amendment to, a certification then in effect or a matter relating to representation;

"the Authority shall investigate the petition, and if it has reasonable cause to believe that question of representation exists, it shall provide an opportunity for a hearing (for which a transcript shall be kept) after reasonable notice. Except as provided under subsection (e) of this section, if the Authority finds on the record of the hearing that a question of representation exists, the Authority shall, subject to paragraph (2) of this subsection, conduct an election on the question by secret ballot and shall certify the results thereof. An election under this subsection shall not be conducted in any appropriate unit or in any subdivision thereof within which, in the preceding 12 calendar months, a valid election under this subsection has been held.

"(2)(A) If, after the 45-day period beginning on the date on which the petition is filed pursuant to paragraph (1) of this subsection, unresolved issues exist concerning—

"(i) the appropriateness of the unit in accordance with section 7112 of this title;

"(ii) the eligibility of one or more employees to vote in the proposed election; or

"(iii) other matters determined by the Authority to be relevant to the election;

the Authority shall direct an election by secret ballot in the unit specified in the petition and announce the results thereof.

"(B) After conducting an election under subparagraph (A) of this paragraph, the Authority shall expedite the resolution of any disputed issues described in subparagraph (A) of this paragraph. If the Authority determines that matters raised by the disputed issues did not affect the outcome of the election, the Authority shall certify the results of the election. If the Authority determines that the matters affected the outcome of the election, it shall conduct a new election by secret ballot in accordance with such requirements as are appropriate on the basis of its determination, and shall certify the results thereof.

"(c) A labor organization which—

"(1) has been designated by at least 10 percent of the employees in the unit specified in any petition filed pursuant to subsection (b) of this section;

"(2) has submitted a valid copy of a current or recently expired collective bargaining agreement for the unit; or

"(3) has submitted other evidence that it is the exclusive representative of the employees involved;

may intervene with respect to a petition filed pursuant to subsection (b) of this section and shall be placed on the ballot of any election under such subsection (b) with respect to the petition.

"(d) The Authority shall determine who is eligible to vote in any election under this section and shall establish rules governing any such deletion, which shall include rules allowing employees eligible to vote the opportunity to choose—

"(1) from labor organizations on the ballot, that labor organization which the employees wish to have represent them; or

"(2) not to be represented by a labor organization.

In any election in which no choice on the ballot receives a majority of the votes cast, a runoff election shall be conducted between the two choices receiving the highest number of votes. A labor organization which receives the majority of the votes cast in an election shall be certified by the Authority as the exclusive representative.

"(e) The Authority may, on the petition of a labor organization, certify the labor organization as an exclusive representative—

"(1) if, after investigation, the Authority determines that the conditions for a free and untrammeled election under this section cannot be established because the agency involved has engaged in or is engaging in an unfair labor practice described in section 7116(a) of this title; or

"(2) if, after investigation, the Authority determines that—

"(A) the labor organization represents a majority of employees in an appropriate unit;

"(B) the majority status was achieved without the benefit of any unfair labor practice described in section 7116 of this title;

"(C) no other person has filed a petition for recognition under subsection (b) of this section or a request for intervention under subsection (c) of this section; and

"(D) no other question of representation exists in the appropriate unit.

"(f) Any labor organization described in section 7103(a)(16)(B)(ii) of this title may petition for an election for the determination of that labor organization as the exclusive representative of an appropriate unit.

"(g) A labor organization seeking exclusive recognition shall submit to the Authority and the agency involved a roster of its officers and representatives, a copy of its constitution and bylaws, and a statement of its objectives.

"(h) Exclusive recognition shall not be accorded to a labor organization—

"(1) if the Authority determines that the labor organization is subject to corrupt influences or influences opposed to democratic principles;

"(2) in the case of a petition filed pursuant to subsection (b)(1)(A) of this section, if there is not credible evidence that at least 30 percent of the employees in the unit specified in the petition wish to be represented for the purpose of collective bargaining by the labor organization seeking exclusive recognition;

"(3) if there is then in effect a lawful written collection bargaining agreement between the agency involved and an exclusive representative (other than the labor organization seeking exclusive recognition) covering any employees included in the unit specified in the petition, unless—

"(A) the collective bargaining agreement has been in effect for more than 3 years, or

"(B) the petition for exclusive recognition is filed during the 4-month period which begins on the 180th day before the expiration date of the collective bargaining agreement; or

"(4) if the Authority has, within the previous 12 calendar months, conducted a secret ballot election involving any of the employees in the unit described in any petition under this section and in such election a majority of the employees voting chose a labor organization for certification as the unit's exclusive representative or chose not to be represented by any labor organization.

"(i) Nothing in this section shall be construed to prohibit the waiving of hearings by stipulation for the purpose of a consent election in conformity with regulations and rules or decisions of the Authority.

"§ 7112. Determination of appropriate units for labor organization representation

"(a)(1) The Authority shall determine the appropriateness of any unit. The Authority shall determine in each case whether, in order to ensure employees the fullest freedom in exercising the rights guaranteed under this chapter, the appropriate unit should be established on an agency, plant, installation, functional, or other basis and shall determine any unit to be an appropriate unit only if the determination will ensure a clear and identifiable community of interest among the employees in the unit and will promote effective dealings with, and efficiency of the operations of, the agency involved.

"(b) A unit shall not be determined to be appropriate under this section solely on the basis of the extent to which employees in the proposed unit have organized, nor shall a unit be determined to be appropriate if it includes—

"(1) except as provided under section 7136(a)(2) of this title, any management official or supervisor, except that, with respect to a unit or majority of which is composed of firefighters or nurses, a unit which includes both supervisors and employees may be considered appropriate;

"(2) a confidential employee;

"(3) an employee engaged in personnel work in other than a purely clerical capacity;

"(4) an employee engaged in administering the provisions of this chapter;

"(5) both professional employees and other employees, unless a majority of the professional employees vote for inclusion in the unit;

"(6) any employee engaged in intelligence, counterintelligence, investigative, or security work which directly affects national security; or

"(7) any employee primarily engaged in investigation or audit functions relating to the work of individuals employed by an agency whose duties directly affect the internal security of the agency but only if the functions are undertaken to insure that the duties are discharged honestly and with integrity.

"(c) Two or more units which are in an agency and for which a labor organization is the exclusive representative by reason of elections within each of the units shall be consolidated into a single larger unit if the Authority considers the larger unit to be appropriate. The Authority shall certify the labor organization as the exclusive representative of the new larger unit.

"(d) In the case of the reorganization of one or more units for which, before the reorganization, a labor organization was the exclusive representative of any such unit, the labor organization shall continue to be the exclusive representative for each such unit until new elections are held or a period of 45 days has elapsed, whichever first occurs.

"§ 7113. National consultation rights

"(a)(1) If, in connection with any agency, no labor organization has been accorded exclusive recognition on an agency basis, a labor organization which is the exclusive representative of a substantial number of the employees of the agency, as determined in accordance with criteria prescribed by the Authority, shall be granted national consultation rights by the agency. National consultation rights shall terminate when the labor organization no longer meets the criteria prescribed by the Authority. Any issue relating to any labor organization's eligibility for, or continuation of, national consultation rights shall be subject to determination by the Authority.

"(b)(1) Any labor organization having national consultation rights in connection with any agency under subsection (a) of this section shall—

"(A) be informed of any change in conditions of employment proposed by the agency, and

"(B) shall be permitted reasonable time to present its views and recommendations regarding the changes.

"(2) If any views or recommendations are presented under paragraph (1) of this subsection to an agency by any labor organization—

"(A) the agency shall consider the views or recommendations before taking final action on any matter with respect to which the views or recommendations are presented; and

"(B) the agency shall provide the labor organization a written statement of the reasons for taking the final action.

"(c) Nothing in this section shall be construed to limit the right of any agency or exclusive representative to engage in collective bargaining.

"§ 7114. Representation rights and duties

"(a) A labor organization which has been accorded exclusive recognition is the exclusive representative of the employees in the unit it represents and is entitled to act for, and negotiate collective bargaining agreements covering, all employees in the unit. An exclusive representative is responsible for representing the interests of all employees in the unit it represents without discrimination and without regard to labor organization membership. An exclusive representative of an appropriate unit in an agency shall be given the opportunity to be represented at—

"(1) any discussion between one or more representatives of the agency and one or more employees in the unit or their representatives concerning any grievance, personnel policy or practice, or other conditions of employment; or

"(2) any discussion between an employee in the unit and a representative of the agency if the employee reasonably believes that the employee may be the subject of disciplinary action.

Any agency and any exclusive representative of any appropriate unit in the agency, through appropriate representatives, shall meet and negotiate in good faith for the purpose of arriving at a collective bargaining agreement. The rights of an exclusive representative under the preceding provisions of this subsection shall not be construed to preclude an employee from being represented by an attorney or other representative, other than the exclusive representative, of the employee's own choosing in any appeal action under procedures other than procedures negotiated pursuant to this chapter.

"(b) The duty of an agency and an exclusive representative to negotiate in good faith under subsection (a) of this section shall include the obligation—

"(1) to approach the negotiations with a sincere resolve to reach a collective bargaining agreement;

"(2) to be represented at the negotiations by duly authorized representatives prepared to discuss and negotiate on any conditions of employment;

"(3) to meet at reasonable times and convenient places as frequently as may be necessary, and to avoid unnecessary delays;

"(4) in the case of an agency, to furnish to the exclusive representative involved, or its authorized representative, upon request and, to the extent not prohibited by law, data which is normally maintained by the agency in the regular course of business, and which is reasonably available and necessary for full and proper discussion, understanding, and negotiation of subjects within the scope of collective bargaining; and

"(5) if agreement is reached, to execute on the request of any party to the negotiation a written document embodying the agreed terms, and to take such steps as are necessary to implement such agreement.

"§ 7115. Allotments to representatives

"(a) If an agency has received from an employee in an appropriate unit a written assignment which authorizes the agency to deduct from the pay of the employee amounts for the payment of regular and periodic dues of the exclusive representative of the unit, the agency shall honor the assignment and make an appropriate allotment pursuant to the assignment. Any such allotment shall be made at no cost to the exclusive representative or the employee. Except as provided under subsection (b) of this section, any such assignment may not be revoked for a period of 1 year.

"(b) An allotment under subsection (a) of this section for the deduction of dues with respect to any employee shall terminate when—

"(1) the agreement between the agency and the exclusive representative involved ceases to be applicable to the employee; or

"(2) the employee is suspended or expelled from membership in the exclusive representative.

"(c)(1) Subject to paragraph (2) of this subsection, if a petition has been filed with the Authority by a labor organization alleging that 10 percent of the employees in an appropriate unit in an agency have membership in the labor organization, the Authority shall investigate the petition to determine its validity. Upon certification by the Authority of the validity of the petition, the agency shall have a duty to negotiate with the labor organization solely concerning the deduction of dues of the labor organization from the pay of the members of the labor organization who are employees in the unit and who make a voluntary allotment for such purpose.

"(2)(A) The provisions of paragraph (1) of this subsection shall not apply in the case of any appropriate unit for which there is an exclusive representative.

"(B) Any agreement under paragraph (1) of this subsection between a labor organization and an agency with respect to an appropriate unit shall be null and void upon the certification of an exclusive representative of the unit.

"§ 7116. Unfair labor practices

"(a) For the purpose of this chapter, it shall be an unfair labor practice for an agency—

"(1) to interfere with, restrain, or coerce any employee in the exercise by the employee of any right under this chapter;

"(2) to encourage or discourage membership in any labor organization by discrimination in connection with hiring, tenure, promotion, or other conditions of employment;

"(3) to sponsor, control, or otherwise assist any labor organization, other than to furnish, upon request, customary and routine services and facilities if the services and facilities are also furnished on an impartial basis to other labor organizations having equivalent status;

"(4) to discipline or disscriminate against an employee because the employee has filed a complaint, affidavit, or petition, or has given any information or testimony under this chapter;

"(5) to refuse to consult, confer, or negotiate in good faith with a labor organization as required by this chapter;

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter;

"(7) to prescribe any rule or regulation which restricts the scope of collective bargaining permitted by this chapter or which is in conflict with any applicable collective bargaining agreement: or

"(8) to otherwise fail or refuse to comply with any provision of this chapter.

"(b) For the purpose of this chapter, it shall be an unfair labor practice for a labor organization—

"(1) to interfere with, restrain, or coerce any employee in the exercise by the employee of any right under this chapter;

"(2) to cause or attempt to cause an agency to discriminate against any employee in the exercise by the employee of any right under this chapter;

"(3) to coerce, discipline, fine, or attempt to coerce a member of the labor organization as punishment, reprisal, or for the purpose of hindering or impeding the member's work performance or productivity as an employee or the discharge of the member's duties as an employee;

"(4) to discriminate against an employee with regard to the term or conditions of membership in the labor organization on the basis of race, color, creed, national origin, sex, age, preferential or nonpreferential civil service status, political affiliation, marital status, or handicapping condition;

"(5) to refuse to consult, confer, or negotiate in good faith with an agency as required by this chapter:

"(6) to fail or refuse to cooperate in impasse procedures and impasse decisions as required by this chapter;

"(7) to call or engage in a strike, work stoppage, or slowdown, or to condone any such activity by failing to take action to prevent or stop such activity; or

"(8) to otherwise fail or refuse to comply with any provision of this chapter.

"(c) For the purpose of this chapter it shall be an unfair labor practice for an exclusive representative to deny membership to any employee in the appropriate unit represented by such exclusive representative except for failure—

(1) to meet reasonable occupational standards uniformly required for admission, or

(2) to tender dues uniformly required as a condition of acquiring and retaining membership.

This subsection does not preclude any labor organization from enforcing discipline in accordance with procedures under its constitution or bylaws to the extent consistent with the provisions of this chapter.

"(d) Issues which may properly be raised under—

"(1) an appeals procedure prescribed by or pursuant to law; or

"(2) any grievance procedure negotiated pursuant to section 7121 of this title;

may, at the election of the aggrieved party, be raised either—

(A) under such appeals procedure or such grievance procedure, as appropriate; or

(B) if applicable, under the procedure for resolving complaints of unfair labor practices under section 7118 of this title.

An election under the preceding sentence shall be made at such time and in such manner as the Authority shall prescribe. Any decision under subparagraph (B) of this subsection on any such issue shall not be construed to be a determination of an unfair labor practice under this chapter or a precedent for any such determination.

"§ 7117. Duty to bargain in good faith; compelling need

"(a)(1) Subject to paragraph (2) of this subsection, the duty to bargain in good faith shall, to the extent not inconsistent with Federal law, extend to matters which are the subject of any rule or regulation which is not a Government-wide rule or regulation.

"(2) The duty to bargain in good faith shall, to the extent not inconsistent with Federal law, extend to matters which are the subject of any Government-wide rule or regulation for which the Authority has determined under subsection (b) of this section that no compelling need (as determined under regulations prescribed by the Authority) exists.

"(b)(1) In any case of collective bargaining in which an exclusive representative alleges that no compelling need exists for any Government-wide rule or regulation which is then in effect and which governs any matter at issue in such collective bargaining, the Authority shall determine under paragraph (2) of this subsection, in accordance with regulations prescribed by the Authority, whether such a compelling need exists.

"(2) For the purpose of this section, a compelling need shall be determined not to exist for any rule or regulation only if—

"(A) the agency which issued the rule or regulation informs the Authority in writing that a compelling need for the rule or regulation does not exist; or

"(B) the Authority determines, after a hearing under this section, that compelling need for the rule or regulation does not exist.

"(3) Any hearing under this subsection

shall be expedited to the extent practicable and shall not include the General Counsel as a party.

"(4) The agency which issued the rule or regulation shall be a necessary party at any hearing under this subsection.

§ 7118. Prevention of unfair labor practices

"(a)(1) If an agency or labor organization is charged by any person with having engaged in or engaging in an unfair labor practice, the General Counsel shall investigate the charge and may issue and cause to be served upon the agency or labor organization a complaint. In any case in which the General Counsel does not issue a complaint because the charge fails to state an unfair labor practice, the General Counsel shall provide the person making the charge a written statement of the reasons for not issuing a complaint.

"(2) Any complaint under paragraph (1) of this subsection shall contain a notice—

"(A) of the charge;

"(B) that a hearing will be held before the Authority (or any member thereof or before an individual employed by the Authority and designated for such purpose); and

"(C) of the time and place fixed for the hearing.

"(3) The labor organization or agency involved shall have the right to file an answer to the original and any amended complaint and to appear in person or otherwise and give testimony at the time and place fixed in the complaint for the hearing.

"(4)(A) Except as provided in subparagraph (B) of this paragraph, no complaint shall be issued based on any alleged unfair labor practice which occurred more than 6 months before the filing of the charge with the Authority.

"(B) If the General Counsel determines that the person filing any charge was prevented from filing the charge during the 6-month period referred to in subparagraph (A) of this paragraph by reason of—

"(i) any failure of the agency or labor organization against which the charge is made to perform a duty owed to the person, or

"(ii) any concealment which prevented discovery of the alleged unfair labor practice during the 6-month period.

the General Counsel may issue a complaint based on the charge if the charge was filed during the 6-month period beginning on the day of the discovery by the person of the alleged unfair labor practice.

"(5) The Authority (or any member thereof or any individual employed by the Authority and designated for such purpose) shall conduct a hearing on the complaint not earlier than 5 days after the date on which the complaint is served. In the discretion of the individual or individuals conducting the hearing, any person involved may be allowed to intervene in the hearing and to present testimony. Any such hearing shall, to the extent practicable, be conducted in accordance with the provisions of subchapter II of chapter 5 of this title, except that the parties shall not be bound by rules of evidence, whether statutory, common law, or adopted by a court. A transcript shall be kept of the hearing. After such a hearing the Authority, in its discretion, may upon notice receive further evidence or hear argument.

"(6) If the Authority (or any member thereof or any individual employed by the Authority and designated for such purpose) determines after any hearing on a complaint under paragraph (5) of this subsection that the preponderance of the evidence received demonstrates that the agency or labor organization named in the complaint has engaged in or is engaging in an unfair labor practice, then the individual or individuals conducting the hearing shall state in writing their findings of fact and shall issue and cause to be served on the agency or labor organization an order—

"(A) to cease and desist from any such unfair labor practice in which the agency or labor organization is engaged;

"(B) directing that a collective bargaining agreement be amended and that the amendments be given retroactive effect;

"(C) requiring an award of reasonable attorney fees;

"(D) requiring reinstatement of an employee with back pay, together with interest thereon; or

"(E) including any combination of the actions described in subparagraph (A) through (D) of this paragraph or such other actions as will carry out the purpose of this chapter.

If any such order requires reinstatement of an employee with backpay, backpay may be required of the agency (as provided in section 5596 of this title) or of the labor organization, as the case may be, which is found to have engaged in the unfair labor practice involved.

"(7) If the individual or individuals conducting the hearing determine that the preponderance of the evidence received fails to demonstrate that the agency or labor organization named in the complaint has engaged in or is engaging in an unfair labor practice, the individual or individuals shall state in writing their findings of fact and shall issue an order dismissing the complaint.

"(b) In connection with any matter before the Authority in any proceeding under this section, the Authority may request from the Director of the Office of Personnel Management an opinion concerning the proper interpretation of rules, regulations, or other policy directives issued by the Office of Personnel Management. Any interpretation under the preceding sentence shall be advisory in nature and shall not be binding on the Authority.

"§ 7119. Negotiation impasses; Federal Service Impasses Panel

"(a) The Federal Mediation and Conciliation Service shall provide services and assistance to agencies and exclusive representatives in the resolution of negotiation impasses. The Service shall determine under what circumstances and in what manner it shall provide services and assistance.

"(b) If voluntary arrangements, including the services of the Federal Mediation and Conciliation Service or any other third-party mediation, fail to resolve a negotiation impasse—

"(1) either party may request the Federal Service Impasses Panel to consider the matter, or

"(2) the parties may agree to adopt a procedure for binding arbitration of the negotiation impasse.

"(c)(1) The Federal Service Impasses Panel is an entity within the Authority, the function of which is to provide assistance in resolving negotiation impasses between agencies and exclusive representatives.

"(2) The Panel shall be composed of a Chairman and at least six other members, who shall be appointed by the President, solely on the basis of fitness to perform the duties and functions involved, from among individuals who are familiar with Government operations and knowledgeable in labor-management relations.

"(3) Of the original members of the Panel, 2 members shall be appointed for a term of 1 year, 2 members shall be appointed for a term of 3 years, and the Chairman and the remaining members shall be appointed for a term of 5 years. Thereafter each member shall be appointed for a term of 5 years, except that an individual chosen to fill a vacancy shall be appointed for the unexpired term of the member replaced. Any member of the Panel may be removed by the President.

"(4) The Panel may appoint an Executive Director and any other individuals it may from time to time find necessary for the proper performance of its duties. Each member of the Panel who is not an employee (as defined in section 2105 of this title) is entitled to pay at a rate equal to the daily equivalent of the maximum annual rate of basic pay then currently paid under the General Schedule for each day he is engaged in the performance of official business of the Panel, including travel time, and is entitled to travel expenses as provided under section 5703 of this title.

"(5)(A) The Panel or its designee shall promptly investigate any impasse presented to it under subsection (b) of this section. The Panel shall consider the impasse and shall either—

"(i) recommend to the parties procedures for the resolution of the impasse; or

"(ii) assist the parties in resolving through whatever methods and procedures, including factfinding and recommendations, it may consider appropriate to accomplish the purpose of this section.

"(B) If the parties do not arrive at a settlement after assistance by the Panel under subparagraph (A) of this paragraph, the Panel may—

"(i) hold hearings;

"(ii) administer oaths, take the testimony or deposition of any person under oath, and issue subpenas as provided in section 7133 of this title; and

"(iii) take whatever action is necessary and not inconsistent with this chapter to resolve the impasse.

"(C) Notice of any final action of the Panel under this section shall be promptly served upon the parties, and the action shall be binding on such parties during the term of the agreement, unless the parties agree otherwise.

"§ 7120. Standards of conduct for labor organizations

"(a) A labor organization representing or seeking to represent employees pursuant to this chapter shall adopt, maintain, and enforce governing requirements containing explicit and detailed provisions to which it shall subscribe, which include provisions for—

"(1) the maintenance of democratic procedures and practices, including—

"(A) provisions for periodic elections to be conducted subject to recognized safeguards, and

"(B) provisions defining and securing the right of individual members to—

"(i) participate in the affairs of the labor organization,

"(ii) fair and equal treatment under the governing rules of the organization, and

"(iii) fair process in disciplinary proceedings;

"(2) the prohibition of business or financial interests on the part of labor organization officers and agents which conflict with their duty to the organization and its members; and

"(3) the maintenance of fiscal integrity in the conduct of the affairs of the labor organization, including provisions for accounting and financial controls and regular financial reports or summaries to be made available to its members.

"(b) This chapter does not authorize participation in the management of a labor organization or acting as a representative of a labor organization by a management official or a supervisor, except as specifically provided in this chapter, or by an employee if the participation or activity would result in a conflict or apparent conflict of interest or would otherwise be incompatible with law or with the official duties of the employee.

"SUBCHAPTER III—GRIEVANCES

"§ 7121. Grievance procedures

"(a) Any collective bargaining agreement shall provide procedures for the settlement of grievances, including questions of arbitrability. Any employee who has a grievance and who is covered by a collective bargaining agreement applies may elect to have the grievance processed under a procedure negotiated in accordance with this chapter.

"(b) Any negotiated grievance procedure referred to in subsection (a) of this section shall—

"(1) be fair and simple,

"(2) provide for expeditious processing, and

"(3) include procedures that—

"(A) assure an exclusive representative the right, in its own behalf or on behalf of any employee in the unit represented by the exclusive representive, to present and process grievances;

"(B) assure such an employee the right to present a grievance on the employee's own behalf, and assure the exclusive representative the right to be present during the grievance proceeding; and

"(C) provide that any grievance and satisfactorily settled under the negotiated grievance procedure shall be subject to binding arbitration which may be invoked by either the exclusive representative or the agency.

"(c) Any party to a collective bargaining agreement aggrieved by the failure, neglect, or refusal of the other party to proceed to arbitration pursuant to the negotiated grievance procedure provided in the agreement may file a petition in the appropriate United States district court requesting an order directing that arbitration proceed pursuant to the procedures provided therefor in the agreement. The court shall hear the matter without jury, expedite the hearing to the maximum extent practicable, and issue any order it determines appropriate.

"(d) The preceding subsections of this section shall not apply with respect to any grievance concerning—

"(1) any claimed violation of subchapter III of chapter 73 of this title (relating to prohibited political activities);

"(2) retirement, life insurance, or health insurance; or

"(3) a suspension or removal under section 7532 of this title.

"(e) The processing of a grievance under a procedure negotiated under this chapter shall not limit the right of an aggrieved employee to request the Equal Employment Opportunity Commission to review a final decision under the procedure—

"(1) pursuant to section 3 of Reorganization Plan Numbered 1 of 1978; or

"(2) where applicable, in such manner as shall otherwise be prescribed by regulation by the Equal Employment Opportunity Commission.

"§ 7122. Exceptions to arbitral awards

(a) Either party to arbitration under this chapter may file with the Authority an exception to any arbitrator's award pursuant to the arbitration. If upon review the Authority finds that the award is deficient because—

"(1) it is contrary to any law, rule, or regulation;

"(2) it was obtained by corruption, fraud, or other misconduct;

"(3) the arbitrator exercised partiality in making the award; or

"(4) the arbitrator exceeded powers granted to the arbitrator;

the Authority may take such action and make such recommendations concerning the award as it considers necessary, consistent with applicable laws, rules, or regulations.

"(b) If no exception to an arbitrator's award is filed under subsection (a) of this section during the 60-day period beginning on the date of such award, the award shall be final and binding. An agency shall take the actions required by an arbitrator's final award. The award may include the payment of backpay (as provided in section 5596 of this title) together with interest thereon.

§ 7123. Judicial review: enforcement

"(a) Any person aggrieved by a final order of the Authority under—

"(1) section 7118 of this title (involving an unfair labor practice);

"(2) section 7122 of this title (involving an award by an arbitrator); or

"(3) section 7112 of this title (involving an appropriate unit determination),

may, during the 60-day period beginning on the date on which the order was issued, institute an action for judicial review of the Authority's order in the United States court of appeals in the circuit in which the person resides or transacts business or in the United States Court of Appeals for the District of Columbia.

"(b) The authority may petition any appropriate United States court of appeals for the enforcement of any order of the Authority and for appropriate temporary relief or restraining order.

"(c) Upon the filing of a petition under subsection (a) of this section for judicial review or under subsection (b) of this section for enforcement, the Authority shall file in the court the record in the proceedings, as provided in section 2112 of title 28. Upon the filing of the petition, the court shall cause notice thereof to be served to the parties involved, and thereupon shall have jurisdiction of the proceeding and of the question determined therein and may grant any temporary relief (including a temporary restraining order) it considers just and proper, and may make and enter a decree affirming and enforcing, modifying and enforcing as so modified, or setting aside in whole or in part the order of the Authority. The filing of a petition under subsection (a) or (b) of this section shall not operate as a stay of the Authority's order unless the court specifically orders the stay. Review of the Authority's order shall be on the record in accordance with section 706 of this title. No objection that has not been urged before the Authority, or its designee, shall be considered by the court, unless the failure or neglect to urge the objection is excused because of extraordinary circumstances. The findings of the Authority with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any person applies to the court for leave to adduce additional evidence and shows to the satisfaction of the court that the additional evidence is material and that there were reasonable grounds for the failure to adduce the evidence in the hearing before the Authority, or its designee, the court may order the additional evidence to be taken before the Authority, or its designee, and to be made a part of the record. The Authority may modify its findings as to the facts, or make new findings by reason of additional evidence so taken and filed. The Authority shall file its modified or new findings, which, with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. The Authority shall file its recommendations, if any, for the modification or setting aside of its original order. Upon the filing of the record with the court, the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the judgment and decree shall be subject to review by the Supreme Court of the United States upon writ of certiorari or certification as provided in section 1254 of title 28.

"(d) The Authority may, upon issuance of a complaint as provided in section 7118 of this title charging that any person has engaged in or is engaging in an unfair labor practice, petition any United States district court within any district in which the unfair labor practice in question is alleged to have occurred or in which such person resides or transacts business for appropriate temporary relief or restraining order. Upon the filing of the petition, the court shall cause notice thereof to be served upon the person, and thereupon shall have jurisdiction to grant any temporary relief (including a temporary restraining order) it considers just and proper.

"SUBCHAPTER IV—ADMINISTRATIVE AND OTHER PROVISIONS

"§ 7131. Reporting requirements for standards of conduct

"The provisions of subchapter III of chapter 11 of title 29 shall be applicable to labor organizations which have been or are seeking to be certified as exclusive representatives under this chapter, and to the organizations' officers, agents, shop stewards, other representatives, and members to the extent to which the provisions would be applicable if the agency were an employer under section 402 of title 29. In addition to the authority conferred on him under section 438 of title 29, the Secretary of Labor shall prescribe regulations, with the written concurrence of the Authority, providing for simplified reports for any such labor organization. The Secretary of Labor may revoke the provision for simplified reports of any such labor organization if the Secretary determines, after any investigation the Secretary considers proper and after reasonable notice and opportunity for a hearing, that the purpose of this chapter and of chapter 11 of title 29 would be served thereby.

"§ 7132. Official time

"(a) Any employee representing an exclusive representative in the negotiation of a collective bargaining agreement under this chapter shall be authorized official time for such purposes, including attendance at impasse proceeding, during the time the employee otherwise would be in a duty status. The number of employees for whom official time is authorized under this subsection shall not exceed the number of individuals designated as representing the agency for such purposes.

"(b) Any activities performed by any employee relating to the internal business of a labor organization (including the solicitation of membership, elections of labor organization officials, and collection of dues) shall be performed during the time the employee is in a nonduty status.

"(c) Except as provided in subsection (a) of this section, the Authority shall determine whether any employee participating for, or on behalf of, a labor organization in any phase of proceedings before the Authority shall be authorized official time for such purpose during the time the employee otherwise would be in a duty status.

"(d) Except as provided in the preceding subsections of this section—

"(1) any employee representing an exclusive representative, or

"(2) in connection with any other matter covered by this chapter, any employee in an appropriate unit represented by an exclusive representative,

shall be granted official time in any amount the agency and the exclusive representative involved agree to be reasonable, necessary, and in the public interest.

"§ 7133. Subpenas

"(a) For the purpose of any hearing or investigatiion which the Panel or the Authority, or any member of the Authority or any individual employed by the Authority

and designated for such purpose, (hereinafter in this section referred to as the 'issuer') determines is necessary and proper for the exercise of its responsibilities under this chapter, the issuer shall at all reasonable times have access to, for the purpose of examination and copying any evidence relating to the subject matter of the hearing or investigation The issuer may, on the application of any party or on its own initiative, issue subpenas requiring the attendance and testimony of witnesses, the production and examination of any books or papers (including those of the Federal Government to the extent otherwise available under law), or any other evidence relating to the hearing or investigation requested in any such application or considered by the issuer to be relevant. Within 5 days after the service of a subpena on any person requiring the production of any evidence the person may petition the issuer to revoke, the subpena. The issuer shall revoke the subpena if in its opinion the evidence sought under the subpena does not relate to any matter under consideration in the hearing or investigation, or if in its opinion the subpena does not describe with sufficient particularity the evidence.

"(b) In the case of contumacy or failure to obey a subpena issued under subsection (a) of this section, the United States district court for the judicial district in which the person to whom the subpena is addressed resides or is served may issue an order requiring the person to appear at any designated place to testify or to produce documentary or other evidence. Any failure to obey the order of the court may be punished by the court as a contempt thereof.

"(c) Witnesses appearing pursuant to a subpena issued under subsection (a) of this section shall be paid the same fee and mileage allowances which are paid subpenaed witnesses in the courts of the United States.

"(d) No person shall be excused from attending and testifying or from producing books, records, correspondence, documents, or other evidence in obedience to a subpena under this section on the ground that the testimony or evidence required of the person may tend to incriminate or subject the person to a penalty or forfeiture, except that no person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction or other matter concerning which the person is compelled, after having claimed privilege against self-incrimination, to testify or produce evidence, except that the person so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

"(e) Any person who shall willfully resist, prevent, impede, or interfere with any member of the Authority or Panel or any individual employed by the Authority or Panel in the performance of duties pursuant to this chapter shall be published by a fine of not more than $5,000 or by imprisonment for not more than one year, or both.

"§ 7134. Compilation and publication of data

"(a) The Authority shall maintain a file of its proceedings and copies of all available agreements and arbitration decisions, and shall publish the tests of its decisions and the actions taken by the Panel under section 7119 of this title.

"(b) All files maintained under subsection (a) of this section shall be open to inspection and reproduction in accordance with the provisions of sections 552 and 552a of this title.

"§ 7135. Regulations

"The Authority, the Federal Mediation and Conciliation Service, and the Panel shall each prescribe rules and regulations to carry out the provisions of this chapter applicable to each of them, respectively. The provisions of subchapter II of chapter 5 of this title shall be applicable to the issuance, revision, or repeal of any such rule or regulation.

"§ 7136. Continuation of existing laws, recognitions, agreements, and procedures

"(a) Nothing contained in this chapter shall preclude—

"(1) the renewal or continuation of an exclusive recognition, certification of an exclusive representative, or a lawful agreement between an agency and an exclusive representative of its employees, which is entered into before the effective date of this chapter; or

"(2) the renewal, continuation, or initial according of recognition for units of management officials or supervisors represented by labor organizations which historically or traditionally represent management officials or supervisors in private industry and which hold exclusive recognition for units of such officials or supervisors in any agency on the effective date of this chapter.

"(b) Policies, regulations, and procedures established under and decisions issued under Executive Orders 11491, 11616, 11636, 11787, and 11838, or under any other Executive order, as in effect on the effective date of this chapter, shall remain in full force and effect until revised or revoked by the President, or unless superseded by specific provisions of this chapter or by regulations or decisions issued pursuant to this chapter.".

BACKPAY IN CASE OF UNFAIR LABOR PRACTICES AND GRIEVANCES

SEC. 702. Section 5596(b) of title 5, United States Code, is amended to read as follows:

"(b) An employee of an agency who, on the basis of a timely appeal or an administrative determination (including a decision relating to an unfair labor practice or a grievance) is found by appropriate authority under applicable law, rule, regulation, or collective bargaining agreement, to have been affected by an unjustified or unwarranted personnel action which has resulted in the withdrawal or reduction of all or a part of the pay, allowances or differentials of the employee—

"(1) is entitled, on correction of personnel action, to receive for the period for which the personnel action was in effect—

"(A) an amount equal to all or any part of the pay, allowances, or differentials, as applicable, which the employee normally would have earned or received during the period if the personnel action had not occurred, less any amounts earned by the employee through other employment during that period;

"(B) interest on the amount payable under subparagraph (A) of this paragraph; and

"(C) reasonable attorney fees and reasonable costs and expenses of litigation related to the personnel action; and

"(2) for all purposes, is deemed to have performed service for the agency during that period, except that—

"(A) annual leave restored under this paragraph which is in excess of the maximum leave accumulation permitted by law shall be credited to a separate leave account for the employee and shall be available for use by the employee within the time limits prescribed by regulations of the Office of Personnel Management, and

"(B) annual leave credited under subparagraph (A) of this paragraph but unused and still available to the employee under regulations prescribed by the Office shall be included in the lump-sum payment under section 5551 or 5552(1) of this title but may not be retained to the credit of the employee under section 5552(2) of this title.

For the purposes of this subsection, 'grievance' and 'collective bargaining agreement' have the meanings set forth in section 7103 of this title, 'unfair labor practice' means an unfair labor practice described in section 7116 of this title, and 'personnel action' includes the omission or failure to take an action or confer a benefit.".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 703. (a) Subchapter II of chapter 71 of title 5, United States Code is amended—

(1) by redesignating sections 7151 (as amended by section 312 of this Act), 7152, 7153, and 7154 as sections 7201, 7202, 7203, and 7204, respectively;

(2) by striking out the subchapter heading and inserting in lieu thereof the following:

"Chapter 72—ANTIDISCRIMINATION; RIGHT TO PETITION CONGRESS

"SUBCHAPTER I—ANTIDISCRIMINATION IN EMPLOYMENT

"Sec.
"7201. Antidiscrimination policy; minority recruitment program.
"7202. Marital status.
"7203. Handicapping condition.
"7204. Other prohibitions.

"SUBCHAPTER II—EMPLOYEES' RIGHT TO PETITION CONGRESS

"7211. Employees' right to petition Congress.";

and

(3) by adding at the end thereof the following new subchapter:

"SUBCHAPTER II—EMPLOYEES' RIGHT TO PETITION CONGRESS

"§ 7211. Employees' right to petition Congress

"The right of employees, individual or collectively, to petition Congress or a Member of Congress, or to furnish information to either House of Congress, or to a committee or Member thereof, may not be interfered with or denied.".

(b) The analysis for part III of title 5, United States Code, is amended by striking out—

"Subpart F—Employee Relations

"71. Policies..... 7101"

and inserting in lieu thereof

"Subpart F—Labor-Management and Employee Relations

"71. Labor-management Relations... 7101
"72. Antidiscrimination; Right to Petition Congress..... 7201".

(c)(1) Section 2105(c)(1) of title 5, United States Code, is amended by striking out "and 7143" and inserting in lieu thereof "and 7204".

(2) Section 3302(2) of title 5, United States Code, is amended by striking out "7152, 7153" and inserting in lieu thereof "7202, 7203".

(3) Sections 4540(c), 7212(a), and 9540(c) of title 10, United States Code, are each amended by striking out "7154 of title 5" and inserting in lieu thereof "7204 of title 5".

(4) Section 410(b)(1) of title 39, United States Code, is amended by striking out "chapters 71 (employee policies)" and inserting in lieu thereof the following: "chapters 72 (antidiscrimination; right to petition Congress)".

(5) Section 1002(g) of title 39, United States Code, is amended by striking out "section 7102 of title 5" and inserting in lieu thereof "section 7211 of title 5".

(d) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following clause:

"(124) Chairman, Federal Labor Relations Authority.".

(e) Section 5316 of such title is amended by adding at the end thereof the following clause:

"(145) Members, Federal Labor Relations Authority (2), and its General Counsel.".

MISCELLANEOUS PROVISIONS

SEC. 704. (a) Except as provided in subsection (b) of this section, the amendments made by this title shall take effect on the first day of the first calendar month beginning more than 90 days after the date of the enactment of this title.

(b) Sections 7104, 7105, and 7136 of title 5, United States Code, as added by section 701 of this title, shall take effect on the date of the enactment of this title.

(c)(1) The wages, terms, and conditions of employment, and other employment benefits with respect to Government prevailing rate employees to whom section 9(b) of Public Law 92-392 applies shall be negotiated in accordance with prevailing rates and practices without regard to any provision of—

(A) chapter 71 of title 5, United States Code (as amended by this title);

(B) chapters 51, 53, and 55 of title 5, United States Code;

(C) or any other law, rule, regulation, decision, or order relating to rate of pay or pay practices with respect to Federal employees.

(2) No provision of chapter 71 of title 5, United States Code (as amended by this title), shall be considered to limit—

(A) any rights or remedies of employees referred to in paragraph (1) of this subsection under any other provision of law or before any court or other tribunal; or

(B) any benefits otherwise available to such employees under any other provision of law.

Mr. UDALL (during the reading). Mr. Chairman, I ask unanimous consent to dispense with further reading of title VII, and that it be printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AMENDMENT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERLENBORN: Page 288, strike line 12 and all that follows thereafter through line 12 on page 348.

Mr. ERLENBORN. Mr. Chairman, I join with the gentleman from Illinois, my colleague (Mr. DERWINSKI) in supporting the basic concept contained in this bill for civil service reform. This itself is a very complex subject, but it is a very laudable and a very necessary goal. The question I think that is given to the House at this point is whether we should at the same time consider another very complex question that will impinge upon and, in some way, affect the goals of civil service reform; that is, to reform our labor-management relations at the same time.

I submit that we should not, that if we are to move from the present labor-management relations controls that are contained in the President's Executive order, it should be done in separate legislation and probably after civil service reform has been enacted and we have had an opportunity to see how that works under the present labor-management rules.

In submitting a civil service reform package in March, the President did not—did not—include legislation to rewrite the Executive order governing labor-management relations, nor even to take the present Executive order and write it into law. Later, he apparently agreed to make his Executive order statutory. As late as his August 3 forum in Fairfax County, he admitted that a few technical amendments had been worked out with Ken Blaylock, the head of some of the Government unions, and with the union, before the legislation was introduced. That is what is now title VII, the collective-bargaining legislation.

He said that this would in some way expand the Executive order, and I quote, "in ways that I do not understand."

In other words, the President suggested that he did want the Executive order, per se, written into law, and that there were some agreements reached with the union chief that the President himself did not understand. He went on to add that his preference is to limit the collective-bargaining processes of this legislation to what was included in the Executive order.

Now, when administration officials sent to Congress on May 10 a proposed title VII on labor relations, it was headlined as incorporating into law the existing Federal employee labor relations program. Title VII before us, as reported by the committee, is not the Executive order. The changes are not, as the President referred to them, a few technical amendments. I think we had better understand the differences before anyone votes for title VII, because we all know how important a few changes and a few words here and there may be.

We should not make it possible for some Federal officials to give a union exclusive recognition, with all that conveys, without an election, but that is in title VII. Members may recall H.R. 77, which was the predecessor to the famous labor law reform bill, contained such a provision, certification of a union as the exclusive bargaining agent for a unit of Government without an election before determining that they are supported by a majority of the employees in that unit.

Even President Carter rejected that concept and before he supported a labor law reform bill insisted that certification without election come out of the bill—and so it did:

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. The gentleman made reference to H.R. 7700. I do not think it is related to this at all.

Mr. ERLENBORN. I am sorry. The gentleman misunderstood me. I said H.R. 77. H.R. 77 was in the Education and Labor Committee and was the first of a series of bills labeled labor law reform.

Mr. CHARLES H. WILSON of California. Then the gentleman is not talking about the great bill the gentleman from New York (Mr. HANLEY) and I brought out. I thought that was it.

Mr. ERLENBORN. No. It is a different bill altogether.

There is another provision. Under the current law and the Executive order a strike by Federal employees is illegal. The provision here in title VII instead makes it merely an unfair labor practice.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(By unanimous consent, Mr. ERLENBORN was allowed to proceed for 5 additional minutes.)

Mr. ERLENBORN. Mr. Chairman, under the Executive order an illegal strike by Federal employees causes the union that has been certified as the bargaining agent to lose their status an exclusive agent.

The bill creates a divisive factor in Federal employment between union members and bargaining units and may affect employees who feel no need to affiliate with a labor union in such because under this bill they will be provided a two-track appeals process concerning disciplining of an employee or denial of automatic salary increases or disciplining action.

This also will produce a major incentive to vote for union representation or to join the union if one has been certified so that the individual employee will have this additional appeal alternative.

The bill allows a union with only 10 percent representation in the unit under question to negotiate for a voluntary dues check off, a form of union security. Now this is a strange provision in that a governmental agency as the employer will be required to bargain with a union that represents as little as 10 percent of the members of the bargaining unit for the purpose of check off. Agency discretion for withholding dues is removed. That discretion is now current under the Executive order.

The definition of dues is expanded to include assessments, which is extraordinary. That is not true under the Executive order. It is not true under the National Labor Relations Act. It means though that those who have agreed, an employee who has agreed to a check off will also have union assessments taken off his pay automatically. A worker who agrees to dues check off today commits himself only for a 6-month period. Title VII will commit without chance to change to his mind to that employee to a 1-year period.

How does title VII relate to the major objective of this bill, and that is change in the merit system? We do not know, because we have not had time to consider the relationship but it is altogether likely that negotiated contracts under title VII may directly go contrary to the major thrust and objective of the balance of the bill.

To top it off, title VII goes far beyond telling agency managers to meet and confer with unions as the Executive order currently does, it will order the manager to reach an agreement with the union. By adding two words to the definition of labor organization, title VII could allow other than public employee unions to represent Federal employees. Let us say, then, that we have a private sector union that organizes a unit in an agency in the Federal Government. Will then strife in the private sector lead to picketing at the Federal agency and refusal of Federal employees to cross the

picket line, thus interfering with governmental business? It is altogether possible.

Expanding the scope of the Executive order as title VII will do means that we will need more administrative law judges, probably with all of the attendant personnel such as regional directors and their supporting personnel. Thus title VII will be expanding the Federal bureaucracy and adding to the cost of Government.

If you really want to tell your constituents that you voted for a civil service reform bill that is going to give the Government the flexibility and the abilities that are necessary for effective Government management, I urge you to vote to strike title VII. That will leave the Executive order in place governing labor-management relations and we will be able to get on with the business of civil service reform and if we desire later to change labor-management relations beyond this Executive order, this Congress will have the ability to do so.

Mr. COLLINS of Texas. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. Mr. Chairman, I thank the gentleman from Illinois (Mr. ERLENBORN) for yielding to me and I believe that he has summed it up well in just suggesting, very plainly, that we should strike this particular section of the bill.

I was impressed with a letter I received from the Chamber of Commerce of the United States.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. COLLINS of Texas and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 2 additional minutes.)

Mr. COLLINS of Texas. Mr. Chairman, if the gentleman will continue to yield, the letter said:

> However, title VII goes so far beyond Executive Order 11491 that an entirely new system is created which clearly ignores the essential differences between private and public sector labor relations.

So what the gentleman has said is that this is not the time or the place or the bill to change this legislation.

I think the gentleman has summed it up well.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I thank the gentleman for yielding. I might say that I am a little bit concerned, I just do not know what the gentleman is referring to about the issue of a strike. And on page 320, it indicates that calling a strike on behalf of a union, constitutes an unfair labor practice.

Mr. ERLENBORN. That is right. What I was pointing out is that at the present time it is illegal, not just an unfair labor practice, an illegal strike by Federal employees, supported by their union will lead to the union no longer being allowed to be the exclusive bargaining agent. Now that will be changed, in substance, by this title VII.

Mr. GLICKMAN. If the gentleman will yield further, participating in or calling an illegal strike, being in violation of any other Federal laws, or perhaps other criminal laws—or does this section supersede anything like that? What I am trying to figure out, does this apply only to an unfair strike, or do other applications of the Federal law still prohibit the strike?

Mr. ERLENBORN. So far as I know this will be the only remedy, the unfair labor practice charge and no longer will it lead to decertification of the union or the union being any longer considered the exclusive bargaining agent for bargaining purposes.

Mr. FORD of Michigan. Mr. Chairman, if the gentleman will yield, I know the gentleman from Illinois (Mr. ERLENBORN) and I are totally in disagreement on some issues, and have been for the past 14 years, we have been in disagreement, but I know the gentleman well enough to know that he would not be wanting to mislead the Members, but the prohibition against Federal employees striking is in a single sentence which prohibits them from joining any organization.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. FORD of Michigan, and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 2 additional minutes.)

Mr. FORD of Michigan. Mr. Chairman, as I was saying, that prohibits them from joining any organization advocating the overthrow of the Government by force or violence, or as mentioned, participating in a strike, and the Supreme Court has said that the effect of the strike provision is not enforceable because it is in violation of the first amendment to the Constitution. That statute is not affected by this law at all, or by this bill, rather, so the act of striking will continue to be a violation of Federal law.

The difference is that this bill for the first time will add on top of that a specific procedure available to the Government to go after a labor organization which advocates strike activity by making that an unfair labor practice reachable in the same way that any other unfair labor practice committed by the union or its representatives is reached by the statute, so that, in fact, we did not affect the existing law on strikes. We add a remedy for the Government in the case of someone advocating an illegal strike, which we think meets the court test of still not violating any first amendment rights.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(By unanimous consent, Mr. ERLENBORN was allowed to proceed for 5 additional minutes.)

Mr. ERLENBORN. Mr. Chairman, let me understand this. Is the gentleman suggesting that this bill, being a later enactment. would not be considered to be a repeal of the current law, and is it the gentleman's understanding that besides being an unfair labor practice, an illegal strike will also lead to a decertification of the union or to the union's no longer being able to act as the exclusive bargaining agent of the employees?

Mr. FORD of Michigan. If the gentleman will yield further, Mr. Chairman, title 18 of the United States Code 1918 provides criminal penalties against strikes in violation of 5 United States Code. Five United States Code prohibits the strike. Title 18 makes participating in the illegal strike a crime.

Neither of those titles is affected by any of the provisions in this act.

Mr. ERLENBORN. I thank the gentleman for his contribution.

Let me just wind this up by saying I would hope that the Members would support this motion to strike title VII. It is highly controversial; and if we would strike title VII, we can move on very expeditiously to concluding the consideration of this bill and going home tonight.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I am happy to yield to the gentleman from Utah.

Mr. MARRIOTT. Mr. Chairman, I just want to ask the gentleman what the Senate did with this particular provision.

Mr. ERLENBORN. The Senate has a title VII that is in substance the incorporation of the Executive order with some few changes. Primarily it is an incorporation into the law of the Executive order. That title is not making the changes contemplated in this title VII.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield for one additional question?

Mr. ERLENBORN. I am happy to yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, perhaps the gentleman from Michigan (Mr. FORD) will want to answer this question.

I would like to ask two basic questions, if possible.

Number one, how does this provision in title VII expand on the provisions in the Executive order with respect to calling a strike or engaging in a strike?

Number two, I think unequivocally we need to have it stated whether this title in any way limits the Federal Government's ability to control strikes. Our constituents are concerned about public employees striking and Federal employees striking.

I think those two questions need to be answered. Could the gentleman from Illinois (Mr. ERLENBORN) or the gentleman from Michigan (Mr. FORD) answer them?

Mr. ERLENBORN. I am afraid I was trying to read a note from the staff and did not hear the gentleman's question.

Mr. FORD of Michigan. If the gentleman will yield, Mr. Chairman, the answer to the gentleman's question is that it does not expand on the right to strike. It does not deal with the right to strike except to enumerate the advocacy of strike activity which is not now prohibited by law as an unfair labor practice, so that, in fact, the passage of this law will provide the Government, as management, with a tool it does not now have to go after a union which advocates the

right to strike, because the Supreme Court has said that the current prohibition against advocating the right to strike is an unconstitutional impairment of their first amendment rights and that one cannot totally abrogate someone's right to advocate something, such as withholding his labor.

However, the court has in the past, under the National Labor Relations Act, upheld illegal strike advocacy for the wrong purposes at the wrong time; and we are following that kind of pattern.

I do not know why this particular section is picked on by the gentleman from Illinois (Mr. ERLENBORN) or why he does not like it because, very clearly, I will be very happy to strike that provision from the bill. It is an antilabor provision. It is a restraint on labor, a tool to be used against labor unions which does not now exist in the Executive order. In fact, this provision of the act is stronger than the Executive order when viewed from the perspective of anyone wanting to see unions challenged on the right to strike.

Mr. ERLENBORN. If the gentleman will yield back, it is very apparent it is not spelled out here. One of the effects of conducting an illegal strike would be the decertification of the union. Under the present practice of the Executive order, if an illegal strike is engaged in, the union that backed such an illegal strike can no longer act as the exclusive bargaining agent of the employees of that unit. Besides, in that definition section we allow a labor organization composed of one unit in whole or in part of Federal employees. In other words, this is an open invitation to mix in the same local employees in the private sector and the public sector.

Again I would point out that this could lead to strife in the private sector, leading to an interruption of work in the public sector. These are only a few. I have pointed out many of the other changes from the Executive order that are in this particular title VII. None of them were specifically backed by the President. The most he has said so far was that he would like possibly to see incorporated into the statute the Executive order. I hope the amendment is adopted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I want to say, without any intent to offend my friend, the gentleman from Illinois (Mr. ERLENBORN), that I thought for about 20 minutes there that he was going to filibuster his own amendment, so I will not take much more time. It should be very simple for everyone to understand that there are some tradeoffs in legislation of this kind.

We have heard very eloquently, particularly from that side this evening when we were talking about the SES, about all the new power we are giving the executive branch to control the destinies of employees, not just the employees who belong to the bargaining agents, the workers, not only the Indians but the chiefs as well, all the way to the top. In the process of the giving of this new power and expanded power and authority to management to manage the Federal work force, I think we might understand that the Federal employees become a little restive about where their status quo fits into a future with all this new power coming on one side of the picture. So the committee over a long period of time has tried to work out a balance to reassure the Federal employees that they are in fact going to maintain the status quo.

I wish that I could say to my friends in organized labor that what we have constructed here is a monumental new breakthrough for the future of public employee collective bargaining, but that would not be true. I must say parenthetically that the discussion of the gentleman from Illinois (Mr. ERLENBORN) about striking is all sheer nonsense, because not at any time did we spend 5 seconds talking about the right to strike. No practical person on our committee would have talked about that as a possibility. It has never been in the draft of any legislation. It has never even been whispered in a closet by any member of the committee. We know, I will say to the gentleman from Illinois (Mr. ERLENBORN) that that would be a foolish attempt to make here, and it has never been advocated. For us to spend all of this time talking about the right to strike as if at some time we had it in the bill is sheer nonsense. The bill does not deal with any expanded right in that regard. The bill does not deal with lots of rights that public employees have in the State arena and on the local level across the country. As a matter of fact, this is anything but a model that I would recommend that public employees would want adopted in their States for their States. What it does represent is an attempt to restructure John Kennedy's Executive order of 1962 into the realities of 1978 and the future, as the name of the game is changing and the rules of the game are changed by this civil service reform.

It is true that there are people in this country who would like to have us go home and say, "I voted for civil service reform," and when they say, "What is that?" we have to reply, "Well, that is the way which we use to kick the lazy, no good Federal employees off of their duffs and get them up to work." If we want to demagogue against Federal employees in that fashion, this is a handy vehicle to do it, but we need not at the same time create chaos in the Federal work force by destroying the morale of the employees.

It is absolutely essential that the employees believe, when we get through reforming the system and giving all of the top management these new powers, that the system is at least as fair to them in the exercise of their rights as it was before. And it is true that there is some change made in the language, the familiar language of the Executive order, although I think the gentleman from Illinois has illustrated that he is far more familiar with the National Labor Relations Act than he is with the Executive order, and I defer to his superior knowledge as a labor lawyer on the National Labor Relations Act.

We are dealing here with an entirely different ball game, I say to the gentleman from Illinois, and there are no dramatic changes from or departures from the existing rights of unions. We are not trying to write a collective bargaining agreement. We are not changing the method by which collective bargaining comes into play. We are drawing a more definitive picture of what the proper subject for collective bargaining would be, what the limitations on the subject matter of collective bargaining might be and the methodology. We are talking about grievance procedures for the first time. We are talking about them in a fashion that we calculate is going to save the Government a great deal of time and money.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(At the request of Mr. FRENZEL, and by unanimous consent, Mr. FORD of Michigan was allowed to proceed for 2 additional minutes.)

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for yielding.

I would like to inquire if one of those tiny little changes the gentleman is talking about is the installation of a binding arbitration system. That is not in the current Executive order, is it?

Mr. FORD of Michigan. The installation of a binding arbitration system? No; we are not installing a binding arbitration system.

Mr. FRENZEL. We are not? That is not the way I read the act.

Mr. FORD of Michigan. Is the gentleman talking about arbitration of grievances?

Mr. FRENZEL. Yes.

Mr. FORD of Michigan. Not arbitration of contract benefits?

Mr. FRENZEL. I will find it in a minute.

Mr. FORD of Michigan. I hope the gentleman understands the difference.

Mr. THOMPSON. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Chairman, first of all, I would like to associate myself with the gentleman's general remarks with respect to this title.

Second, to point out to my friend and colleague from Illinois, whose knowledge of the NLRA is not questioned at all, it seems to me there is a bit of confusion, if anything, here. In addition to the existing regulation emanating from 1962, there is being added by the committee a further restriction heretofore not extant in the form of creating an unfair labor practice where none exists now in the Federal Government. This does not relate at all, and the gentleman knows perfectly well, to the proposed H.R. 7777 relating to public employees, State, county, municipal, and Federal. It is really not in any way similar.

I certainly agree with my friend, the gentleman from Michigan (Mr. FORD) that I would not recommend this title, which I consider entirely too restrictive, to State, county, or municipal employees.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

(By unanimous consent, Mr. FORD of Michigan was allowed to proceed for 1 additional minute.)

Mr. FORD of Michigan. Mr. Chairman, let me say to my colleagues, it comes down to this. The gentleman from Illinois (Mr. ERLENBORN) and I have been arguing for 14 years. I have not persuaded the gentleman from Illinois very much and the gentleman from Illinois has not persuaded me very much.

Let me say, we are wasting our time arguing; but if title VII goes under the Erlenborn amendment, the bill goes, because this is like a balance. It is like a teeter-totter. We are trying to keep a balance with the employees and the new rights we are conferring on management.

You have heard those of us identified with labor tonight consistently fighting those people off who want to give management too many rights. Just a few minutes ago they were helping to try to gut the new management rights we are giving the administration. Who was fighting for them? We were fighting for them, but we were fighting in good faith, relying on the fact that what we had done in writing out agreements for employees would stay in the bill as a balance for what we were giving employees.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

(By unanimous consent, Mr. FORD of Michigan was allowed to proceed for 1 additional minute.)

Mr. FORD of Michigan. Mr. Chairman, really, if we accept the Erlenborn amendment, it simply ends everything and ends the ball game. We will rewrite this bill in a way that is harmful and there will be a subsequent amendment offered by the gentleman from Arizona (Mr. UDALL) that has been worked out over many months with all kinds of disagreeable choices, pushing and shoving, and finally coming to an agreement that does not make anyone so happy that they can walk away from here claiming a victory; but it is a reasonable legislative solution to our problems.

I just ask those of us who want to support this bill and want to see the President have a chance to put civil service reform into effect to support us in defeating the Erlenborn amendment, because passage of the Erlenborn amendment kills the bill.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Chairman, the gentleman said a few minutes ago that no one would offer the right to strike, and that that was not in the bill. I call the attention of the gentleman to his H.R. 1589, which provides the right to strike.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. FORD) has expired.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman from Michigan (Mr. FORD) does seek further time. The time of the gentleman has expired.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, the gentleman from Michigan invited me to peruse the bill to find what I consider to be binding arbitration within the bill.

I refer the committee and the gentleman to section 7119 on page 326, et seq., which states as follows:

If the parties do not arrive at a settlement after assistance by the Panel . . .

And this is the Impasses Panel.

Then it states:

Notice of any final action of the Panel under this section shall be promptly served upon the parties, and the action shall be binding on such parties during the term of the agreement . . .

That is No. 1. Now, this is No. 2.

Mr. FORD of Michigan. Mr. Chairman, let me take my time back.

Mr. FRENZEL. Mr. Chairman, it is not the gentleman's time, but I will be glad to yield to him in a minute.

Mr. FORD of Michigan. Does the gentleman want an answer?

Mr. FRENZEL. Let me state the second part first.

The CHAIRMAN. The Chair will state that the time is that of the gentleman from Minnesota (Mr. FRENZEL).

Mr. FORD of Michigan. Mr. Chairman, I ask the gentleman if he is seriously asking a question. If he is, I will be glad to answer it.

The CHAIRMAN. The Chair will repeat that the time is that of the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, my second point is in relation to section 7121, which is the grievance procedure, found on page 331, et seq., and there, of course, we have binding arbitration of grievances.

Mr. Chairman, I would ask the gentleman from Michigan (Mr. FORD) if that is not true, and I yield to the gentleman for his response.

Mr. FORD of Michigan. Mr. Chairman, it is true, but it is irrelevant, because what the gentleman is reading from on page 326 of the bill is the present Executive order, which the gentleman from Illinois, Mr. JOHN ERLENBORN, has taken to himself as the "Holy Grail."

Mr. FRENZEL. Do we have an impasses panel in the present Executive order?

Mr. FORD of Michigan. Yes; in the exact language the gentleman just read, and this is taken from the executive order.

Mr. FRENZEL. That is not my understanding.

Mr. FORD of Michigan. It represents no change in the status at all.

Mr. FRENZEL. That is not my understanding. How about the grievance procedure?

Mr. FORD of Michigan. That is this gentleman's understanding, and I think the gentleman from Minnesota misunderstands the situation.

Mr. FRENZEL. It would not be the first time I misunderstood, nor would it be the first time I misunderstood the gentleman from Michigan (Mr. FORD).

How about section 7121? Is that right out of the Executive order, too?

Mr. FORD of Michigan. No; that is grievance arbitration.

Mr. FRENZEL. That is binding arbitration, and that is new law; is it not?

Mr. FORD of Michigan. With respect to wages, hours, and working conditions.

Mr. FRENZEL. Is that not what we grieve over usually?

Mr. FORD of Michigan. No; we do not grieve a contract; we negotiate a contract.

Mr. FRENZEL. Mr. Chairman, I no longer yield.

Mr. Chairman, I think the situation is quite obvious. I think it is quite obvious there is new law, and it is different law. I think a lot of us do not know whether it is good law or bad law, but it seems to me we would be best served to revert to the time-tested Executive order.

Mr. Chairman, I hope the amendment is agreed to.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I would like to ask the gentleman from Illinois (Mr. DERWINSKI) a question. The gentleman is the administration's supporter of this bill, and I want to know whether he is for this amendment or not.

Mr. FRENZEL. Mr. Chairman, I cannot advise the gentleman on that. I do not know.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I see the gentleman from Illinois (Mr. DERWINSKI) is over here, and I will ask the gentleman, who is the administration's supporter of this bill, whether he is for this amendment.

Mr. DERWINSKI. Mr. Chairman, may I use this microphone?

Mr. CHARLES H. WILSON of California. The gentleman may use any microphone he wants to use.

Mr. FRENZEL. Mr. Chairman, I yield to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, my personal position is that this bill should have as title VII the President's Executive order, which was in fact the action taken in the Senate.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield further?

Mr. FRENZEL. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Chairman, let me ask: Is that what the gentleman from Illinois (Mr. ERLENBORN) is seeking?

Mr. FRENZEL. That is what the gentleman from Illinois (Mr. ERLENBORN) is trying to do.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I will ask the gentleman from Illinois (Mr. DERWINSKI):

Is that what the gentleman from Illinois (Mr. ERLENBORN) is trying to do?

Mr. DERWINSKI. Mr. Chairman, if the gentleman will yield, the gentleman from Illinois (Mr. ERLENBORN) is a very free gentleman.

Mr. CHARLES H. WILSON of California. No, what I would like to know is this: I think the Democrats should understand who is for who and what is for what. Now, if the gentleman from Illinois (Mr. ERLENBORN) is presenting the Presidential position, I think we should know that.

Mr. DERWINSKI. Mr. Chairman, the gentleman from Illinois (Mr. ERLENBORN) and I are both for civil service reform. We have a difference of opinion on title VII.

Mr. CHARLES H. WILSON of California. Who is for what?

Mr. CLAY. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Missouri?

Mr. CLAY. I thank the gentleman for yielding.

Mr. Chairman, the President recommended the provision that is in this title relating to binding arbitration. The Senate bill also includes this provision. In addition to that, the reason and the basis for this precise procedure is to save the taxpayers money.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. FRENZEL) has expired.

(On the request of Mr. CLAY and by unanimous consent, Mr. FRENZEL was allowed to proceed for 1 additional minute.)

Mr. FRENZEL. Mr. Chairman, I yield further to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Presently, Mr. Chairman, under the process of appealing through statutory appeals, the Government pays the entire cost of the proviso. Under the provisions of this title, subjecting grievances to binding arbitration, the costs will be shared equally by the Government and the parties who are alleging grievances. And that is one of the provisos for us including it and accepting the recommendation of the administration to include it in the bill.

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for his contribution.

I think it is an interesting point and may be a good one. I am not sure it would be pervasive in asking us to accept this new concept, however.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the issue before us is the Erlenborn amendment, which would strike all of title VII. And as my friend, the gentleman from Michigan (Mr. FORD), said a minute ago, if there is no title VII, there simply is no bill.

The administration came forward early on in this controversy. The original administration's submission had no title VII, had no labor-management title in it at all. We raised questions about this, and the administration finally said, "We are willing to write into this new management rights bill, this new civil service reform bill, something the Federal employee unions have always wanted," which was not to be at the whim or the mercy of the President, who, with a stroke of the pen, could undo all of these collective bargaining rights enjoyed since 1963.

We argued a good deal over the last few months about what should be in that title VII, and no one has seriously suggested until tonight that there should be no title VII at all.

A number of my colleagues have asked me where we are in this debate today, and most of the remaining controversy is in title VII. Title VIII is a short title. Title IX and title X have been stricken by a point of order. We can be out of here fairly soon if we decide what we are going to do about title VII.

The first thing to do is to get rid of the Erlenborn amendment and get on with the real issues. There will be an amendment which will be offered by the gentleman from Texas (Mr. COLLINS) which sets up a labor-management framework. It is not at all acceptable to the Federal employee unions. It is acceptable to the administration. I will have a substitute for that amendment which represents the product of long negotiations. My labor friends do not like it very much. The gentleman from Michigan (Mr. FORD) has very limited enthusiasm for it. We have finally reached that limited ground, but we cannot get on with that as long as we are involved with an amendment which strikes out all of the title. I thought we were making good progress until I saw all of the big guns on the Education and Labor Committee rise, but I would hope that at least we could proceed very shortly to get a decision on the Erlenborn amendment which totally strikes all of title VII and, then, so far as I am concerned, we can end the debate.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman knows, I have been waiting patiently since noon to reach title VII. I would like to comment on the gentleman's statement about the Education and Labor Committee. About an hour ago, about 8 or 9 o'clock, several of my colleagues mentioned that the gentleman's committee was making the Education and Labor Committee look good.

Mr. UDALL. I claim full credit for that.

Mr. Chairman, I would hope that we could have a vote now on the Erlenborn amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

RECORDED VOTE

Mr. ERLENBORN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 125, noes 217, not voting 90, as follows:

[Roll No. 751]

| Evans, Del. | Moss | Zeferetti |
| Fary | Pettis | |
| Fish | | |

The Clerk announced the following pairs:

On this vote:

Mr. Breaux for, with Mr. Addabbo against.

Mr. Burleson of Texas for, with Mr. Mitchell of Maryland against.

Mr. Teague for, with Mr. Richmond against.

Mr. Lujan for, with Mr. Zeferetti against.

Mrs. FENWICK and Mr. SAWYER changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

PREFERENTIAL MOTION OFFERED BY MR. CHARLES H. WILSON OF CALIFORNIA

Mr. CHARLES H. WILSON of California. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. CHARLES H. WILSON of California moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken.

Mr. CHARLES H. WILSON of California. Mr. Chairman, I am not going to take too much time. I think this amending process could go on indefinitely. It is a bad bill. We have not passed the right amendments, and I think it is about time that we went home and started doing other business.

Mr. DERWINSKI. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, I appreciate the Members' frustration. I appreciate that some of them are tired, and I appreciate all the complications of the hour.

However, I would like to point out that we have gone about 90 percent of the way with a very difficult, absolutely necessary piece of legislation. I would like to commend all of the Members who have in any way participated in the debate. This has been a good, high class, nonpartisan handling of a major national issue.

Mr. Chairman, this is necessary legislation. This is legislation that is good for every Member's constituents. If the Members will just be patient, we are within an hour of wrapping this legislation up properly. The Members are within an hour of casting a vote for what will go down in history as one of their greatest votes as Members of Congress. If they will just stay here, Mr. Chairman, we will pass civil service reform legislation.

Mr. RHODES. Mr. Chairman, would the gentleman yield?

Mr. DERWINSKI. I yield to my distinguished statesmanlike leader.

Mr. RHODES. I do not recognize the description. I would like to differ with the gentleman most respectfully. It seems to me that after the hour of 9 o'clock—and I thought we had agreed upon this—very little is done to save the Republic. I do not recognize the absolute necessity of passing this bill tonight. It seems to me that we have many days left, and some say we are even going to come back after the election. It seems to me, if the gentleman will yield further, that this might be a very propitious time to shut down the proceedings of the House tonight. I just do not believe that it is necessary for us to consider a bill of this importance—and it is of great importance—in this type of a situation. With all of the regrets and my great respect for the gentleman from Illinois (Mr. DERWINSKI) and my good friend, the gentleman from Arizona (Mr. UDALL), I hope that the motion of the gentleman from California (Mr. CHARLES H. WILSON) will be adopted.

Mr. DERWINSKI. No; just a minute. Do not hope that much. The gentleman from California is moving to strike the enacting clause, and I am sure my distinguished leader, the gentleman from Arizona, is just referring to the Committee's rising for the evening.

Mr. RHODES. If the gentleman would yield further, actually, if the committee votes to strike the enacting clause, we would go back into the House, and then, before the House agrees to the recommendation of the Committee we could adjourn, if we want to adjourn. We cannot adjourn from the Committee of the Whole. That is the main reason I think the gentleman's motion is well taken.

Mr. DERWINSKI. I realize that, but we do not want anybody in the well to think that our distinguished minority leader is momentarily in the embrace of the gentleman from California (Mr. CHARLES H. WILSON).

Mr. CHARLES H. WILSON of California. If the gentleman will yield, why not?

The CHAIRMAN. All time for debate on the motion has concluded. The question is on the preferential motion offered by the gentleman from California (Mr. CHARLES H. WILSON).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. CHARLES H. WILSON of California Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 46, noes 286, not voting 100, as follows:

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

Mr. UDALL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we have had a long and difficult day, and I must say that it has been a very productive day. The Members have been cooperative, and we have not had the kind of dilatory tactics some had feared. But the hour is late, and I am not sure we can be productive much longer. We do have a number of important amendments left.

Mr. Chairman, I am going to make a unanimous-consent request in just a moment, and if it is agreed to, at that point I would move that the committee rise. I am told by the leadership that we will come back on this bill perhaps on Wednesday, but not tomorrow.

Mr. Chairman, my unanimous-consent request is that the remaining time for debate on title VII, and all amendments thereto—that is the title we are now considering—be limited to a total of 2 hours.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. CHARLES H. WILSON of California. Mr. Chairman, reserving the right to object, this is just title VII?

Mr. UDALL. If the gentleman will yield, this is title VII only.

Mr. CHARLES H. WILSON of California. Further reserving the right to object, the gentleman is not asking that the entire bill be limited to 2 hours?

Mr. UDALL. No.

The remaining titles are not very controversial and are not very long. I am assuming that after we finish title VII, in a very rapid pace we could finish up the bill. But the pending request relates to title VII only.

Mr. CHARLES H. WILSON of California. I thank the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. ASHBROOK. Mr. Chairman, I reserve the right to object. Could I be informed as to how many amendments are pending on title VII?

Mr. UDALL. It has been anticipated at this point that the gentleman from Texas (Mr. COLLINS) would offer a complete substitute for title VII. Immediately after that, I was going to offer a substitute for that substitute, which represents a compromise we have put together over here.

The gentleman from Illinois (Mr. ERLENBORN) indicated that he had a number of amendments to my substitute, and that he would offer them in a fairly prompt fashion. At the close of that we would choose between the Collins substitute and the Udall substitute. If either one of them carries, that is the end of title VII.

Mr. ASHBROOK. Further reserving the right to object, those do sound like very substantial amendments. Does the gentleman know whether there are any other amendments?

Mr. UDALL. I am not aware of any major amendments to title VII except those that have been proposed by the distinguished gentleman from Illinois (Mr. ERLENBORN). It might be that there are perfecting amendments to either the Collins or Udall substitutes. I doubt that there would be any besides that. In any event, the Members who have printed amendments in the RECORD would be protected.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I am sure the gentleman from Ohio will be pleased to know that the amendment to be offered by the gentleman from Texas is identical to title VII in the Senate passed bill, so that what we are down to is really a narrow difference between the Udall substitute, which is an administration amendment, in effect, to the Collins amendment, which is the Senate title VII. So, the differences between the two positions are not extreme.

Mr. ASHBROOK. I thank the gentleman, and withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. GARY A. MYERS. Mr. Chairman, reserving the right to object, I do so make inquiry on parliamentary procedure. It is normal parliamentary procedure upon such a request for Members to stand and request time. Is it the Chairman's intent that the time to be divided be divided tonight?

The CHAIRMAN. The Chair would advise the gentleman that the Chair would not intend to divide the time tonight, but that subject will be taken up at the time we reconvene in connection with this bill.

Mr. GARY A. MYERS. I thank the Chair, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, as I understand it, there will be two substitutes posed, and a number of Members have amendments in the RECORD. They are, of course, amendments to the bill and not to the substitutes. I wonder if the Chair could tell me how we could protect the amendments which are now filed so that they would be in order and have time under the proposal that the gentleman suggests, to either of the substitutes.

The CHAIRMAN. The Chair advises the gentleman that the amendments which have been printed in the RECORD would be protected under our rules.

Mr. FRENZEL. Will we be able to make the amendments to the substitute, Mr. Chairman?

The CHAIRMAN. Yes. If they can be redrafted to pertain to the substitute, and placed in the RECORD, the answer is in the affirmative.

Mr. FRENZEL. I thank the Chair.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, to further demonstate the absolute cooperation that is developing, the gentleman from Illinois (Mr. ERLENBORN) has filed his amendments in the RECORD so that the record of what we are going to get to is clear. We think we are moving on an open basis toward final solution.

Mr. FRENZEL. I thank the gentleman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

Mr. CHARLES H. WILSON of California. Mr. Chariman, I object to the unanimous-consent request.

The CHAIRMAN. Objection is heard.

Mr. UDALL. Mr. Chairman, I move that all debate on title VII and all

amendments thereto be limited to 2 hours for that debate purpose when we resume.

The CHAIRMAN. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The motion was agreed to.

● Mrs. SCHROEDER. Mr. Chairman, I want to make a few comments regarding the effect of the two amendments offered by Mr. BOLAND and Mr. COLLINS of Texas as they affect the "whistleblower" provisions of H.R. 11280.

First. Generally, the merit system principles apply throughout Government to all executive agencies, including CIA, FBI, and everybody else. The President is required to take action to implement these principles, including section 2301 (c) (9) which requires the protection of whistleblowers.

Second. Generally, although Government corporations, CIA, FBI, and GAO are exempted from prohibited personnel practices, other existing law prohibits discrimination, Hatch Act violations, and nepotism in these agencies. With the exception of the whistleblower protection, the prohibited personnel practices are merely the codification of existing law. As to whistleblower protection, the FBI is specifically brought in under the Collins-Udall compromise, and the President will act as Special Counsel. For other agencies, the merit system principles, as implemented by the President will cover them.

Third. Generally, although the Special Counsel is only required to receive complaints and guarantee anonymity to employees in agencies covered by Prohibited Personnel Practices, nothing precludes the Special Counsel from receiving complaints and guaranteeing anonymity to anyone. He cannot, however, ever receive foreign intelligence or counterintelligence information nor can he order an agency investigation where the complaint does not come from an agency covered by prohibited personnel practices, whether or not the complaint concerns the agency in which the individual is employed.

Fourth. With regard to the FBI, the President's regulations required for the FBI must protect the same sort of information as the bill protects. What the President can vary is the enforcement of those principles. He can, but need not, give the enforcement power to the Special Counsel. The President's regulations must include some employee complaint handling mechanism, although the current procedures are satisfactory to meet this requirement.

Fifth. Generally, under the Special Counsel's general investigatory powers, as modified, the Special Counsel has the basic power to investigate allegations of arbitrary or capricious withholdings of information under the Freedom of Information Act, regardless of whether court-ordered discipline is required under section 552(a)(4)(F), unless the request deals with foreign intelligence or counter-intelligence information.

Sixth. Generally, the Special Counsel, under 1206(g)(1)(A) to seek disciplinary action against offending employees as the result of any investigation in the section, including investigations prompted by employee complaints to the Special Counsel.* * *

Seventh. Generally, the basic thrust of the whole section dealing with employee complaints is to encourage, but not require, internal attempts at revolving the wrongdoing. The goal is to rout wrongdoing out of the Federal Government as much as to protect the first amendment rights of employees.●

● Mr. FRENZEL. Mr. Chairman, the President has a rather low batting average in converting ideas into law. Partly it is his fault, but partly it is ours. When he has a good proposal, we ought to pass it even if it disturbs our personal comfort zones.

The President's civil service reform is a good idea. The American people think so, too. So did ex-President Ford who submitted a similar proposal. The need for tightening up the Federal bureaucracy, and for making it more responsive and manageable, is obvious.

The administration's plan was basically a good one. It still is. It addresses not all, but many, of the most glaring problems. Even our hard-to-please colleagues in the other body have passed it overwhelmingly.

Our Post Office and Civil Service Committee, has, however, made many changes which I deem inappropriate and unacceptable. The original bill was designed to make the civil service more manageable. The committee amendments, in some cases, make it the opposite. A case in point is the expanded scope of collective bargaining. These changes, made by the committee should be eliminated, and the original language, essentially retaining the provisions of the Executive order covering labor-management relations, should be restored.

Perhaps the most controversial section of the bill deals with the preference accorded to veterans in Federal employment. There is a real problem here. Women and minorities are not advancing as quickly as most of us would like in the Federal service. Nevertheless, a good, clear-cut case has not been made that veterans' preferences are a major retardant. I am unwilling, at this time, to take away the rights and preferences now accorded to veterans, and therefore intend to support the Hanley amendment to restore current preferences. However, there is some justice in what the President is saying and I would suggest a thorough study of this whole subject by the committee. At this point, we should not hold up, or jeopardize the passage of the bill because of this item.

The other highly controversial change made by the committee is the repeal of the Hatch Act. It is not germane to this bill and should be removed in a point-of-order. If not, I shall certainly support a motion to strike it.

The Hatch Act does need revision. But Federal employees need its protection. It should not be repealed in any case, and it should not be a part of this bill at all.

Some of my colleagues in the Republican minority are concerned about the increase in high-level, appointed jobs in the bureaucracy. Some concern is justified, but I endorse the position of the distinguished gentleman from Illinois (M. DERWINSKI) that any Chief Executive needs his own people to manage and motivate the bureaucracy. President Carter, like his predecessors, and like his successors, needs the authority to put capable managers of his own choosing into his Government if it is to be run well.

When the bad amendments are removed the House should promptly pass civil service reform. The President has made a good recommendation. This is one issue on which he has strong and justified popular support. Support here in Congress ought to be bipartisan, and it ought to be just as strong.●

● Mr. GARCIA. Mr. Chairman, I rise in support of the Civil Service Reform Act of 1978. I believe the time for change is long overdue. And I know there is much room for improvement in the functioning of the Federal civilian work force—for both those in labor and those in management.

In fiscal year 1977, $46,247,517,000 was spent on the Federal civilian employees' payroll. Presently, this payroll is averaging out to around $4,052,817,148 per month. That is an awful lot of money for the American people to pay for something that is less than the best. I welcome civil service reform because I think it is a major step toward giving us the best.

I, as one of the newest Members of Congress, am very pleased to have had the opportunity to be assigned to the committee which handled this major piece of legislation. It has been an honor for me to work long, hard hours with such fine colleagues on this committee to bring us to where we are right now. I would especially like to commend the gentleman from Arizona (Mr. UDALL) and the gentleman from Illinois (Mr. DERWINSKI) for their leadership throughout the entire process.●

Mr. UDALL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, (Mr. DANIELSON), Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11280) to reform the civil service laws, had come to no resolution thereon.

---

## GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on debate, including debate on the Hanley amendment.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

## APPOINTMENT OF ADDITIONAL CONFEREES ON H.R. 11445, SMALL BUSINESS ADMINISTRATION PROGRAMS AND AUTHORIZATIONS

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that the Speaker be authorized to appoint additional conferees solely for the consideration of sections 117 and 118 of the Senate amendment to the bill (H.R. 11445) to amend the Small Business Act and the Small Business Investment Act of 1958.

The SPEAKER. Is there objection to the request of the gentleman from Iowa? The Chair hears none, and appoints the following conferees: Messrs. THOMPSON, GAYDOS, and BUCHANAN.

## MAKING IN ORDER CONSIDERATION OF DISTRICT DAY BILLS ON TUESDAY, SEPTEMBER 12, 1978

Mr. DIGGS. Mr. Speaker, I ask unanimous consent that the business in order today under District Day be in order tomorrow, Tuesday, September 12, 1978.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, and I shall not object, a number of us including the gentleman from Maryland have had some concern about the proposed rules changes which are the subject of hearings or possibly a markup in the Rules Committee on Wednesday. I am referring to those proposed rule changes attempting to end a Representative's right to demand a second on motions to suspend the rules and the right to vote on motions to resolve into the Committee of the Whole and various other fundamental changes in the rules of the House all, I should add, under the guise of doing away with "pointless" votes on so-called "minor" procedural questions.

As the gentleman from Michigan (Mr. DIGGS) knows, unanimous-consent requests are a very useful tool in the House. They accomplish ends, and those of us who feel strongly about rules changes are not disposed to grant these unanimous-consent requests in certain circumstances.

I have had conversations with the Speaker of the House and he has told me that no rules changes will occur in this session, and with that understanding I am glad to only reserve the right to object and not object. I believe the Speaker to be a man of his word and I respect him for that. I think that we are in agreement that the best interests of the House would be served by the postponement of any rule changes until the first session of the 96th Congress.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair makes the following announcement:

It would be the hope of the Chair that we would take up the suspensions first tomorrow and have all the rollcalls occur in the afternoon, and then follow with the District bills, keeping in mind the fact that there are 14 primaries around the country tomorrow and that would give Members an opportunity to vote and then to come back here. So we would hope that the voting will take place in the afternoon.

The House will meet at noon tomorrow, the votes will come sometime late in the afternoon, and we will finish the session sometime around 9 o'clock tomorrow night.

## COMPREHENSIVE REVIEW OF RETIREMENT INCOME PROGRAM

(Mr. ROONEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROONEY. Mr. Speaker, together with several of my colleagues on the Select Committee on Aging as well as Congressman JOHN H. DENT, chairman of the task force on welfare and pension plans, I am today introducing a House concurrent resolution to express the support of the Congress for the work of the President's Commission on Pension Policy and to urge this Commission, during the year long study it is about to undertake, to come to grips with the most basic issues which must be resolved before we can hope to develop the kind of cohesive and comprehensive national policy on retirement income which this country so desperately needs.

Earlier this year the Subcommittee on Retirement Income and Employment, which I chair, held several days of hearings on our national pension policies with particular emphasis on the private pension system. As you know, this Nation's present system of retirement income is a panoply of programs ranging from social security to various public and private pensions to individual savings and investments.

Since the security of millions of older Americans is directly affected by these programs and since greater demands will be placed on these various sources of retirement income by a growing proportion of retired persons, it is obvious that a more equitable and more well-coordinated system of retirement income is an urgent necessity in the United States.

In its hearings on this subject our subcommittee addressed such questions as: What should be the relative roles of social security, pension plans—public and private—and individual savings and investments in providing income to retired Americans? How should these programs be coordinated? What is an "adequate" pre-retirement earnings replacement rate? How should it be derived? We found not only that there are no readily available answers to these elementary questions, but that they have not even been adequately researched or fully discussed in any appropriate public forum.

This lack of an overall national policy is reflected in the private pension system which covers slightly less than half of the work force. The Employment Retirement Income Security Act of 1974 (ERISA) does not require employers to establish pension plans; it does not prescribe a minimum amount of benefits under any given plan; it does not require that benefits be adjusted according to changes in the cost of living.

While I believe that ERIS has extended much needed protection to individuals covered by private pension plans, the upsurge in plan terminations coupled with a decrease in the annual ratio of new plans to terminated plans since the enactment of this law would certainly seem to indicate that the private pension system is burdened with unnecessarily complex regulation by a multiplicity of Government agencies to the ultimate detriment of individuals who seek to rely on private pensions as a source of retirement income.

Notwithstanding the substantitve reforms made by ERISA, significant numbers of workers covered by private pension plans will not receive pensions reflective of their working years. Many people will never receive any benefits because they will be employed by several different employers during their careers and will change jobs before they acquire vested rights to their pension credits. We were informed by at least one expert witness that defined benefit plans can afford to pay pensions to the small proportion of employees who become vested in these plans only because of the high forfeiture rates among the preponderance of their covered workers. This, in my opinion, is a lottery system which runs contrary to basic principles of fairness and to the generally held belief that pensions are deferred wages.

All retirement income issues must, of course, be assessed within the context of today's economy. As we are all well aware, the ravages of inflation are experienced most acutely by individuals attempting to survive on fixed incomes. Regrettably only about 4 percent of private pension plans contain cost-of-living escalators.

Mr. Speaker, on the basis of the testimony presented to the subcommittee, we have concluded that if private pension plans are to be a substantial and reliable source of retirement income, the scope of their coverage must be expanded, their benefits must be distributed in a fairer manner and they must be able to keep pace with inflation. If the attainment of these goals is not feasible in the near future, I believe it will be necessary either to redefine the role of the social security system, or mandate a layer of private pension protection over and above social security, or make individual retirement accounts more widely available—or combine some or all of these approached.

It is my sincere hope that the President's Commission on Pension Policy will produce some imaginative and sound solutions to these problems, and, more importantly, that it will propose, as a result of its study, a farsighted, equitable and clearly defined policy on retirement income which we in the Congress can support and on which all older Americans can rely.

## A MODEL FOR WELFARE REFORM

The SPEAKER. Under a previous order of the House, the gentleman from Cali-

fornia (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, we are constantly hearing of cases involving fraud in our welfare system. Just a few weeks ago I shared with the House the case of a Los Angeles County woman who collected nearly a quarter of a million dollars in welfare payments by claiming, at age 33, that she had 48 children. There are countless other cases with which, I am sure, you are familiar, probably right in your own congressional districts.

It is the failure of the bureaucracy to detect and confront welfare cheaters which incenses me and many of my colleagues, Mr. Speaker. The entire concept of providing temporary relief to economically disadvantaged individuals is not at all an improper undertaking for Government. Citizens of other nations are not quite as fortunate to have such assistance available to them.

The flagrant abuse of the system, however, demonstrates the need for an effective welfare reform program at all levels of government. It is a simple case of efficient organizational management, of being certain that the criteria for receiving benefits is complied with.

My attention has been drawn to the way in which the State of Oregon has taken action to institute reforms in its welfare system. Since last May the State has dropped 2,000 people a month from its rolls. That amounts to a reduction of about 6½ percent, an impressive figure, indeed. The Oregon Welfare Department is making an effort to reduce its $30 million deficit by passing on to volunteer private agencies, the task of caring for applicants in desperate straits. Computers have been installed to search for evidence of fraud. If an applicant applies for food stamps in one office, the computer will reject any claim made for food stamps in another welfare office. An attempt is made to provide every applicant for welfare with a suitable job, or training which will prepare them for one. A recent feature on the CBS Morning News profiled one applicant for welfare money who started training with a Portland firm, and has now earned three promotions in his 2½ years with the company, not to mention the sense of pride and self-esteem he has gained.

I think the strides toward welfare reform which Oregon has made is worthy of congressoinal review. I represent a district in the neighboring State of California, and I know my constituents would certainly welcome changes in this direction for its welfare system. If Oregon could do it, I do not see why this cannot be a reasonable goal for other jurisdictions. We can make the welfare program a viable one, Mr. Speaker, if the Congress would only make the commitment to take reform measures along the lines of those which Oregon has put into practice.●

## A PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from Connecticut (Mr. MCKINNEY) is recognized for 5 minutes.

● Mr. MCKINNEY. Mr. Speaker, due to commitments in the Fourth Congressional District, I was unable to be present during consideration of the legislative calendar for Friday, September 8. Had I been in attendance, I would have cast the following rollcall votes:

Rollcall No. 740; "yea."
Rollcall No. 741; "nay."
Rollcall No. 742; "yea."
Rollcall No. 743; "yea."●

## IN OPPOSITION TO THE VARIABLE RATE MORTGAGE

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, homeowners across the country may be saddled with 40-year mortgages if a title to the Financial Institutions Regulatory Reform Act becomes law.

I am referring to title XVIII of the Reform Act, which allows Federal savings and loan institutions to offer variable rate mortgages in States where State-chartered associations may offer the controversial loan plan.

The variable rate mortgage has an interest rate that fluctuates with change in the money supply, with an allowance of a 2½-percentage-point increase over the life of the mortgage. When interest rates rise, the homeowner is given the choice of increased monthly payments or an extension of the mortgage at the same rate of interest. On a $60,000 home made with today's prevailing interest rate of 10 percent, which was adjusted to the maximum amount of interest allowed, 12½ percent, this theoretical mortgage would be extended a full 10 years.

Mr. Speaker, it is not out of the question for interest rates to rise by 2½ percent under a variable rate mortgage. I cannot fathom how this mortgage plan can possibly be construed as beneficial to consumers in any manner, considering a very real possibility of a 10-year extension on a home mortgage.

What rationale does exist for a variable rate mortgage? The savings and loan industry maintains that the VRM is needed for two reasons: First, consumers want a broader choice in home financing, and second, the instrument is needed to insure a steady flow of funds into savings and loan associations to be used for mortgage lending.

The problems faced by the savings and loan industry during periods of tight credit are very real. However, in the past several months, important steps have been taken to assure that savings and loan associations can effectively compete for savings during such periods. I am referring to the two new savings certificates that savings and loans began issuing June 1. One new instrument allow thrifts to pay rates on 6-month certificates equal to the 6-month Treasury bill discount rate plus 25 basic points. The other new instrument is an 8-year certificate that draws 8 percent interest. Together, these new instruments have greatly aided the savings and loan industry in attracting new savings during today's period of tight credit.

The industry has already felt the positive effects of these two certificates. The Federal Home Loan Bank Board reported that net new savings receipts of savings and loan associations rose sharply in July, in fact, to the largest volume since last summer. The amount of savings in certificates rose 20 percent in July, to a total of $3.059 billion as compared to $2.538 billion in June. And the industry further reported that 40 percent of the money invested in these certificates is "new money," that is, money from other sources than that already in savings accounts.

It would be ridiculous to say that all of the savings and loan industry's problems have been solved by these two new certificates. But, the truth is that the industry has benefited greatly from these instruments and they have come a long way in stabilizing the deposit base in savings and loan associations as well as attracting new funds.

These two new certificates have helped avert the situation of 1975, when savings and loan associations were greatly strapped for new funds. It was also in 1975 when Congress previously considered allowing variable rate mortgages to be offered in Federal associations. Despite the gravity of the S. & L.'s situation in 1975, a period of severely tight credit, both Houses of Congress prohibited any issuance of variable rate mortgage regulations. The prevailing reason—the threat this mortgage instrument posed to consumers far outweighed the advantages offered to the savings and loan industry.

Consider the typical homeowner today. He is the victim of record housing costs, record interest rates, record utility costs and record food costs. Fewer and fewer Americans can afford to buy a home. And an even smaller amount can afford to buy a home on one person's income. Many young couples must put off starting a family in order to afford a home.

This brings us to the issue of consumers wanting a broader choice in home financing. There is a great deal of truth in this statement. A recent survey found that 87 percent of those surveyed wanted greater availability of alternative mortgage instruments as opposed to the conventional, fixed rate loan. But, when the survey further broke down into the different types of alternative mortgage instruments, a more accurate picture emerges. Only 12 percent of those surveyed were interested in an increased availability of the variable rate mortgage. The loan plans that consumers want are the graduated payment mortgage, a loan plan where the monthly payments begin at a lower rate and increase over the life of the loan, and the reverse annuity mortgage, a loan plan which allows senior citizens to draw a monthly payment based on the equity of their homes.

What constituency does exist for the variable rate mortgage? It is clearly not the consumer. The administration has opposed the loan plan, calling it inflationary. The housing industry has opposed the VRM. The president of the National Association of Home Builders, Ernest A. Becker, Sr., has said the mortgages will "cost future homebuyers untold millions of dollars in additional mortgage interest." Organized labor has gone on record opposing the variable rate

mortgage, as well as consumer groups across the country.

It is clear that the only group pushing for the VRM is the savings and loan associations themselves. The reasons are self-explanatory. It allows the industry to pass on the increased costs of inflation to the borrower, and will represent a tremendous profit to the associations each time the interest rate climbs.

I stand in total opposition to title XVIII of the Reform Act. It poses a great threat to consumers. I shall do everything in my power to see this amendment defeated on the floor of the House.●

## THE NATION TO OBSERVE ROSH HASHANA, OCTOBER 2 AND 3

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 10 minutes.

● Mr. ADDABBO. Mr. Speaker, on October 1, 2, and 3, the Nation will observe Rosh Hashana, which are the High Holy Days for the people of the Jewish faith. I join with my colleagues in wishing a very happy and healthy new year to all of our citizens of the Jewish faith.

I also ask unanimous consent to put into the RECORD a short article by Rabbi Jehuda Melber of the Briarwood Jewish Center, which provides a historical summation of these important holidays. I think the Members of the House who might not be familiar with the background of these holidays will find the article fascinating reading:

FROM THE RABBI'S DESK

Due to the fact that last year 5738 was a leap-year, we celebrate the High-Holidays of 5739 at a much later period. This gives us a greater opportunity to do some deeper thinking and contemplating about the significance of Rosh Hashana and Yom Kippur. Rosh Hashana will be on Monday, October 2nd and Tuesday, October 3rd; Yom Kippur on Wednesday, October 11th. Let us therefore consider two questions with regard to Rosh Hashana:

A) What is the difference between Rosh Hashana and the other Jewish holidays?

B) What is the difference between the Jewish New Year's celebration and that of the Gentile world?

The replies to these questions shed brighter light for a better understanding of our tradition in general.

A) The difference between Rosh Hashana and the other Jewish holidays lies in the fact that all other holidays are referred to the Jewish *"nation"* in historical retrospect, whereas Rosh Hashana is addressed to the Jewish *"individual"* on a strictly singular basis: a day of judgement for every *single* person. Here the Jewish calendar in its totality represents a double concept of developing a sense of responsibility: Every person is responsible for *himself* and for the *society* in which he lives. No one has the right to disregard this double responsibility, as a wholesome discipline for proper human life. And when you ask which comes first, the answer is: Rosh Hashana is the *beginning* of the year, and so it is with the principle of responsibility. The accountability of the individual comes first.

B) The difference between the Jewish New Year's celebration and that of the Gentile world is quite obvious: The first of January is celebrated with dining and wining, with merry making spectacles and hilarity. But the first of Tishrei is celebrated with prayer and devotion, with soul searching and spiritual inventory taking. That makes it of course more inspiring and uplifting.

Let us therefore hope that Rosh Hashana of 5739 will indeed bring a new era of dedication to the tenets of the Bible's guidance, a new period of peace and harmony between man and neighbor, and nation. Let this forthcoming Rosh-Hashana be the end of our suffering and the beginning of our salvation for Klal-Israel and for all mankind.

Wishing all our members and friends a very Happy and Healthy New Year.

Your devoted Rabbi

Dr. JEHUDA MELBER.●

## GETTING DEADWOOD OUT OF CONGRESS

The SPEAKER. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 5 minutes.

● Mr. BAUCUS. Mr. Speaker, once progressives called Congress an enemy of change. People said moss-headed Congressmen prevented progress in the country.

Recently that has changed. Congress has found new solutions as new problems developed.

We have been successful in reducing poverty and expanding educational opportunities for all Americans. We have closed many of the legal loopholes that benefited only the rich and powerful.

We have curbed the disastrous decline in environmental quality. We have increased employment opportunities.

But Congress has missed a point. The point is that we have only a limited amount of resources to commit to solving national problems.

Too many times Congress has addressed problems by creating new programs. The result is that Government has gotten out of touch and out of control.

The Federal Government now consists of 11 Cabinet-level departments. Plus 44 independent agencies. Plus 1,240 advisory boards, committees, commissions, and councils.

In all, we have over 1,000 Federal spending programs.

There may have been a time when we could afford those programs, and and not worry which ones were working and which ones were not.

But budget realities of today and tomorrow do not leave room to waste scarce resources. We cannot—and should not—continue to pay for a system where one hand does not know what the other is doing.

Let me give you one example. A General Accounting Office study of health care clinics in the District of Columbia found eight clinics in one neighborhood. These clinics were funded under several Federal programs, and each administrator was unaware of what the others were doing.

Several of these subsidized doctors were seeing only a handful of patients a day. Meanwhile, the citizens of Baker, Mont., cannot find a doctor at all.

I would like to discuss some of my ideas for attacking Government spending. None of these ideas are new—I have been pushing some of them for years.

We have heard many proposals recently that frankly amount to wishful thinking or hot air or a combination of both.

I am going to talk about solid proposals—ideas that will work, and that have a reasonable chance of being enacted by this Congress.

LIMIT FEDERAL SPENDING

First, Congress must limit Federal spending. Recent growth in Federal outlays is shocking: From less than $200 billion in 1970 to $480 billion for 1979.

The time has come for a freeze on spending. I recommend that next year's budget resolution call for—at most—$490 billion in outlays. I will vote against any budget resolution calling for higher spending.

And I will point out that I voted against both the first and second concurrent budget resolutions this year because the spending levels were unacceptably high.

A $490 billion limit would let current programs continue. Because of inflation, there would be a reduction in real terms.

But there is some waste and unnecessary spending in every agency; all we would really be doing is cutting out some fat.

During the spending freeze, Congress can concentrate on getting the most service per dollar spent.

SLASH FEDERAL PROGRAMS

In 1975 I joined Congressman BLANCHARD in introducing the Government Economy and Spending Reform Act. Senator MUSKIE introduced a similar bill in 1976.

Senator MUSKIE calls our legislation the Sunset Act. I prefer to call it the meat ax bill.

The notion is that all spending programs would be divided into five groups. Each year, Congress would examine one of the groups.

And unless Congress specifically voted to continue each specific program, it would automatically expire.

Let me point out why this meat ax approach is needed.

The medicaid program began in 1965. This year it will cost $11 billion, and I am concerned that too much of that money goes to line doctors' pockets. But medicaid has never had a top-to-bottom review by Congress.

We are spending million every year to improve rivers and harbors. Some of these expenditures are the result of laws passed by Congress in 1899—laws the Congressional Budget Office says have never been reviewed.

Revenue sharing was designed in 1976 to provide assistance for State and local governments hit by recession. The program was supposed to end automatically when unemployment dropped. Unemployment dropped all right, but now President Carter wants to continue the program and focus it exclusively on big cities.

Of the 1,200 spending programs identified by the General Accounting Office, over 800 are permanently authorized. That means they never come up for review or reconsideration by Congress.

The spending reform bill did not get much attention in the 94th Congress, so I cosponsored it again in April of 1977.

The measure will soon be debated on

the Senate floor and the House Rules Committee has held hearings.

This legislation is essential to help Congress rein in on excessive spending. It is essential to get the deadwood out of Government.

ABOLISH "TAXFLATION"

Our tax system provides automatic tax increases that let Government keep getting bigger. I call this phenomenon taxflation and I want it stopped.

Here is how it works. Suppose you and your spouse together have a taxable income of $22,000. Your income tax would be $4,044.

Suppose that you both get a 7-percent cost-of-living increase to help keep up with inflation. Your income would be $23,540—and according to IRS schedule Y, your new tax is $4,489.

That is an 11-percent tax increase, even though in real terms your income stayed the same.

One report I read estimated that a 10-percent increase in the Consumer Price Index raises Government revenues 16 percent.

Several months ago I introduced legislation to end this taxflation. My bill would adjust tax brackets upward each year according to the CPI—the best available measure of inflation.

I am gratified that part of this year's tax reduction bill adjusts brackets upward 6 percent to account for last year's inflation. But I will continue my efforts to pass legislation so this is done automatically every year.

Ending taxflation would be a solid step toward making Government more accountable and less expensive.●

## COMMUNITY CREDIT NEEDS ACT OF 1978

The SPEAKER. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, today, I am introducing a bill which will be the focus of a Subcommittee on Financial Institutions markup in the near future. This legislation is a composite of three bills, the subjects of which have been discussed during hearings held in July and August and concluding Thursday of this week. The Thursday hearing will allow formal testimony on the provisions of H.R 13748 (regulation Q extension and transaction account differential elimination—CONGRESSIONAL RECORD, August 4, 1978, p. 24479). In addition, testimony will be received from those witnesses whose requests to testify could not be accommodated during the hearing period July 20 to August 10.

Title I of the bill extends regulation Q for 3 years and eliminates the differential on savings accounts at thrift institutions which are tied to an automatic transfer of funds to third-party accounts. This is identical to H.R. 13748. The hearing will allow opportunity for the subcommittee to consider suggestions for changes in the language regarding such accounts. For example, it has been suggested that the treatment of bill-payer services and transfers of interest income from certificates of deposit may need clarification.

Title II is a restatement of the investment authority of Federal savings and loan associations with four substantive changes in that authority. Section 5(c) of the Home Owners' Loan Act of 1933—the basic statute governing the operation of federally chartered savings and loans—is a complex statute which has needed simplification for many years. This legislation will accomplish that goal. the changes in investment authority all relate to the Federal Home Loan Bank Board's efforts to encourage more activity by Federal savings and loans in urban areas. Three of these changes were recommended by the Federal Home Loan Bank Board:

First. An updating of the authority of savings and loans to invest in community development assistance areas.

Second. A clarification and enhancement of the authority of savings and loans to invest in loans for property alteration, repair, or improvement.

Third. A revision and expansion of the authority to invest in obligations issued by State or local governments for the purposes of rehabilitation, financing or construction of residential real property.

The fourth change builds upon the Home Loan Bank Board's efforts to encourage Federal savings and loans to work in cooperation with State and local governments by placing in the unlimited investment category the authority for associations to invest in or lend to State housing corporations provided that the obligations are secured by real estate insured under the provisions of the National Housing Act. As stated the Board recommended a change in investment authority to allow savings and loans to invest in obligations issued by State or local governments for residential housing. This authority would limit such investments to 5 percent of an association's assets subject to requirements that the obligations be rated, or have a reserve or sinking fund, or have sufficient collateralization or guarantees. There are, however, some State obligations which are similar to direct investments in National Housing Act insured mortgages already allowed by statute. These obligations are issued by State housing corporations, are fully secured by residential mortgages, have full FHA insurance, and have full protection available in the event of default. Thus, the State housing corporation is between the savings and loan and FHA, the savings and loan receives a good yield and invests in a productive community project, and the State housing corporation can more readily market its bonds. This additional authority is in conjunction with the Board's own proposals and should make more funds available for housing in our communities.

Title III establishes a central liquidity facility for credit unions and is almost identical to H.R. 11310. The changes reflect suggestions made by National Credit Union Administrator Lawrence Connell, Gov. Philip Jackson of the Board of Governors of the Federal Reserve System and others during subcommittee hearings. The changes are:

First. Language to eliminate the possibility of double stock subscriptions in the facility;

Second. A requirement that NCUA not approve an extension of credit which is intended to expand a credit union's portfolio rather than to serve liquidity needs.

Third. A requirement that NCUA consider a credit union's creditworthiness prior to granting an application for assistance from the facility;

Fourth. A provision for emergency extensions of credit to State chartered credit unions by using a State share insurance fund of which the credit union is a member;

Fifth. Language to allow Federal reserve banks to act as fiscal agents, custodians, or depositories for the facility; and

Sixth. Revised borrowing authority to limit the total amount of such borrowing to 12 times capital stock and surplus of the facility. The 12 would apply whether the borrowings have a Government guarantee or not. This is comparable to the borrowing authority for other Federal Government entities.

It is my hope that the committee can expeditiously act on this legislation.●

## REPORT ON SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 5 minutes.

● Mr. STOKES. Mr. Speaker, the Select Committee on Assassinations is well on its way to fulfilling the legislative mandate of this House. Each of the three main areas of our legislative mandate—First, who were the assassin(s) of Dr. Martin Luther King, Jr. and President John F. Kennedy; second, did the assassin(s) have aid or assistance either before or after the assassinations; and third, how did the agencies and departments of the U.S. Government perform in investigating the assassinations—are being fully explored.

The public hearings into the assassination of Dr. Martin Luther King, Jr. commenced the week of August 14, 1978. During the course of those hearings, I believe the extensive and professional work the committee has done was apparent. The committee commenced to make public the results of its year-and-a-half-long investigation into this case. It has looked at over 21 conspiracy allegations, and made numerous trips to every place James Earl Ray was known to visit. Indeed, the total number of points traveled to were over 700. More than 75 witnesses gave testimony in executive session and on 41 occasions, orders of immunity were obtained so that witnesses could fully testify. As for agency files, over 360 have been reviewed. Their quantity, however, was far greater than that number as one file can range from a few pages to literally thousands. Finally, several consultants were employed to bring scientific expertise into the required areas.

Public hearings on our investigation into the assassination of President John F. Kennedy commenced last week. As is equally apparent from these hearings, the select committee has spent long and detailed hours investigating this case. More than 500 places had to be visited. Over 1,500 witness interviews were conducted and more than 75 witnesses were

questioned in executive session. In excess of 500 files were reviewed. Indeed, these figures are as of the first 6 months of the year and have steadily grown. More so than the investigation into the death of Dr. Martin Luther King, Jr., scientific consultants have played a major role in the investigation of President Kennedy's assassination due to the evidence available. They have ranged through such diverse fields as photography, pathology, acoustics, ballistics and neutron activation analysis.

The supplementary funding request the committee is currently seeking will enable the committee to fully and professionally complete the work that has been mandated by this House. The failure to do so would be a disservice to the American people and only further foster rumors and allegations that surround each of these assassinations. By giving the select committee the full amount that we have requested, we can be assured that no shortcuts will have to be taken or necessary work left undone. The public hearings and, equally if not more important, the select committee's final report will be a credit to the House of Representatives.

During the course of the select committee's request for sufficient funds to complete its public hearings and write a complete final report, several allegations have been reported in the newspapers concerning the manner in which the select committee has been fiscally managed. I wish to assure you, and other Members of the House, that the select committee has been extraordinarily mindful of the taxpayer's dollar—it has operated in a responsible manner that is totally consistent with the directives of this House. The allegations of excessive expenditures and fiscal management are totally false.

It was reported in a newspaper that a Member of Congress loudly complained that the committee had made no effort to live within the $2.5 million budget the House gave it earlier this year. When the select committee's budget request earlier this year was reduced by the Subcommittee on Accounts, that subcommittee gave the select committee the same amount of money the select committee had appropriated in 1977. However, the forecast known requirements of the investigation were higher. In addition, there were other costs, for example, scientific projects, where actual expense could not then be forecast. When informed of these facts, the Accounts Subcommittee told the select committee that it would be perfectly appropriate to request additional funds if the appropriated funds could not finish the investigation. This is precisely what has happened, and why these funds are now being requested. The directive from the Accounts Subcommittee was not to restrict the investigation to only $2.5 million; it was to do a proper investigation, and if more than $2.5 million should be necessary, additional funds could be requested and authorized. The Accounts Committee was informed at that time that this additional request was almost certainly necessary—they did not change their position.

It has been charged and reported in the newspapers that the Select Committee's salaries are excessive. In fact, monthly reports filed with the Committee on House Administration for other House committees of comparable size to the Select Committee show their average salaries to be $4,600 to $5,400 higher than the Select Committee, with the percentage of salaries $30,000 and up substantially higher than the Select Committee.

It was reported in the newspaper that the Accounts Subcommittee staff was ordered to examine the Select Committee's financial records and put them in order. In fact, the senior staff member from the Committee on House Administration dispatched to carry out this assignment declined to do so as being unnecessary.

It was reported in the newspaper that the Select Committee has not been properly reporting its spending, especially in the area of its 56 secret consulting contracts. In fact, the Select Committee has filed every report required by the Committee on House Administration, the Finance Office of the Clerk of the House, and the Rules of the House of Representatives. As to consultants, the Committee on House Administration approved keeping that part of the monthly reports on a confidential basis until conclusion of the investigations. This was done mainly to protect the consultants from being prematurely harassed by the news media and others for the results of their findings.

As can be seen, Mr. Speaker, the Select Committee has consistently operated within the directives of the House. The allegations of fiscal mismanagement are without any merit, and I believe it important that the record reflect the true facts. At this point, I request permission to insert into the RECORD an analysis of the Select Committee's funding request which was submitted to the Committee on House Administration. The first chart reflects the committee's actual funding expenditures for the first 7 months of this year. The second chart reflects our projection of the committee's funding requirements for the balance of the year.

Finally, Mr. Speaker, there has been an allegation that a member of the Select Committee staff engaged in improper conduct. On the basis of evidence available to date, this allegation is totally without merit. I hereby request permission, Mr. Speaker, to insert into the RECORD a memorandum on this subject which was submitted to the Committee on House Administration on September 6, 1978.

Mr. Speaker, I trust that this report brings the Members of the House up to date on the progress of the Select Committee and answers any questions they may have had in conjunction with this request for additional funding.

SELECT COMMITTEE ON ASSASSINATIONS—ANALYSIS OF FUNDING REQUIREMENTS, 2D SESS., 95TH CONG.

To: Committee on House Administration
From: Chairman Louis Stokes, Select Committee on Assassinations
Re: Allegation of Illegal Conduct by Committee Staff
Date: September 6, 1978

Attached to this memorandum is a report analyzing the allegations of illegal conduct made by Oliver Patterson and Mark Lane against the Select Committee. As of the date of this memorandum, the Committee has not yet conducted a personal interview of Mr. Patterson. The Committee attempted to interview Mr. Patterson as soon as he made his public accusations. One interview that we scheduled with Mr. Patterson for August 12, 1978 was cancelled by Mark Lane, then acting on behalf of Mr. Patterson. Mr. Patterson's present attorney, Melvin Wulf, was contacted to arrange an interview. On August 31, Mr. Wulf informed the Committee that Mr. Patterson would be interviewed, but not earlier than the week of September 11, 1978. An interview is presently scheduled with Mr. Patterson for September 15, 1978.

To evaluate Mr. Patterson's allegations, the Committee Report relies on Mr. Patterson's affidavit (Exhibit 1) and his known public and private statements. The Committee has also attended a Mark Lane/Oliver Patterson press conference during which Lane "offered" physical evidence of claimed illegal conduct on the part of the Committee. This evidence, consisting of a taperecording between Patterson and Baetz, a photograph of one of their meetings and some scrawled notes, confirmed no more than the fact that Patterson was providing information to Baetz.

In the absence, to date, of an interview with Mr. Patterson, and the production of any physical evidence he may wish to offer, the attached report is complete.

---

HOUSE SELECT COMMITTEE ON ASSASSINATIONS STAFF REPORT ON ALLEGATIONS OF OLIVER PATTERSON

On August 7, 1978, Oliver Patterson in a news conference publicly alleged that a Committee staff investigator, Conrad Baetz, had engaged in illegal and improper activities during the course of his Committee assignments. (See Ex. 1, formal affidavit of Patterson concerning his allegations.) Present with Mr. Patterson during his public appearances in which he has made such allegations has been Mark Lane, attorney for James Earl Ray. This report is designed to set out each of Mr. Patterson's allegations in detail and provide responses to each. The Committee is confident that these responses will reveal that Mr. Baetz's conduct was legal as well as consistent with the Rules of this Committee and the Rules of the House of Representatives.

Before engaging in an analysis of Patterson's allegations and the Committee investigation of such, it is significant to understand the lawful function that informants in general *can* and *do* perform during investigations into criminal activity. Such an appreciation is particularly appropriate in the instant case where Mr. Patterson, Mr. Lane and others have attempted to suggest that the use of informants is inherently sinister and in contravention of constitutional rights.

UTILIZATION OF INFORMANTS IN GENERAL

Proper and lawful utilization of informants and informant information has long been recognized by the federal courts to be a necessary and permissible law enforcement technique. Various court decisions have dealt specifically with the implementtaion of informants and the relationship of such to certain fundamental guarantees.

I. *Fourth Amendment:* Conversations with, or in the hearing of, an undercover agent or government informant are not a search and seizure within the meaning of the Fourth Amendment. The Supreme Court held in *Hoffa* v. *United States*, 385 U.S. 293, 302 (1966), that a person speaking within the hearing of a government agent is not relying on the security of any constitutionally protected area, but rather on his misplaced confidence that the listener will not reveal what is said. The use of an informant to gather evidence of incriminating statements for use against the speaker does not pose a Fourth Amendment problem. *See also United States* v. *Satillo*, 507 F.2d 629, (3d Cir.), *cert denied*, 421 U.S. 968 (1975) (undercover agent's testimony from notes admissible at trial); *Berlin Democratic Club* v. *Rumsfeld*, 410 F. Supp. 144, 153 (D.D.C. 1976) (covert penetration of organization does not violate Fourth Amendment); *State* v. *Humm*, 234 N.W. 2d 60, 63 (S.D. 1975) (use of informant to "pump" suspects does not violate Fourth Amendment).

Electronic eavesdropping on conversations to which a consenting informant is a party or is physically present is not a search and seizure and no warrant is required. *United States* v. *White*, 401 U.S. 745, 752 (1971). This is so whether a) the conversation is transmitted by a device worn by the informant, *United States* v. *White, supra*; b) taped by the informant, *Lopez* v. *United States*, 373 U.S. 427, 439 (1963); c) taped by other agents monitoring a transmission, *Ansley* v. *Stynchcombe*, 480 F.2d 437, 441 (5th Cir. 1973); or d) taped by other agents monitoring a telephone call, *United States* v. *Bonano*, 487 F. 2d 654, 658 (2d Cir. 1973).

II. *Fifth Amendment:* The Supreme Court in *Hoffa* v. *United States*. *supra* at 304, also held that the use at trial of incriminating statements made to, or overheard by, an informant does not violate the defendant's privilege against compulsory self-incrimination. Such statements are made voluntarily and lack any element of compulsion. Lower federal courts have consistently held that informant obtained statements are admissible and do not violate the defendant's Fifth Amendment privilege. *See, e.g., United States* v. *DiLorenzo*, 429 F. 2d 216, 219 (2d Cir. 1970), *cert. denied*, 402 U.S. 950 (1971); *Ansley* v. *Stynchcombe*. *supra*.

III. *Due Process:* Courts have seldom treated the argument that the use of an undercover agent is *per se* a violation of due process. The argument was flatly rejected by the Supreme Court in *Hoffa* v. *United States, supra* at 311. It failed again in *United States* v. *Crow Dog*, 532 F. 2d 1182, 1197 (8th Cir. 1976), where the informant infiltrated a political organization when several of its members were under indictment.

Hence, this brief review of relevant case lay clearly identifies the constitutional propriety of informant use. No provisions of either the Rules of this Committee or the Rules of the House of Representatives limit or modify in any way the constitutionally prescribed methods of informant utilization.

COMMITTEE INVESTIGATION OF PATTERSON ALLEGATIONS INTRODUCTION

By his own admission (See Patterson affidavit, Exhibit 1 at page 1, paragraph 4), Oliver Patterson was an informant for the FBI during 1970 and 1971 to obtain information from Jerry Ray, brother of James Earl Ray, and J.B. Stoner, an avowed racist with an alleged background of violence. (Stoner also was a former attorney for James Earl Ray.) This Committee has clearly indicated to both Jerry Ray and Stoner that they are considered as subjects of its investigation into the murder of Dr. Martin Luther King, Jr. Given this characterization of Jerry Ray and J. B. Stoner and the proven intelligence capabilities of Patterson, who on one occasion advised the FBI that Jerry Ray had indicated to him the existence of a conspiracy to kill Dr. King, this Committee determined it only appropriate and propitious to ascertain Patterson's state of knowledge and capabilities for providing information relative to the possible roles of Jerry Ray and J. B. Stoner in the assassination of Dr. King. Accordingly, Patterson was not only served with a subpoena to appear before this Committee but he was also asked to provide information concerning Jerry Ray and Stoner on a continuing basis. He enthusiastically agreed.

SPECIFIC ALLEGATIONS

A. Role and payment of money.

Mr. Patterson himself was never a member of the staff of the Committee. His role was solely that of a subpoenaed witness, who, in fact, provided a statement under oath, and who provided additional information to the Committee relative to J. B. Stoner and Jerry Ray. Neither the testimony of Mr. Patterson nor his information were paid for. Mr. Patterson was advised that his role as a testimonial witness and source of information would not result in the payment of money to him by the Committee, except to the extent that Patterson, like all other witnesses who have testified or provided information to the Committee, would be accorded routine reimbursement for actual expenses for lodging, food, travel, telephone and similar costs incurred during the period that such testimony or information was provided. The Committee has every reason to believe that

Patterson understood precisely that he could receive only reimbursement for his expenses and not payment for information on a *quid pro quo* basis. That Patterson knew to expect only "expense" money is demonstrated in his response to the following question administered during a recent polygraph test:

Question: Were you promised *expense* money for travel and undercover work by Pete Baetz?

Answer: Yes. (Emphasis added) [1]

B. Electronic Surveillance

Committee interviews indicate that the staff investigator did not engage in physically recording any conversation overheard by him with the consent of Patterson. Nor did he overhear any conversation without the consent of Patterson. Patterson was also explicitly told that the Committee would not seek his cooperation in the utilization of otherwise proper and legal electronic surveillance techniques in order that the recordings made as a result of such surveillance could be used by the Committee.[2] See *United States* v. *White*, supra. Accordingly, electronic surveillance equipment has neither been provided nor used by the Committee in this or any other instance. Apparently, Patterson, with a background in electronics and personal possession of the necessary equipment, elected to record certain conversations on his own. Committee interviews indicate that the conduct of the staff investigator, therefore, did not constitute violation of the Committee Rules or House Rules; it also was not illegal.[3]

C. Hair Samples and Map

Patterson has also alleged in his affidavit (Exhibit 1, page 2, paragraph 7) and his polygraph test (footnote 2, *supra*, question No. 3) that the Committee was provided with hair samples and a map from the belongings of Jerry Ray. With respect to the map, on approximately April 17, 1978, while in Washington, D.C., and sharing a motel room with Jerry Ray, Patterson asked if the staff investigators with whom he was in contact wanted him to look through the personal effects of Jerry Ray for documents pertinent to the Committee investigation. Patterson was told immediately and repetitively by both investigators that he should not engage in such conduct. Patterson next advised the Committee on the following day, and *after the fact*, that he had indeed rummaged through Jerry Ray's belongings and discovered a map that he thought would be of interest to the Committee. He inquired if he should take it and photocopy it for the Committee. After this matter was immediately brought to the attention of the Chief Counsel for the Committee, Patterson was again explicitly instructed not to take the document in question or even allow staff members to view it. Patterson advised a staff investigator in response that he was going to make a copy anyway for his own use in case he wanted to write a book. Subsequent conversations with Mr. Patterson revealed that the nature of the map suggested an active plan by James Earl Ray to escape from the Tennessee Penitentiary where he is incarcerated. Given this significance to the map, the Committee asked Patterson to provide a *copy* of the map, which was in James Earl Ray's handwriting, so that the Committee could alert the appropriate law enforcement officials to prevent any escape attempt on the part of James Earl Ray. The actual map never came into the possession of the Committee. Information from the map was, in fact, conveyed to the FBI and the Tennessee Bureau of Investigation, as well as to the Governor of Tennessee. Hence, despite the Committee admonitions to Patterson, he obtained a xerox copy of the map which the Committee felt compelled to accept, in order to prevent a possible catastrophic event, i.e., another escape attempt by James Earl Ray. (Interestingly, on August 15, 1978, in a TV interview, Jerry Ray falsely denied even possessing a copy of the map which Patterson had obtained from him.[4])

As to the hair samples of Jerry Ray provided by Patterson to the Committee, Patterson advised the Committee that he had obtained such from a bathroom where Jerry Ray resided. This technique of suspect identification is clearly recognized in our judicial system. *Schmerber* v. *California*, 384 U.S. 757 (1966); *Gilbert* v. *California*, 388 U.S. 263 (1967); and *Biggers* v. *Tennessee*, 390 U.S. 404 1968). Further, given the existence of unidentified hairs in the FBI investigation of Dr. King's murder and the necessity of determining Jerry Ray's possible involvement in the assassination, it is most appropriate for the Committee to seek the production of this type of evidence.

D. Subornation of Perjury

With respect to allegations that staff members suborned perjury during Mr. Patterson's sworn statement to the Committee, he has specifically contended in his August 14, 1978 press conference with Mark Lane that, while he cannot remember the questions and answers involved in the subornation effort or even whether he in fact lied, at least he was furnished answers for the last three questions that were posed to him. The last three questions and answers in Mr. Patterson's sworn statement are:

(1) Mr. EBERHARDT: Do you still actively participate in the National States Rights Party matters?

Mr. PATTERSON: No, I have not seen Jerry for about four years.

(2) Mr. EBERHARDT: During the last couple of days that you have been with Jerry Ray, has he expressly admitted to you any personal role on his part in the assassination of Dr. Martin Luther King?

Mr. PATTERSON: None.

(3) Mr. EBERHARDT: Has he indicated that John Ray had any personal involvement in the shooting of Dr. King?

Mr. PATTERSON: No, the statements are there has been no involvement whatsoever.

If it is Patterson's contention that perjury was suborned and obtained in the instance of these three answers, such a contention is not supported by the nature and content of his responses. Question (1) is inquiry with a response consistent with Patterson's known involvement with the National States Rights Party. The answers to Questions (2) and (3) could hardly be instances of suborned perjury since one of the key issues involved in the Committee investigation is a determination of the involvement of Jerry and John Ray in the assassination. The Committee could hardly be expected to suggest negative answers to Questions (2) and (3) where such negatives are so fundamentally inconsistent with its mandate to identify any conspiracy to the murder of Dr. King. Staff members present during Patterson's statement confirm the absence of any effort to encourage false testimony from Patterson.

E. False Statements to the Media

Patterson has alleged that the staff investigator advised him to give false information to the New York Times regarding the following three matters:

(1) Patterson claims that the staff investigator told him to state that Mark Lane had said that there was "Raoul" (the individual alleged by James Earl Ray to have set him up as a "dupe" in the assassination of Dr. King). In fact, Patterson had previously reported that both Jerry Ray and Mark Lane had implied in conversations in Patterson's presence that there was no "Raoul." Other evidence gathered by the Committee clearly establishes Raoul's non-existence and acknowledgements of such by Jerry Ray (who coincidentally was originally represented by Mark Lane in his initial appearance before the Committee).

(2) Patterson further claims that the same investigator advised him to state that Lane had no new evidence about the King case. Not only has Lane implicitly so indicated according to earlier Patterson reports to the same staff investigator, but James Earl Ray's recent public testimony before this Committee, with Lane as his attorney, confirms those earlier reports that there would be no "new evidence."

(3) Patterson also contends that the staff investigator advised him to claim that he was terrified of Jerry Ray and that such was the reason why Patterson wanted his relationship with the Committee out in the open, so as to perhaps discourage any harm that might come to him. In fact, Patterson had been warned by the FBI prior to the instant allegations that Jerry Ray had discovered his role with the Committee and that the FBI had reason to express concern for his safety because of such.

F. Threats of Incarceration

Patterson contends that the staff investigator threatened to send his girl friend, Donna Stayton, to prison if she revealed what she had learned of Patterson's role with the Committee. In fact, only after Patterson had initially contacted the staff investigator with the advice that his then disenchanted girl friend, who was acquainted with both Jerry Ray and J. B. Stoner, had knowledge of his sensitive posture, did the staff investigator caution her, out of a sense of concern for Patterson's security, that any disclosure on her part of his role could be construed as an obstruction of a Congressional investigation and therefore a violation of law. See Title 18, U.S.C., Section 1505 which states in pertinent part:

Whoever corruptly . . . endeavors to obstruct or impede . . . the due and proper exercise of the power of inquiry . . . by any Committee of either House . . . (s)hall be fined not more than $5,000 or imprisoned not more than five years, or both.

Such information was imparted in the form of advice, not a menacing threat as Patterson suggests. Furthermore, such advice was rendered by the staff investigator after consultation with staff counsel.

G. Personal Allegations

Patterson has sought to further discredit the staff investigator by making allegations of a personal nature. The Committee is satisfied that these allegations are totally false and deems their nature unworthy of further comment.

CONCLUSION

Based on all available information and evidence the Committee is satisfied that the allegations of Oliver Patterson are not founded in fact and that no unlawful or improper conduct has been engaged in by members of its staff.

FOOTNOTES

[1] The only other questions and answers contained in the polygraph test arranged with a private polygraphist by Mark Lane are as follows:

1. Question: Did you telephone and record calls to Jerry Ray, J. B. Stoner, and others with Pete Baetz monitoring some of the calls?

Answer: Yes.

2. Question: Did Pete Baetz furnish you with replacement tape cassettes to record telephone calls with Jerry Ray and others?

Answer: Yes.

3. Question: Did Pete Baetz direct you to mail documents and hair samples, illegally obtained by you from Jerry Ray, to his Wood River Illinois Post Office Box?

Answer: Yes.

The Committee has not yet had the opportunity to independently evaluate this test or review the post-examination interview of Patterson by the polygraphist who administered the test.

[2] Patterson's allegation relative to electronic surveillance is somewhat amorphous since it is his contention, in an interview with KSD–TV in St. Louis, that Baetz never gave him specific instructions in the form of "you do this or you do that," but rather that Baetz had in some way *suggested* that Patterson record his conversations with Jerry Ray.

[3] Rule 7.1 of the Committee Rules reads in pertinent part: "*Tape Recordings.* No conversation of Committee members or staff with any person shall be recorded without the prior knowledge and/or written consent of the person whose conversation is to be recorded." Further, it does not preclude the use of an informant to record conversations between the informant and a subject of the investigation, although such a technique involving consensual tape recording by an informant has not been implemented by this Committee in any instance. Rule 7.1 does limit the ability of "Committee members" and "staff" to engage in consensually recorded conversations, but the limitation extends no further.

[4] It is also interesting to note that in Patterson's description of how he obtained his copy of the map he specifically avoids any indication that he searched Ray's belongings in the first instance at Committee instructions. (See Exhibit 1, page 2, paragraph 7.)

---

STATEMENT OF OLIVER PATTERSON

Oliver Patterson, being duly sworn, deposes and says that:

1. I reside at 12350 Old Halls Ferry Road, in the City of Black Jack, State of Missouri.

2. For the past several months I have been working as an undercover agent for the House Select Committee on Assassinations.

3. During that period I testified before the Committee's staff in Washington, D.C. During that testimony, I was asked questions by a lawyer for the Committee named Michael Eberhardt and on several occasions I was handed written "answers" to the question by Conrad Baetz, hereinafter referred to as Baetz, a staff investigator for the House Select Committee on Assassinations, hereinafter referred to as HSCA. I read the Baetz-supplied answers into the record and the stenographer apparently took it down as my own. I do not believe that the members of Congress on the Committee know that their staff is functioning in this fashion.

4. During 1970 or 1971, I was assigned by the FBI, an organization I had worked for since 1968, to meet Jerry Ray, the brother of James Earl Ray, and J. B. Stoner, and to secure information from them. I continued to carry out that assignment for approximately three years.

5. Early this year I was recruited by Conrad Baetz to work for the Select Committee. I was sent to Georgia by the HSCA to meet Jerry Ray and to renew my relationship with him.

6. Baetz regularly instructed me to telephone Jerry Ray and to tape record those conversations. I often did that while Baetz was in my house. Often Baetz would listen in on the conversations by using earphones through which he monitored those telephone conversations. This went on for several months. Baetz took the tapes of the recorded conversations with him and gave me back new tapes regularly.

7. On one occasion when I was in Washington, D.C. with Jerry Ray and while I was working for the HSCA, I searched Jerry Ray's belongings. I found some letters from James Earl Ray to his brother Jerry and a map which Jerry had placed in his toilet article bag. Following directions from Baetz, I took the letters and the map from the Quality Inn on Capitol Hill where I had discovered them, across the street to the Hyatt Regency Hotel and there I had all of the documents photocopied. I had several copies of each document made. Following the specific directions of Baetz, I then mailed copies of each of the documents to him at his P.O. Box in Wood River, Illinois. Baetz gave me directions to photocopy the documents and send them to him in telephone conversations that I had with him almost immediately after I found the documents. I called Baetz at a special number he had given me and left word that he should call "David Rogers" at once. "David Rogers" was a code name that the Committee used to identify me. Baetz called me back almost immediately and told me that he had been called out of the hearing room. He told me that Jerry Ray was then testifying. When I told Baetz about the documents, he agreed to try to detain Jerry Ray longer before the Commitee so that I could make copies of the documents.

8. Later, Baetz told me that the documents were so important that a meeting was held in Washington, D.C. to discuss them. Baetz said those present at that meeting were, G. Robert Blakey, general counsel of HSCA, the Director of the FBI and Attorney General Bell.

9. During the course of my undercover work for the HSCA, I went to Georgia to see Jerry Ray. I was instructed by Baetz to secure samples of Jerry Ray's hair. A woman named Donna Stayton, (1619 Board Walk, Florissant, Missouri, 63031) who travelled with me at the time, assisted in securing hair samples.

10. Later, after I told Baetz that Donna and I had an argument, Baetz immediately visited Donna and thereafter told me that he had threatened to send her and her husband to a federal penitentiary if either of them ever told of our secret work for the HSCA. Baetz called me and told me that he had threatened Donna with prison.

11. Recently the HSCA discovered that Mark Lane had learned of our operation. Baetz told me that I had three options. He said I could leave town and just disappear. Or, I could hold a press briefing which he could set up and then leave town. Or, he said the FBI could visit me and arrange a new identity for me so that I could not be found.

12. Baetz told me that he had talked with Eberhardt and Blakey. He told me that they wanted me to meet with the New York Times. The House Select Committee arranged with the New York Times for a reporter to come to St. Louis on August 6, 1978 so that I could give him false information. Baetz called me in the afternoon to tell me that because the Pope had died it was a bad news day for our story and he put off the meeting with the New York Times until August 7, 1978.

13. Baetz told me that I was to tell the New York Times that "Mark Lane is a queer." In fact, I have not the slightest indication that that is true.

14. Baetz told me to tell the New York Times that Lane had said that there is no Raoul. Mark Lane has never made such a statement to me and in fact I have heard him say on many occasions that he was convinced that Ray was duped by a man who had identified himself as Raoul.

15. Baetz told me to tell the New York Times that Lane had no new evidence about the King case. Lane has told me just the contrary.

16. Baetz told me to tell the New York Times that I was terrified of Jerry Ray and that was why I was talking to the New York Times and requesting protection from the FBI.

17. Two weeks prior to the time that Mel Waxman and Baetz of the Select Committee had called upon me at my home in Black Jack for the first time, I was warned by the FBI of their impending arrival. Within 48 hours after having been warned by the FBI that the Select Committee was going to interview me, I wrote a letter to Jim Haggerty, Special Agent of the FBI, stating that I wished to withdraw from all further work with the FBI. I stated clearly that I did not wish to be involved any further with the Committee or with the FBI. However, my requests to be left alone were ignored. Not long after I wrote to the FBI, Baetz and Waxman visited me and asked me to work for the Select Committee by spying on Jerry Ray and J. B. Stoner.

18. I am now telling the truth about the secret operation against James Earl Ray, Jerry Ray and their lawyer, Mark Lane, that the Select Committee set up. I am willing to take a lie detector test and to make my statement before an investigating Committee under oath. I am willing to be cross-examined by an impartial investigating body.

19. In addition to urging me to call Jerry Ray, to tape record those conversations and to learn of Mark Lane's flight schedule and schedule of meetings, Baetz spent a lot of time at my house playing the pinball machine, watching pornographics films and urging me to get one of the girls in the film to my house so that he might have sexual intercourse with her. He was so persistent and so insistent that one day while Baetz was as my house, I did call the young woman. She came over to the house and Baetz and she had intercourse in the bedroom next to the room that I was occupying. They were in there for fifteen minutes and Baetz later told me that they had had intercourse.

OLIVER PATTERSON.

---

STATEMENT OF G. ROBERT BLAKEY, CHIEF COUNSEL AND DIRECTOR, SELECT COMMITTEE ON ASSASSINATIONS, AUGUST 10, 1978

On Monday, August 7, 1978, a man who has been associated with an attorney for the convicted assassin of Dr. Martin Luther King, Jr. held a press conference in which he made several serious allegations concerning the conduct of an investigator for the Select Committee on Assassinations. The man making the charges has given a statement under oath to the Committee, though he has never been an employee of the committee.

Since the integrity of the committee's investigation of the assassination of Dr. King has been questioned, the committee is looking into the allegations. The investigator charged with misdeeds, a law enforcement officer who has a top secret security clearance based on an extensive background examination of his character, has been interviewed, as have other members of the committee staff who may have had information concerning the investigator's conduct.

On the strength of a preliminary investigation, the committee categorically denies each and every allegation of wrongdoing. It states with assurance that no federal, state or local law or any rule of the House or of the committee has been violated by the investigator or by any other member of the committee staff.

The committee will continue to conduct a complete investigation of the allegations. If any indication of wrongdoing is uncovered, prompt and appropriate action will be taken and brought to public attention. The committee is determined that the American people will not be misled by attempts to discredit the committee and its investigation.●

## NOISY AIRCRAFT REVENUE AND CREDIT ACT

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

● Mr. VANIK. Mr. Speaker, if H.R. 11986, the Noisy Aircraft Revenue and Credit Act, passes in its current form—

First. United Airlines could receive $640 million for its $1.6 billion order of Boeing 767's and 727-200's.

Second. Eastern Airlines could receive over $311 million for its $778 million purchase of the Airbus Industrie A300.

Third. Pan American Airlines could receive $200 million for its $500 million purchase of 12 Lockheed jets equipped with Rolls Royce engines.

Any airline purchasing a new aircraft with a less noisy engine is eligible to receive up to a 40-percent credit under this bill.

The Noisy Aircraft Revenue and Credit Act is an outrageous raid on the airline safety trust fund. If this fund is in surplus, the airline passenger tax should be reduced by 2 percent. The $3.2 billion that H.R. 11986 would give to the airline industry, by transferring 2 percent of the airline excise tax, belongs to the consumer.

I urge Members of the House to vote down the previous question on the rule on this bill so that an open rule may be considered. However, if the rule is not defeated, vote against H.R. 11986, the Ways and Means substitute to title III and for the motion to strike sections 301–304 of H.R. 8729. If these efforts fail, support the Snyder motion to recommit the bill.●

---

## ABORTION AND GENETIC COUNSELING

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, the September 10 edition of the Parade Magazine contains a very informative article on the significant progress being made in methods for identifying, prior to birth and even prior to conception, hereditary diseases with which the children of some parents may be afflicted. These diseases include the following:

Cystic Fibrosis: Afflicts children and young adults with breathing problems, intestinal difficulties and malnourishment, with life expectancy limited.

Down's Syndrome (Mongolism): Involves mental retardation and other functional difficulties often leading to institutionalization.

Sickle-Cell Anemia: Produces general weakness and susceptibility to infection leading to multiple crises and, finally, fatal bodily deterioration.

Spina Bifida: A birth defect affecting the central nervous system, causing a defect in the bony structure of the spinal column. Victims may never control the lower part of their bodies.

Tay-Sachs Disease: Causes a destruction of the nervous system. The affected child appears normal for about 6 months, then deteriorates rapidly, losing all physical skills, and eventually dies.

Thalassemia: Symptoms include anemia or multiple physical problems throughout childhood, requiring periodic blood transfusions; in more severe cases, still-birth or death soon after birth.

In some cases, tests of prospective parents prior to conception may indicate likelihood that their children will be afflicted with a genetic disease. In other cases, prenatal tests after conception are available or will soon be available to determine whether the infant will suffer the disease.

Where prenatal tests are available, the parents have the option of an abortion in order to avoid giving birth to a genetically diseased child. Unfortunately, under the restrictions imposed by the current so-called "right to life" amendments, many women in lower economic circumstances will be denied the right to such an abortion. The unfairness of this is obvious.

On this point, the article quotes Dr. Henry L. Nadler of Childrens' Memorial Hospital and Northwestern University Medical School:

What do you do when you tell a woman who can't afford to pay for an abortion that she is going to have a child with mongolism, for example? I simply don't think we can selectively set up a particular socioeconomic section of the population and say, "Sorry, we can't help you." There will be a hue and cry that will make something happen.

Mr. Speaker, this is but one of the many unrealistic aspects of the so-called "right to life" campaign. It would deny the fruits of medical progress to poor women, forcing them to give birth to defective human beings, many of whom, such as mongoloid children, cannot live life in any meaningful sense. They would also, of course, force unwanted children on women lacking the financial means to care for them.

Certainly the "right to life" should include some considerations as to the quality of life of those who are born and not merely the question of whether all fetuses, once conceived, must proceed to birth whether or not the mother is willing and whether or not the person who is born will be able to have a meaningful existence.

The full text of the Parade article follows these remarks:

### HELPING THE NEWBORN VIA GENETIC COUNSELING

(By Jeanne Helen Jones)

When Mrs. Robert W. Howard of New York give birth to a baby with Tay-Sachs disease, she and her husband felt they had only one person to blame—their obstetrician. After 22 months, the baby died a horrible death, and the Howards sued their obstetrician for failing to advise them of two means of preventing the tragedy: a blood test and a prenatal test.

Had they known about and taken these tests, they would have found themselves to be carriers of Tay-Sachs and the fetus destined to die of the disease. Mrs. Howard would have aborted.

The Howards won their original suit but lost on appeal to the Supreme Court of New York, which stated that it is the public policy not to weigh the quality of a life.

There have been many other cases similar to the Howards' and the outcomes have been mixed. Moreover, the abortion issue is aggravating the controversy over genetics.

Also adding to the confusion is the ignorance of the public and many medical professionals about what can be done to prevent genetic diseases. In fact, whether a woman receives expert or outdated advice on genetic risks could depend on when her physician graduated from medical school. "Ten years ago, many medical schools taught practically nothing about genetics," says Dr. Connie Sandlin, director of genetic services at Loma Linda (Cal.) University Medical Center. She notes that most chromosome diseases weren't charted and identified until the late 1950's.

As a result, "The average physician of any kind does not know what he or she should about handling genetic problems," says Dr. Henry L. Nadler of Children's Memorial Hospital and Northwestern University Medical School in Chicago. "Now at Northwestern a very significant amount of the obstetrics-gynecology training is spent in genetics."

The National Foundation—March of Dimes estimates that genetic factors account for 40 percent of all childhood deaths and 80 percent of the 3 million retarded in the United States today.

Infant genetic diseases usually arise through mistakes in one of the hundreds of thousands of genes within the chromosomes of the parents' egg or sperm, or through abnormalities in the chromosomes, most frequently those of the child—not the parent.

How can these diseases be detected? In the case of gene defects carried by the parents, prepregnancy blood tests are available to pinpoint risks for three diseases: Tay-Sachs, thalassemia and sickle-cell anemia. A blood test for cystic fibrosis is within a year of development, says the March of Dimes.

Another early-warning system is being devised to detect spina bifida, the second most common birth defect in this country. A blood test during pregnancy followed by a prenatal test for absolute diagnosis are being administered to prospective mothers in pilot projects throughout the country.

The prototype for genetic counseling is the highly successful California Tay-Sachs Disease Prevention Program directed by Dr. Michael Kaback. The program employs blood test to identify Tay-Sachs carriers and makes prenatal diagnoses of the fetus using amniocentesis.

But many genetic diseases cannot be detected through simple blood tests of the parent. In chromosome-related diseases, for example, the defects usually occur by chance in a particular baby. Fewer than 5 percent of the chromosome abnormalities are due to the parents' defective chromosomes. These diseases can be detected within the pregnant woman's uterus through amniocentesis, the most widely used prenatal test now available.

#### POOR RESPONSE

An alarming number of people fail to make use of this technique. Even in California, where amniocentesis is widely offered through 11 state-sponsored centers, the response has not been overwhelming. During fiscal year 1976–77, the state estimates that 3500 amniocentesis procedures were performed out of 18,700 pregnancies at risk and eligible.

"It is dramatic how slow society has been to utilize an outstanding technique that can greatly reduce birth defects," says Dr. Aubrey Milunsky, director of genetics and pediatrics at Harvard's Eunice Kennedy Shriver Center and author of Know Your Genes, a book for lay readers. He strongly suggests that the use of amniocentesis in this country should be expanded from the current 20,000 a year to 160,000 by testing every pregnant woman over 35.

Dr. Kaback takes a more moderate view: "Not every woman over 35 who is pregnant should have an amniocentesis. On the other hand, a pregnant woman beyond 35 should be informed that she is at a relatively increased risk for having a child with Down's

syndrome or with an often more serious chromosomal imbalance, that there is a safe and accurate test available to her to find out whether this pregnancy is an affected pregnancy, and that there are various options open to her to deal with this discovery."

ABORTION FOES

One of those options is, of course, abortion, which has its opponents. Shirley Murtaugh, education director of The Right to Life League of Southern California, says, "Many families have been advanced and enriched by having a defective child. We regret that abortion is connected with amniocentesis because we feel that under no circumstances, once a life exists, can there be an abortion. If the fetus is defective, we do not change our position one iota."

Last fall, Congress enacted the Michel Amendment, which cut off federal Medicaid funds in most abortion cases. Thirty-three states have also cut off public funds, with others showing signs of doing the same.

What this means for prenatal testing and genetic counseling is not clear. "What you basically do if you follow the letter of the law is make screening for genetic defects unavailable to a specific socioeconomic class," says Northwestern's Dr. Nadler. "What do you do when you tell a woman who can't afford to pay for an abortion that she is going to have a child with mongolism, for example? I simply don't think we can selectively set up a particular socioeconomic section of the population and say, 'Sorry, we can't help you.' There will be a hue and cry that will make something happen."

The demand for better genetics services nationwide has been heard in Congress. Sen. Jacob Javits (R., N.Y.) is spearheading a new bill providing funds for a network of genetics clinics around the country. And should current research seeking carrier detection for scores of diseases succeed, Dr. Kaback envisions the following scenario for a national counseling program:

"Twenty to 30 years from now, when a couple decides to have children, a state will provide a service, either through a clinic or private physician. The couple's blood will be drawn, and tests will be run on that blood for 50 different genetic problems—all paid for, all voluntary. The couple will then receive a report that they have been found not to be at risk for passing any of the tested diseases on to their offspring and are free from concern. If they are found at risk, counseling and amniocentesis services would be made available free of charge."

Whether this sounds like "playing God"—as some have labeled all things genetic—or like an idea whose time has come may depend on your philosophy, your religion, your family history, your physical health or your own genetic composition.

BASIC GENETIC GLOSSARY

Amniocentesis—the most common prenatal test. Fluid is drawn from the uterus during pregnancy for laboratory analysis. Danger to fetus and mother is generally accepted as far below 1 percent, and in more than 97 percent of people tested, no genetic problem is discovered. Can detect all chromosome abnormalities and at least 70 chemical errors in the genes.

Carrier—a healthy individual, usually not affected by the deleterious gene he or she carries, who can pass on a disease to offspring because of it.

Cystic Fibrosis—the most common severe birth defect of body chemistry affecting people of northwestern European ancestry. Children and young adults commonly suffer from breathing problems, intestinal difficulties and malnourishment, with life expectancy limited. Carrier blood and prenatal test in final research stages.

Down's Syndrome (Mongolism)—the most common birth defect and the one most screened for by amniocentesis. Caused by an error in the parent's ovum or sperm, producing an extra chromosome 21. Retardation and other functional difficulties often lead to institutionalization. Prenatal test now commonly available.

Genetic Counseling—making available knowledge about hereditary problems to the public. Counselors can reassure prospective parents who fear they may pass on a genetic disease, educate families with histories of genetic disorders and refer families with genetically impaired members to treatment facilities.

Genetic Disease—a mistake in the basic blueprint of an individual because of an error in one or a group of chromosomes or genes.

Sickle-cell Anema—genetic disease afflicting black children. Symptoms can include general weakness and susceptibility to infection leading to multiple crises, and, finally, fatal bodily deterioration. Carrier blood test is currently available.

Spina Bifida—the most common birth defect affecting the central nervous system, causing a defect in the bony structure of the spinal column. Victims may never control the lower part of their bodies. Maternal blood and prenatal test now in pilot study stage.

Tay-Sachs Disease—an inherited genetic disorder most common in Ashkenazi Jews, causing a destruction of the nervous system. The affected child appears normal about six months, then deteriorates rapidly, losing all physical skills, and eventually dies. Blood and prenatal tests widely available.

Thalassemia—genetic disease prevalent among people of Mediterranean descent. Symptoms may include mild anemia or multiple physical problems throughout childhood, requiring periodic blood transfusions: more severely, still-birth or death soon after birth. Carrier blood test is currently available.

## WE NEED TO KNOW ZAMBIA BETTER

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. SIKES. Mr. Speaker, Zambia is an enigma to most Americans. But it is highly important to negotiations affecting Rhodesia and Namibia. It is one of the few countries in Africa that holds meaningful elections, that has a relatively free press, and where whites are welcome.

The President, Kaunda, is Methodist mission trained and claims to be nonalined. However, both Russian and Cuban military personnel are in his country to assist in the training of forces of Nkomo, the Rhodesian guerrilla leader who plans an invasion of Rhodesia unless he is offered a place which is attractive to him in the present government.

Ironically, Nkomo's army and his Russian-supplied weapons are much larger in number than the Zambian forces. Because of a close personal friendship of many years, Kaunda has permitted Nkomo to use Zambia as a base of operations against Rhodesia. Now he is powerless to get rid of them. Estimates on the size of Nkomo's army range from 6,000 to 12,000. There are also 25,000 to 35,000 refugees from Rhodesia who accompany Nkomo's army. Feeding them is a major undertaking for a poor country and it is generally accepted that Russia is paying the bill.

Initially the Chinese assisted in training Nkomo's forces, but apparently the Chinese have been replaced by Cubans and Russians and are no longer there.

Kaunda does not approve of Cubans in Angola and he objected to U.S. efforts in Vietnam. It is known that he tried to curb SWAPO's recent incursion into the Capriva strip of Southwest Africa. This venture ended in disaster for SWAPO, which has been seeking for years to establish a new government in Southwest Africa and still enjoys strong support from the United Nations.

Despite these seeming contradictions, those who know Kaunda say that he is not a socialist, that he is widely respected in Africa, and that the United States should keep open our options for dealing with him.

Zambia needs western expertise. A major problem is food and self-sufficiency in agriculture production is a primary goal of the present government.●

## THE REAL GOVERNMENT IN ANGOLA TODAY IS RUSSIA ALIAS CUBA

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. SIKES. Mr. Speaker, U.S. feelers toward better relations with Angola are directed to the wrong group. There is nothing to be gained by negotiating with a government which is kept in power only by Cuban bayonets, controlled by Russia, and used to obtain a major base of operations for Russian air and naval forces. The real government in Angola today is Russia alias Cuba.

The Communist faction in power in Angola, the MPLA, has no stronger claim for recognition as the legal government than does UNITA, which controls more than one-third of the country, including Angola's bread basket and principal railroad.

The MPLA government operating from Luanda, is far from secure despite 3 years of massive Russian aid and Cuban troop support.

Intelligence reports which were made available to me show 23,000 Cubans now in Angola, of whom 17,000 are troops and the remainder are Cuban technical and maintenance personnel. There has been much mystery about Cuban casualties, a subject generally ignored by the American press. It is obvious that casualties result from battle wounds and tropical illnesses, and best estimates from the local level are that there have been 5,000 Cuban deaths there. This does not include the numbers of sick and wounded. Castro has attempted to conceal the casualties. Notification is sent to families of deceased, sometimes months after death occurs. The seriously wounded and ill are flown to Communist nations in Europe, notably East Germany, for treatment and convalescence.

There are now an estimated 1,500 Russians in Angola, principally in the capital, in part to direct the Cuban war effort which often has been ineffective in the field. The Russians also maintain a sub-

stantial naval presence in Luanda, including combat surface ships and submarines. Russian aircraft, including reconnaissance planes and transport aircraft, are based there. This gives Russia an important stronghold in the South Atlantic.

There are reports of growing friction, sometimes with serious outbreaks, between Cubans and Angolans. As a result, Cubans are being kept more and more in their own compounds. Local Angolans accuse the Cubans of helping themselves to radios, TV sets, refrigerators, even automobiles, and shipping them back to Cuba.

The glamour of Castro's African adventure is wearing off as word of deaths, mutilation of captives, and other stories gain circulation in Cuba. Soldiers who are rotated back are instructed not to talk but word gets around. Despite Castro's continued bombastic statements, there is growing uneasiness on the island about "Cuba's Vietnam." More and more Cubans are seeking, by whatever means possible, to avoid service in Africa.

Even with Cuban and Russian support, MPLA troops do not venture out except in strength. This causes supply problems which they do not cope with effectively. Food sometimes is short, even in the capital, because UNITA controls so much of the food producing area and because of interruptions in the operation of the railroad. Defections from MPLA forces are reported to be occurring with increasing frequency.

Although UNITA is the principal adversary of the MPLA, another insurgent movement, the FMLA, continues to operate in the northern part of Angola. However, the FMLA controls but little territory.

The UNITA forces, headed by Savimbi, are careful to avoid a direct confrontation with the MPLA. Savimbi is Chinese-trained and he fully understands Mao's tactics of guerrilla warfare. His hit-and-run attacks have kept the MPLA off balance. He has a supply problem and a considerable part of his weapons are those captured from the MPLA forces. Although UNITA can operate with much more flexibility, the struggle is not an easy one. They are badly outnumbered and short of mobile equipment. They have tried repeatedly to obtain mobile radio broadcast facilities possessing greater power than those they now have in order to broadcast their story to the world.

Russia's interest is in maintaining a puppet government in the capital and in using the port and airfield facilities at Luanda for their own purposes. Admittedly, it will be almost impossible for UNITA to oust the MPLA from the capital area while the Cuban and Russian effort persists. However, there is no reason for the United States to place its stamp of approval on this situation by opening negotiations with the MPLA for recognition.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. YOUNG of Alaska (at the request of Mr. RHODES), for September 11 through 13, on account of official business.

Mr. BURKE of Florida (at the request of Mr. RHODES), for the week of September 11, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KINDNESS) and to revise and extend their remarks and include extraneous matter:)

Mr. GOLDWATER, for 5 minutes, today.
Mr. MCKINNEY, for 5 minutes, today.
Mr. YOUNG of Florida, for 5 minutes, today.

(The following Members (at the request of Mr. RAHALL) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. ADDABBO, for 10 minutes, today.
Mr. BINGHAM, for 10 minutes, today.
Mr. BAUCUS, for 5 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.
Mr. STOKES, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. DOWNEY, for 45 minutes, September 12, 1978.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. KINDNESS), and to include extraneous matter:)

Mr. JEFFORDS.
Mr. FINDLEY in two instances.
Mr. PRITCHARD.
Mr. RHODES.
Mr. LEACH.
Mr. DORNAN.
Mr. FRENZEL in five instances.
Mr. MARRIOTT.

(The following Members (at the request of Mr. RAHALL), and to include extraneous matter:)

Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. KILDEE.
Mr. EILBERG in 10 instances.
Mr. IRELAND.
Mr. BOLLING.
Mr. BINGHAM in 10 instances.
Mr. THOMPSON.
Mr. RODINO.
Mr. HAMILTON.
Mr. LUNDINE.
Mr. MOORHEAD of Pennsylvania.
Mr. NOLAN in two instances.
Mr. DOWNEY.
Mr. HARRIS.
Ms. KEYS.
Mr. STARK.
Mr. WOLFF.
Mr. BRECKINRIDGE in four instances.
Mr. OTTINGER.
Mr. AUCOIN.
Mr. SIMON in three instances.
Mr. VANIK.
Mr. JONES of Oklahoma.
Mr. EDGAR.

## SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 691. An act to provide for the preservation and enhancement of critical habitat for migratory waterfowl and other wetlands-dependent migratory birds of the Pacific flyway in the grasslands area of the San Joaquin Valley, California; to the Committee on the Judiciary; and

S. 1423. An act to establish a procedure in addition to impeachment for the retirement of disabled members of the Judiciary of the United States and the removal of those whose conduct is or has been inconsistent with the good behavior required by article III, section 1 of the Constitution, and for other purposes; to the Committee on Interior and Insular Affairs.

## SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2928. An act to authorize appropriations for the fiscal year 1979 under the International Investment Survey Act of 1976, and for other purposes; and

S. 3107. An act to amend the Bankruptcy Act to provide for uniform supervision and control of employees of referees in bankruptcy.

## ADJOURNMENT

Mr. RAHALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 51 minutes p.m.), the House adjourned until tomorrow, Tuesday, September 12, 1978, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of title XXIV, executive communications were taken from the Speaker's table and referred as follows:

4953. A communication from the President of the United States, transmitting notice of the issuance of a determination that the extension for 1 year of the authorities currently exercised under section 5(b) of the Trading With the Enemy Act, with respect to various Communist countries, is in the national interest, pursuant to section 101(b) of Public Law 95-223. (H. Doc. No. 95-380); to the Committee on International Relations and ordered to be printed.

4954. A letter from the Director, Office of Management and Budget, Executive Office of the President transmitting a cumulative report on rescissions and deferrals of budget authority as of September 1, 1978, pursuant to sction 1104(e) of Public Law 93-344 (H. Doc. No. 95-381); to the Committee on Appropriations and ordered to be printed.

4955. A letter from the president and chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction with British Airways exceeding $60 million, pursuant to section 2(b)(3)(1) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

4956. A letter from the U.S. Commissioner of Education, Department of Health, Education, and Welfare, transmitting the 27th annual report on Federal financial assistance for maintenance and operation of schools and

for construction of school facilities in federally affected areas, and on disaster relief of schools in disaster areas, pursuant to section 401(c) of Public Law 71–874 and section 12 (c) of Public Law 81–815; to the Committee on Education and Labor.

4957. A letter from the U.S. Commissioner of Education, Department of Health, Education, and Welfare, transmitting a report on graduate fellowships and assistance for fiscal year 1977, pursuant to section 971 of the Higher Education Act of 1965, as amended; to the Committee on Education and Labor.

4958. A letter from Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

4959. A letter from the Secretary of Health, Education, and Welfare, transmitting the findings of the assessment of bilingual and bicultural awareness activities in health professions schools, pursuant to section 904(c) of Public Law 94–484; to the Committee on Interstate and Foreign Commerce.

4960. A letter from the executive director, American Historical Association, transmitting the audit of the association's accounts for the year ended June 30, 1978, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

4961. A letter from the chairman, Board of Directors, Future Farmers of America, transmitting a report on the audit of the accounts of the organization for the year ended June 30, 1978, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

4962. A letter from the Comptroller General of the United States, transmitting a report on the Nuclear Regulatory Commission's procedures for inspecting nuclear powerplants under construction (EMD–78–80, September 7, 1978); jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Interstate and Foreign Commerce.

4963. A letter from the Comptroller General of the United States, transmitting a report on cargo processing by the U.S. Customs Service (GGD–78–79, September 7, 1978); jointly, to the Committees on Government Operations, and Ways and Means.

4964. A letter from the Assistant Attorney General for Legislative Affairs, transmitting a draft of proposed legislation to improve the physical security features of the motor vehicle and its parts, increase the criminal penalties of persons trafficking in stolen motor vehicles and parts and to curtail the exportation of stolen motor vehicles and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ULLMAN: Committee on Ways and Means. H.R. 13750. A bill to implement the International Sugar Agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes; with amendment (Rept. No. 95–1484, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. H.R. 9158. A bill to provide for grants to tribally controlled community colleges, and for other purposes; with amendment (Rept. No. 95–1558). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARCHER:

H.R. 14035. A bill to amend the Internal Revenue Code of 1954 to provide that individuals will not be required to make declarations of estimated tax if the amount of estimated tax is less than $500; to the Committee on Ways and Means.

By Mr. EVANS of Colorado:

H.R. 14036. A bill to provide for the orderly construction, operation and maintenance of the previously authorized Fryingpan-Arkansas Federal reclamation project in Colorado, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HOLLAND:

H.R. 14037. A bill to authorize the Secretary of the Interior to conduct a study of the historic resources of Camden, S.C., and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 14038. A bill to authorize the establishment of the Historic Camden National Historic Park, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. JACOBS (for himself and Mr. ERTEL):

H.R. 14039. A bill to amend title II of the Social Security Act to provide that renewal commissions, received by a retired insurance agent from life insurance policies which were sold by him before his retirement, shall not be taken into account in determining his net earnings from self-employment for purposes of the earnings test; to the Committee on Ways and Means.

By Mrs. LLOYD of Tennessee:

H.R. 14040. A bill to provide that any claim arising out of the loss, miscarriage, or negligent transmission of letters or postal matter be subject to the provisions of the Federal Tort Claims Act; to the Committee on the Judiciary.

By Mr. PICKLE (for himself, Mr. BAUMAN, Mr. ANDREWS of North Carolina, and Mr. LOTT):

H.R. 14041. A bill to amend the Internal Revenue Code of 1954 to clarify the application of the investment tax credit to certain enclosures or structures used for the housing, raising, or feeding of poultry or their produce; to the Committee on Ways and Means.

By Mr. PRICE:

H.R. 14042. A bill to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes; to the Committee on Armed Services.

By M. PRICE (for himself and Mr. BOB WILSON) (by request):

H.R. 14043. A bill to amend title 10, United States Code, to remove chaplains from under the cognizance of the Chief of Naval Personnel; to the Committee on Armed Services.

By Mr. ST GERMAIN:

H.R. 14044. A bill to amend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, to facilitate urban lending investment by Federal savings and loan associations, to establish a Central Liquidity Facility for Federal and State credit unions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WHITEHURST (for himself and Mr. ARCHER):

H.R. 14045. A bill to assist former spouses of Federal employees in obtaining court-ordered payments; to the Committee on Ways and Means.

By Mr. OTTINGER (for himself, Mr. ROSE and Mr. FUQUA):

H.R. 14046. A bill to provide for a research, development, and demonstration program to establish an experimental public service satellite communications system; to the Committee on Science and Technology.

By Mr. STOCKMAN:

H.R. 14047. A bill to implement the International Sugar Agreement of 1977; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. THONE (for himself, Mr. EDWARDS of Oklahoma, Mrs. HOLT, and Mr. WAMPLER):

H.R. 14048. A bill to amend the Congressional Budget and Impoundment Control Act to limit total Federal budget authority and budget outlays in fiscal years 1980, 1981, 1982, and 1983; jointly, to the Committees on Government Operations, and Rules.

By Mr. TUCKER:

H.R. 14049. A bill to amend sections 170, 2055, and 2522 of the Internal Revenue Code of 1954 to provide a deduction for income, estate, and gift tax purposes for contributions to a section 501(c)(10) organization for the purpose of building or maintaining a building; to the Committee on Ways and Means.

By Mr. NOLAN (for himself, Mr. HOLLAND, Mr. KRUEGER, Ms. KEYS, Mr. ANDREWS of North Dakota, Mr. WINN, and Mr. FLIPPO):

H.J. Res. 1133. Joint resolution raising the price support levels for milk, wheat, corn, soybeans, and cotton to 90 percent of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture.

By Mr. RISENHOOVER:

H.J. Res. 1134. Joint resolution to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares; to the Committee on Public Works and Transportation.

H.J. Res. 1135. Joint resolution to change the name of Oologah Lake in the State of Oklahoma to Will Rogers Lake; to the Committee on Public Works and Transportation.

By Mrs. MEYNER (for herself and Mr. LONG of Louisiana):

H. Con Res. 709. Concurrent resolution requesting the President to convene a White House Conference on Foreign Trade; jointly, to the Committees on International Relations, and Ways and Means.

By Mr. ROONEY (for himself, Mr. PEPPER, Mr. DENT, Mr. ROYBAL, Mr. BIAGGI, Mr. JOHN L. BURTON, Mr. BEARD of Rhode Island, Mr. BLOUIN, Mr. FLORIO, Mr. HUGHES, Mr. SANTINI, Mr. RISENHOOVER, Mr. DRINAN, Mr. LUNDINE, Ms. OAKAR, Mr. WAMPLER, Mr. HAMMERSCHMIDT, Mr. COHEN, Mr. SARASIN, Mr. GRASSLEY, Mr. COCHRAN of Mississippi, Mr. RINALDO, and Mr. MARKS):

H. CON. RES. 710. Concurrent resolution expressing the support of the Congress for a comprehensive review of retirement income, survivor benefit, and disability benefit programs in the United States; to the Committee on Education and Labor.

By Mr. BRECKINRIDGE (for himself, Mr. ROSE, Mr. PRESSLER, Mr. BAUCUS, Mr. WATKINS, Ms. KEYS, Mr. SIMON, Mr. EVANS of Georgia, Mr. ABDNOR, Mr. RAILSBACK, and Mr. FOUNTAIN):

H. Res. 1341. Resolution to establish a select committee to study nonmetropolitan America; to the Committee on Rules.

## MEMORIALS

Under clause 4 of rule XXII,

470. The SPEAKER presented a memorial of the Legislature of the State of California, relative to victims of crimes; to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HAMMERSCHMIDT:

H.R. 14050. A bill for the relief of John H. Parker; to the Committee on the Judiciary.

By Ms. HOLTZMAN:

H.R. 14051. A bill for the relief of Michael Carl Brown; to the Committee on the Judiciary.

H.R. 14052. A bill for the relief of Joy Marsia Dehaney; to the Committee on the Judiciary.

By Mr. LEVITAS:

H.R. 14053. A bill for the relief of Mirko Mark Sedlak; to the Committee on the Judiciary.

By Mr. PATTERSON of California:

H.R. 14054. A bill for the relief of Orange County Fair Housing Council, Inc.; to the Committee on the Judiciary.

By Mr. STEERS:

H.R. 14055. A bill for the relief of Javid Saadian; to the Committee on the Judiciary.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. DANIELSON:

(Amendment to the amendment in the nature of a substitute.)

—Page 30, line 21: Strike "101" and insert "202".

Page 34, lines 21 and 22: Strike "the appropriate committee shall so inform the reporting individual and direct him" and insert: "the reporting individual shall be informed and directed".

Page 41, line 9: Strike "the" and insert "a".

Page 41, line 10: Strike "required by section 206(b)".

Page 44, line 2: Strike "1978" and insert "1979".

Page 51, line 22: Strike "January 1, 1978" and insert "July 1, 1979".

Page 62, line 2: Strike "101" and insert "302".

Page 64, lines 17 and 18; Strike "appropriate committee" and insert "Committee".

Page 66, line 3: Strike "(a)" and insert "(d)".

H.R. 1

By Mr. FRENZEL:

(Amendment to the amendment in the nature of a substitute.)

—Strike "and candidates for Federal office" in the title of H.R. 13850.

On page 2, lines 8–9, strike ", and any individual who becomes a candidate in any election for the office of Member"

On page 2, lines 17–18, strike "(1) Except as provided in paragraph 2," and capitalize the word "Each".

On page 2, lines 19–20, "other than an individual who becomes a candidate in any election for the office of Member,"

On page 3, strike lines 6–14 and on line 10 strike (B) and insert (2).

On page 3, strike lines 15–25 and on page 4 strike lines 1–2.

On page 4, line 3 strike (c) and insert (b).

On page 4, on lines 3–4 strike "or an individual who is a candidate for the office of Member".

On page 12, line 4 after ", except" strike all that follows through line 8,

On page 15, strike lines 12–22, and redesignate (2) as (1), (3) as (2), (4) as (3), (5) as (4), (6) as (5), (7) as (6), (8) as (7), (9) as (8), (10) as (9), (11) as (10), (12) as (11), (13) as (12), (14) as (13), and (15) as (14).

—On page 3, lines 16–17, strike "October 1, 1978," and insert "January 1, 1979,".

—On page 7, line 10, strike the "period", and insert "or any deposit in a personal savings account which bears interest."

—On page 8, line 5, after the word "children." insert the new paragraph:

"(7) The identity of all positions held as an officer, director, trustee, partner, proprietor, representative, employee, or consultant of any corporation company, firm, partnership, or other business enterprise, any nonprofit organization, any labor organization, and any educational or other institution: Provided, that this paragraph shall not require the reporting of positions held in any religious, social, fraternal, charitable, or political entity."

—On page 8, line 5, after "children." insert:

"(8) A description of the date, parties to, and terms of any agreement or arrangment with respect to: (A) future employment; (B) a leave of absence during the period of the reporting individual's Government service; (C) continuation of payments by a former employer other than the United States Government; and (D) continuing participation in an employee welfare or benefit plan maintained by a former employee."

—On page 10, line 25, after the word "holdings" insert the following "at the time his interest in the trust was originally placed in such trust, if available,".

—On page 11, strike lines 14–25, and insert:

"(c) Any person requesting a copy of a report may be required to pay a reasonable fee to cover the cost of reproduction or mailing of such report, excluding any salary of any employee involved in such reproduction or mailing. A copy of such report may be furnished without charge or at a reduced charge if it is determined by the Clerk or Secretary that waiver or reduction of the fee is in the public interest because furnishing the information may be considered as primarily benefitting the public."

—On page 12, strike lines 1–8 and insert:

"(d)(1) Any report filed under this title shall be available for public inspection for a period of five years, so long as the reporting individual remains in a position designated in section 2, after which the report shall be destroyed.

(2) If the individual who filed the report is no longer within any position designated in section 2 and so notifies the office designated in section 6 holding his report, the report shall, one year after such notification, no longer be available for public inspection. Such report shall be retained by the office designated in section 6 of the remainder of the five year period after which it shall be destroyed;

(3) If the individual specified in subsection d(2) returns to any position designated in section 2 during such five year period, his report shall again be made available for public inspection for the remainder of that seven year period."

—On page 12, strike lines 17–19 and insert:

"(D) for use, directly or indirectly, in the solicitation of money for any purpose, other than for a political purpose."

H.R. 1

By Mr. MAZZOLI:

(Amendment to the amendment in the nature of a substitute.)

—On page 32, line 2, strike "In addition" and all that follows through the end of the subsection.

H.R. 1

By Mr. VOLKMER:

(Amendment to the amendment in the nature of a substitute.)

—On page 8, strike lines 12 through 19 and insert in lieu thereof the following:

"(1) up to $5,000;
"(2) from $5,000 to $15,000;
"(3) from $15,000 to $50,000;
"(4) from $50,000 to $100,000;
"(5) from $100,000 to $250,000;
"(6) from $250,000 to $500,000;
"(7) from $500,000 to $1,000,000;
"(8) from $1,000,000 to $2,000,000;
"(9) from $2,000,000 to $5,000,000; and
"(10) greater than $5,000,000."

—On page 26, strike line 22 and all that follows through line 1, page 27 and insert in lieu thereof the following:

"(1) up to $5,000;
"(2) from $5,000 to $15,000;
"(3) from $15,000 to $50,000;
"(4) from $50,000 to $100,000;
"(5) from $100,000 to $250,000;
"(6) from $250,000 to $500,000;
"(7) from $500,000 to $1,000,000;
"(8) from $1,000,000 to $2,000,000;
"(9) from $2,000,000 to $5,000,000; and
"(10) greater than $5,000,000."

—On page 57, strike lines 17 through 21 and insert in lieu thereof the following:

"(1) up to $5,000;
"(2) from $5,000 to $15,000;
"(3) from $15,000 to $50,000;
"(4) from $50,000 to $100,000;
"(5) from $100,000 to $250,000;
"(6) from $250,000 to $500,000;
"(7) from $500,000 to $1,000,000;
"(8) from $1,000,000 to $2,000,000;
"(9) from $2,000,000 to $5,000,000; and
"(10) greater than $5,000,000."

H.R. 11280

By Mr. EDWARDS of Alabama:

(Amendment to the Udall Substitute.)

—In section 7106(a)(1), strike the semicolon and the word "and" after the word "agency" and insert a comma and the following: "the numbers, types, and grades of positions or employees assigned to an organizational unit, work project, or tour of duty.".

In section 7106(b), delete all of item "(1)", which reads as follows: "at the election of the agency, on the numbers, types, and grades of employees or positions assigned to any organizational subdivision, work project, or tour of duty, or on the technology, methods, and means of performing work;".

H.R. 11280

By Mr. ERLENBORN:

(Amendments to the amendment in the nature of a substitute offered by Mr. UDALL to title VII.)

—Newly designated section 7103(a)(4) of subpart F of part III of title V, United States Code is amended by striking the words "in whole or in part", and by striking the words "and pay dues".

—Amend newly designated section 7103 of subpart F of part III of title V, United States Code by striking the "or" after subparagraph 7103(a)(4)(B); by inserting an "or" after subparagraph 7103(a)(4)(C); and by inserting the following new subparagraph 7103(a)(4)(D):

"(D) an organization which assists, or participates in the conduct of a strike against the Government of the United States or any agency thereof or imposes a duty or obligation to conduct, assist, or participate in such a strike;".

—Newly designated section 7103(a)(5) of subpart F of part III of title V, United States Code, is amended by striking the words "dues, fees and assessment" and substituting therefor "periodic dues and initiation fees uniformly required".

—Newly designated section 7104(f)(1) of subpart F of part III of title V, United States

Code is amended by inserting before the final period the words "only upon notice and hearing and only for misconduct, inefficiency, neglect of duty, or malfeasance in office".

—Newly designated section 7105(e) of subpart F of part III of part V, United States Code, is amended by striking the number "(1)", redesignating the letters "(A)", "(B)", "(C)", and "(D)" as numbers "(1)", "(2)", "(3)", and "(4)"; and striking all of subsection 7105(e)(2); and striking the words "or administrative law judge" in subsection 7105(f).

Section 7118(a)(5), as presently designated, is amended by inserting before the period in the fourth sentence thereof the words "and filed with the Authority". Section 7118(a)(6), as presently designated is amended by striking "(or any member thereof or any individual employed by the Authority and designated for such purpose)"; and by striking the words "individual or individuals conducting the hearing shall state in writing their" and substitute therefor "Authority shall state in writing its". Section 7118(a)(7), as presently designated, is amended by striking all of section 7118(a)(7) and substituting therefor: "(7) If the Authority determines that the preponderance of the evidence received fails to demonstrate that the agency or labor organization named in the complaint has engaged in or is engaging in any such unfair labor practice, the Authority shall state in writing its findings of fact and shall issue an order dismissing the complaint.".

—Newly designated section 7111(b) of subchapter II of subpart F of part III of title V, United States Code is amended by striking "(b)(1)" and substituting therefore "(b)"; and is further amended by striking from presently designated 7111(b)(1)(B) the words "Except as provided under subsection (e) of this section, if" and substituting therefore "If," and by striking the words "subject to paragraph (2) of this subsection"; and by striking all of paragraph (2), including (2)(A) and (2)(B).

—Newly designated section 7111(b)(1)(B) of subchapter II of subpart F of part III of title V, United States Code is amended by striking the words "Except as provided under subsection (e) of this Section, if", and substituting therefore "If"; and section 711 is further amended by striking all of subsection (e) and redesignating the subsequent subsections accordingly.

—Newly designated section 7112 of subpart F of part III of title V, United States Code, is amended by inserting after subsection (c), a new subsection (d) (and redesignating the subsequent subsections accordingly) which reads as follows:

"(d) Any employee who is engaged in the administration, interpretation and enforcement of the Federal Election Campaign Act of 1971, as amended, shall not be represented by any labor organization which maintains a political action committee or which is affiliated, associated, or connected with an organization which maintains a political action committee; nor shall such employees be represented by a labor organization which expressly advocates the election or defeat of any candidate for Federal Office.".

—Strike newly designated section 7113 of subpart F of part III of title V, United States Code, and redesignate the subsequent sections accordingly; and amend newly designated section 7117 by striking all of subsection (d).

—Newly designated section 7115 of subpart F of part III of title V, United States Code is amended by striking all of subsection (c) thereof.

—Newly designated section 7116(a)(5) of subpart F of part III of title V, United States Code is amended by inserting immediately before the semicolon the following: "; *Provided*, That nothing in this chapter shall be construed as requiring an agency to negotiate in good faith with any labor organization certified after the enactment of this Act until such labor organization has been determined by means of a secret ballot election conducted in accordance with the provisions of this chapter. This provision shall not be construed to bar a consolidation of units without an election".

—Amend newly designated section 7116 of subpart F of part III of title V, United States Code, by inserting after subsection (b) a new subsection (c), redesignating the present subsection (c) and subsequent subsection accordingly, which reads as follows:

"(c) The expression of any personal views, argument, opinion or the making of any statement shall not (1) constitute or be evidence of an unfair labor practice under any of the provisions of this chapter or (2) constitute grounds for, or evidence justifying, setting aside the results of any election conducted under any provisions of this chapter, if such expression contains no threats of reprisal or force or promise of benefit.".

---

H.R. 11280

By Mr. FRENZEL:

(Amendment to the Udall substitute for title VII.)

—In new section 7103(a)(3)(F) strike the word "or".

In new section 7103(a)(3)(G) after the word "Panel;" insert the following: "or (H) the Federal Election Commission;".

---

H.R. 11622

By Mr. EDGAR:

—Page 56, after line 11, delete "." and insert the following:

"(3) Not later than 1 year after the date of the enactment of this subsection, the Secretary shall conduct a study, and submit a report thereon to the Congress, on the effects which would result from including within the coverage of this Act various types and classes of facilities and equipment used in the transportation on land of gas or liquified petroleum gas in interstate or foreign commerce, or storage in connection with such transportation.".

---

H.R. 11733

By Mr. EDGAR:

Page 204, strike out line 9 and all that follows down through page 209, line 11, and insert in lieu thereof the following:

SEC. 401. Section 134 of title 23, United States Code, and section 8 of the Urban Mass Transportation Act of 1964 are amended, both to read as follows:

"(a) It is declared to be in the national interest to encourage and promote the development of transportation systems embracing various modes of transportation in a manner that will serve the States and local communities efficiently and effectively. To accomplish this objective, the Secretary shall cooperate with the State and local officials in the development of transportation plans and programs which are formulated on the basis of transportation needs, as determined by the State and local officials, with due consideration given to the national goals set forth in subsection (c) of this section.

"(b)(1) The transportation planning process for urbanized areas shall be carried on, in collaboration with the State, by elected local officials acting through a metropolitan planning organization or other metropolitan instrumentality which, at the minimum, shall encompass the entire urbanized area within the State as designated by the Bureau of the Census. Where an urbanized area encompasses communities in more than one State the Secretary may, at his discretion and upon the request of the responsible local officials, assist in the development of separate plans and programs for those parts of the urbanized area within a single State.

"(2) Within one year after the enactment of this section, in the absence of State law to the contrary, the local officials of the urbanized area for which a metropolitan planning organization has been designated prior to enactment of this section, or for which a metropolitan planning organization has not been designated for the purposes of this section, may under rules established by the Secretary designate the State or any representative regional instrumentality as the metropolitan planning organization for the purposes of this section.

"(c)(1) On a date established by regulation, and at subsequent two-year intervals, urbanized areas desiring Federal financial assistance under this Act shall submit to the Secretary for his approval a comprehensive transportation plan. The planning process required under this section shall consider all modes of transportation, and shall be continuing, cooperative, and comprehensive to the degree appropriate based on the complexity of the transportation problems. All plans submitted under this section for approval by the Secretary shall include both a long-range and a short-range element.

"(2) The long-range element shall set forth a multi-year program of transportation improvement projects, staged according to priority. Such multi-year programs shall be based on an assessment of transportation needs, as determined by the responsible local officials, and shall include concise statements relating the program to each of the following objectives, which are declared to be in the national interest: (A) Coordination of the urbanized area transportation system with the Statewide Transportation System; (B) Development and implementation of strategies to reduce transportation improvement costs by making more efficient use of existing transportation facilities; (C) Development and implementation of strategies to coordinate various modes of passenger transportation; (D) Development and implementation of strategies to reduce traffic fatalities and improve other aspects of transportation safety; (E) General improvement of mobility, with special effort made in meeting the needs of the transportation disadvantaged; and (F) with respect to urbanized areas of 1,000,000 or more population, conservation of energy and improvement of air quality by development and implementation of strategies to reduce peak hour single-passenger automotive travel to and from major centers of employment.

"(3) The short-range element shall set forth those transportation improvement projects, together with alternative transportation management strategies, proposed for the following two calendar years. The short-range element shall be developed, under the supervision of the designated metropolitan planning organization, by an appropriate forum involving the State transportation department (or its equivalent), operators of public mass transportation, and other public bodies responsible for the implementation of the urbanized area's transportation policy.

"(4) The Secretary shall approve a comprehensive transportation plan submitted under this subsection unless he determines that the planning process on which the plan is based has not been carried out in conformance with this section, or unless he determines that the programs contained in the plan, when considered in the aggregate, will not reasonably promote each of the national objectives set forth under this subsection.

"(5) Concurrent with submission to the Secretary, metropolitan planning organizations shall submit the comprehensive transportation plan required by this section to the Governor of the State or States affected, to principal sponsors of projects proposed in the plan, and to the Environmental Protection Agency. If within thirty days thereafter any of the recipients submits comments to the Secretary, the Secretary shall con-

sider such comments before taking final action on the plan.

"(6) Approval by the Secretary of any plan submitted under this section shall not prevent the Secretary from subsequently disapproving any individual project on the program, pursuant to the provisions of the Urban Mass Transportation Act of 1964 or title 23, United States Code, nor shall it be considered an action or approval for the purposes of the National Environmental Policy Act or any other federal law.

"(d) No project assisted under this Act (title) and within an urbanized area as designated by the Bureau of the Census shall be approved by the Secretary (after the date of the enactment of rules established by the Secretary to implement this section) unless the proposed project is part of an approved short-range transportation planning element under this section.".

H.R. 11733

By Mr. WINN:

—Page 100, after line 4, insert the following:

URBAN SYSTEMS DISCRETIONARY GRANTS

SEC. 109. Subsection (a) of section 104 of title 23, United States Code, is amended by inserting "(1)" immediately after "(a)" the first place it appears and by adding at the end thereof the following new paragraph:

"(2) In addition to the deduction authorized by paragraph (1), the Secretary shall deduct an amount equal to 10 per centum of the sums authorized to be appropriated in each fiscal year for expenditure on the Federal-aid urban system. The sum so deducted shall be available for expenditure at the discretion of the Secretary for grants to States and to political subdivisions of States for projects on the Federal-aid urban system in accordance with those provisions of this title otherwise applicable to such projects unless the Secretary finds any such provision to be inconsistent with the purpose of this paragraph. No grant shall be made under this paragraph to any State, or to any political subdivision thereof, which has not obligated all of the funds apportioned to such State for such fiscal year for expenditure on the Federal-aid urban system. Any sum deducted by the Secretary under this paragraph shall remain available until expended. Sums apportioned to a State under paragraph (6) of subsection (b) of this section unexpended at the end of the period of their availability shall lapse as provided in section 118(b) of this title and shall thereupon become immediately available for expenditure, at the discretion of the Secretary, in accordance with this paragraph."

H.R. 12005

By Mr. SOLARZ:

—Page 8, line 16, insert "(a)" before "The".

Page 9, insert after line 24 the following new subsection:

(b) In recognition of the severe plight of refugees from Democratic Kampuchea (Cambodia) and in view of the magnitude and severity of the violations of human rights committed by the government of that country, the Attorney General should exercise his authority under section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)) to parole into the United States, during the two-year period ending on September 30, 1980, 15,000 of such refugees who seek admission to the United States.

H.R. 12611

By Mr. CAVANAUGH:

—Page 137, strike out line 17 and all that follows through line 18 on page 138 and insert in lieu thereof the following:

EMPLOYEE PROTECTION PROGRAM

SEC. 32. (a)(1) Any protected employee who suffers a qualifying dislocation shall have the right to be hired, regardless of age, for any position in such employee's occupational specialty by any air carrier before such air carrier hires any other individual for such position unless such other individual (A) was furloughed or terminated by such air carrier, or (B) suffered a qualifying dislocation before such protected employee and such other individual is a protected employee.

(2) The Secretary shall establish, maintain, and periodically publish in the Federal Register a comprehensive list of available jobs with air carriers. Such list shall include descriptions of, and qualifications for, such jobs and such other information with respect to such jobs as the Secretary deems advisable. The Secretary may require each air carrier to submit such reports, data, and other information at such times and in such manner as the Secretary deems necessary to carry out his responsibilities under this section. The Secretary shall be responsible for determining the accuracy of such reports, data, and information.

(b)(1) The Secretary of Labor shall make every effort to assist any protected employee who has been furloughed or terminated by any air carrier because of a qualifying dislocation in finding employment reasonably comparable to such employee's employment with such air carrier.

(2) The Secretary of Labor shall require each air carrier to comply with the requirements imposed by this section.

(c)(1) The Secretary may issue, amend, or repeal such regulations as the Secretary deems necessary to carry out his responsibilities under this section.

(2) Simultaneously with the promulgation of any regulation pursuant to paragraph (1) of this subsection the Secretary shall transmit a copy thereof to the Congress. Except as provided in paragraph (3) of this subsection, such regulation shall take effect 60 legislative days after the date of its promulgation unless—

(A) during such 60-day period and before either House of Congress adopts a resolution under clause (B) with respect to such regulation, both Houses adopt a concurrent resolution which states that both Houses approve such regulation, in which case such regulation shall take effect on the date of the adoption of such resolution by the second House taking action on such resolution; or

(B) during such 60-day period and before both Houses adopt a concurrent resolution under clause (A) with respect to such regulation, either House of Congress adopts a resolution which states that such House disapproves such regulation, in which case such regulation shall not take effect.

(3) Under provisions contained in a regulation described in paragraph (2) of this subsection, such regulation may be effective at a time later than the date on which such regulation would otherwise take effect under such paragraph.

(4) For purposes of this subsection, the term "legislative day" means a calendar day on which both Houses of Congress are in session.

(d) For purposes of this section—

(1) the term "air carrier" means any air carrier, as such term is defined in section 101 of the Federal Aviation Act of 1958, which holds a certificate issued under section 401 of such Act;

(2) the term "protected employee" means any individual who was employed full-time by any air carrier prior to the date of enactment of this Act for a period or periods totaling at least 12 months, except that such term shall not include any employee of the air carrier terminated for cause or any member of the Board of Directors or officers of the air carrier;

(3) the term "qualifying dislocation" means any furloughing or terminating of an employee by any air carrier due to any change in the Federal regulatory system made under the authority provided in this Act or in any amendment made by this Act to any other law which the Civil Aeronautics Board determines to have occurred on any date on which the total number of employees of such air carrier is less than the total number of employees of such air carrier on the date of enactment of this Act;

(4) the term "employee" includes individuals who are employed by an air carrier but not working because of any labor strike; and

(5) the term "Secretary" means the Secretary of Transportation.

(e) This section shall cease to be in effect after the last day of the 10-year period beginning on the date of enactment of this Act.

# EXTENSIONS OF REMARKS

## JUDGE PHILLIP FORMAN

## HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. THOMPSON. Mr. Speaker, during our recent district work period while the House was out of session, my community of Trenton and the legal profession lost one of its most respected and able men. I have reference to U.S. District Court Judge Phillip Forman.

Judge Forman had a remarkable career on the Federal bench, serving for 46 years. He was appointed in 1932 by President Hoover and at the time was the youngest Federal judge in the Nation. I had the honor and privilege of having Judge Forman as a lifelong friend. He was a schoolmate of my late mother, Mrs. Beatrice Thompson, and did me the honor of admitting me to practice before the U.S. district court.

I know that Judge Forman's many friends join me in extending condolences to his widow, Mrs. Pearl Forman, and his brother, Mr. Milton Forman. It is with a great sense of personal loss that I place before my colleagues Judge Forman's obituary as it appeared in the Trenton Times:

PHILLIP FORMAN, 46-YEAR VETERAN OF FEDERAL BENCH

(By Ed Chelland)

U.S. District Court Judge Phillip Forman, a 46-year veteran of the federal bench and an expert in the field of antitrust and bankruptcy law, died yesterday at the Mercer Medical Center at the age of 82.

Judge Forman, who resided at 5 Belmont Circle, was named to the federal bench in 1932 by President Herbert Hoover. At the

time he was the youngest federal judge in the nation.

He was admitted to the New Jersey Bar in 1917. He became an assistant U.S. attorney that year and served as U.S. attorney for the District of New Jersey from 1923 to 1929.

As U.S. attorney, he was hailed for tough actions against racketeering bondsmen who operated in federal courts in New Jersey. He shared offices with the firm of Hutchinson & Hutchinson in Trenton and later joined I. Herbert Levy in a law firm, a partnership which continued until his appointment as judge in 1932.

Judge Forman was named chief federal judge for New Jersey in 1951, a post he held until 1959 when he was named to the 3d Circuit Court of Appeals.

In 1961, he became a senior judge, and continued in active service until last year. During his career he presided over a number of major precedent-setting antitrust cases.

Also in 1961, Judge Forman was named as the chairman of the Advisory Commission on Bankruptcy Rules of the Judicial Conference of the U.S. The commission last year brought about changes that were hailed as the single greatest improvement ever made in the administration of the nation's bankruptcy laws.

Judge Forman was well-known for his numerous activities in charitable organizations and was one of the founders of the Trenton Council on Human Relations.

A veteran of World War I, he served in the U.S. Navy as a chief petty officer. He subsequently became commander of the Elkins-Olphant Post of the American Legion, which is now Post 93. In 1923 he was elected commander of the New Jersey American Legion.

He served as a major in the Organized Reserve Corps and as a lieutenant colonel in the Judge Advocate General's Department of the New Jersey National Guard.

After World War II, Judge Forman traveled to Europe with the Joint Distribution Committee to assist in the relocation of the survivors of concentration camps.

He was a member of the National Conference of Christians and Jews, the American Bar Association, the American Judicature Society, the Federal Bar Council, the New Jersey Bar Association and the Mercer County Bar Association.

He was a director of the McKinley Memorial Hospital, now Helene Fuld Medical Center, and a trustee of Rutgers University. He was also president of the board of managers of the New Jersey State Hospital, now the Trenton Psychiatric Hospital.

Judge Forman was born in New York City in 1895. Five years later the family moved to Trenton where his father established a tailor shop. He was a graduate of Trenton High School, Class of 1913, and of Temple University.

He is survived by his wife, Pearl Karlberg Forman, and a brother, Milton Forman of Hollywood, Fla.

Private funeral services will be held under the direction of Orland's Ewing Memorial Chapel, 1534 Pennington Road.●

## MESSAGE FROM THE MAYOR OF KYRENIA, CYPRUS

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. HAMILTON. Mr. Speaker, at the request of the mayor of the town of Kyrenia on the island of Cyprus, I would like to bring to the attention of my colleagues a letter sent to Chairman Zablocki of the Committee on International Relations.

Although the mayor expresses bitterness and disappointment at the lifting of the arms embargo against Turkey, he and his people are thankful for the continued assistance and concern shown by the United States for the plight of the refugees and human suffering created as a result of hostilities between the Turks and Greeks on the island in 1974.

It is the hope of all of us that in the coming weeks the Greek and Turkish Cypriot communal talks can resume and negotiations for the return to the town of Famagusta of more than 30,000 of its former Greek-Cypriot inhabitants can be completed. We all share a continued interest in alleviating human suffering on Cyprus and our hopes are with the mayor of Kyrenia and other Cypriots that substantial progress for a Cyprus settlement can be achieved shortly after direct talks resume.

The mayor's letter follows:

Mr. CLEMENT J. ZABLOCKI,
*U.S. House of Representatives.*
*Washington, D.C.*

Mr. CHAIRMAN: Although we have heard with bitterness and disappointment of the lifting of the arms embargo on Turkey which we strongly believed to be the only means that Turkey would eventually have seen reason and allowed all refugees to return to their ancestral homes, we still see a ray of hope that America has not abandoned its responsibility to the support of justice and human rights, and that she recognises the immensity of the human tragedy that Turkish troops with American arms created in Cyprus, and voted financial aid to the 240,000 refugees.

We can assure you that whilst all refugees do appreciate the assistance afforded to them they will never forget or abandon their homes and towns and the problem in Cyprus will never be solved until every single refugee returns to his ancestral home. We wish to believe that we shall continue to enjoy the American government's support until the injustice is corrected and the refugees' aim and expectation is achieved.

Please Mr. Chairman we would appreciate if you would kindly circulate this message to all members of the House.

GEORGE TSIMON,
*Mayor of Kyrenia, Cyprus.*●

## BOSTON IMPACT FELT BY THE FUELS TRANSPORTATION SAFETY AMENDMENTS DEBATE

### HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. MOAKLEY. Mr. Chairman, today the House is scheduled to debate the Fuels Transportation Safety Amendments of 1978. It goes without saying that this is extremely significant legislation, especially for those of us in the Metropolitan Boston area where such a high volume of liquified natural gas finds its way through our city streets and highways on a daily basis.

I would like to take this opportunity to register my support of the Dingel-Markey bill governing the transportation of LNG and LPG through densely populated urban areas such as Boston. National media attention has been focused on the city of Boston in recent weeks, as officials from almost every level of the city and State government registered their strong opposition to the continued transportation of LNG through the heart of the city. Some of the statistics cited on national television are overwhelming. Experts have agreed that if the LNG commonly carried in one tanker, approximately 125,000 cubic meters, were to accidently escape for any variety of reasons, it could expand to cause a low-lying vapor cloud that would drift with the prevailing winds and cover an area of many square miles. If 40 cubic meters of LNG in one truck, perhaps half a load, were to spill and vaporize, it could mix with air and produce enough flammable gas to fill more than 110 miles of sewer lines or 15 miles of subway lines.

These are especially significant and awesome statistics for my constituents in the city of Boston because most of New England's LNG supply is shipped through the city of Boston on the southeast expressway. I do not doubt the necessity of insuring a continued supply of LNG to New England. Obviously, LNG is a very necessary element in the Northeastern area's energy picture. What I am concerned with is the literally life and death fears of my constituents in the impacted transportation network areas over what they perceive to be a very obvious threat to their own well-being. I urge my colleagues to support Mr. DINGELL's and Mr. MARKEY's proposed legislation as a necessary and rational first step in creating safer road conditions for LNG transportation, in maintaining a noninterruptible flow of LNG into New England, and in securing a safer environment for all Boston residents.●

## NOISY AIRCRAFT AND REVENUE CREDIT ACT OF 1978

### HON. JOEL PRITCHARD

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. PRITCHARD. Mr. Speaker, this week the House of Representatives considers H.R. 11986, the Noisy Aircraft and Revenue Credit Act of 1978. Legislation that assists the airline industry to meet the multibillion dollar Federal noise reduction requirements.

The Seattle Times, in an August 27th editorial, explains why this bill is not a "rip-off" for the airlines and why its enactment is in the national interest.

As a strong supporter of this legislation, I recommend these remarks to my colleagues.

The editorial follows:

[From the Seattle Times, Aug. 27, 1978]

FINANCING QUIETER AIRPLANES

An airplane noise-reduction bill now making its way through Congress has attracted a certain amount of controversy, not over the objective of mandating quieter airplanes, but over how the improvements would be financed.

The measure provides for diversion of a part of the existing airline-ticket tax to noise-abatement programs over five years.

The tax is now used to finance airport-improvement and air-safety programs, and most of it would continue to be used for those purposes. The diversion amounts to a

means of helping the airline industry meet multibillion-dollar federal noise-reduction demands with no increase in ticket costs, no new taxes, no direct appropriations, and no increase in federal spending.

That strikes us as a pretty sensible arrangement.

The principal objection to the legislation appears to be that it might set a bad precedent for other industries, giving them an excuse to seek special help in meeting environmental standards. But the objection overlooks the retroactive nature of the noise-abatement rules the airlines must meet.

The treatment given the airlines is different from that accorded all other transportation modes. For example, the Environmental Protection Agency has determined that it will not require railroad locomotives to be retrofitted for noise requirements, because, among other things, that would be too expensive for the railroads.

But the airlines, in addition to spending billions of dollars for new aircraft to meet normal demand in the years just ahead, must spend some $7 billion through 1984 to meet the noise-reduction rules imposed retroactively on two-thirds of the jet fleet. The noise rules, in effect, ground 1,600 airplanes unless they are modified or replaced.

The bill before Congress, H.R. 11986, would not only provide some form of environmental-cost equity for the airline industry at no taxpayer cost, but would encourage the replacement of planes now in service with new energy-efficient aircraft that are quieter than is required.

It would help maintain technological and sales leadership for the aerospace industry, which is, of course, this country's No. 1 exporter of manufactured goods.●

## NATIONAL AFFAIRS

### HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. BOLLING. Mr. Speaker, the American Veterans Committee (AVC) has recently adopted its current platform. I would like to draw your attention to the AVC policy on national affairs:

NATIONAL AFFAIRS

AVC stands for the Bill of Rights as a living force animating the political life of our Nation and as a firm limitation on the arbitrariness of government.

AVC stands for the Bill of Rights as a guarantee of our freedom to speak, to assemble, to believe, and to dissent without fear from the conformities of the day.

AVC stands for equality for all, regardless of race, color, ancestry, national origin, religion, sex or age, and for the constitutional guarantees of such equality.

AVC stands for just legislative representation of the people of the United States, the States and their subdivisions, without poll taxes or property qualifications for voting, with equal weight for each vote, and on a geographically fair basis, within the frame work of the Constitution of the United States.

AVC stands for honesty and integrity in public affairs and calls upon public officials scrupulously to uphold their oaths of office.

AVC stands for a policy of gainful, full employment and security for all, as outlined in the Employment Act of 1946.

AVC stands for responsible, efficient, and honest government and for the merit system in government employment.

AVC stands for a government willing to exercise all constitutional powers necessary to bring about solutions to our national problems.

AVC supports the active intervention of government, primarily of the Federal Government, in the economy and the general welfare of our country to stimulate and provide employment to improve the physical condition of our cities and towns, of our housing and our schools, to bring all the greatest benefits from the development and conservation of our natural and industrial resources and to provide for the general welfare and health of our people.

AVC supports a tax policy based on ability to pay and opposes regressive sales and excise taxes.

AVC stands for the recognition of equal rights for labor and management and for improved social benefits of employees.

AVC supports an educational system and a public health system which will give the American people, and America's youth in particular, the knowledge, skills, and training, and the physical and mental health and stamina, to continue their forward march toward America's democratic fulfillment.●

## FFA PLAYING A PART IN AMERICA'S FUTURE

### HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. JEFFORDS. Mr. Speaker, earlier this summer I, along with many of my distinguished colleagues, attended a congressional breakfast sponsored by one of the Nation's outstanding youth groups—The Future Farmers of America. Those in attendance witnessed excellent remarks from several individuals, however, one of the most impressive of those statements was uttered by Rob Hovis, National FFA Vice President from Helene, Ohio. It is with a great deal of pleasure that I share the full text of the Rob Hovis speech with you.

FFA PLAYING A PART IN AMERICA'S FUTURE

(By Rob Hovis)

We appreciate the opportunity to share with you today some of our personal views concerning our program.

There are two great success stories of cooperation among local, state, and federal agencies that involve agriculture. The first is the story of the Cooperative Extension Service for agriculture, where local and state agricultural agencies, land-grant colleges, and the United States Department of Agriculture work together to generate, interpret, and distribute the research data that has ushered this Nation to the forefront of world agricultural production.

The second is the story which began with the passage of the Smith-Hughes Act of 1917. Since then, local communities have cooperated with state educational agencies and the United States Office of Education to provide facilities and personnel for vocational training programs.

Today, this program represents our best agent for effecting social and economic change in this country. And we should move quickly to activate this potential. In many cases, the only difference between the United States and nations similar to ours that have fallen in the past is a public education system that reaches all youth! And our system does, with some states having as high as 52% of their high school juniors and seniors enrolled in vocational education programs.

We are sure that many of you are aware of some of these facts, but we, as National student officers of the FFA want to reemphasize them today.

Vocational Education can help correct economic problems. Two great fears that the trustees of state and the National economies always have are unemployment and inflation. Our track record is very good in these areas. Let me illustrate by using my home state as an example. In Ohio, unemployment among graduates of vocational education programs who are four months out of high school is 7.5%, compared to a rate of 21% for all youth of similar age, and compared to as high as 45% for some minorities. (This statistic does not include those in college or military service because they are not seeking a job.)

Vocational education has great impact in the area of inflation. The single greatest factor in the cost of producing most goods in the United States is labor, and it is vocational education which increases worker productivity and efficiency.

Today, the American agricultural industry is placing severe demands upon the labor force for trained people. Some of the very largest of our vocational agriculture and FFA programs are in places like Philadelphia, Cleveland, Cincinnati, Los Angeles, etc. Fifty of the Nation's largest cities have vocational agriculture and FFA programs and it is from these student populations, as well as from our traditional programs in the high schools of rural America that we train food processors, farmers, horticulturists, agricultural mechanics, conservation technicians, and so on.

We must do more in vocational agriculture. Statistics collected by the United States Department of Labor show that there were 404,000 job replacement opportunities in American agriculture in 1975–76. Our own data tells us that the vocational agriculture and FFA programs generated only 131,000 qualified graduates—only 26% of the need. Some states are providing as low as 6% of their need. That cannot continue very long! We must work to expand our programs so that the industry of agriculture receives its due from public education. Vocational Agriculture/FFA is the best learning system we have for providing a student with up-to-date skills and a high degree of personal development for employment in agriculture. We are sure beyond question that a vocational student organization such as FFA, legally tied to the public education system as is FFA through its Federal Charter, Public Law 81–740, is the best way to secure the benefits of the organization for that instructional program. Public Law 81–740 demands performance from the FFA and establishes excellent lines of cooperation with the United States Office of Education, all of which has helped to give us the "Golden Past" which we speak of in our 1978 theme. All vocational student organizations and their corresponding instructional program would benefit from such legal linkage to their respective service area of the United States Office of Education.

Our priorities should be not merely to treat the problem of an untrained or mistrained population with massive investments in remedial programs designed to correct the shortcomings of education among people several years removed from high school, but to prevent the problem at its most likely point of origin—in the schools and, ladies and gentlemen, it is within this void between graduation from high school as a mistrained, untrained, or undertrained person, and the time at which the remedial program designed to correct that deficiency, may affect the individual, that the Nation's crime rate soars. Let's be wise enough to buy the ounce of prevention before we are assessed for the pound of cure.

In conclusion, I would like you to listen to what Confucious once said: "If you give a man a fish, you have provided for his food needs for one day. If you teach a man to fish, you have fed him for the rest of his life." We in vocational agriculture and FFA are in the business of teaching men to fish. You, the Congress of the United States, have paved the way by constructing the legal framework in

which the program functions, and we salute you.

As in any field of endeavor, vocational education is now facing some difficult and frustrating problems, but, realizing that our problems are really only the absence of ideas, we have no good reason to believe that they cannot be solved.●

## CLEANER WATER IN PHILADELPHIA

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. EILBERG. Mr. Speaker, I am pleased to announce that the city of Philadelphia will construct a new sludge recycling center as part of its program to promote cleaner streams and phase out the dumping of sludge in the ocean.

According to an announcement by Mayor Frank L. Rizzo, the $11 million center will be located next to the new Southwest Water Pollution Control Plant, at 80th Street and Penrose Ferry Road. It will provide for the dewatering, drying, composting, cleansing, storage, bagging, and distribution of digested sludge and sludge-based products.

This project will promote cleaner water throughout the entire Philadelphia area, and will make use of waste product for enriching the soil. The center will occupy 38 acres of vacant land. Water Commissioner Carmen F. Guarino says the center will supply rich and usable soil conditioners to what will be a growing market in future years.

The sludge, Mr. Speaker, will be given away and sold to homeowners, farmers, gardeners, horticultural firms, wholesalers, and other outlets. Eventually the center will be able to fill up to 1 million 40-lb. bags a year, besides distributing thousands of tons in dry bulk or liquid form by truck.

The new center will be built in three phases between 1979 and 1981. The first phase will provide for processing 60 dry tons of sludge a day, and the second phase an additional 150 tons. Thus by 1982, the center will have the capacity to convert over 76,000 dry tons of digested sludge (equal to all of Philadelphia's current annual output) into soil conditioner each year.

Guarino said that the plan calls for the pumping of digested sludge from the southeast and southwest sewage treatment plants to the recycle center. There, part of the sludge will be naturally dried in a dozen open-air drying beds, and then composted to increase the drying process.

Special treatment will be given to another part of the sludge, intended for sale. This will be mixed with wood chips and then force dried through perforated air pipes laid under the sludge in another area. This process will take 21 days. The resulting product will then be cured, screened for removal of wood chips, and shredded.

Phase 1 construction in 1979 will include:

Air drying beds, forced aeration beds, and a curing, shredding, screening area;

A storage area for dewatered sludge ready for composting, and for large quantities of bulking agents such as wood chips;

A liquid storage tank holding 730,000 gallons;

A liquid loading platform, where up to 25 tank trucks daily can take on liquid sludge;

A liquid sludge pumping station, plus pipelines;

An operations building to house offices, an information center, storage tanks, polymer pumps, and spare equipment;

A pick-up site, where the public can obtain sludge-based products free; and

Various access roads.

In phase 2, the water department will build more forced-aeration installations, storage areas, and curing and distribution areas, as well as composting facilities. The department will also build a full scale dewatering system that might include centrifuges, belt presses, air drying beds, or other processes. Additional liquid storage will also be provided.

Phase 3 will include an improved bulk-handling system for onsite transfer and truck loading, and a facility for bagging and warehousing sludge products destined for sale. Liquid storage will be further expanded.

Guarino said that in accordance with requirements of the Environmental Protection Agency, the water department has prepared an environmental assessment statement and description of the proposed facilities.

The city water department is seeking 75 percent funding from the EPA for the sludge recycling center.●

## JOHN M. CAREY IS THE NATIONAL COMMANDER OF THE AMERICAN LEGION

### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. KILDEE. Mr. Speaker, it is with great pride that I wish to bring to the attention of my colleagues in the Congress the recent election of a constituent and personal friend of mine as national commander of the American Legion. He is John M. Carey, of Grand Blanc, Mich. Mr. Carey was elected national commander for 1978–79 at the recent convention of the American Legion in New Orleans.

Commander Carey is in Washington, D.C., this week. He will be appearing on Tuesday, September 12, before the House and Senate Committees on Veterans' Affairs to present the legislative goals and priorities of the American Legion for fiscal year 1980. That evening he also will be present to meet Members of Congress at a reception being hosted by the American Legion in recognition of the many services rendered to the veterans of America by the committee members.

A devoted family man, Mr. Carey brings an exceptional record of public involvement to his term as national commander. He has been active for many years both in the American Legion and in his community in many volunteer, appointive, and elective posts. I would like to just briefly outline some of his many accomplishments as a means of introducing him to my colleagues in the Congress.

John M. Carey is a native of Michigan, and served during World War II in the Pacific with the U.S. Army Corps of Engineers, 64th Engineering Battalion. He was married to Mildred Vanderlip on June 19, 1948, and today they have a son, John, and two daughters, Janice and Marsha. He and his wife went to Grand Blanc as high school teachers, before he began employment at General Motors, for which he has worked the last 27 years. Mr. Carey is now on a leave of absence from his position as department supervisor of the industrial engineering fabricating unit at the Fisher Body Plant in Flint.

As a member of the American Legion, he is a life member of Grand Blanc Post 413, and served as that post's adjutant for 28 years. He also is a past post commander, past district commander, past State finance officer, past State commander (1959), and past national executive committeeman (1965–67). He served as chairman of both the Michigan and national internal affairs committees, was a member of the national foreign relations council in 1977 and a member of the national public relations commission from 1970 to 1974.

As a citizen, Mr. Carey's exemplary record includes 8 years of service as the elected mayor of Grand Blanc. He was chairman of the Genesee County Small Cities Association in 1974, vice chairman of the Michigan Municipal League for Region Four in 1971, chairman of the Grand Blanc Regional Planning Commission from 1967 to 1971, and secretary-treasurer of the Michigan Republican Serviceman's Council. His awards for community service and involvement include the General Motors Award for Excellence in Community Activities for both 1972 and 1977. He also was the Grand Blanc Rotary Club's Man of the Year in 1972 and the Grand Blanc Community Veteran of the Year in 1975. He also has received the Minuteman Award from the Governor of Michigan and the Personal Leadership Award from the Flint Industrial Executives Club. Since 1969 Mr. Carey has been a member of the board of managers for the Michigan Veterans Facility in Grand Rapids.

The American Legion is fortunate to have such an outstanding individual for its national commander, and I look forward to working with Jack Carey on issues of vital concern to America's veterans.●

## HUMAN RESOURCES DEVELOPMENT ACT

### HON. STANLEY N. LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. LUNDINE. Mr. Speaker, I would simply like to clarify the copyright status of a manuscript submitted during hearings on the Human Resources Development Act in March of 1977. The item appearing in the appendix on page 225 of the record of the hearings before the

Subcommittee on Economic Stabilization of the Committee on Banking, Finance and Urban Affairs, House of Representatives, 95th Congress, 1st session, on H.R. 2596, inadvertently omitted the following reference:

Copyright 1977 Mitchell Fein.

"Draft 5."●

## BUSINESS WEEK INVALIDATES FEDERAL-MILITARY PAY CAP RATIONALE

**HON. HERBERT E. HARRIS II**

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. HARRIS. Mr. Speaker, last Wednesday I introduced House Resolution 1336 to overturn the President's proposed 5.5 percent pay cap on Federal employees and military personnel. My resolution would put into effect the 8.4 percent pay adjustment which the President's pay advisers have recommended to achieve comparability between current public employee-military pay levels and private industry pay raises since 1977.

There has been much talk from the administration about the need for the Government to "set an example" for private industry in the fight against inflation. This is a commendable goal, but in singling out one sector of the economy for wage controls, the President has chosen an unfair and ineffective vehicle for providing an example to business. I have stated repeatedly, the Comparability Pay Act does not authorize cost-of-living increases; rather it directs that regular pay adjustments be made to bring military and Federal pay up to levels of comparable private industry salary increases.

A recent study by the Congressional Budget Office found pay caps in the past to have been an ineffective means of setting an example for private industry (see "Capping Federal Pay: Alternative Pay Adjustments for 1979," Congressional Budget Office report, August 1978). This new report shows that "in the 6 months following the 1975 (Federal pay) cap, major wage settlements in the private sector averages—for the first year—10.4 percent as compared with 9.4 percent for the preceding 6 months."

Today's issue of Business Week contains an excellent article which further illustrates the ineffectiveness of pay caps in setting an example for private industry. My colleagues will recall that in the spring of this year, President Carter announced his intention to freeze Federal and military pay as such an example, well in advance of any reliable data on what private industry increases would be, or what size of pay adjustment would be necessary to bring about comparability under the law. This article "A Boom in White-Collar Salaries" (Business Week, September 11, page 50) makes it clear that private white-collar salaries have risen far faster than the level which the President seeks to impose on employees under his control.

I commend this article to the attention of my colleagues:

A BOOM IN WHITE-COLLAR SALARIES

The Carter Administration may be making loud noises about holding a lid on salary increases, but apparently it is speaking into a vacuum. The Bureau of Labor Statistics recently announced that the 7.9% average white-collar raise for the 12-month period ending March, 1978, was the second largest overall increase recorded in the 18-year history of the BLS surveys—topped only by the 9% average for the inflation-heavy period of March 1974–75. What is more, the BLS numbers may be on the low side: A recent check of 20 industrial companies by Robert H. Hayes & Associates, a Chicago management consulting firm, showed average white-collar increases of 8.16% in 1978, with an 8.35% average projected for 1979. Business Week's own telephone survey showed nonpromotional raises hitting as high as 10% and 11% in some companies, with no downward swing in sight.

Clearly, the lull in salary pressure that many companies enjoyed in 1976 and 1977 is over, and the strongest heat is being felt at the lower rungs of the white-collar ladder. "The rate of pay increases at upper levels is definitely slowing down, while that at lower levels is speeding up," states Edwin S. Mruk of Arthur Young & Co., which does periodic surveys of executive compensation. "We find that management groups are moving ahead at an 8% clip nationally, while secretarial salaries are moving at 10% to 12%," adds Raymond F. Sasso, director of corporate compensation at Pitney-Bowes Inc.

HEAVY UNION PRESSURE

Unionized companies, of course, are affected most, as hefty blue-collar settlements cause a ripple effect upward through the lower management ranks. At Pillsbury Co., Robert Sayer, vice-president of personnel and organization planning, says that union settlements are coming in at 9%, which has put heavy pressure on white-collar raises. One result: Pillsbury raised salary midpoints for lower and middle management levels by about 6% in January, while grade levels for senior management have remained unchanged since June, 1976.

Even those companies that were first to hop on the White House bandwagon on fighting wage inflation are finding that union pressures on white-collar pay are almost irresistible. A General Motors Corp. spokesman admits that while the company is trying to hold the line on management salaries, lower-level white-collar raises now and in the future "will take into consideration what union employees get." And Jan Robbins, supervisor of compensation for American Telephone & Telegraph Co., notes that while salary ranges for employees in most middle- to upper-management jobs went up 5% in 1978, lower-level salary ranges were pushed up 7%. "We have to look at the outside competitive market for our managers, but we look at the internal lower-level pay pressures for secretaries and the like," she says.

In some parts of the country, however, fierce competition for really good lower-level employees rivals blue-collar wage hikes as the culprit in the renewed upward salary pressure. One large Midwestern insurance company recently granted 10% across-the-board increases to all employees making less than $20,000. In Greenwich Conn., Iroquois Brands Ltd., which granted white-collar raises of between 8% and 11% this year, bases its managerial increases on national salary surveys that it conducts once or twice a year, but bases its secretarial salaries on more frequent local salary surveys. "We know that if we give our secretaries, say, a 6½% raise and five companies within 20 blocks give 8%, we'll wind up with mass applications [for new jobs] going out," says Robert L. Cummings, executive vice-president. Similar competitive pressure in Houston has caused Pullman Kellogg to increase the frequency, if not the actual amount, of raises to secretaries. "Our lower-level people get about the same percentage increases as our middle and upper managers, but we are spreading the raises out, granting smaller ones several times a year," says David Bartlett, vice-president of personnel and facilities.

MERIT-RAISE CONFLICTS

All the corporate scurrying to remain competitive in salaries and, at least, to keep employees even as the cost of living surges is "battering the so-called concept of merit increases about the head," says Victor V. Veysey, director of the California Institute of Technology's Industrial Relations Center, which holds periodic discussion sessions with compensation managers. Still, at least some companies are struggling to continue linking monetary rewards to performance. Xerox Corp., for one, increased the upper level for possible nonpromotional raises in all pay categories to 15% in 1978 from 13% in 1977, but a company source stresses that "criteria for raises have been toughened."

Companies are also, of course, still looking for ways to keep outstanding performers at all levels happy without building huge increases into their base pay. Pitney-Bowes this year started granting overtime pay to exempt employees all the way up to senior executives, and Sasso says the company has already loosened restrictions on who qualifies. For example, managers formerly had to work more than 45 hours a week for four consecutive weeks to receive overtime. Now, working extra time in any week can bring in extra pay. Sasso adds that P-B is also looking to include more people under the umbrella of lump-sum performance bonuses. "We've already removed any restrictions on the proportion of our work force that can get the payment," he says, "and we're looking at possibly giving bonuses for the next-best level of performance as well as for the top achievers."

SALARY CRUNCH

Iroquois Brands also is striving to broaden the base of those employees who are covered by its incentive compensation program, but it, too, is trying to make sure that management bonuses are linked to actual performance. "Where three to four years ago bonuses were granted on a discretionary basis, we are now really taking hard looks at returns on investment, on sales, and the like," Cummings says. "Our objective is to hold salaries to a prudent level, and if a bad year comes along and bonuses are low, employees will understand how they were arrived at."

Still, keeping salaries reasonable is not going to be an easy task for any company this year. And most industry experts predict that 1979 is not going to be much better. "Through the end of this year and the beginning of next, there will be a great psychological impact from union bargaining that in normal times—times of less inflation—might well be ignored," says Harland Fox, executive compensation specialist at the Conference Board. Sums up Joseph W. Kimmel, vice-president of management consultants William E. Hill & Co. Inc., "The increasing rate of inflation, coupled with the pressure of blue-collar settlements, will put tremendous pressure on management to keep raises up."

And, of course, a thorny question remains: What can be done about the continual erosion of spendable income? The combination of progressive taxation and inflation continues to keep take-home pay frustratingly low despite the large increases.

Nearly every company contacted by BUSINESS WEEK is "working on the problem." But apparently no one is close to a solution. Until that solution is found, it is unlikely that the clamor for raises will ease.

THE ADMINISTRATION BELIEVES IN PROMISES

The responses are mostly in to the letters that Robert S. Strauss, President Carter's

chief inflation fighter, sent to the 1,000 largest U.S. companies, asking them to hold down price and compensation increases. And although only about 10 percent of the corporate heads responded with positive commitments of one sort or another, the Administration apparently is trying to convince itself that the glass is not half empty, but half full. Strauss said responses came from a "significant number of American businesses [that] are now demonstrating a will to take the necessary steps to help reduce our rate of inflation."

In fact, Strauss did receive some specific commitments from corporate leaders. Uniroyal Inc. Chairman David Beretta promised that Uniroyal "will establish for the 12-month period from July 1978 through June 1979 a goal of maintaning salary increase costs for our mid and top management group at a 5 percent rate." And International Business Machines Corp. Chairman Frank T. Cary assured Strauss that "in 1978 the average increase in the compensation of IBM employees will be less than the average increase for the past two years."

But, if Strauss's statement is any indication, most of the commitments—particularly on prices—were hedged. For example, Du Pont Co. Chairman Irving S. Shapiro advised Strauss that "our domestic selling price index for 1978 will increase less than the average annual rate of increase for our firm for 1976 and 1977, assuming that our forecasts for raw materials and labor costs are reasonably accurate." In fact, the only actual number commitment cited by Strauss came from McGraw-Hill Inc. Chairman Harold W. McGraw, who specified that "the impact of increases in our domestic prices on our 1978 sales will be below 7 percent."

Possibly, many companies are still waiting to see if Washington will clean its house first. H. Barclay Morley, chairman and president of Stauffer Chemical Co., did pledge that Stauffer would hold 1978 price increases below the 1976–77 average annual rate. But Strauss quotes Morley as adding, "The majority of the business community will pitch in and help if they believe that more than cosmetic actions are being taken and that other sectors of the economy, especially government, are doing their share."

Of course, none of the companies is legally committeed to fulfilling even those salary and price restraint promises they did make. Still, some of them may have an easier time than others. One of the companies that promised to hold down wages was New York Times Co., which has been closed down by a strike for the last month.●

## PERSONAL EXPLANATION

### HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Ms. KEYS. Mr. Speaker, on Friday September 8, 1978, I was unavoidably absent from the House. Had I been present, I would have voted on matters coming before the House as follows:

"Nay" on rollcall No. 741, on a motion to recommit Senate Joint Resolution 4, establishing the Aboriginal Hawaiian Claims Settlement Study Commission, to the Committee on Interior and Insular Affairs.

"Aye" on rollcall No. 742, on committee amendment No. 1, that provided for an alternative eligibility requirement which permits workers to qualify on the basis of 40 weeks of employment in one or more trade-impacted firms on the preceding 2 years.

"Yea" on rollcall No. 743, final passage of the bill H.R. 11711, trade adjustment assistance for workers and firms.●

## BALANCE OF TERROR

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. SIMON. Mr. Speaker, columnist Tom Braden had a column in the Washington Post and other newspapers recently which discussed the whole question of military superiority and "the balance of terror."

He reaches the conclusion that—

The peace of mutual terror requires care, wariness, restraint and vigilance. But the one thing that might destroy it is a chauvinistic determination to be No. 1.

I concur completely.

The article follows:

THE BALANCE OF TERROR

(By Tom Braden)

We must accept the fact that there is no such thing any more as being No. 1 in military matters. If we try, we run the risk of suicide.

I bring this up because another group dedicated to military superiority has just formed in the Congress. It is called the Coalition for Peace Through Strength and, like its sister organizations—the American Security Council, the Committee on the Present Danger and a number of others—it is dedicated to achieving and maintaining, "military superiority over Moscow."

Maybe those people get a certain satisfaction out of crying alarm. Maybe they fancy themselves as modern-day Paul Reveres. Consciously or unconsciously, they are, of course, fronting for an enormous weapons industry, which wants to build bombers and ships the Pentagon has declared unnecessary.

But whatever their reasons for talking nonsense, nonsense is what these people are talking. They want to embark on a huge civil-defense program, build more missiles, beef up our conventional forces, build a bigger Navy and Air Force.

And what will the Russians do? Why, of course, they will then do precisely the same thing. We can both spend ourselves into bankruptcy while the Japanese become the world's leading economic power.

All the spending in the world will not change the strategic balance, which rests today exactly where it did when Winston Churchill defined peace as "mutual terror." Each side knows that if it strikes first, the other can retaliate. Each side knows that if it strikes to kill, the other can and will kill before it dies.

Peace should not depend on mutual knowledge of possible obliteration, but it is fact. And all of us, owing our lives to the balance of terror, ought to be wary of efforts to upset that balance.

Because, of course, there is always the possibility that, if one side believes the other is achieving real superiority, some dangerous or desperate act may ensue.

We know, for example, that the Soviet Union is building up its forces in Eastern Europe to a level our secretary of defense estimates at "2 to 1 or more." We don't quite understand this. Some people think the Russians are only doing what they have always done, which is to try to maintain superior strength along their own borders. Others suspect they have or will develop offensive designs on Western Europe.

What do we do about this? Obviously we do not let the Russians achieve such superiority along their own borders as to tempt them to adventure. We maintain a NATO force that is capable of holding the pass.

Also, we obviously take counsel with our allies, and we talk with the Russians to see if we can determine why they are building up their conventional forces and whether we can reach some agreement, tacit or otherwise, in limiting the buildup.

But the one thing we must not do is to try to scare hell out of the Russians by embarking on an effort to be stronger than they are along their own borders.

The peace of mutual terror requires care, wariness, restraint and vigilance. But the one thing that might destroy it is a chauvinistic determination to be No. 1.●

## HORROR STORIES

### HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Monday, September 11, 1978*

● Mr. IRELAND. Mr. Speaker, we often hear "horror stories" about the stupidity of particular Government regulations, or the blundering of certain agencies.

Well, today I would like to share with my colleagues a situation which is occuring in Palmetto, Fla., and is a prime example of just these kinds of problems.

What follows is a letter by the mayor of Palmetto, the Honorable John J. "Toby" Holland, describing the problem and a newspaper article filling in the details.

Mr. Speaker, the situation described by Mayor Holland is fast becoming the rule rather than the exception all across this Nation. We have far too many Government regulations and too much Government intervention in our lives. The American people are looking to us in Congress to help them with this problem. Up to now, we have disappointed them. We can and must do better.

Thank you, Mr. Speaker.

The material follows:

PALMETTO, FLA.,
*August 24, 1978.*

HON. ANDY IRELAND,
*House of Representatives,*
*Congress of the United States.*

DEAR ANDY: May I take this opportunity to enclose an article sent to me by one of my friends in Georgia from an Atlanta newspaper. Big Brother in Washington has also affected this little community, this might be a reprint of our own problem.

As I am sure you are aware, we were threatened with a $10,000 a day fine for noncompliance of our sewage treatment plant. To avoid this we recently floated a 4.1 million dollar bond issue to meet the federal government requirements. The cost to renovate the plant will be some two million dollars and we hope to solve the number one problem, that of infiltration and exfiltration for an excess of one-half million dollars. The balance is the expense of the bond issue.

Had we not solved this problem totally with local funding but rather had applied to the 201 program we would have expended ten million dollars in local funds. That is the price of the carrot that the Feds hold in front of us for federal dollars. This plus a five year delay to get in compliance.

I am convinced that the least government is the best government and hope that you and the rest of the Florida delegation concur with my philosophy. Please do whatever you can to stop the threat of the federal government trying to solve all of the local problems because it has become a disaster. I hope that it will get back to the problem of trying to solve some of the world and national problems, an even greater disaster.

Sincerely,

JOHN J. HOLLAND,
*Mayor.*

---

MILLIONS WASTED ON SEWAGE PLANTS, HOUSE PANEL TOLD

(By Jeff Nesmith)

WASHINGTON.—Cities and towns in the Tampa Bay area of Florida are spending millions of dollars to comply with state water quality edicts that include a requirement that phosphate compounds be removed from sewage.

But the streams and rivers flowing into the bay drain an area that contains one of the world's richest deposits of phosphate rock—an area that for decades has provided one-third of all the commercial phosphate on earth.

The amount of phosphate that finds its way into Tampa Bay from city sewage is miniscule in comparison with the phosphate that would flow into the bay even if there were no towns or cities in the area.

Congressional investigators say the millions of dollars—federal, state and local—being spent to remove phosphates from area sewage will have no appreciable effect on water quality in the area.

In Toledo, Ohio, million of dollars have been committed to remove phosphates from sewage that empties into the Maumee River and ultimately flows into Lake Erie.

But most of the phosphate in the Maumee River does not come from Toledo sewage. It comes from the Tampa Bay area—in the tons of phosphorous-rich fertilizer that farmers in northern Ohio apply to their crops.

"Even if Toledo were wiped off the map, the Maumee River would still be full of phosphates," federal consultants recently reported.

LEAKY SEWER SYSTEM IS MAJOR PROBLEM

Moreover, the most serious water pollution problem in the Toledo area is a leaky sewer system that will keep a lot of wastewater from ever reaching the new treatment plant.

Yet most federal grants to Toledo are being spent on the new advanced water treatment facility, rather than on repairing the leaky sewers.

"Until the sewers are fixed, no amount of treatment will do much to improve these squalid, smelly waters," consultants Jerome Howoritz and Berry Bazel told a House subcommittee recently.

"If the sewage never gets to the treatment plant, it can't be treated. It's that simple."

The Toledo and Tampa Bay cases are among several cited in an upcoming House subcommittee report that will warn that U.S. cities and towns may be spending billions of dollars for expensive sewage treatment equipment that won't work, is too expensive to operate, or is not needed.

The House Public Works subcommittee on investigations and review has heard testimony that inadequate design processes and a lack of knowledge about what is actually being dumped into the nation's waters could mean that billions being spent for advanced water treatment equipment will not achieve the expected improvements in water quality.

"Not only are the capital costs for building the waste treatment plants high, but operation and maintenance costs paid by the users are staggering as well," investigators from the General Accounting Office told the subcommittee.

TREATMENT PLANT NEVER WORKED RIGHT

For example, an advanced treatment plant was constructed in Greenville, Maine, to treat sewage discharges into scenic Moosehead Lake. The plant has never worked properly.

But to cover operating costs, the town's 1,500 residents are having to pay user charges of $200 a year per family, even though 80 per cent of the families have incomes below $10,000 a year.

Recently, the town put the plant up for sale.

In Walton, N.Y., a new $9 million sewer system and treatment plant for a community of 1,700 people is so expensive to operate that it now accounts for 88 percent of the town's expenditures. The eight workers who operate the plant outnumber the police force.

Despite such operating costs, surveys have repeatedly shown that as many as half of the wastewater treatment plants in the country are not operated properly, according to the committee's staff.
